

19 GRADBENIŠTVO  
CONSTRUCTION

št./No 25

STATISTIKA GRADBENIH DOVOLJENJ ZA STAVBE, SLOVENIJA, 2. ČETRLETJE 2005  
STATISTICS OF BUILDING PERMITS, SLOVENIA, 2<sup>ND</sup> QUARTER 2005

► V drugem četrletju letos je bilo v Sloveniji izdanih skoraj 1 600 gradbenih dovoljenj za gradnjo stavb, to je za 27 % več kot v prvem četrletju.

V prvi polovici letošnjega leta je bilo izdanih za 5 % gradbenih dovoljenj več kot lani v enakem obdobju, skupna površina vseh v navedenem obdobju letos načrtovanih stavb pa je bila za 13 % večja od tiste, ki je bila načrtovana v enakem obdobju lani.

► Med gradbenimi dovoljenji, izdanimi v drugem četrletju letos, je bilo 96 % gradbenih dovoljenj za nove stavbe, med temi pa so prevladovala dovoljenja za stanovanjske stavbe – bilo jih je 1 110 ali okoli 74 % celotne nove gradnje.

► Do polovice letošnjega leta je bilo z izdajo gradbenih dovoljenj predvidena gradnja skoraj 3 700 novih stanovanj oz. za 19 % več kot v enakem obdobju lani. 50 % teh stanovanj bo v večstanovanjskih stavbah.

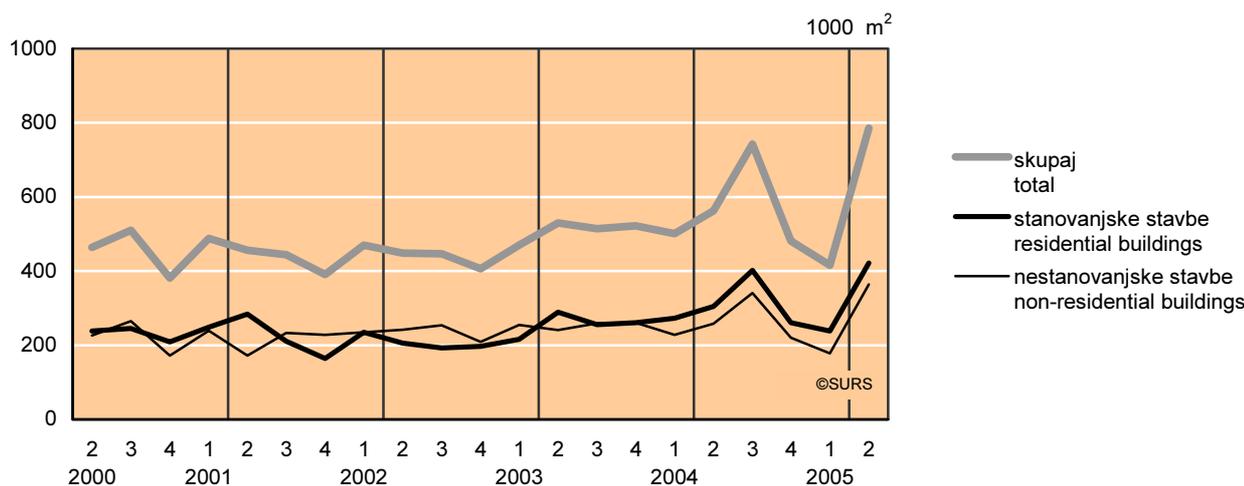

► In the second quarter of 2005 there were issued 1,600 building permits in Slovenia, which is 27% more than in the first quarter of 2005.

In the first two quarters of 2005, 5% more building permits were issued than in the first half of 2004. The total floor area of planned buildings increased by 13%.

► In the second quarter of 2005, 96% of building permits were issued for new buildings, among which residential buildings prevailed. There were 1,110 such buildings and they represented over 74% of all new buildings.

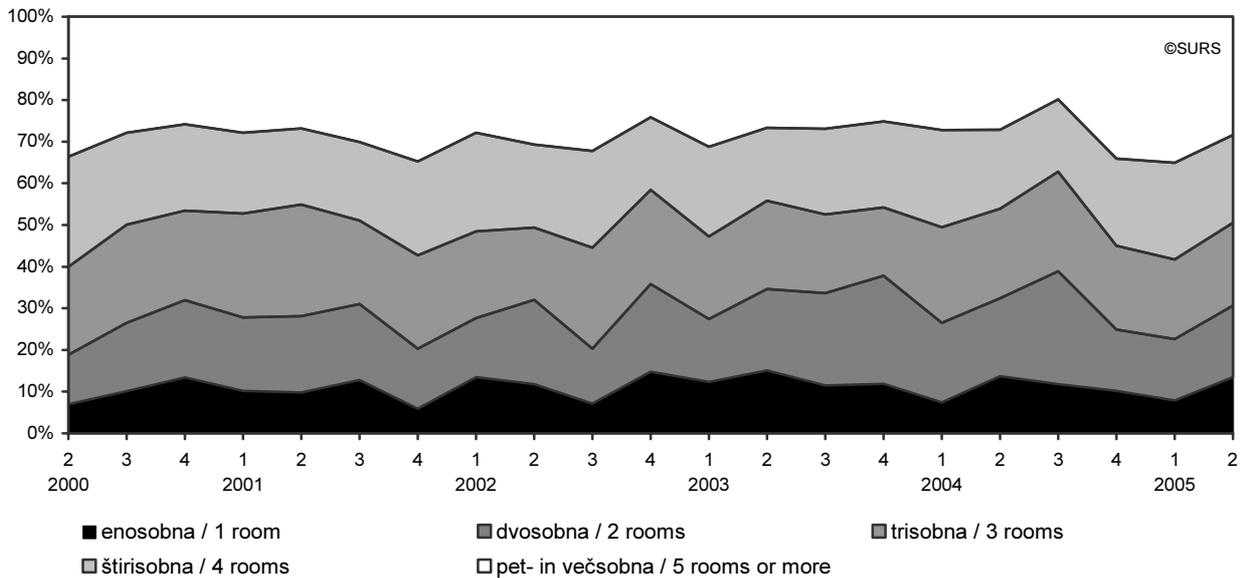

► By the middle of the year 2005 construction of 3,700 new dwellings was planned, which is 19% more than in the first half of 2004. Of these, 50% of dwellings are in multi-dwelling buildings.

### STATISTIČNA ZNAMENJA

- ni pojava

### METODOLOŠKA POJASNILA

#### Namen statističnega raziskovanja

je pridobitev statističnih podatkov o gradbeni dejavnosti za stavbe na osnovi gradbenih dovoljenj, ki jih je izdal upravni organ. Vsako izdano dovoljenje spremljamo posebej.

Podatki so pomembni za:

- statistično spremljanje kratkoročnega gibanja v gradbeni dejavnosti,
- pregled nad posegi v prostor,
- poslovno odločanje v gradbeni dejavnosti in z njo povezanih dejavnostih industrijske proizvodnje,
- mednarodne primerjave.

#### Enote opazovanja

so vse stavbe, za katere je upravna enota izdala gradbena dovoljenja. Razvrščanje gradbenih objektov na stavbe in gradbene inženirske objekte opredeljuje klasifikacija, ki je bila sprejeta z Uredbo o uvedbi in uporabi enotne klasifikacije vrst objektov in o določitvi objektov državnega pomena (Uradni list RS, št. 33/03). Enotna klasifikacija vrst objektov (CC-SI) temelji na klasifikaciji Classification of Types of Constructions (CC), ki se uporablja v Evropski uniji, in je izvedena iz nje.

#### Viri

Podatke pridobimo na osnovi mesečnega raziskovanja *Poročilo o dovoljenju za gradnjo stavbe (GRAD-PGD/M)*. Raziskovanje izvajamo od leta 1998. Vir podatkov je projektna dokumentacija za pridobitev gradbenega dovoljenja, s katero razpolaga oddelek za okolje in prostor v okviru upravnega organa.

#### Zajetje

V to statistično raziskovanje so zajete vse stanovanjske in nestanovanjske stavbe, za katere je v opazovanem obdobju upravna enota izdala gradbeno dovoljenje (za novogradnjo, povečavo ali spremembo namembnosti). Pri povečavah stanovanjskih stavb ne upoštevamo prizidave sobe ali pomožnega prostora.

### STATISTICAL SIGNS

- no occurrence of event

### METHODOLOGICAL EXPLANATIONS

#### The purpose of the statistical survey

is to obtain statistical data on construction activity for buildings on the basis of building permits issued by the administrative body. Each permit is monitored separately.

Data are important for:

- statistical monitoring of short-term changes in the construction activity,
- review of interventions into living space,
- business decision-making in construction and related industrial production activities,
- international comparisons.

#### Observation units

are all buildings for which the administrative unit issued building permits. Classification of constructions into buildings and civil engineering works is determined by the classification adopted with the Decree on the Introduction and Application of the Classification of Types of Constructions and Determination of Constructions of National Importance (OJ RS No. 33/03). The Slovene Classification of Types of Constructions (CC-SI) is based on the Classification of Types of Constructions (CC) used in the European Union.

#### Sources

Data are obtained with monthly surveys *Report on Building Permits (GRAD-PGD/M)*. The survey has been carried out since 1998. The source of data is the project documentation for obtaining the building permit, which is available at the department for environment and spatial planning within the administrative body.

#### Coverage

This statistical survey covers all residential and non-residential buildings for which the administrative unit issued a building permit in the observed period (for new construction, extension and conversion-improvement). At extensions of dwellings we do not take into consideration extension of room or utility space.

## Definicije in druga pojasnila

**Gradbeno dovoljenje za stavbo** je odločba, s katero pristojni upravni organ dovoli gradnjo in s katero predpiše konkretne pogoje, ki jih je treba pri gradnji upoštevati.

**Stavba** je objekt z enim ali več prostori, v katere človek lahko vstopi in ki so namenjeni za prebivanje ali opravljanje dejavnosti.

**Stanovanjska stavba** je stavba, v kateri se najmanj polovica uporabne površine uporablja za prebivanje.

**Nestanovanjska stavba** je stavba, v kateri se več kot polovica uporabne površine uporablja za opravljanje dejavnosti.

**Novogradnja** ali **povečava** je gradnja novega objekta ali dozidava (nadzidava) že obstoječega objekta, s katero se bistveno spremeni zunanji izgled. Nadomestno gradnjo štejemo za novogradnjo.

**Sprememba namembnosti** je posledica izvedbe del, s katerimi se spremeni raba celega objekta ali dela objekta tako, da se z njo spremeni vpliv objekta na okolico, vendar pri tem ne gre za gradnjo.

**Površina stavbe** obsega vsoto površin vseh etaž stavbe, ki jo določa veljavni tehnični predpis.

**Prostornina stavbe** obsega vsoto prostornin vseh etaž stavbe, ki jo določa veljavni tehnični predpis.

**Stanovanje** je vsaka gradbeno povezana celota, namenjena za stanovanje. Ima eno ali več sob z ustreznimi pomožnimi prostori (kuhinjo, kopalnico, straniščem, predsobo, shrambo itd.) ali pa je brez teh prostorov in ima vsaj en poseben vhod.

Rezultati o številu stanovanj so prikazani drugače kot v prejšnjih objavah, in sicer po metodologiji iz leta 2002, po kateri so upoštevana tudi tista stanovanja, ki se uporabljajo le občasno (počitniška stanovanja). Ne upoštevamo pa stanovanj v stavbah za posebne namene (kot so npr. domovi za ostarele, študente, delavce itd.).

**Površina stanovanja** je seštevek površin vseh sob, kuhinje in drugih pomožnih prostorov (kopalnice, stranišča, predsobe, preddverja) ter površin zaprtih teras in verand. V površino je všteta tudi površina sobe in kuhinje, ki sta gradbeno ločeni od stanovanja, vendar se celo leto uporabljata kot sestavni del stanovanja. V površino stanovanja ni všteta površina odprtih teras, balkonov in lož, površina gradbeno ločenih pomožnih prostorov, površina garaž, kleti in podstrešij, ki niso primerna za bivanje.

**Soba** je prostor, ki je s stalnimi stenami ločen od drugih stanovanjskih prostorov, ima neposredno dnevno svetlobo in meri najmanj 6 m<sup>2</sup>. Kuhinja ni všteta v število sob.

## Pojasnilo

Začasne četrtletne podatke objavljamo po datumu prejema gradbenega dovoljenja. Pri končnih podatkih upoštevamo uradni datum izdaje dovoljenja.

## Objavljanje rezultatov

Četrletno:

Prva statistična objava. Gradbeništvo

Statistične informacije. Gradbeništvo

## Definitions and other explanations

**Building permit** is a decision with which the authorised administrative body allows construction and with which it prescribes concrete conditions that have to be taken into consideration.

**Buildings** are structures with one or more rooms into which a person can enter and are intended for residence or for performing an activity.

**Residential buildings** are buildings at least half of which is used for residential purpose.

**Non-residential buildings** are buildings more than half of which is not used for residential purpose.

**New construction** or **extension** is construction of a new building or extension of an already existing building with which its appearance is considerably altered. Replacement construction is new construction.

**Conversion-improvement** is execution of works that are not construction but the use of the entire building or a part of it is changed so that the impact of the building on the surrounding area is changed.

**Floor area of buildings** is the sum total of floor area of all storeys of the building defined by the valid technical regulation.

**Volume of buildings** is the sum total of the volume of all storeys of the building defined by the valid technical regulation.

A **dwelling** is any structurally unified whole intended for residence, with one or more rooms, with or without appropriate utility spaces (kitchen, bathroom, toilet, hallway, larder, etc.) and with at least one separate entrance.

In contrast to previous issues, results are shown according to the 2002 methodology which takes into account dwellings used only occasionally (e.g. holiday homes). Dwellings in collective accommodation facilities (e.g. old people's homes, student residence, etc.) are not taken into consideration.

**Useful floor space of a dwelling** is the sum of useful floor space of rooms, kitchens and other auxiliary spaces (bathroom, toilet, hallway, entrance hall) and space of enclosed terraces and verandas. The space of the room and kitchen which are architecturally separated from the dwelling but are used as a part of the dwelling all the year round is also taken into account. The area of open terraces and balconies, architecturally separated auxiliary spaces, garages, cellars and attics unsuitable for living is not taken into account.

A **room** is an interior space separated from others by permanent walls, which receives direct daylight and has an area of at least six square metres. The kitchen is not counted as a room

## Explanation

Provisional quarterly data are published by the date of the receipt of the building permit. In publishing the final data we take into consideration the official date of the issue of the building permit.
