### Novci (denarji).

Na mesto dosedanje avstrijske vrednote stopi zlata vrednota (kronska vrednota), katere računska enota je krona.

Krona se deli v sto vinarjev (beličev).

Kot deželski zlati novci se bodo kovali:

- a) novci po dvajset kron;
- b) novci po deset kron.

Srebrni novci:

Kosi po eno krono.

Nikljevi novci:

- a) novci po dvajset vinarjev (beličev);
- b) novci po deset vinarjev (beličev).

Bronasti novci:

- a) novci po dva vinarja (béliča);
- b) novci po en vinar (belič).

Razen deželskih zlatih novcev kronske vrednote se bodo kovali tudi nadalje avstrijski cekini, pa tudi tako zvani levantinski srebrni tolarji s podobo cesarice Marije Terezije kot trgovski novci.

Enota avstrijske vrednosti je bil 1 goldinar (gl.) = 100 krajcarjev (kr.)
