METODOLOŠKA POJASNILA

Podatki o storilcih kaznivih dejanj so rezultat rednih letnih statističnih raziskovanj s področja statistike kriminalitete. V tej številki Statističnih informacij objavljamo le rezultate raziskovanj o obtoženih polnoletnih in mladoletnih osebah, zoper katere je bil kazenski postopek pred senatom pravno močno končan.

Namen statističnih raziskovanj

kriminalitete je ugotavljanje obsega, teritorialne razpršenosti in drugih značilnosti tega družbeno negativnega pojava.

Enote opazovanja

so storilci kaznivih dejanj. Kadar je pri storitvi enega kaznivega dejanja udeleženih več oseb, je enota opazovanja vsak udeleženec posebej. Če stori ena oseba več kaznivih dejanj, spremljamo kot lastnost storilca samo glavno kaznivo dejanje.

Viri

Podatke zbiramo z individualnimi statističnimi vprašalniki, ki jih izpolnjujejo okrožna državna tožilstva ter okrožna in okrajna sodišča.

Zajetje

kriminalitete kot družbeno negativnega pojava je popolno, saj so v statističnih raziskovanjih upoštevani vsi storilci kaznivih dejanj ter tudi kazniva dejanja neznanih storilcev.

Način zbiranja podatkov

Statistični vprašalnik izpolni poročevalska enota, ki je po zakonskih predpisih pristojna za vodenje postopka, takoj ko je postopek pravno močno končan. To pomeni, da se enota opazovanja ugotavlja s trenutkom pravno močnosti, število teh enot pa ugotavljamo z obdelavo podatkov. Ta poteka letno za vsako koledarsko leto.

Definicije

Kriminaliteta je v zvezi s statističnimi raziskovanji skupen izraz za pojav od vložitve ovadbe za storjeno kaznivo dejanje do pravno močnega dokončanja postopka pri pristojnem organu.

METHODOLOGICAL EXPLANATIONS

Data on perpetrators of criminal offences are the result of regular annual statistical surveys in the field of crime statistics. This issue of Rapid Reports brings only results of surveys of accused adults and juveniles against whom criminal proceedings through a senate have been legally concluded.

The purpose of the statistical survey

is to establish the extent, territorial dispersion and other characteristics of this negative social phenomenon.

Observation units

are perpetrators of criminal offences. When more than one perpetrator participated in committing one criminal offence, each participant is a separate observation unit. If one perpetrator committed several criminal offences, the attribute of the perpetrator is only the main criminal offence.

Sources

Data are collected by individual statistical questionnaires filled in by regional public prosecutor's offices and by regional and district courts.

Coverage

Crime as a negative social phenomenon is fully covered since statistical surveys encompass all perpetrators of criminal offences as well as criminal offences committed by unknown perpetrators.

Method of data collection

Statistical questionnaires are filled in by reporting units legally authorised for conducting the proceedings as soon as they are legally concluded. Data collection at the moment of legal conclusion means that this moment defines the observation unit. The number of these units is determined by data processing, which is performed once a year.

Definitions

Statistical research of **crime** ranges from the filing of the charge for a criminal offence to the conclusion of the legal proceedings at the competent body.

Kaznivo dejanje je protipravno dejanje, ki ga zakon zaradi njegove nevarnosti določa kot kaznivo dejanje in hkrati določa njegove znake (Kazenski zakonik, 7. člen). V tabelah 3 in 6 so prikazana po ožji klasifikaciji (skupina kaznivih dejanj), ki se nanaša na Kazenski zakonik (Ur. l. RS 63/94 in 23/99). V primerih, ko so bile osebe obravnavane za storjena kazniva dejanja, ki sta jih določala Kazenski zakon SRS (Ur. l. SRS 12/77) in Kazenski zakon SFRJ (Ur. l. SFRJ 44/76), so bili podatki po skupinah kaznivih dejanj preurejeni v skladu s Kazenskim zakonikom.

Polnoletni storilci kaznivih dejanj so osebe, ki so ob storitvi kaznivega dejanja že dopolnile 18 let. **Mladoletni storilci** pa so osebe, ki so ob storitvi kaznivega dejanja že dopolnile 14, ne pa še 18 let.

Pri polnoletnih storilcih kaznivih dejanj se kot **prejšnje obsodbe** upoštevajo vse prejšnje obsodbe po dopolnjeni polnoletnosti, od obsodb iz časa mladoletnosti pa le obsodbe na mladoletniški zapor ali na denarno kazen. Pri mladoletnih storilcih pa se kot **prejšnje obravnave** upoštevajo tiste, po katerih sta bila mladoletniku izrečena vzgojni ukrep ali kazen.

Criminal offence is an unlawful activity, which is because of its danger defined and described by the law as a crime (Penal Code, Article 7). Criminal offences in Tables 3 and 6 are shown by a narrower classification (group of criminal offences), which refers to the Penal Code (Official Journal of the RS, No. 63/94 and 23/99). In cases when persons were tried for committing criminal offences as defined by the Penal Code of the RS (OJ of the Socialist Republic of Slovenia, No. 12/77) and Penal Code of the Socialist Federal Republic of Yugoslavia (OJ of the Socialist Federal Republic of Yugoslavia, No. 44/76), the offences were treated in accordance with the Penal Code.

Adult perpetrators are persons who had completed 18 years of age before the criminal offence was committed. **Juvenile perpetrators** are persons who had completed 14 years of age before the criminal offence was committed but had not completed 18 years of age.

For adult perpetrators **previous convictions** are all previous convictions after they completed 18 years of age and for the time prior to their completing 18 years of age only convictions to a prison for juveniles or a fine. For juvenile perpetrators **previous convictions** are all convictions to an educational measure or a sentence.
