NATIONAL ACCOUNTS

št./No 1

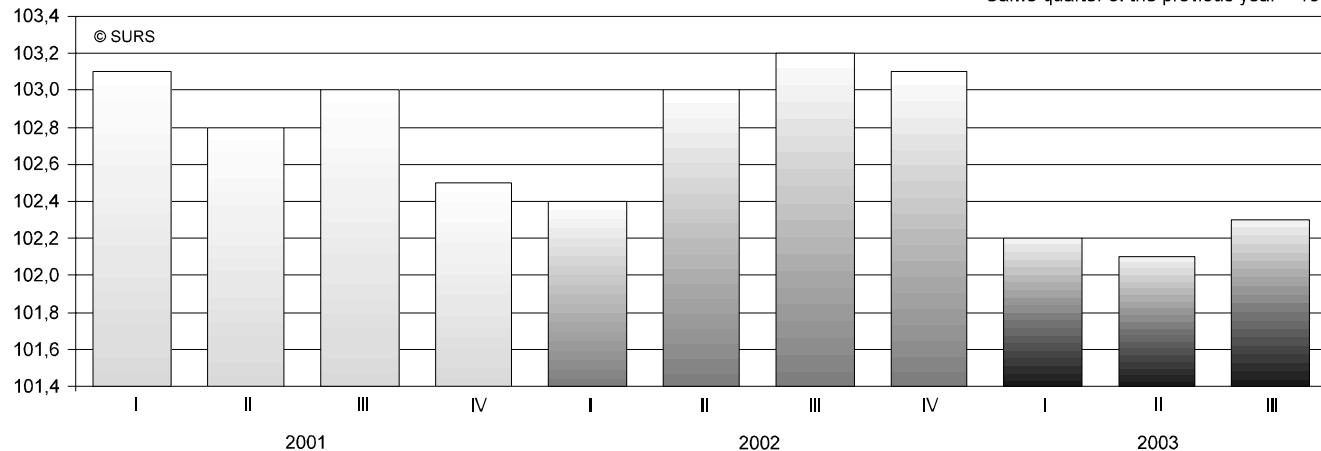

BRUTO DOMAČI PROIZVOD, 1. ČETRTLETJE 2000 – 3. ČETRTLETJE 2003
GROSS DOMESTIC PRODUCT, 1ST QUARTER 2000 – 3RD QUARTER 2003

- V tretjem četrtletju 2003 je bil bruto domači proizvod, merjen v stalnih cenah leta 2003, 2,3 odstotka višji kot v tretjem četrtletju lanskega leta.
- V prvih devetih mesecih letos je gospodarska rast znašala 2,2 odstotka.
- Bruto domači proizvod v tekočih cenah je znašal 1 452 945 mio SIT ali za 7,1 odstotka več kot v tretjem četrtletju leta 2002.
- Ob 14,6-odstotnem povečanju prilivov primarnih dohodkov iz tujine in 23,9-odstotnem zmanjšanju odlivov primarnih dohodkov v tujino se je bruto nacionalni dohodek povečal za 8,1 odstotka.
- Zaposlenost se je na letni ravni zmanjšala za 0,3 odstotka.
- Pomen domačega trošenja za gospodarsko rast se še naprej povečuje, prispevek neto izvoza pa ostaja negativen.
- V okviru domače potrošnje so v primerjavi s tretjim lanskim četrtletjem najbolj porasle bruto investicije v osnovna sredstva (za 5 odstotkov), trošenje gospodinjstev se je povečalo za 3,2 odstotka, trošenje države pa za 2,3 odstotka.
- Izvoz proizvodov je v obsegu na letni ravni porasel za 3,2 odstotka, uvoz proizvodov pa za 6,7 odstotka. Saldo neto izvoza je na gospodarsko rast vplival negativno v višini 2,2 odstotne točke.
- Dodana vrednost se je v obsegu na letni ravni povečala za 2,5 odstotka (v osnovnih proizvodnih dejavnostih za en odstotek, v storitvenih pa za 3,4 odstotka).
- In the third quarter of 2003 gross domestic product at constant 2000 prices increased by 2.3 per cent compared to the third quarter of 2002.
- GDP volume growth amounted to 2.2 per cent in the first nine months of 2003 compared to the same period of 2002.
- Gross domestic product at current prices amounted to SIT 1 452 945 mio or 7.1 per cent more than in the third quarter of 2002.
- At the 14.6 per cent increase of the primary incomes receivable from abroad and the 23.9 per cent increase of the primary incomes payable to abroad, gross national income increased by 8.1 per cent.
- Employment decreased by 0.3 per cent at the annual level.
- The contribution of domestic expenditure to GDP volume growth is increasing and the contribution of net exports is still negative
- Within domestic expenditure and compared to the third quarter of 2002 gross fixed capital formation increased by 5 per cent, final consumption expenditure of government by 2.3 per cent and households expenditures by 3.2 per cent.
- Exports of goods and services in volume terms increased by 3.2 per cent at the annual level and imports of goods and services by 6.7 per cent. Net exports decreased GDP volume growth by 2.2 percentage points.
- Value added at annual level in volume terms increased by 2.5 per cent (in basic industries by one per cent and in services by 3.2 per cent).

METODOLOŠKA POJASNILA

VIRI PODATKOV

Glavni viri podatkov so rezultati mesečnih in četrletnih osnovnih statističnih raziskovanj (kmetijska, industrijska statistika, statistika gradbeništva, trgovine, gostinstva, prometa in zvez, podatki o zaposlenih in plačah, statistika cen, statistika zunanje trgovine), davčne evidence, podatki statistike javnih financ ministrstva za finance, plačilne bilance Banke Slovenije in drugi viri.

ZAJETJE

V obračun so zajete vse dejavnosti v skladu s konceptom proizvodnje po Sistemu nacionalnih računov iz leta 1993 (SNR 1993) in Evropskem sistemu nacionalnih in regionalnih računov iz leta 1995 (ESR 1995).

DEFINICIJE

Bruto domači proizvod po izdatkovni metodi je vsota izdatkov za končno potrošnjo, bruto investicij in razlike med izvozom ter uvozom proizvodov in storitev.

Izdatke za končno potrošnjo sestavlja agregata individualni izdatki za potrošnjo in kolektivni izdatki države za potrošnjo. Individualno potrošnjo sestavljajo izdatki za končno potrošnjo gospodinjstev, izdatki nepridobitnih institucij, ki opravljajo storitve za gospodinjstva (NPISG) in individualni izdatki države. Izdatki države za individualno potrošnjo so izdatki za netržne storitve države (izobraževanje, zdravstvo, socialno skrbstvo, šport, kultura ipd.) in izdatki za tržne proizvode in storitve (zdravila, ortopedski pripomočki, koncesijske pravice zasebnemu in javnemu tržnemu sektorju, storitve zdravilišč ipd.). Izdatki države za kolektivno potrošnjo so izdatki za upravne, administrativne, obrambne, razvojno-raziskovalne, ekonomske in druge netržne storitve države. Državni izdatki za netržne storitve in izdatki NPISG za končno potrošnjo so enaki razliki med vrednostjo proizvodnje po stroškovni metodi in vrednostjo prodaj.

Bruto investicije so sestavljene iz bruto investicij v osnovna sredstva, spremembe zaloga ter neto nabav vrednostnih predmetov in umetnin. Bruto investicije v osnovna sredstva so sestavljene iz investicij v nova osnovna sredstva, stroškov transakcij rabljenih osnovnih sredstev in povečanja vrednosti neproizvedenih nefinančnih sredstev. Spremembe zalog sestavljajo spremembe zaloga surovin in materiala, nedokončane proizvodnje, dokončanih proizvodov in trgovskega blaga.

Izvoz in uvoz proizvodov zajemata izvoz in uvoz proizvodov po brutu načelu, kar pomeni, da so v izvoz in uvoz proizvodov vključeni tudi proizvodi, uvoženi v oplemenitev oziroma izvoženi iz oplemenitevanja. Vrednosti izvoza in izvoza sta obračunana po pariteti FOB. Podatki o izvozu in uvozu storitev so povzeti iz plačilne bilance po podatkih in metodologiji Banke Slovenije.

Bruto domači proizvod po proizvodni metodi je enak dodani vrednosti v osnovnih cenah, povečani za davke na proizvode in storitve in zmanjšani za subvencije za proizvode in storitve. Bruto domači proizvod je tako enak vsoti dodane vrednosti vseh domačih (rezidenčnih) proizvodnih enot in neto davkov na proizvode in storitve.

Dodata vrednost v osnovnih cenah je enaka proizvodnji v osnovnih cenah, zmanjšani za vmesno potrošnjo v kupčevih cenah.

Neto davki na proizvode in storitve so razlika med davki na proizvode in storitve ter subvencijami za proizvode in storitve. Med davke na proizvode in storitve so vključene carine in uvozne dajatve, davek na dodano vrednost, posebni prometni davki na proizvode in storitve,

METHODOLOGICAL EXPLANATIONS

SOURCES OF DATA

The main sources of data are results of monthly and quarterly basic statistical surveys (agricultural, manufacturing, construction, trade, hotels and restaurants, transport and communication statistics, data on employment and wages, price statistics, foreign trade statistics), tax records, public finance statistics of the ministry of finance, balance of payments of the Bank of Slovenia and other sources.

COVERAGE

The calculation covers all activities following the concepts of production by the 1993 System of national accounts (SNA 1993) and 1995 European system of national and regional accounts (ESA 1995).

DEFINITIONS

Gross domestic product by expenditure approach is the sum of final consumption expenditure, gross capital formation and balance between exports and imports of goods and services.

Final consumption expenditure is composed of the aggregates final consumption expenditure and collective consumption expenditure. Individual consumption is composed of expenditure of households, non-profit institutions serving households (NPISH) and individual government expenditure. Individual government expenditure comprises payments for non-market government services (education, health, social care, sports, culture, etc.) and market goods and services (pharmaceutical and therapeutical products, concessions to private and market public sector, health resort services, etc.). Collective government expenditure comprises expenditure on administrative, defence, R&R, economic and other non-market government services. Government and NPISHs final consumption expenditures are calculated as the difference between the output value by the cost method and sales.

Gross capital formation consists of gross fixed capital formation, changes in inventories and acquisitions less disposals of valuables. Gross fixed capital formation consists of investments into new fixed assets, costs of transactions of existing fixed assets and additions to the value of non-produced non-financial assets. Changes in inventories consist of changes in inventories of raw materials, work-in-progress, finished goods and goods for resale.

Exports and imports of goods cover exports and imports of goods by gross principle. That means that in exports and imports of goods also the imports of goods for processing and exports of goods after processing is included. Value of exports and imports of goods are calculated by FOB. Exports and imports of services are taken from the balance of payments according to the data and methodology of the Bank of Slovenia.

Gross domestic product by production approach equals value added at basic prices, increased by taxes on products and reduced by subsidies on products. Gross domestic product thus equals the sum of value added at basic prices of all (domestic) (resident) production units and net taxes on products.

Value added at basic prices equals output at basic prices less intermediate consumption at purchaser's prices.

Net taxes on products are defined as the difference between the taxes on products and subsidies on products. Taxes on products are customs duties and import duties, value added tax, special turnover taxes by goods and services, excise duties on cigarettes, alcohol, petrol, gambling

trošarske dajatve na cigarete, alkohol, naftne derivate, davki na igre na srečo in igralne avtomate ter davki na transakcije nepremičnin. Subvencije za proizvode in storitve so nevračljiva plačila tržnim proizvajalcem s strani državnih institucij. Vključujejo subvencije v kmetijstvu in proizvodnji hrane ter subvencije cen potniškega prometa v železniškem prometu.

Zaposlenost zajema vse stalno zaposlene osebe po domačem konceptu ter samozaposlene osebe (skupaj s pomagajočimi družinskim članom v kmetijstvu). Zaposlenost vključuje tudi študentsko delo in druge oblike začasne zaposlenosti, zaposlene v pomorskem transportu na naših ladjah in zaposlene v naših diplomatskih in konzularnih predstavništvih v tujini, podjetja brez zaposlenih ipd. Osnovni vir za oceno zaposlenosti je Statistični register delovno aktivnega prebivalstva.

Bruto nacionalni dohodek je enak bruto domačemu proizvodu in saldu primarnih dohodkov (od dela in kapitala) s tujino. **Bruto nacionalni razpoložljivi dohodek** je enak bruto nacionalnemu dohodku in saldu tekočih transfernih dohodkov s tujino. **Bruto varčevanje** je enako bruto nacionalnemu razpoložljivemu dohodku, ki so mu odštetili izdatki za končno potrošnjo (izdatki za individualno in kolektivno končno potrošnjo). **Neto varčevanje** je enako bruto varčevanju, zmanjšanemu za potrošnjo stalnega kapitala. **Saldo tekočih transakcij s tujino** je enak bruto varčevanju, zmanjšanemu za bruto investicije. **Neto posojanje tujini (+), neto izposojanje iz tujine (-)** sta enaka saldu tekočih transakcij s tujino, povečanemu za saldo transferjev kapitala s tujino in zmanjšanemu za neto nabave neproizvedenih nefinančnih sredstev v tujini.

Realni neto primarni dohodki in realni neto tekoči transferji s tujino so ocenjeni z implicitnim deflatorjem za agregat končne domače potrošnje, potrošnja stalnega kapitala pa z implicitnim deflatorjem za agregat bruto investicij v osnovna sredstva.

V tabeli 9 so prikazani tisti **prihodki in izdatki sektorja S.13 Država**, ki jih zahteva Uredba Komisije (ES) št. 264/2000 o kratkoročni javnofinancni statistiki. Podatki so ocenjeni na podlagi Poročil o vplačilu in razporeditvi javnofinancnih prihodkov Uprave za javna plačila RS, obračunov davka na dodano vrednost Davčne uprave RS in podatkov iz carinskih deklaracij, prikazani pa so po obračunskem načelu. Vse kategorije, razen davkov na proizvode (D.21) in dejanskih socialnih prispevkov, vključujejo zamudne obresti pri plačilih. Podatki so na voljo od prvega četrletja 1995 naprej in jih uporabniki lahko dobijo na statističnem uradu.

KOMENTAR

V tretjem četrletju 2003 je bil bruto domači proizvod, merjen v stalnih cenah leta 2003, za 2,3 odstotka višji kot v tretjem četrletju lanskega leta. V prvih devetih mesecih letos je gospodarska rast v primerjavi z enakim lanskim obdobjem znašala 2,2 odstotka.

Bruto domači proizvod v tekočih cenah je znašal 1 453 milijard tolarjev ali za 7,1 % več kot v tretjem četrletju leta 2002. Ob 14,6-odstotnem povečanju prilivov primarnih dohodkov iz tujine in 23,9-odstotnem zmanjšanju odlivov primarnih dohodkov v tujino se je bruto nacionalni dohodek povečal za 8,1 odstotka na 1460 milijard tolarjev.

Implicitni deflator bruto domačega proizvoda je na letni ravni znašal 104,7 in se zmanjšuje četrtto zaporedno četrletje. Po elementih domačega trošenja (implicitni deflator 104,8) je bil deflator izdatkov države za končno potrošnjo 105,5, deflator trošenja gospodinjstev 105,2 in deflator bruto investicij v osnovna sredstva 103,2. Pogoji menjave so bili rahlo negativni in niso bistveno vplivali na deflator bruto domačega proizvoda.

V tretjem četrletju 2003 je zaposlenost znašala 903 tisoč oseb in je bila za

and slot machines and taxes on real estate transactions. Subsidies on products are unrequited payments to market producers, made by government institutions. The category includes subsidies on agriculture products and food manufacturing and subsidies for passenger transport by railway.

Employment covers all permanent employees according to the domestic concept and self-employed (together with unpaid family workers in agriculture). Employment covers also student work and other forms of part-time employment, employees in transport by sea on our ships, staff of Slovene embassies and consulates, enterprises without employees etc. Basic source for estimation of employment is Statistical Register of Employment.

Gross national income equals the sum of gross domestic product and balance of primary incomes (from labour and capital) with the rest of the world. **Gross national disposable income** equals the sum of gross national income and the balance of current transfers with the rest of the world. **Gross saving** equals gross national disposable income less final consumption expenditures (individual and collective final consumption). **Net saving** equals gross saving less consumption of fixed capital. Current external balance equals gross saving less gross capital formation. **Net lending (+), net borrowing (-)** with the rest of the world equals the current external balance plus the balance of current capital transfers with the rest of the world less net acquisitions of non-produced non-financial assets in the rest of the world.

Real net primary incomes and real net current transfers from the rest of the world are estimated using the implicit price index for domestic final consumption expenditures and consumption of fixed capital by using the implicit price index for gross fixed capital formation.

Table 9 contains **revenue and expenditure of S.13 General Government** according to the Commission Regulation (EC) No 264/2000 on short-term public finance statistics. Data sources are Report on Public Revenues of the Public Payments Administration, data on value added tax of the Tax Administration and customs declarations. Data are estimated on accrual basis. Except taxes on products (D.21) and actual social contributions, all values of other categories include interest for delay payments. Data are available from the first quarter of 1995 on and can be obtained from the Statistical Office.

COMMENT

In the third quarter of 2003 gross domestic product at constant 2000 prices increased by 2.3 per cent compared to the third quarter of 2002. The GDP volume growth amounted to 2.2 per cent in the first nine months of 2003 compared to the same period of 2002.

Gross domestic product at current prices amounted to SIT 1 453 billion or 7.1 per cent more than in the third quarter of 2002. At the 14.6 per cent increase of the primary incomes receivable from abroad and the 23.9 per cent increase of the primary incomes payable to abroad, gross national income increased by 8.1 per cent (SIT 1 460 billion).

Implicit GDP deflator amounted to 104.7 at the annual level and is decreasing for the fourth time in a row. By elements of domestic expenditure (implicit deflator 104.8) implicit deflator for government expenditure amounted to 105.5, for households expenditure it was 105.2 and for gross fixed capital formation 103.2. Terms of trade were slightly negative and have negligible impact on implicit GDP deflator.

In the third quarter of 2003 employment amounted to 903 000 persons or

0,3 odstotka manjša kot v tretjem četrtletju leta 2002. V sektorju družb se je zmanjšala za 0,5 odstotka, v gospodinjstvih in nepridobitnih institucijah, ki opravljajo storitve za gospodinjstva (NPISG), pa za 1,2 odstotka. V sektorju država se je zaposlenost povečala za 2,1 odstotka. Število zaposlenih se je povečalo za 0,1 odstotka, število samozaposlenih pa zmanjšalo za 2,1 odstotka.

Domače trošenje še naprej postaja vse pomembnejše za gospodarsko rast, v tretjem četrtletju je k 2,3-odstotni rasti BDP prispevalo 4,5 odstotne točke. Rast končnega trošenja ostaja tudi v tretjem četrtletju (2,9 odstotka) na približno enaki ravni kot v prvih dveh četrtletjih. Pri tem so se izdatki gospodinjstev povečali za 3,2 odstotka, izdatki države pa za 2,3 odstotka. Bruto investicije so zabeležile 9,1-odstotno rast, k tej rasti je povečanje zalog prispevalo 4,2 odstotne točke.

Razlika v dinamiki rasti izvoza in uvoza proizvodov ostaja v zadnjih dveh četrtletjih približno enaka, zato je bil negativni prispevek salda h gospodarski rasti v tretjem četrtletju podoben kot v drugem (2,2 odstotne točki v tretjem in 2,1 odstotne točke v drugem četrtletju). Izvoz se je povečal za 3,2 odstotka; pri tem se je izvoz blaga povečal za 4,2 odstotka, obseg izvoza storitev pa se je zmanjšal za 1,2 odstotka. Uvoz proizvodov je porasel za 6,7 odstotka (blago za 7,2 odstotka, storitve pa za 4,2 odstotka).

Skupna dodana vrednost je v obsegu porasla za 2,5 odstotka. V osnovnih proizvodnih dejavnostih se je povečala za en odstotek, v storitvenih proizvodnih dejavnostih pa za 3,4 odstotka.

0.3 per cent less than in the third quarter of 2002. It decreased in sectors of corporations by 0.5 per cent and households together with non-profit institutions serving households (NPISH) by 1.2 per cent. In general government sector employment increased by 2.1 per cent. The number of employees increased by 0.1 per cent and the number of self-employed decreased by 2.1 per cent.

Domestic expenditure contributed 4.5 percentage points to GDP volume growth which is even more important contribution than in the previous quarters. Final consumption expenditure increased by 2.9 per cent, of which expenditures by households by 3.2 per cent and expenditures by general government by 2.3 per cent. Gross capital formation increased by 9.1 percent, where changes in inventories contributed 4.2 percentage points.

Difference between exports and imports volume growth is the same in the second and the third quarter of 2003, therefore in this two quarters negative contribution of external trade balance to GDP volume growth was nearly the same (2.1 and 2.2 percentage points, respectively). Exports increased by 3.2 per cent, of which export of goods increased by 4.2 per cent and export of services decreased by 1.2 per cent. Imports increased by 6.7 per cent (imports of goods by 7.2 per cent and imports of services by 4.2 per cent).

Total value added at constant 2000 prices increased by 2.5 per cent. In basic industries it increased by one per cent and in service industries by 3.4 per cent.
