1. OZEMLJE IN PODNEBJE

TERRITORY AND CLIMATE

VIRI IN METODE ZBIRANJA PODATKOV

Podatki o zemljepisni opredelitvi so povzeti iz StatistiËnih letopisov Republike Slovenije in iz drugih dokumentacijskih virov, leksikonov in registrov StatistiËnega urada Republike Slovenije. Podatki so prevzeti tudi iz Pregledne karte SR Slovenije 1 : 250.000 (PK-250), ki jo je v letu 1985 izdala Republiöka geodetska uprava, ter iz Topografske karte 1 : 25.000 (TK-25) za obmoËje Republike Slovenije.

Imena teritorialnih enot so v skladu s predpisi.

Podatke so posredovali: Geodetska uprava Republike Slovenije (o geografskih koordinatah skrajnih toËk drűave, dolűini drűavne meje in o nadmorskih viöinah), Geodetska uprava obalne skupnosti v Kopru (o dolűini slovenske morske obale), Inötitut za raziskovanje Krasa ZRC - SAZU v Postojni (o kraökih jamah), Uprava Republike Slovenije za varstvo narave (o zavarovanih naravnih obmoËjih Republike Slovenije), Hidrometeoroloöki zavod Republike Slovenije (o jezerih in vodnih akumulacijah, rekah in o podnebju: temperaturah, vlaűnosti, oblaËnosti, vetrovih, padavinah) ter Uprava Republike Slovenije za geofiziko (o potresih).

Podatke o digitalnem modelu reliefa v Republiki Sloveniji so posredovali: Geodetska uprava Republike Slovenije, Gozdarski inötitut Republike Slovenije in StatistiËni urad Republike Slovenije.

ZAJETJE

V preglednicah so zajete nekatere naravnogeografske znaËilnosti ozemlja in podnebja Slovenije. Prikazana so tudi zavarovana obmoËja narave v Sloveniji in karta z izoseistami najmoËnejöega potresa leta 1996. Diagrami prikazujejo razporeditev nadmorske viöine, razporeditev naklona zemljiöË v Sloveniji in nekatere podnebne znaËilnosti.

DEFINICIJE

Nadmorska viöina krajev, kjer so sedeűi obËin, je vnesena po razdelitvi na obËine v Republiki Sloveniji konec leta 1996.

Razporeditev nadmorske viöine in naklona zemljiöËa v Republiki Sloveniji je povzeta po projektu Digitalnega modela reliefa (DMR - 100); merjena enota je 1 ha.

Med zavarovanimi naravnimi obmoËji v Republiki Sloveniji so upoötevani vsi naravni parki, ki zajemajo vse narodne parke, vse krajinske parke in druga zavarovana obmoËja z elementi krajinskih parkov. RazvröËeni in oznaËeni so v skladu s kategorizacijo Mednarodne zveze za varstvo narave (IUCN):

IUCN kategorija II - narodni park

IUCN kategorija III - naravni spomenik

IUCN kategorija V - zavarovana krajina.

Za **vodno stanje** oz. **pretoke rek** so upoötevane le najpomembnejöe vodomerske postaje, za katere je bilo na voljo najveË popolnih podatkov glede na ötevilo elementov in glede na dolűino Ëasovne vrste. Pomen znakov: QS - srednji pretok v letu, QVK - najveËji pretok - konica v letu. QNK - najmanjöi pretok - konica v letu.

Jakost potresov je prikazana po naslednjih lestvicah:

MCS (Mercalli-Cancani-Sieberg)

MSK (Medvedev-Sponheuer-Karnik)

EMS (European Macroseismic Scale).

Vse lestvice imajo 12 stopenj. MSK-lestvica upoöteva öe statistiko posledic potresa. Karta potresa je prikazana z izoseistami, tj. Ërtami, ki povezujejo toËke z enako intenzivnostjo potresnih sunkov.

Pri **podnebnih podatkih** so upoötevani le podatki najpomembnejöih meteoroloökih postaj. Prikazane so letne srednje temperature in letna viöina padavin, poleg teh pa öe srednje temperature za januar in julij ter srednje temperature in viöine padavin za glavno vegetacijsko obdobje (od aprila do vkljuËno junija). Pri podatkih za absolutno maksimalno oziroma minimalno letno temperaturo je izbrana temperatura, ki je bila doseűena v enem dnevu ali veË. Prikazani sta tudi absolutna minimalna in maksimalna temperatura za desetletno obdobje.

PovpreËna meseËna temperatura zraka je raËunana iz opazovanj ob 7., 14. in 21. uri po krajevnem Ëasu po obrazcu (t7 + t14 + 2 x t21) : 4. Srednje letne vrednosti so raËunane iz srednjih meseËnih vrednosti.

SOURCES AND METHODS OF DATA COLLECTION

Data on geographical characteristics are taken from the Statistical Yearbook of the Republic of Slovenia and from other documentational sources, lexicons and registers of the Statistical Office of the Republic of Slovenia. Data are also taken from the Map of the Socialist Republic of Slovenia 1:250,000 (PK-250), published in 1985 by the Surveying and Mapping Authority, and from the Topographical Map 1:25,000 (TK-25) for the territory of the Republic of Slovenia.

Territorial units are referred to by their legally-established names.

Data were supplied by: the Surveying and Mapping Authority of the Republic of Slovenia on geographical coordinates of the extreme points of the state, the length of the state border and heights above sea level, the Surveying and Mapping Authority of the Littoral Community in Koper on the length of the Slovenian coastline, the Institute for Karst Research of the Environmental Research Institute of the Slovenian Academy of Sciences and Arts on karst caves, the Nature Protection Authority of the Republic of Slovenia on protected natural areas of the Republic of Slovenia, the Hydrometheorological Institute of the Republic of Slovenia on lakes and water accumulations, rivers (over 25 km in length) and their watersheds, on the level and rate of flow of rivers and on climate (temperatures, humidity, cloudiness, wind, precipitation) and the Geophysical Survey of Slovenia on earthquakes.

The data on digital model of relief are from the Surveying and Mapping Authority of the Republic of Slovenia, the Institute of Forestry of the Republic of Slovenia and the Statistical Office of the Republic of Slovenia.

COVERAGE

Covered are some geographical characteristics of Slovenian territory and climate. Also shown are protected areas of nature in Slovenia and the chart with isoseismals of the strongest earthquake in 1996. Diagrams show distribution of the height above sea level, distribution of the inclination of the territory in Slovenia and some characteristics of the climate.

DEFINITIONS

*The **height above sea level** of seats of municipalities is given with respect to the shape of communities in the Republic of Slovenia as of the end of 1996.*

***Distribution of the height above sea level and of the inclination** of the territory in the Republic of Slovenia is presented according to the project of the Digital Model of Relief (DMR - 100); observed unit was 1 ha.*

*Among **protected natural areas** of the Republic of Slovenia we include all natural parks. They include all national parks, all landscape parks and other protected areas with elements of landscape parks. Categorisation of natural parks is in accordance with the categorisation of IUCN (International Union of the Conservation of Nature).*

IUCN II denotes national parks.

IUCN III denotes natural monuments.

IUCN V denotes protected landscapes.

*With respect to the **level**/**rate of flow of rivers** we have considered only the most important hydrometric stations, for which the fullest data were available with regard to the number of elements and the length of the time series. The signs have the following meanings: QS - medium flow in the year; QVK - maximum flow, yearly peak; QNK - minimum flow, yearly peak.*

***Macroseismic intensity** is given in the MCS (Mercalli-Cancani-Sieberg), MSK (Medvedev-Sponheuer-Karnik) and EMS (European Macroseismic Scale) intensity scale. All scales have 12 degrees. The MSK intensity scale includes statistics of the earthquake effects. On the map, areas of a given intensity are delineated by means of intensity contours or "isoseismals".*

***Climatological data** take account of the most important weather stations alone. In addition to average annual temperatures and annual precipitation, average temperatures for January and July and average temperatures and precipitation for the main vegetation period (from April to June inclusive) are also shown. The absolute maximum/minimum annual temperature is taken from the temperature reached on one (or more) day(s). Ten-year absolute maximum and minimum temperatures are shown.*

***Average monthly air temperature** is calculated from observations at 7.00, 14.00 and 21.00 local time using the formula (t7 + t14 + 2 x t21) : 4. Average annual values are calculated from the average monthly values.*

Padavine se merijo vsak dan ob 7. uri zjutraj. Dan z deűjem ali dan s snegom je dan, ko je na meteoroloöki postaji padlo vsaj 0,1 mm ustreznih padavin v 24 urah (od 7. ure do 7. ure naslednjega dne). » e je v tem Ëasu deűevalo ali sneűilo hkrati ali izmenoma, se öteje tak dan kot dan z deűjem in snegom. Dan s sneűno odejo je dan, ko je bilo na meteoroloöki postaji ob 7. uri najmanj 1 cm sneűne odeje.

Srednja oblaËnost je raËunana po opazovanjih ob 7., 14. in 21. uri. Stopnja oblaËnosti je ocenjena po lestvici od 0 do 10. Kadar je srednja dnevna oblaËnost manjöa od 2,0, govorimo o jasnem dnevu, kadar pa je srednja dnevna oblaËnost veËja od 8,0, gre za oblaËen dan.

Ure sonËnega obsevanja zapisuje heliograf (do desetinke ure natanËno), prikazane so kot vsota ur.

Relativna vlaga je stopnja nasiËenosti zraka z vodno paro ali razmerje med dejansko mnoűino vodne pare in moűno koliËino vodne pare, ki je lahko v zraku pri doloËeni temperaturi. IzraËuna se po opazovanjih ob 7., 14. in 21. uri.

Smeri vetra so oznaËene z mednarodnimi kraticami in njihovimi kombinacijami: N - sever, S - jug, E - vzhod, W - zahod.

Jakost vetra se meri po Beaufortovi lestvici, ki ima 12 stopenj. Dan z vetrom 8 ali veË po Beaufortovi lestvici je npr. tisti dan, v katerem veter doseűe tako jakost, da lomi veje na drevju ali veËinoma onemogoËa hojo proti vetru.

Precipitation *is measured daily at 7.00. A day with rain or a day with snow is a day on which at least 0.1 mm of the respective precipitation falls at the weather station within a period of 24 hours (from 7.00 to 7.00 on the following day). If rain and snow fall simultaneously or alternately within this period the day is classified as a day with rain and snow. A day with snow cover is a day on which there is at least 1 cm of snow covering the weather station at 7.00.*

Average cloudiness *is calculated from observations at 7.00, 14.00 and 21.00. The degree of cloudiness is assessed on a scale of 1 to 10. A clear day is one on which the average daily cloudiness is less than 2.0, while a cloudy day is one on which the average daily cloudiness is greater than 8.0.*

Sun duration *is measured on a heliograph (to one tenth of an hour) and is given in hours.*

Relative humidity *is the level of saturation of the air by water vapour, i.e. the ratio of the actual quantity of water vapour and the possible quantity of water vapour which may occur in the air at the given temperature. It is calculated from observations at 7.00, 14.00 and 21.00.*

Wind directions *are shown by means of international abbreviations and their combinations: N(orth), S(outh), E(ast), W(est).*

Wind force *is measured on the Beaufort scale, which has 12 degrees. A day with wind force 8 or more on the Beaufort scale is a day on which at any time the wind achieves a force such that it breaks tree branches or such that walking against the wind is impossible.*

2. UPRAVNO-TERITORIALNA UREDITEV

ADMINISTRATIVE TERRITORIAL STRUCTURE

VIRI IN METODE ZBIRANJA PODATKOV

Teritorialno ureditev smo po imenih teritorialnih enot in po obdobjih navedli po zakonih ter njihovih spremembah in popravkih, ki so bili objavljeni v uradnih listih Ljudske Republike Slovenije, SocialistiËne Republike Slovenije in Republike Slovenije.

Podatke za stanje 1. 6. 1939 smo prevzeli po sploönem pregledu Dravske banovine iz leta 1939. Del Primorske, priključen po pariökem sporazumu, upoötevamo od 23. 2. 1948 naprej, del Koprskega, priključen po londonskem sporazumu, pa od 4. 11. 1954.

Podatke o teritorialnih enotah in o spremembah posreduje Geodetska uprava Republike Slovenije, vodimo in vzdrűujemo jih v Registru teritorialnih enot.

SOURCES AND METHODS OF DATA COLLECTION

The territorial structure by named territorial units and by periods is cited according to laws and their changes and amendments, published in the Official Gazette of the People' s Republic of Slovenia, the Official Gazette of the Socialist Republic of Slovenia and the Official Journal of the Republic of Slovenia.

Data for the situation as of 1 June 1939 are drawn from the 1939 General Survey of the Drava Banovina (Drava province). The part of Primorska (i.e. the Littoral) incorporated under the terms of the Paris Agreement is taken into account from 23 February 1948 onwards and the part of the Koper region incorporated under the London Agreement is taken into account from 4 November 1954 onwards.

Data on territorial units and changes are supplied by Surveying and Mapping Authority and kept in the Register of Territorial Units.

ZAJETJE

V registru vodimo in vzdrűujemo podatke o teritorialnih enotah, ki so definirane z Zakonom o imenovanju in evidentiranju naselij, ulic in stavb (Ur. l. SRS, öt. 5/80, 42/86) in s podzakonskimi akti.

Za statistiËna raziskovanja smo v letu 1959 uvedli statistiËni kataster, katerega osnovna teritorialna enota je statistiËni okoliö. PrviË je bil uporabljen za izvedbo popisa prebivalstva, gospodinjstev in stanovanj v letu 1961. Po reviziji je bil tudi osnova za izvedbo popisa prebivalstva, gospodinjstev in stanovanj v letu 1971.

Na podlagi statistiËnega katastra smo skupaj z Geodetsko upravo Republike Slovenije in njenimi izpostavami izdelali novo metodologijo za vodenje Registra teritorialnih enot in njegovega kartografskega dela od leta 1978 do 1981; ta je postal osnova za izvedbo popisov prebivalstva, gospodinjstev, stanovanj in kmeËkih gospodarstev v letih 1981 in 1991 ter drugih statistiËnih raziskovanj od leta 1981.

Povröine obËin, ki so prevzete iz Registra prostorskih enot Republike Slovenije, so izraËunane iz koordinat mejnih toËk posameznega prostorskega okoliöa in nato seötete na podlagi atributne opredelitve pripadnosti prostorskega okoliöa viöji prostorski enoti. Seötevek povröin obËin tako ni enak seötevku povröin katastrskih obËin, ki so povzete iz zemljiökega katastra in se z novimi izmerami vsako leto spreminjajo. Za statistiËne raziskave se uporablja povröina obËin iz Registra prostorskih enot Republike Slovenije.

COVERAGE

The register is used to keep and maintain information on territorial units defined under the Law on the Naming and Record-keeping of Settlements, Streets and Buildings (Official Gazette of the Socialist Republic of Slovenia, No. 5/80, 42/86) and by supplements to legislative acts.

For the purposes of statistical surveys, a statistical cadastral register was introduced in 1959. Its basic territorial unit is the statistical district. It was first used for the census of population, households and dwellings in 1961. After revision it was used for the census of population, households and dwellings in 1971.

On the basis of the statistical cadastral register and in collaboration with the Surveying and Mapping Authority of the Republic of Slovenia and geodetic administrations of communities, we created a new record-keeping methodology and a cartographic section for the Register of Territorial Units in the 1978-1981 period. This became the basis for conducting censuses of population, households, dwellings and agricultural holdings in 1981 and 1991 and other statistical surveys since 1981.

The total area of municipalities taken from the Register of Spatial Units of the Republic of Slovenia is calculated from coordinates of boundary points of an individual spatial environment and then they are summed up - on the basis of the attributive belonging of the spatial environment - to a higer spatial unit. The total area of municipalities thus does not equal the total area of cadastral municipalities, which is taken from the land cadastre and changes every year with new measurements. For statistical surveys the area of municipalities from the Register of Spatial Units of the Republic of Slovenia is used.

DEFINICIJE

V prikazih razvoja teritorialne ureditve smo za posamezne teritorialne enote navedli obdobja, ko so te enote v skladu z ustreznimi predpisi obstajale. Znak X pomeni, da so enote obstajale le v obdobju, ki je v preglednici oznaËeno s tem znakom.

ObËina (po stanju 1. 1. 1995) je temeljna lokalna samoupravna skupnost, ki v okviru ustave in zakonov samostojno ureja in opravlja svoje zadeve in izvröuje naloge, ki so nanjo prenesene z zakoni (Ur. l. RS, öt. 72/93, 14/95).

ObmoËja obËin so doloËena z obmoËji naselij (Ur. l. RS, öt. 60/94, 69/94).

Upravne enote so organizirane za obmoËje ene ali veË lokalnih skupnosti, tako da se zagotovi racionalno in uËinkovito opravljanje z zakonom doloËenih nalog drűavne uprave (Ur. l. RS, öt. 67/94, 75/94, 78/94).

Katastrska obËina je osnovna teritorialna enota za vodenje zemljiökega katastra. Pri razdelitvi katastrskih obËin po velikostnih razredih smo upoötevali Zakon o postopku za ustanovitev, zdruűitev oziroma spremembo obmoËja obËine ter o obmoËjih obËin (Ur. l. SRS, öt. 28/80, 9/82, 27/84, 38/89 in Ur. l. RS, öt. 30/90) in popravke zaradi komasacije ali preimenovanj (po podatkih Geodetske uprave Republike Slovenije). Pri povröini katastrskih obËin se z novimi izmerami vsako leto popravljajo podatki za tiste obËine, za katere so opravljene nove meritve. Zato tudi povröina Slovenije, ki je seötevek povröin katastrskih obËin, ni vsako leto enaka.

Mesto se po predpisih o teritorialni razdelitvi, veljavni od 30. 6. 1955, ne pojavlja kot upravna teritorialna enota. Po stanju 30. 6. 1955, ko je bilo na ozemlju Slovenije 130 obËin, je bilo 50 mest. ätevilo mest je ostalo

DEFINITIONS

In setting out the development of the territorial structure we give the period of existence of each territorial unit as determined by legislation. Periods of existence are tabulated against territorial units and marked with an X.

***Municipalities** (as of 1 January 1995) are fundamental local self-government communities, which on the basis of the constitution and laws have to execute their own affairs and affairs which are turned over to them by laws (Official Journal of the Republic of Slovenia, No. 72/93, 14/95).*

The teritories of the municipalities are determined by the territories of settlements (Official Journal of the Republic of Slovenia, No. 60/94, 69/94).

***Administrative units** are organized for one or more local communities. Administrative units are designed for effective administration of state government tasks which are defined by law (Official Journal of the Republic of Slovenia, No. 67/94, 75/94, 78/94).*

***Cadastral communities** are basic territorial units for keeping the land register. In classifying cadastral communities by size we have taken into account the Law on the Procedure for Establishing, Merging and Changing the Territory of a Community and on the Territories of Communities (Official Gazette of the Socialist Republic of Slovenia, No. 28/80, 9/82, 27/84, 38/89; Official Journal of the Republic of Slovenia, No. 30/90) and amendments due to commassations or changes of names (according to the Surveying and Mapping Authority of the Republic of Slovenia). In the areas of cadastral communities new measurements are introduced each year to correct data relating to cadastral communities for which new measurements have been conducted. For this reason the area of Slovenia, which is the aggregate area of all cadastral communities, is not identical in every year.*

***Towns**, under the legislative arrangements for the territorial structure which have been in effect since 30 June 1955, do not occur as administrative territorial units. On 30 June 1955, when there were 130*

enako vse do 23. 10. 1964 (Ur. l. SRS, öt. 30/64), ko je bil med mesta uvröËen öe élec; s tem se je ötevilo mest poveËalo na 51. Taköno stanje je ostalo prav do uveljavitve Zakona o postopku za ustanovitev, zdruűitev oziroma spremembo obmoËja obËine ter o obmoËjih obËin (Ur. l. SRS, öt. 28/80, 9/82, 27/84, 38/89 in Ur. l. RS, öt. 30/90) ter Zakona o imenovanju in evidentiranju naselij, ulic in stavb (Ur. l. SRS, öt. 5/80). Ta predpisa sta mestna naselja izenaËila z drugimi naselji v Sloveniji.

communities on the territory of Slovenia, there were 50 towns. The number of towns remained constant until 23 October 1964 (Official Gazette of the Socialist Republic of Slovenia, No. 30/64), when élec was classified as a town, bringing the number to 51. This situation persisted until the introduction of the Law on the Procedure for Establishing, Merging and Changing the Territory of a Community and on the Territories of Communities (Official Gazette of the Socialist Republic of Slovenia, No. 28/80, 9/82, 27/84, 38/89; Official Journal of the Republic of Slovenia, No. 30/90) and the Law on the Naming and Record-keeping of Settlements, Streets and Buildings (Official Gazette of the Socialist Republic of Slovenia, No. 5/80). These two laws abolished the distinction between towns and other settlements in Slovenia.

Naselje je strnjena ali nestrnjena skupina stavb, ki sestavljajo naseljeno zemljepisno enoto (mesto, trg, vas, industrijsko in rudarsko naselje, zdraviliöËe itd.); ta ima skupno ime, lastni sistem oötevilËenja stavb ter doloËeno obmoËje, ki ga tvori en ali veË statistiËnih okoliöev. Ta opredelitev je v skladu z zakonom o imenovanju in evidentiranju naselij, ulic in stavb (Ur. l. SRS, öt. 5/80).

Settlements *are compact or non-compact groups of buildings constituting a settled geographical unit (town, market, village, industrial or mining settlement, spa, etc.). A settlement has a single name, its own system of numbering buildings and a determinate area made up of one or more statistical districts. The Law on the Naming and Record-keeping of Settlements, Streets and Buildings (Official Gazette of the Socialist Republic of Slovenia, No. 5/80).*

StatistiËni okoliöi so bili ustanovljeni leta 1959 za statistiËna raziskovanja in so stalne temeljne teritorialne enote, ki se ne spreminjajo, razen Ëe se spremenijo meje naselij. StatistiËni okoliö pripada le enemu naselju.

Statistical districts *were established in 1959 for the purposes of statistical surveys and are standard fundamental territorial units which are adjusted only when settlement boundaries are changed. Each statistical district falls within one settlement only.*

1) Povröine obËin so prevzete iz Registra prostorskih enot Republike Slovenije, stanje 1. 1. 1997. IzraËunane so iz digitaliziranih obrisov posameznega prostorskega okoliöa na kartah 1:5000 in 1:10000 in nato seötete na podlagi pripadnosti prostorskega okoliöa viöji prostorski enoti, Seötevek povröin obËin zato ni enak seötevku povröin katastrskih obËin. Ta povröina se uporablja za statistiËna raziskovanja od 1. 1. 1996.
The area of municipalities is taken from the Register of Spatial Units of the Republic of Slovenia, as of 1. 1. 1997. It is calculated from digitalised outlines of individual areas on maps 1:5000 and 1:10000 and then added on the basis of affiliation to the higher unit. The total area of municipalities therefore is not equal to the area of cadastral communities. This area has been used for statistical surveys since 1 January 1996.

2) Podatki o ötevilu naselij se razlikujejo od podatkov, objavljenih v publikaciji 'Slovenija v ötevilkah 1997', ker smo nekatere podatke o spremembah za leto 1996 dobili od poroËevalskih enot naknadno.
Data on the number of settlements differ from data published in 'Slovenia in Figures' because we obtained soure changes for 1996 from reporting units subsequently.

3. POSLOVNI SUBJEKTI

BUSINESS UNITS

VIRI IN METODE ZBIRANJA PODATKOV

Viri podatkov o poslovnih subjektih v Poslovnem registru Slovenije so registri, ki jih vodijo pristojna okroûna sodiöËa, upravne enote, organi za notranje zadeve, drugi registrski organi, pooblaöËeni po zakonih, predpisih in drugih aktih, ki so objavljeni v Uradnih listih Republike Slovenije.

V letu 1995 sta bila sprejeta Zakon o Poslovnem registru Slovenije (Ur. l. RS, öt. 13/95) in Uredba o vodenju in vzdrûevanju poslovnega registra Slovenije (Ur. l. RS, öt. 70/95). Urejata vzpostavitev, vodenje in vzdrûevanje Poslovnega registra Slovenije, opredelitev enot v tem registru, doloËanje njihove identifikacije in njeno obvezno uporabo, podatke o enotah in njihovo razvröËanje po dejavnostih Standardne klasifikacije dejavnosti (Ur. l. RS, öt. 34/94, 3/95 in 15/96).

Sprejeta je bila tudi Uredba o uvedbi in uporabi Standardne klasifikacije dejavnosti (Ur. l. RS, öt. 34/94, 3/95, 33/95, 15/96).

Identifikacijo, doloËeno v Poslovnem registru Slovenije, morajo obvezno uporabljati vsi poslovni subjekti v Sloveniji, prav tako tudi podruûnice tujih poslovnih subjektov pri posredovanju podatkov ter poslovanju.

Vsi poslovni subjekti so v Poslovnem registru Slovenije razvröËeni po svoji glavni dejavnosti oziroma po dejavnosti, ki jim je bila doloËena z zakonom ali z aktom o njihovi ustanovitvi.

Od leta 1976 do leta 1994 je StatistiËni urad Republike Slovenije razvröËal vse pravne subjekte in njihove dele v Register podjetij, druûb in drugih organizacij (ROS), za katerega so veljali tile predpisi: Zakon o enotni klasifikaciji dejavnosti (Ur. l. SFRJ, öt. 6/76), Odlok o enotni klasifikaciji dejavnosti (Ur. l. SFRJ, öt. 34/76, 62/77, 72/80, 77/82, 71/83, 68/84,, 28/86, 72/86, 78/87, 63/88, 6/89, 29/90, 47/90), Pravilnik o razvröËanju organizacij in skupnosti (Ur. l. SFRJ, öt. 42/76, 61/77, 5/78, 72/80, 69/83, 4/84), Uredba o razvröËanju organizacij in skupnosti po Enotni klasifikaciji dejavnosti (Ur. l. SFRJ, öt. 43/76, 10/77, 14/78).

V istem obdobju smo vodili, vzdrûevali in razvröËali fiziËne osebe v Enotni register obratovalnic za Republiko Slovenijo (ERO), za katerega pa so veljali tile predpisi: Sploöni zakon o obrtnih delavnicah samostojnih obrtnikov (Ur. l. SFRJ, öt. 14/63), Obrtni zakon (Ur. l. SRS, öt. 1-13/79), Zakon o spremembah in dopolnitvah obrtnega zakona (Ur. l. SRS, öt. 37/85), Pravilnik o vodenju in vzdrûevanju registra obratovalnic v obËini in Enotnega registra obratovalnic za Republiko Slovenijo (Ur. l. SRS, öt. 14/86, 21/87, 34/87), Obrtni zakon (Ur. l. SRS, öt. 35/88), Zakon o gospodarskih druûbah (Ur. l. RS, öt. 30/93, 29/94, 82/94), Pravilnik o naËinu in postopku priglasitve ter o ureditvi vpisnika samostojnih podjetnikov posameznikov (Ur. l. RS, öt. 47/93).

StatistiËni register delovno aktivnega prebivalstva (SRDAP) je bil v StatistiËnem uradu Republike Slovenije vzpostavljen v letu 1986. Redno je aûuriran na podlagi podatkov iz obrazcev Prijava podatkov za uvedbo in vodenje matiËne evidence pokojninskega in invalidskega zavarovanja, evidence zdravstvenega zavarovanja, evidence o sklenitvi delovnega razmerja (M-1, M-2, M-1A, M-3, M-3A).

ZAJETJE PODATKOV

Poslovni register Slovenije zajema vse pravnoorganizacijske oblike poslovnih subjektov ter njihove enote v sestavi, ki jih doloËajo Zakon o podjetjih (Ur. l. SFRJ, öt. 77/88, 40/89, 46/90, 61/90), Zakon o gospodarskih druûbah (Ur. l. RS, öt. 30/93, 29/94, 82/94), Zakon o zadrugah (Ur. l. RS, öt.13/92), Zakon o zavodih (Ur. l. RS, öt. 12/91), Zakon o bankah in hranilnicah (Ur. l. RS, öt. 1/91, 38/92, 46/93), Zakon o gospodarskih javnih sluûbah (Ur. l. öt. 32/93), Zakon o zdruûenem delu (Ur. l. SFRJ, öt. 53/76) in drugi zakoni, ki dajejo posameznim subjektom pravni status.

V Poslovnem registru Slovenije so bile v letu 1996 öe vedno zajete nekatere druge organizacijske oblike, ki so bile ustanovljene po Zakonu o zdruûenem delu (ZZD) in drugih starih zakonih. V registru se bodo vodile, dokler ne bodo usklajene z Zakonom o gospodarskih druûbah in drugih zakonih.

DEFINICIJE

Podjetje je pravna oseba, ki opravlja dejavnosti zaradi pridobivanja dohodka oziroma dobiËka. Podjetja se lahko ustanovijo v druûbeni, zasebni, zadruûni ali meöani lasti in se lahko organizirajo v razliËne

SOURCES AND METHODS OF DATA COLLETION

Sources of data on business units in the Business Register of Slovenia are registers kept by compentent regional courts, communities, bodies of internal affairs and other register bodies authorised by laws, regulations and other legal documents published in Offical Journals of the Republic of Slovenia.

In 1995 a new Law on the Business Register of Slovenia (OJ RS, No. 13/95) and the Decree on Keeping and Maintaining of the Business Register of Slovenia (OJ RS, No. 70/95) were accepted. The two regulate the set-up, managing and maintenance of the Business Register of Slovenia, definition of units in the register, definition of their identification and obligatory use, data on units and their classification by activities of the Standard Classification of Activities (OJ RS, No. 34/94, 3/95, 15/96).

The Decree on Implementation and Use of the Standard Classification of Activities (OJ RS, No. 34/94, 3/95, 33/95, 15/96) was accepted as well.

The identification defined in the Business Register of Slovenia must be used by all bussiness entities in Slovenia, as well as subsidiaries of foreign entities at data mediation and operation.

All business entities are classifield according to their main activity or activity which was appointed to them by the law or by the legal document of their foundation.

From 1976 to 1994 the Statistical Office of the Republic of Slovenia maintained a register of legal entities and their constituent units in the Register of Organizations and Communities (ROS). The legal basis for the register were the Law on the National Classification of Activities (OG SFRY, No. 6/76), the Decree on the National Classification of Activities (OG SFRY, No. 34/76, 62/77, 72/80, 77/82, 71/83, 68/84, 28/86, 72/86, 78/87, 63/88, 6/89, 29/90, 47/90), the Regulations on the Classification of Organizations and Communities by Activities (OG SFRY, No. 42/76, 61/77, 5/78, 72/80, 69/83, 4/84), the Decree on the Classification of Organizations and Communities by the National Classification of Activities (Official Gazete of Socialist Federal Republic of Yugoslavia, No. 43/76, 10/77, 14/78).

In the same period the Statistical Office of the Republic of Slovenia maintained physical persons in the Register of Craft Establishments for the Republic of Slovenia (ERO) on the basis of: the General Law on Craft Establishments of Individual Private Entrepreneurs (OG SFRY, No. 14/63), the Law on Crafts (OG SRS, No. 1-13/79), the Law on Modifications and Supplements of the Law on Crafts (OG SRS, No. 37/85), the Regulation on Keeping and Maintaining the Register of Craft Establishments Within Communities and the Register of Craft Establishments for the Republic of Slovenia (OG SRS, No. 14/86, 21/97, 21/87, 34/87), the Law on Crafts (OJ SRS, 35/88), the Law on Commercial Companies (OJ RS, No. 30/93, 29/94, 82/94), the Regulations on Mode and Procedure of Application and Regulation of the Register of Individual Private Entrepreneurs (OJ RS, No. 47/93).

***Statistical Register of Labour Force** was organised at the Statistical Office of the Republic of Slovenia in 1986. It is regularly updated on the basis of data from the forms Registration of data for introducing and keeping pension and disability insurance records, health insurance records and employment records (M-1, M-2, M-1A, M-3, M-3A).*

COVERAGE

The Business Register of Slovenia covers all legal organizational forms of bussines units and their constituent paits, as determined by the Law on Enterprises (OG SFRY, No 77/88, 40/89, 46/90, 61/90), the Law on Commercial Companies (OJ RS, No. 30/93, 29/94, 82/94), the Law on Cooperatives (OJ RS, No. 30/93), the Law on Institutes (OJ RS, No. 12/91), the Law on Banks and Savings Banks (OJ RS, No. 1/91, 38/92, 46/93), the Law on Public Economic Offices (OJ RS, No. 32/93), the Law on Associated Labour (OG SFRY, No. 53/76) and other laws conferring legal status on given entities.

Sources of data on business units in the Business Register of Slovenia are registers kept by compentent regional courts, communities, bodies of internal affairs and other register bodies authorised by laws, regulations and other legal documents published in Offical Journals of the Republic of Slovenia.

In the Business Register of Slovenia in 1996 still comprised some organizational forms founded upon the Law on Associated Labour and other old laws. They will be kept in the register until they are harmonized with the Law on Commercial Companies and other laws.

Individual private entreprenuers are physical persons, which can be founded in private ownership for self-dependent to profitable activities on the free market.

DEFINITIONS

***An enterprise** is a legal entity that performs economic and other activities to create income or profit. Enterprises can be founded in social, private, cooperative or mixed ownership and can be organized*

pravnoorganizacijske oblike in s kapitalom razliËnega porekla (tuji, meöani, domaËi).

Druűba je pravna oseba, ki na trgu samostojno opravlja pridobitno dejavnost.

Zavod je organizacija, ki se ustanovi za opravljanje dejavnosti vzgoje, izobraűevanja, znanosti, kulture, öporta, zdravstva, socialnega varstva, otroökega varstva, invalidskega varstva itn., Ëe namen poslovanja ni pridobivanje dobiËka.

Samostojni podjetniki posamezniki so fiziËne osebe, ki se ustanovijo v zasebni lasti za samostojno opravljanje pridobitne dejavnosti na prostem trgu.

Zaposlene osebe, vkljuËene v StatistiËni register delovno aktivnega prebivalstva (SRDP), so:

- zaposlene osebe, ki so v delovnem razmerju (pokojninsko in invalidsko ter zdravstveno zavarovane) pri poslovnih subjektih - pravnih osebah ne glede na njihovo lastnino;

1) Vir: Poslovni register Slovenije (PRS).
Source: Business Register of Slovenia.
2) Vir: StatistiËni register delovno aktivnega prebivalstva.
Source: Statistical Register of Labour Force.
3) Do razlike v podatkih med registroma prihaja zato, ker so v Poslovni register Slovenije vkljuËene tudi trenutno neaktivne fiziËne osebe, v StatistiËni register delovno aktivnega prebivalstva pa so vkljuËene tudi fiziËne osebe, ki se öe niso prijavile v PRS (vendar so pokojninsko in invalidsko ter zdravstveno zavarovane).
The discrepancy in data between both registers arises due to the fact that the Business Register of Slovenia comprises also at present inactive physical persons and the Statistical Register of labour force comprises physical persons who have not yet been registered into the Business Register of Slovenia (but have pension and disability insurance and health insurance).

4. PREBIVALSTVO

POPULATION

VIRI IN METODE ZBIRANJA PODATKOV

Viri podatkov so:

- popisi prebivalstva, gospodinjstev in stanovanj;
- letna statistiËna raziskovanja o rojstvih, smrtih, priznanjih in ugotovitvah oËetovstva ter posvojitvah otrok, sklenitvah zakonskih zvez, razvezah zakonskih zvez, selitvah prebivalstva, ki jih izvaja StatistiËni urad Republike Slovenije;
- Centralni register prebivalstva Republike Slovenije; vodi ga StatistiËni urad Republike Slovenije;
- evidenca o tujih drűavljanih Ministrstva za notranje zadeve;
- evidenca RdeËega kriűa Republike Slovenije in Urada za priseljevanje in begunce pri Vladi Republike Slovenije o osebah z zaËasnim zatoËiöËem v Sloveniji.

S popisi prebivalstva zbira StatistiËni urad Republike Slovenije podatke o ötevilËnem stanju in osnovnih strukturah prebivalstva in gospodinjstev. Po I. svetovni vojni je bilo v Sloveniji izvedenih osem popisov prebivalstva: 31. 1. 1921, 31. 3. 1931, 15. 3. 1948, 31. 3. 1953, 31. 3. 1961, 31. 3. 1971, 31. 3. 1981 in 31. 3. 1991. Ob popisih 1971, 1981 in 1991 je bil hkrati opravljen tudi popis stanovanj, ob popisu 1991 pa öe popis gospodinjstev s kmeËkim gospodarstvom.

Osnovni podatki popisov prebivalstva so prikazani najprej za ozemlje Slovenije ob popisih, nato pa öe za sedanje ozemlje naöe drűave. V popisih leta 1921 in 1931, ko je bilo ozemlje Slovenskega primorja priklju Ëeno k Italiji, so bili prebivalci tega obmoËja popisani v italijanskih popisih prebivalstva. Ker ta dva popisa v Sloveniji in Italiji nista bila izvedena hkrati, so osnovni podatki za omenjeni del ozemlja ocenjeni. V Ëasu popisov 1948 in 1953 je bilo zunaj danaönjih meja Slovenije Svobodno trűaöko ozemlje, razdeljeno v coni A in B. Za cono B je bilo 15. 12. 1948 izvedeno delno ötetje prebivalstva, soËasno z zbiranjem prijav za preskrbo z űivilskimi kartami. Cona B je bila priklju Ëena k Sloveniji leta 1954. Prvo evidentiranje prebivalstva na tem ozemlju je bilo izvedeno 25. 4. 1956.

Podatke o prebivalstvu objavljamo tudi na podlagi:

- bilanËnega izraËuna ötevila prebivalstva (od leta 1920 do leta 1953);
- obËinskih registrov stalnega prebivalstva (od leta 1954 do leta 1984);
- Centralnega registra prebivalstva (od leta 1985 do leta 1994);
- spremenjene definicije prebivalstva (od leta 1995).

PoroËevalske enote za vitalno in selitveno statistiko prebivalstva so oddelki za upravne notranje zadeve, le za razveze zakonskih zvez so poroËevalske enote okroűna sodiöËa.

StatistiËni urad Republike Slovenije zbira podatke o:

- rojstvih, smrtih, priznanjih in ugotovitvah oËetovstva ter posvojitvah otrok, sklenitvah zakonskih zvez z obrazci, ki jih na osnovi vpisov in zaznamb v matiËne knjige, izpolnjujejo delavci oddelkov za upravne notranje zadeve pri upravnih enotah;
- vzroku smrti z obrazci, ki jih izpolnjujejo zdravniki - mrliöki ogledniki ali obducenti;
- razvezah zakonskih zvez z obrazci, ki jih izpolnjujejo sodniki okroűnih sodiöË na podlagi sodb o razvezah zakonskih zvez.

StatistiËni urad Republike Slovenije zbira te podatke po kraju dogodka, rezultate pa objavlja po stalnem prebivaliöËu:

- pri rojstvu po stalnem prebivaliöËu matere ob otrokovem rojstvu;
- pri priznanju in ugotovitvi oËetovstva po stalnem prebivaliöËu otroka;
- pri posvojitvi po stalnem prebivaliöËu posvojitelja;
- pri smrti po zadnjem stalnem prebivaliöËu umrle osebe;
- pri sklenitvi zakonske zveze po stalnem prebivaliöËu űenina pred sklenitvijo zakonske zveze;
- pri razvezi zakonske zveze po zadnjem skupnem stalnem prebivaliöËu moűa in űene pred razvezo zakonske zveze.

Podatke o selitvah prebivalstva posreduje StatistiËnemu uradu Republike Slovenije Ministrstvo za notranje zadeve na podlagi podatkov o prijavi, odjavi, spremembi stalnega prebivaliöËa v Sloveniji na elektronskih medijih. Za priselitve tujih drűavljanov v letih 1995 in 1996 pa je posredovalo agregirane podatke na podlagi svoje evidence o tujcih v Sloveniji.

SOURCES AND METHODS OF DATA COLLECTION

Sources of data are:

- *censuses of the population, households and housing,*
- *national annual statistical surveys on births, deaths, acknowledgment and ascertainment of paternity, child adoptions, marriages, divorces and migration, conducted by the Statistical Office of the Republic of Slovenia,*
- *the Central Register of Population of the Republic of Slovenia kept by the Statistical Office of the Republic of Slovenia,*
- *records of foreigners provided by the Ministry of Internal Affairs,*
- *records of persons under temporary protection in Slovenia, provided by the Red Cross of the Republic of Slovenia and the Office of Immigration and Refugees of the Government of the Republic of Slovenia.*

Population censuses are used to compile data on the size and basic structure of the population and households. Eight censuses have been carried out on the territory of Slovenia after the First World War: 31 January 1921, 31 March 1931, 15 March 1948, 31 March 1953, 31 March 1961, 31 March 1971, 31 March 1981 and 31 March 1991. During the censuses in 1971, 1981 and 1991 a census of dwellings was also carried out, and a census of agricultural holdings in 1991.

The basic data from the censuses of population are shown first by the territory at the time of the census and then for the current territory of Slovenia. At the time of the censuses in 1921 and 1931 the Slovenian coast belonged to Italy so the population of this region was registered in the Italian population census. These censuses did not coincide with the censuses in the Republic of Slovenia, therefore the data for these territories are estimated for both years. At the time of the censuses in 1948 and 1953 the Free Territory of Trieste was outside the current borders of Slovenia and divided into Zone A and Zone B. On 15 December 1948 a partial population count was carried out in Zone B connected with the registration for food coupons. Zone B was incorporated into the Republic of Slovenia in 1954. The first registration of population on this territory was carried out on 25 April 1956.

Data on population are published on the basis of:

- *balance calculation of the size of the population (from 1920 to 1953),*
- *municipal registers of permanent population (from 1954 to 1984),*
- *Central Register of Population (from 1985 to 1994),*
- *modified definition of population (from 1995).*

The reporting units for births and deaths, marriage, and migration statistics of the population are the municipal administrative bodies of internal affairs. The courts are the reporting units only in the case of divorce statistics.

The Statistical Office of the Republic of Slovenia collects data on:

- *births, deaths, acknowledgment of paternity, ascertainment of paternity, child adoption and marriages on forms filled in by employees of the administrative units of the departments of internal affairs based on entries and records in the register,*
- *cause of death on forms filled in by coroners,*
- *divorces on forms filled in by district court judges based on legally effective sentences on divorces.*

The Statistical Office of the Republic of Slovenia collects these data according to the place of event, and the results are published by permanent residence:

- *permanent residence of mother at child birth,*
- *permanent residence of child at acknowledgment and ascertainment of paternity,*
- *permanent residence of adopter at adoption,*
- *the last permanent residence of dead person at death,*
- *at marriage permanent residence of groom before marriage,*
- *at divorce the last common permanent residence of husband and wife before divorce.*

Data on migration of population are mediated by the Ministry of Internal Affairs to the Statistical Office of the Republic of Slovenia, based on information on registrations, departure notices, and changes of permanent residence in Slovenia. Aggregated data on immigrations of foreign citizens for 1995 and 1996 are supplied on the basis of the records on foreigners in Slovenia.

Podatki za Ëasovne vrste niso popolnoma primerljivi. Do leta 1992 so v njih upoötevane selitve drűavljanov SFR Jugoslavije (drűavljanov vseh republik nekdanje Jugoslavije, ki so se priselili v Slovenijo oziroma odselili iz Slovenije ali so se selili znotraj njenega obmoËja).

Od leta 1992 so upoötevane le selitve drűavljanov Republike Slovenije. Po slovenskih zakonskih predpisih s podroËja osebnih stanj so nekdanji drűavljani SFR Jugoslavije postali tujci, Ëe niso sprejeli oziroma niso izpolnjevali pogojev za pridobitev drűavljanstva Republike Slovenije.

Za leti 1995 in 1996 so v podatkih za priselitve v Slovenijo in odselitve iz Slovenije upoötevani tudi podatki o selitvah tujih drűavljanov. Podatki za odselitve tujih drűavljanov so ocenjeni na osnovi podatkov o ötevilu in naravnem gibanju tujih drűavljanov v Sloveniji.

Koeficienti, strukture in vsa druga relativna ötevila so izraËuni StatistiËnega urada Republike Slovenije. Nekatere vrednosti kazalnikov, ki jih je v svojih publikacijah do leta 1989 objavljal tudi Zvezni zavod za statistiko, se od izraËunov StatistiËnega urada Republike Slovenije razlikujejo. Zvezni zavod za statistiko pri raËunanju ötevila prebivalstva ni upoöteval selitvenega prirasta, ki je bil za Slovenijo od leta 1957 stalno pozitiven. Zato imajo izraËuni zveznega zavoda viöje vrednosti.

StatistiËni urad Republike Slovenije je pri svojih izraËunih upoöteval ötevilo prebivalstva po starosti in spolu na dan 30. junija:

- do leta 1980 ocene Zveznega zavoda za statistiko (za tiste kazalnike, ki jih raËunamo na podlagi starostne strukture) oziroma podatke StatistiËnega urada Republike Slovenije (za kazalnike, ki jih raËunamo le na podlagi skupnega ötevila prebivalstva);
- od leta 1981 do leta 1985 ocene StatistiËnega urada Republike Slovenije;
- od leta 1986 do leta 1994 podatke Centralnega registra prebivalstva;
- od leta 1995 podatke po spremenjeni definiciji prebivalstva.

Data for time series are not entirely comparable. Until 1992 data on migration included migration of citizens of the SFR Yugoslavia (citizens of all republics of the former Yugoslavia who took up permanent residence in Slovenia or left permanent residence in Slovenia or changed their permanent residence in Slovenia).

Since 1992 only migration of citizens of the Republic of Slovenia are included. According to legal regulations of Slovenia concerning personal conditions, the ex-citizens of the SFR Yugoslavia who did not accept or fulfill conditions of acquiring citizenship of the Republic of Slovenia became foreigners.

For 1995 and 1996 data on immigration and emigration in Slovenia include also the data on migration of foreign citizens. Data on emigration of foreign citizens are estimated on the basis of the size and natural changes of foreign citizens in the Republic of Slovenia.

Coefficients, structures and all other relative figures are calculated by the Statistical Office of the Republic of Slovenia. Some values of indicators, published also by the Federal Statistical Office until 1989, differ from the calculations of the Statistical Office of the Republic of Slovenia. In the calculation of the size of the population the Federal Statistical Office did not take into account population growth through migration which has had a positive effect on the size of the Slovenian population since 1957. So the figures calculated by the Federal Office are higher.

Statistical Office of the Republic of Slovenia took into account the size of the population by age and sex as of 30 June in its calculations:

- *until 1980 estimations of the Federal Statistical Office (for indicators calculated on age structure), or data of the Republic of Slovenia (for indicators calculated on total number of population),*
- *from 1981 to 1985 estimations of the Statistical Office of the Republic of Slovenia,*
- *from 1986 to 1994 data of the Central Register of Population,*
- *from 1995 data according to the modified definition of the population.*

DEFINICIJE

Aktivnost je ekonomski znak, na podlagi katerega delimo prebivalstvo na: aktivne osebe, osebe z lastnimi dohodki in vzdrűevane osebe.

Aktivni prebivalec je oseba, ki:

- opravlja poklic in za svoje delo prejema dohodke v denarju ali naravi; v kmeËkih gospodinjstvih sta aktivni osebi tudi pomagajoËi druűinski Ëlan (oseba, starejöa od 14 let, ki ne obiskuje öole) in kmeËka gospodinja, ki veËinoma opravlja kmeËka dela;
- ne opravlja poklica, ker prviË ali ponovno iöËe zaposlitev, ali je prekinila delo, ker sluűi vojaöki rok, je v priporu ali prestaja zaporno kazen.

Oseba z lastnimi dohodki je oseba, ki ni aktivna, je pa ekonomsko samostojna, ker űivi od dohodkov svoje prejönje zaposlitve (upokojenec, delovni invalid itd.) ali prejönje zaposlitve enega od oűjih druűinskih Ëlanov (druűinski upokojenec) ali se preűivlja s socialno podporo, ötipendijo, rento ipd.

Vzdrűevana oseba je oseba, ki nima lastnih sredstev za preűivljanje in jo zato vzdrűujejo staröi, sorodniki ali drugi.

Druűina je űivljenjska skupnost:

- staröev (obeh ali enega) in njihovih neporoËenih otrok, ki űivijo v istem gospodinjstvu; starost otrok ni omejena, vendar pa le-ti nimajo svoje druűine oziroma ne űivijo v zunajzakonski skupnosti;
- moűa in űene brez otrok oziroma moökega in űenske, ki űivita v zunajzakonski skupnosti.

Drűavljan Republike Slovenije je oseba z drűavljanstvom Republike Slovenije in stalnim prebivaliöËem v Sloveniji.

Drűavljan Republike Slovenije, ki je zaËasno odöel v tujino, je drűavljan Republike Slovenije s stalnim prebivaliöËem v Sloveniji, ki je odöel v tujino za veË kot tri mesece in je svoj odhod prijavil v upravni enoti svojega stalnega prebivaliöËa.

Drűavljan Republike Slovenije, ki se je vrnil iz tujine, je drűavljan Republike Slovenije s stalnim prebivaliöËem v Sloveniji, ki se je vrnil iz tujine po veË kot treh mesecih in je pred odhodom v tujino svoj odhod prijavil v upravni enoti svojega stalnega prebivaliöËa.

Gospodinjstvo je:

- skupnost oseb, ki izjavijo, da skupaj stanujejo in skupaj porabljajo dohodke za osnovne űivljenjske potrebe (stanovanje, hrano, ipd.);

DEFINITIONS

***Activity** is an economic category by which the population is divided into: active population, people with their own income and dependents.*

***An economically active inhabitant** is a person, who:*

- *performs an occupation and receives payment for his/her work in money or in kind. In agricultural households, active person are also an unpaid family member who works in the agricultural household (a person over 14 who does not attend school) and the agricultural housewife who is predominantly involved in agricultural work;*
- *does not perform an occupation because he/she is seeking a job for the first time, for the subsequent time, he/she interrupted work because of military service, or is in detention or serving a prison sentence.*

***A person with his/her own income** is a person who is not economically active but is financially independent because he/she lives off income from his/her previous employment (pensioner, disabled worker, etc.) or previous employment of a member of his/her nuclear family (family pensioner) or lives off his/her social benefit, scholarship, rent, etc.*

***A dependent** is a person who does not have his/her own income and is therefore supported by parents, relatives or others.*

***A family** is a community of:*

- *parents (both or one) and their unmarried children living in the same household; the age of children is not limited, but they must not have their own families or live in a consensual union;*
- *husband and wife without children or man and woman living in a consensual union.*

***A citizen of the Republic of Slovenia** is a person with Slovenian citizenship and permanent residence in Slovenia.*

***A citizen of the Republic of Slovenia temporarily residing abroad** is a citizen of the Republic of Slovenia with permanent residence in Slovenia who emigrated temporarily abroad for more than three months and gave notice of his/her departure at the administrative body.*

***A citizen of the Republic of Slovenia returning from abroad** is a citizen of the Republic of Slovenia who emigrated abroad for more than three months and gave notice of his/her departure at the administrative body, and after returning from abroad registered his/her return.*

***A household** is:*

- *a community of persons who declare that they live together and share their income for covering the basic costs of living*

navadno vsi Ëlani enega gospodinjstva ůivijo skupaj, lahko pa kak Ëlan zaËasno dlje Ëasa ůivi drugje zaradi dela, öolanja ali drugih vzrokov;

- oseba, ki ůivi sama ali z drugimi osebami, s katerimi ne porablja dohodkov za preůivljanje in ni Ëlan drugega gospodinjstva.

Mrtvorojeni je otrok, ki je bil rojen oziroma izloËen iz materinega telesa brez znakov ůivljenja (ni dihal, ni gibal, srce ni utripalo), in je:

- noseËnost trajala 28 dopolnjenih tednov ali veË ter je plod tehtal manj kot 500 gramov;
- noseËnost trajala manj kot 28 tednov, plod pa je tehtal veË kot 500 gramov.

Naravni prirast je razlika med ötevilom ůivorojenih otrok in ötevilom umrlih na doloËenem obmoËju v koledarskem letu.

Narodna pripadnost je pripadnost narodu ali narodnosti. Skladno z naËeli ustave o enakopravnosti narodov in narodnosti ima oseba pravico, da svobodno izraůa pripadnost narodu ali narodni skupnosti (Ustava Republike Slovenije, Ur. l. RS, öt. 33/91-I, Ëlen 61). NatanËnejöa pojasnila so objavljena v StatistiËnih informacijah öt. 30/1992 - Popis prebivalstva, gospodinjstev, stanovanj in kmeËkih gospodarstev v Republiki Sloveniji v letu 1991.

Notranja selitev je sprememba naselja prebivaliöËa osebe na obmoËju Slovenije.

Odseljeni je prebivalec Slovenije, ki:

- je v Sloveniji odjavil prebivaliöËe z namenom, da se bo odselil v tujino;
- se je odselil v drugo naselje, obËino v Sloveniji.

Poklic je delo, ki ga oseba opravlja zato, da si pridobi sredstva za preůivljanje.

Posvojitev je postopek, ko oseba (osebi razliËnega spola) skladno z veljavnimi zakonskimi predpisi posvoji (posvojita) otroka.

Prebivalec je oseba, ki ima v Sloveniji stalno, zaËasno prebivaliöËe ali z drugimi predpisi urejeno prebivaliöËe. Glede na vir podatka je definicija prebivalstva razliËna.

1. Popisi prebivalstva

V podatkih popisov pred 2. svetovno vojno je bilo prikazano prisotno (de facto) prebivalstvo.

V podatkih popisov po 2. svetovni vojni je bilo upoötevano prebivalstvo s stalnim prebivaliöËem v Sloveniji (de jure). Upoötevane so bile osebe, ki so izjavile, da imajo v naselju popisa stalno prebivaliöËe (drůavljani Republike Slovenije, tuji drůavljani in osebe brez drůavljanstva), ne glede na to, ali so bile ob popisu zaËasno odsotne. ZaËasno odsotne so bile osebe, ki so bile odsotne krajöi Ëas, in tudi osebe na delu v tujini ter njihovi druůinski Ëlani, ki so z njimi ůiveli v tujini (zdomci), ne glede na trajanje dela oziroma prebivanja v tujini.

V popisih 1948, 1953, 1961 in 1971 je bilo za zaposlene osebe, ki se niso dnevno vraËale v naselje stalnega prebivaliöËa, upoötevano naselje dela kot naselje stalnega prebivaliöËa.

2. ObËinski registri prebivalstva

Od leta 1954 do leta 1984 so podatki o ötevilu prebivalstva Slovenije zraËunani in objavljeni iz podatkov obËinskih registrov stalnega prebivalstva. ZraËunani so tako, da so podatkom o ötevilu prebivalstva obËin na zaËetku leta prioteti oziroma odöteti podatki o naravnem in selitvenem gibanju prebivalstva na obmoËju obËin ter popravki v obËinskem registru stalnega prebivalstva, ki so vplivali na njegovo ötevilo.

V podatkih o ötevilu prebivalstva Slovenije po registrih stalnega prebivalstva obËin so upoötevani prebivalci, ki so imeli prijavljeno stalno prebivaliöËe v Sloveniji, ne glede na to, ali so zaËasno ůiveli v tujini.

3. Centralni register prebivalstva

Od leta 1985 so podatki o ötevilu prebivalstva objavljeni po podatkih Centralnega registra prebivalstva. Ta je zbir podatkov o prebivalcih, ki imajo prijavljeno stalno prebivaliöËe v Sloveniji, ne glede na to, ali zaËasno ůivijo v tujini in so pred odhodom tja svoj odhod prijavili pristojnemu uradu. Tuji drůavljani, ki imajo stalno prebivaliöËe v

(accommodation, food, etc.). Usually all members of one household live together. A member of a household can, however, temporarily for a longer time live apart because of work, schooling or other reasons;

- *a person who lives alone or with other persons with whom he/she does not share income for covering the basic costs of living and he/she is not a member of another household.*

***A stillborn** is a child born or extracted from its mother' s body without signs of life (no breathing, no moving, no beating of the heart) and:*

- *the pregnancy lasted 28 completed weeks or more, the foetus was less than 500 grams in weight;*
- *the pregnancy lasted less than 28 weeks, the foetus was more than 500 grams in weight.*

***Natural increase** is the difference between the number of live-born children and the number of deaths for a given area in the calendar year.*

***Ethnic affiliation** is being a member of a nation or ethnic group. In accordance with the constitutional principles of the equality of nations and ethnic groups, a person has a right to declare his/her ethnic affiliation (Constitution of the Republic of Slovenia, Official Journal of RS, No. 33/91-I, article 61). More exact explanations are published in Rapid Reports No. 30/1992 Census of the Population, Households, Housing and Agricultural Holdings in the Republic of Slovenia in 1991.*

***Internal migration** is a change of settlement of person' s residence on the territory of Slovenia.*

***An emigrant** is a resident of Slovenia who:*

- *in Slovenia gave notice of leaving his/her permanent residence with the intention of emigrating abroad,*
- *emigrated to another settlement or municipality in Slovenia.*

***Occupation** is work a person performs in order to earn a living.*

***Adoption** is a procedure in which a person (persons of opposite sexes) adopt(s) a child in accordance with the valid legal regulations.*

***A resident** is a person with permanent, temporary or another legally determined residence in Slovenia. The definition is different according to the source of data.*

1. Population censuses

Census data in the period before the Second World War took into consideration present (de facto) population.

Census data in the period after the Second World War took into consideration persons with permanent residence in Slovenia (de jure). Included are persons who stated that they were permanently residing in the census settlement (citizens of the Republic of Slovenia, foreign citizens and persons without citizenship), irrespective of whether they were temporarily absent at the time of census. Considered as temporarily absent were those persons who were, for short periods, away from their settlement of permanent residence and also persons who were working abroad, together with those family members who were living with them abroad (migrant workers), irrespective of the duration of their work or residence abroad.

In the censuses of 1948, 1953, 1961 and 1971, the working settlement was considered as the settlement of permanent residence for employed persons who did not return daily to their settlement of permanent residence.

2. Municipal registers of population

Between 1954 and 1984 data on the population of Slovenia were calculated and published on the basis of data from municipal registers of permanent population. They were calculated in such a way that data on natural and migration movements of the population within the area of the community, together with corrections in the municipal register of permanent residence that might have affected the number of residents, were added or subtracted from the population of the community at the beginning of the month.

Data on the population of Slovenia according to municipal registers of permanent population include residents registered as permanent residents of Slovenia irrespective of whether they were temporarily living abroad.

3. The Central Register of Population

Since 1985 data on the number of population have been published according to the information provided by the CRP. The CRP is a collection of data on population registered as permanent residents in Slovenia irrespective of whether they are temporarily living abroad and whether they gave notice of departure in the administrative unit of their

Sloveniji, niso vkljuËeni v Centralni register prebivalstva.

V ötevilu prebivalstva Slovenije so do 25. junija 1991 upoötevani prebivalci, ki so imeli prijavljeno stalno prebivaliöËe v Sloveniji. To so bili drűavljani nekdanje SFR Jugoslavije (drűavljani SR Slovenije in drűavljani drugih republik nekdanje SFR Jugoslavije).

Po 25. juniju 1991 so v ötevilu prebivalstva Slovenije upoötevani:

- drűavljani Republike Slovenije s stalnim prebivaliöËem v Sloveniji,
- osebe, ki so bile do 25. 6. 1991 drűavljani nekdanje SFR Jugoslavije in so imele takrat prijavljeno stalno prebivaliöËe v Sloveniji, a si niso pridobile drűavljanstva Republike Slovenije oziroma drűavljanstva druge drűave.

Zaradi popravkov v obËinskih registrih stalnega prebivalstva oziroma popravkov v Centralnem registru prebivalstva izraËuni ötevila prebivalstva po stanju na zaËetku leta in podatkov naravnega in selitvenega gibanja prebivalstva za vse leto niso enaki stanju ötevila prebivalstva ob koncu leta.

4. Spremenjena definicija prebivalstva

V letu 1995 je StatistiËni urad Republike Slovenije pripravil novo definicijo prebivalstva, ki uradno öe ni sprejeta. Podatki za leti 1995 in 1996 so objavljeni po definiciji, ki je z novo definicijo prebivalstva űe delno usklajena. Skladno z njo so prebivalstvo Slovenije:

- drűavljani Republike Slovenije s stalnim prebivaliöËem v Sloveniji brez tistih, ki so odöli v tujino za veË kot tri mesece in so svoj odhod prijavili v upravni enoti svojega stalnega prebivaliöËa;
- tuji drűavljani v Republiki Sloveniji z izdanim dovoljenjem za stalno prebivanje v Republiki Sloveniji, ki so v Sloveniji prijavili stalno prebivaliöËe;
- tuji drűavljani v Republiki Sloveniji z izdanim dovoljenjem za zaËasno prebivanje v Republiki Sloveniji, ki so v Sloveniji prijavili zaËasno prebivaliöËe;
- tuji drűavljani v Republiki Sloveniji z veljavnim delovnim ali poslovnim vizumom, ki so v Sloveniji prijavili zaËasno prebivaliöËe;
- osebe z zaËasnim zatoËiöËem v Republiki Sloveniji (zaËasni begunci);
- begunci, ki jim je bil po Zakonu o tujcih priznan status begunca v Republiki Sloveniji.

Obseűnejöa pojasnila za podatke popisov prebivalstva, gospodinjstev in stanovanj so objavljena v Rezultatih raziskovanj öt. 617/1994, za podatke vitalne in selitvene statistike v Rezultatih raziskovanj öt. 685/1997 in za ötevilo prebivalstva po spremenjeni definiciji v StatistiËni informaciji öt. 93/1997.

PriËakovano trajanje űivljenja je povpreËno ötevilo let űivljenja, ki jih öe lahko priËakuje oseba, stara toËno x let, Ëe bo umrljivost po starosti v Ëasu űivljenja te osebe enaka vrednostim umrljivosti v tablicah umrljivosti za opazovano leto.

Priseljeni je prebivalec, ki se je v Slovenijo:

- priselil iz tujine in v Sloveniji prijavil prebivaliöËe;
- priselil v drugo naselje, obËino v Sloveniji in tam prijavil prebivaliöËe.

Priznanje oËetovstva je postopek, ko moöki skladno z veljavnimi zakonskimi predpisi prizna otroka za svojega.

Projekcija prebivalstva je izraËun verjetnega prihodnjega ötevila in sestave prebivalstva po razliËnih znakih. (IzhodiöËe projekcije so podatki Centralnega registra prebivalstva po stanju 1. 1. 1992.)

Selitev je sprememba naselja prebivaliöËa osebe.

Selitveni prirast je razlika med ötevilom priseljenih in odseljenih oseb na doloËenem obmoËju v koledarskem letu.

Starost je Ëas, ki ga je oseba preűivela od rojstva do trenutka opazovanja (popis, stanje) oz. do opazovanega dogodka (rojstvo prvega otroka, sklenitev zakonske zveze). Prikazana je v dopolnjenih letih, starost umrlih dojenËkov pa tudi v mesecih, dnevih in urah.

äolska izobrazba je najviöja stopnja izobrazbe, ki si jo je oseba pridobila z dokonËano redno öolo, öolo za izobraűevanje ob delu, opravljenimi izpiti na redni öoli ali z dokonËanjem teËajev, s katerimi je oseba po veljavnih predpisih dosegla doloËeno öolsko izobrazbo.

permanent resident. Foreign citizens with permanent residence in Slovenia are not included in the CRP.

Until 25 June 1991 the number of residents had included those who were registered as permanent residents in Slovenia. These were citizens of the former Socialist Federal Republic of Yugoslavia (citizens of the Socialist Republic of Slovenia and citizens of other republics of the former SFR Yugoslavia).

After 25 June 1991 in the number of residents are included:

- *citizens of the Republic of Slovenia with permanent residence in the Republic of Slovenia,*
- *persons who until 25 June 1991 were citizens of the former SFR Yugoslavia and were registered as permanent residents Slovenia at the time but did not acquire citizenship of the Republic of Slovenia or citizenship of any other country.*

Due to corrections made in municipal registers of permanent population and those made in the CRP, calculations of the number of population at the beginning of the year and data on natural and migration movements of residents for the whole year are not the same as the number of population calculated at the end of the year.

4. Modified definition of population

In 1995 the Statistical Office of the Republic of Slovenia prepared a modified definition of the population which has not yet been officially adopted. The data for 1995 and 1996 are published according to a definition which is partly harmonised with the new one. The population of Slovenia are:

- *citizens of the Republic of Slovenia with permanent residence in Slovenia, excluding those who went abroad for more than three months and gave notice of their departure in the administrative unit of their permanent residence,*
- *foreign citizens in the Republic of Slovenia with issued permission for permanent residing in the Republic of Slovenia, who registered a permanent residence in Slovenia,*
- *foreign citizens in the Republic of Slovenia with issued permission for temporary residing in the Republic of Slovenia, who registered a temporary residence in Slovenia,*
- *foreign citizens in the Republic of Slovenia with a valid work permit or business visa, who registered a temporary residence in Slovenia,*
- *persons under temporary protection in the Republic of Slovenia (temporary refugees),*
- *refugees on the basis of the Law on Foreigners whose refugee status was granted in the Republic of Slovenia.*

More extensive explanations for data of censuses of the population, households, and housing are published in Results of Surveys, No. 617/1994, for data of vital and migration statistics in Results of Surveys, No. 685/1997, and for the number of population in 1995 in Rapid Reports, No. 93/1997.

***Life expectancy** is the average number of years to be lived by a person, aged exactly x years, if the mortality by age during his/her lifetime remains the same as the values of the life tables for the observed year.*

***An immigrant** is a resident of Slovenia who:*

- *immigrated from abroad and registered his/her residence in Slovenia,*
- *immigrated to another settlement or municipality in Slovenia and registered his/her residence there.*

***Acknowledgment of paternity** is a procedure in which a man in accordance with the valid legal regulations acknowledges a child to be his own.*

***Population projection** is the calculation of the probable future number and structure of population by various indicators. (The basis for the projection are data from the Central Register of Population as of 1 January 1992).*

***Migration** is the change of settlement of residence of a person.*

***Net migration** is the difference between the number of immigrants and the number of emigrants for a given area in the calendar year.*

***Age** is the period of time a person has lived from his/her birth to the moment of observation (census, time cross-section) or until the observed event (birth of the first child, marriage). It is expressed by completed years of age, and infant mortality also by months, days and hours.*

***Educational attainment** is the highest education a person obtained by finishing a regular school or a school for adults, by passing examinations at a regular school or by finishing courses with which according to the valid regulations he/she obtained certain education.*

Tuji drűavljan v Sloveniji je:

- oseba z drűavljanstvom tuje drűave in izdanim dovoljenjem za stalno oziroma zaËasno prebivanje v Sloveniji, ki je v Sloveniji prijavila stalno oziroma zaËasno prebivaliöËe;
- oseba z drűavljanstvom tuje drűave in veljavnim delovnim ali poslovnim vizumom, ki je v Sloveniji prijavila zaËasno prebivaliöËe;
- oseba brez ugotovljenega drűavljanstva oziroma brez drűavljanstva in s stalnim oziroma zaËasnim prebivaliöËem v Sloveniji, ki je bila drűavljan nekdanje SFR Jugoslavije, »eökoslovaöke, Sovjetske zveze oziroma kake druge drűave.

Vzroki smrti so vse bolezni, bolezenska stanja ali poökodbe, ki so povzroËile smrt ali so prispevale k smrti, in okoliöËine nezgode ali nasilja, ki so povzroËile take poökodbe.

Osnovni vzrok smrti je:

- bolezen ali poökodba, ki je povzroËila vrsto dogodkov, ki so privedli neposredno do smrti,
- okoliöËine nezgode ali nasilja, ki so povzroËile poökodbo, zaradi katere je oseba umrla.

Vzroki smrti so razvröËeni po Mednarodni klasifikaciji bolezni, poökodb in vzrokov smrti - IX. revizija, izdana leta 1975.

Zdomec (delavec na delu v tujini in njegovi druűinski Ëlani, ki z njim űivijo v tujini) je prebivalec Republike Slovenije, ki je v Ëasu opazovanja delal v tujini pri tujem delodajalcu ali samostojno oziroma je bil druűinski Ëlan le-tega in je z njim űivel v tujini. Ni pomembno, koliko Ëasa je tam delal oziroma űivel.

éivorojen je otrok, ki je takoj po rojstvu pokazal znake űivljenja (dihanje, srËni utrip, trzanje miöic), Ëeprav le za krajöi Ëas. Trajanje noseËnosti ni pomembno.

Foreign citizen in the Republic of Slovenia *is:*

- *person with foreign citizenship and permission for permanent or temporary residing in Slovenia, who registered their residence in Slovenia,*
- *person with foreign citizenship and valid work permit or business visa, who registered their temporary residence in Slovenia,*
- *person without established citizenship or without citizenship, who was citizen of the former SFR Yugoslavia, Czechoslovakia, Soviet Union or some other countries, but has permanent or temporary residence in Slovenia.*

Causes of death *are all illnesses or injuries which caused death or contributed to death, and the circumstances of the accident or violence which caused such injuries.*

The basic cause of death *is:*

- *the illness or injury which caused the sequence of events which led directly to death,*
- *the circumstances of the accident or violence which caused the fatal injury.*

The causes of death are classified according to the International Classification of Illness, Injury and Causes of Death - IX. revision, published in 1975.

A migrant worker (worker abroad together with those family members who are living with him/her abroad) *is an inhabitant of the Republic of Slovenia who in time of statistical observation worked abroad at an employer or independently, or was a family member of the same and lived with him/her. It is not important how long the person worked or lived abroad.*

A live-born *is a child who immediately after birth showed signs of life (breathing, beating of the heart, muscle twitch), even though only for a short period. Duration of pregnancy is not important.*

5. VOLITVE

ELECTIONS

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o izvoljenih delegatih skupöËin so za leto 1990 posredovale obËinske volilne komisije in kadrovske sluûbe skupöËin obËin. Podatke o deleûih strank, ki so jih dobile na volitvah, nam je posredovala Republiöka volilna komisija.

Ob volitvah 1992 je StatistiËni urad Republike Slovenije podatke o kandidatih drûavnega zbora in drûavnega sveta zbiral na individualnih obrazcih (VO-DZ in VO-DS), podatke o izvoljenih poslancih oz. izvoljenih ËlanIh drûavnega sveta ter podatke o izvolitvi predsednika Republike Slovenije pa smo dobili na disketah od Republiöke volilne komisije.

Podatke o volitvah v drûavni zbor za leto 1996 nam je posredovala Republiöka volilna komisija.

Podatke v prvem in drugem krogu izvoljenih ûupanov mestnih in drugih obËin leta 1994 smo prejeli na disketah od Republiöke volilne komisije.

Individualne podatke o izvoljenih ËlanIh obËinskih svetov za leto 1994 so nam poslale obËinske volilne komisije po objavi v uradnih glasilih. Deleûe glasov, ki so jih dobile posamezne stranke pri volitvah ËlanIh obËinskih svetov, nam je prav tako posredovala Republiöka volilna komisija.

Podatke o plebiscitu 23. 12. 1990 nam je posredovala Republiöka volilna komisija.

Leta 1975 je bilo uvedeno republiöko raziskovanje o samoprispevkih. Od takrat zbiramo preko obËinskih skupöËin tudi podatke o vseh uvedenih samoprispevkih.

ZAJETJE

V podatkih so zajeti vsi kandidati in izvoljeni poslanci drûavnega zbora ter ËlanI drûavnega sveta in vsi izvoljeni ûupani mestnih in drugih obËin ter izvoljeni ËlanI obËinskih svetov.

V raziskovanje o samoprispevkih so zajeti vsi samoprispevki obËin, krajevnih skupnosti in njihovih delov, uvedeni do leta 1975, ko se je to raziskovanje zaËelo. Z letnimi raziskovanji o samoprispevkih dobivamo podatke o novo uvedenih samoprispevkih. Zajetje je popolno.

DEFINICIJE

Drûavni zbor je zakonodajno telo, sestavljajo ga poslanci drûavljanov Slovenije in öteje **90** poslancev.

Poslanci so predstavniki ljudstva in pri opravljanju poslanskega mandata niso vezani na kakröna koli navodila. Poslanski mandat opravljajo v skladu z ustavo, zakonom in poslovnikom drûavnega zbora. Poslanci drûavnega zbora se volijo iz list kandidatov, ki jih predlagajo politiËne stranke in volivci.

Lista kandidatov je seznam kandidatov, ki jih predlagajo politiËne stranke ali volivci v volilni enoti.

Volilne komisije in volilni odbori so organi za izvedbo drûavnozborskih volitev.

Drûavni svet je zastopstvo nosilcev socialnih, gospodarskih, poklicnih in lokalnih interesov. Drûavni svet izvaja civilnodruûbeni nadzor nad strankarsko sestavljenim drûavnim zborom in vpliva na delo in odloËitve ter lahko izreËe veto na zakone, ki jih predlaga drûavni zbor. Drûavni svet ima **40** Ëlanov. Mandat Ëlanov drûavnega sveta traja 5 let. Organi za izvedbo volitev Ëlanov drûavnega sveta v lokalnih skupnostih so lokalne volilne komisije in Republiöka volilna komisija, za Ëlane drûavnega sveta interesnih organizacij pa Republiöka volilna komisija.

éupan predstavlja in zastopa obËino. Voli se po veËinskem naËelu. Pravico voliti in biti izvoljen za ûupana ima vsak obËan, ki ima volilno pravico pri volitvah v obËinski svet. Predlagatelji kandidatov za ûupane so politiËne stranke in skupine volivcev.

ObËinski svet je predstavniöko telo in je najpomembnejöi organ lokalne samouprave; izvolijo ga prebivalci lokalne skupnosti in predstavlja njihovo voljo. ObËinski svet se lahko voli po dveh sistemih, veËinskem in proporcionalnem. Pravico voliti in biti voljen za ËlanA obËinskega sveta ima vsak drûavljan Republike Slovenije, ki je na dan glasovanja dopolnil 18 let in mu ni odvzeta poslovna sposobnost. Pravico voliti in biti voljen za ËlanA obËinskega sveta, predstavnika italijanske oziroma madûarske narodne skupnosti, imajo pripadniki teh narodnostnih skupnosti, ki imajo volilno pravico. Pravico voliti in biti voljen za ËlanA obËinskega sveta,

SOURCES AND METHODS OF DATA COLLECTION

Data on elected deputies of assemblies for 1990 were mediated by the municipal electoral commissions and personnel offices of municipalities. The share of elected parties was mediated by the National Electoral Commission.

At the 1992 elections we compiled data on candidates for the election to the National Assembly and the National Council on individual forms (VO-DZ and VO-DS). Data on elected National Assembly deputies and National Council members and data on the election of the president of the Republic of Slovenia were sent to us on diskettes by the National Electoral Commission.

Data on 1996 elections to the National Assembly were mediated by the National Electoral Commission.

Data on mayors of urban and other municipalities elected in the first and second round were sent to us on diskettes by the National Electoral Commission.

Individual data on the elected members of municipal councils 1994 were sent by municipal electoral commissions after the publication in official journals. Shares of elected parties gained at the election for the members of municipal councils were also mediated by the National Electoral Commission.

Data on the plebiscite, held on 23 December 1990, were sent to us by the National Electoral Commission.

In 1975 we introduced a nation-wide survey on self-imposed contributions to municipal financing. Since then we also collect data from the municipal assemblies on all self-imposed contributions to municipal financing.

COVERAGE

The coverage of candidates and elected deputies of the National Assembly and members of the National Council is complete as is the coverage of all elected mayors of urban and other municipalities and members of municipal councils.

The survey on self-imposed contributions to municipal financing has been compiling data on all self-imposed contributions to municipal financing at the level of municipalities, local communities and their parts since 1975 when the survey has begun. With these annual surveys we obtain data on newly introduced self-imposed contributions to municipal financing. The coverage is complete.

DEFINITIONS

***The National Assembly** is a legislative body composed of **90** deputies of citizens of Slovenia.*

***Deputies** are representatives of the people and in performing their mandate are not bound to any instructions. The mandate is performed in accordance with the Constitution, laws and the National Assembly proceedings. Deputies of the National Assembly are elected from the candidate lists proposed by political parties and voters.*

***List of candidates** is submitted by the political parties or voters in an electoral units.*

***Electoral commissions and electoral committees** are bodies responsible for the realization of elections of deputies to the National Assembly.*

***The National Council** represents social, economic, professional and local interests. It has **40** members. The National Council performs civil and social supervision of the National Assembly, influences its work and the decisions it makes, and has the power of veto on laws proposed by the National Assembly. The mandate of members of the National Council is 5 years. The organs for the realization of elections of members of the National Council in local communities are local electoral commissions and the National Electoral Commission. For members of the National Council of organizations of interests the organ is the National Electoral Commission.*

***Mayor** represents the municipality. Mayors are elected according to the majority system. Every member of the municipality who has the right to vote at the elections to the municipal council has the right to vote and be elected mayor. Proposers of the candidates for mayors are political parties and groups of voters.*

***The municipal council** is a representative body and the most important body of the local self-management. It is elected by the members of local communities and represents their will. The municipal council can be elected according to the majority system or proportional system. Every citizen of Slovenia who has completed 18 years of age by the election day and was not deprived of his/her business capacity has the right to vote and be elected a member of the municipal council. Members of Italian and Hungarian national minorities who have the right to vote have the right to vote or be elected a member of the municipal council, representative of*

predstavnika romske skupnosti, imajo pripadniki te skupnosti, ki imajo volilno pravico.

the Italian or Hungarian national minority in Slovenia. Members of Romany community who have the right to vote have the right to vote and be elected a member of the municipal council, representative of the Romany community in Slovenia.

1) Posamezni samoprispevki so bili uvedeni tudi za veË vrst objektov, zato je seötevek prikazanih samoprispevkov po vrstah objektov veËji, kot je seötevek vseh samoprispevkov.
Individual self-imposed contributions to municipal financing were also introduced for several types of facilities. Therefore the list of contributions shown by facilities is larger than the list of all self-imposed contributions.

6. IZOBRAéEVANJE

EDUCATION

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o vrtcih, osnovnih öolah, glasbenih öolah, srednjih öolah, zavodih za otroke in mladostnike s posebnimi potrebami ter visokoöolskih zavodih zbiramo z rednimi letnimi raziskovanji statistike izobraűevanja.

K uËencem osnovnih öol, ki so dokonËali öolo, ötejemo tiste, ki so uspeöno izdelali osmi razred, k dijakom srednjih öol, ki so konËali öolo, pa spadajo tisti, ki so opravili zakljuËni izpit ali maturo. Upoötevali smo tudi obËane, ki so si znanje pridobili s samoizobraűevanjem.

Podatke o ötipendistih srednjih öol in visokoöolskih zavodov zbiramo letno po stanju 31. 12.

ZAJETJE

Z letnimi poroËili statistike izobraűevanja zbiramo podatke o osnovnih öolah, glasbenih öolah, srednjih öolah in visokoöolskih zavodih. Podatki o vpisu ötudentov na visokoöolske zavode se nanaöajo na ötudijsko leto, podatki za diplomante in doktorje znanosti pa na koledarsko leto. Podatki o vpisu v 1. razred oziroma letnik osnovnih in srednjih öol so zbrani za zaËetek öolskega leta, drugi podatki öol pa se nanaöajo na konec öolskega leta. Podatke o vrtcih zbiramo po stanju 30. 9. Podatki zajemajo tudi otroke s posebnimi potrebami, ki so vkljuËeni v razvojne oddelke vrtcev.

Podatke o zavodih za otroke in mladostnike s posebnimi potrebami zbiramo po stanju 31. 12. v tekoËem öolskem letu. Podatki o dijaökih in ötudentskih domovih so zbrani po stanju 31. 3. v tekoËem öolskem letu.

V podatke o pripravi otrok na osnovno öolo (mala öola) so zajeti otroci, ki obiskujejo malo öolo v osnovnih öolah in vrtcih.

Prikazujemo vse ljudske univerze, ki so vkljuËene v Zvezo ljudskih univerz Slovenije; podatki se nanaöajo na öolsko leto.

Zajeti so ötipendisti, ki prejemajo kadrovske ötipendije, Zoisove ötipendije, ötipendije za deficitarnost, ki so prav tako kadrovske ötipendije, nato republiöke ötipendije, ötipendije Mundovega sklada ter ötipendisti s plaËanim ötudijskim dopustom.

DEFINICIJE

äola je organizirana kot vzgojno-izobraűevalni zavod ali kot enota vzgojno-izobraűevalnih ali drugih zavodov, podjetij ali organizacij ali kot zasebna dejavnost. Oddelek je organizacijska enota, v kateri vzgajajo in izobraűujejo uËence enega razreda (Ëisti oddelek) ali hkrati uËence veË razredov (kombinirani oddelek).

Osnovna öola daje osnovno vzgojo in osnovno sploöno izobrazbo (Ur. l. RS, öt. 12/96).

Vzgojno-izobraűevalni proces organizira kot osrednja osnovna öola, kot podruűnica v sestavi osrednje osnovne öole ali kot samostojna osnovna öola. Osnovne öole same ali skupaj z vrtci organizirajo oddelke podaljöanega bivanja kot tudi malo öolo, ki je organizirana priprava na osnovno öolo v letu pred vstopom vanjo.

Glasbena öola (Ur. l. RS, öt. 12/96) je sestavni del vzgojno-izobraűevalnega sistema in daje dopolnilno izobrazbo.

Srednje öole (Ur. l. RS, öt. 12/96).

Poklicne öole dajejo praktiËno in teoretiËno znanje, ki je potrebno za opravljanje dela v posameznih poklicih, pri katerih je pomembno zlasti praktiËno znanje. Poglabljajo in razöirjajo tudi sploöno izobrazbo.

Tehniöke öole dajejo strokovno teoretiËno in osnovno praktiËno znanje in seznanjajo uËence z delovnimi procesi in z organizacijo dela v posameznih panogah gospodarstva, druűbenih sluűb in javne uprave, razöirjajo in poglabljajo znanje dijakov iz naravoslovnih in druűbenih ved.

Gimnazija razöirja in poglablja znanje dijakov iz naravoslovnih, druűbenih in humanistiËnih ved, iz sploöne tehniËne izobrazbe in jih pripravlja na univerzitetni ötudij.

Zavodi za otroke in mladostnike s posebnimi potrebami (Ur. l. RS, öt. 12/96) izobraűujejo in usposabljajo otroke, mladostnike in mlajöe polnoletne osebe, ki zaradi motenj v telesnem in duöevnem razvoju potrebujejo posebne oblike vzgoje, izobraűevanja in usposabljanja. Pri zavodih za otroke in mladostnike s posebnimi potrebami prikazujemo domove za vzgojo in oskrbo otrok in mladostnikov z motnjami v telesnem in duöevnem razvoju, zavode za usposabljanje vedenjsko in osebnostno motenih otrok in mladostnikov ter zavode za usposabljanje zmerno in teűe prizadetih otrok in mladostnikov.

äole za izobraűevanje odraslih (öole in enote za odrasle) omogoËajo izobraűevanje osebam, ki si niso pridobile ustrezne izobrazbe med

SOURCES AND METHODS OF DATA COLLECTION

Data on kindergartens, elementary schools, music schools, upper secondary schools, institutions for special needs education of children and youth and institutions of higher education have been gathered by regular educational surveys.

Elementary school graduates are pupils who have successfully completed eight years of study. Upper secondary school graduates are pupils who have successfully passed the Final exam or Maturity Examination. Self-educating persons are also covered by our surveys.

Data on grant-holders of secondary schools and of higher education institutions are collected as of 31 December.

COVERAGE

The annual surveys of education statistics cover elementary schools, music schools, upper secondary schools and institutions of higher education. Data on the enrolment at higher educational levels refer to the academic year, while data on diploma graduates and doctors of sciences refer to the calendar year. Data on enrolment for the first year of elementary schools and upper secondary schools are gathered for the beginning of the school year, while other data refer to the end of the school year. Data on kindergartens for pre-school children are collected as of 30 September. Data capture olso children with special educational needs who are included in specilal class units of kindergartens.

Data on institutions for special needs education of children and youth are gathered as of 31 December of the current school year. Data on student accommodation are gathered as of 31 March of the current academic year.

Data on elementary school preparation (little school) include children in elementary schools or in kindergartens.

All adult education institutes which are included in the Association of Adult Education Institutes of Slovenia are included in our data; data refer to the academic year.

The following grant-holders are included: recipients of sponsorships, Zois grants and deficit subject grants, which are also sponsorships, recipients of the national and Munda Fund grants and grant-holders entitled to paid study leave.

DEFINITIONS

***A school** is an organized educational institution or a branch of educational or other institutions, enterprises or other organizations and private schools. A class unit is an organizational unit either including pupils of one year of study or pupils of different years of study.*

***Elementary schools** give basic general education (OJ RS, No. 12/96).*

The educational process runs either in a central elementary school, its branches or in the autonomous elementary school. Daily extension and pre-school class units, which are organized as one-year elementary school preparation for children, are organized by either elementary school or together with kindergarten.

***Music schools** (OJ RS, No. 12/96) are a constituent part of the educational system and provide supplementary education.*

***Upper secondary schools** (OJ RS, No. 12/96).*

***Vocational schools** give practical and theoretical knowledge required to perform works in particular professions where practical knowledge is especially important. They also broaden and deepen general education.*

***Technical schools** give basic theoretical and practical knowledge, introduce students to the working processes and work organization in particular economic branches, public offices and administration and broaden and deepen knowledge of the natural and social sciences.*

***Grammar school** broaden and deepen pupils' knowledge of the natural, social sciences and humanities and their general techincal education and prepare pupils for university studies.*

***Institutions for special needs education of children and youth** (OJ RS, No. 12/96) educate and train children, youth and young disabled adults who need special education and training. The following are included under the category of institutions for special needs education of children and youth: institutions for physicaly and mentally disabled children and youth, institutions for children and youth with behavioral and personal disturbances, and institutions for moderately and seriously disabled children and youth.*

***Schools for adult education** (schools and branches for adults) offer education to adults who have not obtained an adequate education in the*

rednim öolanjem. Delimo jih kot redne öole. Lahko so samostojne ali v sestavi vzgojno-izobraűevalnih in drugih zavodov.

Izobraűevanje v podjetjih in drugih organizacijah, ki ga organizirajo sami za svoje delavce, se ureja s pravilniki teh organizacij.

Visokoöolski zavodi (Ur. l. RS, öt. 67/93) so univerze, fakultete, umetniöke akademije in visoke strokovne öole. ätudij na visokoöolskih zavodih poteka po ötudijskih programih za pridobitev izobrazbe in programih za izpopolnjevanje. ätudijski programi za pridobitev izobrazbe so:

a) dodiplomski:
   - programi za pridobitev visoke strokovne izobrazbe,
   - programi za pridobitev univerzitetne izobrazbe;

b) podiplomski:
   - programi za pridobitev specializacije,
   - programi za pridobitev magisterija,
   - doktorat znanosti.

Pedagoöko osebje na visokoöolskih zavodih sestavljajo tako visokoöolski uËitelji kot tudi sodelavci, ki sodelujejo v pedagoökem procesu.

Srednje izobraűevanje (Ur. l. RS, öt. 12/96) obsega izobraűevanje za pridobitev strokovne izobrazbe, izpopolnjevanje strokovne izobrazbe ter usposabljanje z delom. Izobraűevanje za pridobitev strokovne izobrazbe se izvaja po vzgojno-izobraűevalnih programih.

Programi za pridobitev izobrazbe v srednjem izobraűevanju so programi srednjega izobraűevanja, nadaljevalni programi srednjega izobraűevanja, skrajöani programi srednjega izobraűevanja ter programi poklicnega, tehniökega in drugega strokovnega izobraűevanja, gimnazijski programi in programi nadaljevalnega izobraűevanja.

Vrtci (Ur. l. RS, öt. 12/96) so ustanove, ki pomagajo staröem pri celoviti skrbi za otroke, izboljöanju kvalitete ûivljenja druûin in otrok ter ustvarjanju pogojev za razvoj otrokovih telesnih in duöevnih sposobnosti.

Dijaöki domovi (Ur. l. RS, öt. 12/96) so javna mreûa dijaökih domov, ki omogoËajo uËencem, vajencem, dijakom in ötudentom viöjih öol, ki se öolajo zunaj kraja stalnega bivaliöËa, pogoje za bivanje in uËenje.

Ljudske univerze so ustanove, ki organizirajo in izvajajo izobraűevanje odraslih. Organizirajo seminarje in teËaje za sploöno, strokovno in drugo izobraűevanje ter izobraűevanje za pridobitev izobrazbe. Do leta 1990 so se imenovale delavske, z letom 1991 pa so se preimenovale v ljudske univerze. V preteklih letih smo njihove podatke objavljali v poglavju o kulturi.

ätipendisti so dijaki srednjih öol in ötudentje visokoöolskih zavodov, ki med öolanjem prejemajo ötipendijo kot redni meseËni denarni znesek. Podeljujejo jih podjetja, zavodi in druge organizacije, ki imajo ötipendiste. ätipendiranje je urejeno s Pravilnikom o ötipendiranju (Ur. l. RS, öt. 24/91), s Statutom sklada dr. Franca Munde za ötipendiranje ötudentov v Republiki Sloveniji (Ur. l. RS, öt. 15/91) ter po Zakonu o zaposlovanju in zavarovanju za primer brezposelnosti (VI. poglavje, Ëleni 55-59, Ur. l. RS, öt. 58/91). ätipendije iz Mundovega sklada prejemajo samo ötudenti od 3. letnika dalje.

Higher education teaching staff *includes both teaching faculty and faculty assistants.*

Upper secondary education *(OJ RS, No. 12/96) covers professional education, additional professional education and training for employed people. Professional education follows educational programmes.*

Educational programmes at upper secondary level are upper secondary educational programmes, advanced upper secondary educational programmes and shortened upper secondary educational programmes.

Kindergartens (*OJ RS, No. 12/96): are institutions which help parents with comprehensive care for children, improving the quality of life of families and children, and creating conditions for development of children' s physical and mental capabilities.*

Upper secondary school boarding homes *(OJ RS, No, 12/96): are public network of upper secondary school boarding homes which provides housing and learning conditions for pupils, apprentices and student attending schools outside the place of their permanent residence.*

Adult education institutes *re institutions which organize and conduct adult education. They organize seminars and courses for general, vocational and other education and formal education. They were called workers' universities until 1991, when they were renamed to popular universities. In past years we have published data on them under the section on culture.*

Grant-holders *are upper secondary school pupils and higher education students who receive a grant during their education in the form of a regular monthly sum. Grants are conferred by enterprises, institutions and other organizations which support grant-holders. The award of grants is regulated by the Rules on the Award of Grants (OJ RS, No. 24/91), by the Statute of the Dr. Franc Munda Fund for the Award of Grants to Students in the Republic of Slovenia (OJ RS, No. 15/91) and on the basis of the Law on Employment and Insurance in the Event of Unemployment, (Chapter VI, Articles 55-59; OJ RS, No. 58/91). Munda Fund grants are available only to students in the third year or higher years.*

1) Pri srednjih öolah so zajeti dijaki, ki so se izobraűevali po Zakonu o usmerjenem izobraűevanju.
Data include upper secondary school pupils who were educated under the Law on Job-Oriented Education.

2) Zakon o poklicnem in strokovnem izobraűevanju uvaja niűje in srednje poklicne öole, viöje poklicne öole, srednje tehniöke in strokovne öole, Zakon o gimnazijah pa splooöne in strokovne gimnazije (Ur. l. RS, öt. 12/96). Pri poklicnih öolah so prikazani podatki o ötevilu vpisanih dijakov na dveletnih in triletnih poklicnih programih, pri tehniökih in strokovnih öolah vpisani dijaki na ötiriletnih oz. petletnih strokovnih in tehniökih programih, pri gimnazijah pa ötevilo vpisanih dijakov na splooönih in strokovnih gimnazijah.
The Law on Vocational and Professional Education introduces senior and upper secondary vocational schools. The Law on Gymnasiums introduces general and technical gymnasiums (OJ RS, No. 12/96). Data on vocational schools illustrate the number of enrolled pupils in 2-and 3-year vocational programmes, data on technical and professional schools ilustrate the number of enrolled pupils in 4-or 5-year professional and technical programmes, and data on gymnasiums ilustrate the number of enrolled pupils in general and technical gymnasiums.

3) Pri viöjih öolah so zajeti vsi diplomanti viöje stopnje.
Data for 2-3 year colleges include also all graduates at other non-university levels.

7. RAZISKOVANJE IN RAZVOJ, ZNANOST IN TEHNOLOGIJA

RESEARCH AND DEVELOPMENT, SCIENCE AND TECHNOLOGY

VIRI PODATKOV

Podatke o raziskovalno-razvojni dejavnosti v Republiki Sloveniji zbiramo vsako leto s statistiËnim poroËilom R-RD.

Izpolnijo ga vsi javni raziskovalni zavodi, gospodarske druűbe in gospodarske javne sluűbe, ki so

a) registrirani (vpisani v razvid, Ur. l. öt. 8/91, Zakon o raziskovalni dejavnosti, Ël. 8) pri Ministrstvu za znanost in tehnologijo;

b) samo evidentirani pri Ministrstvu za znanost in tehnologijo;

c) raziskovalne organizacije po zakonu (SAZU, visokoöolski javni zavodi; visoke öole, fakultete in umetniöke akademije).

SOURCES AND METHODS OF DATA COLLECTION

The data on research and development activitity in the Republic of Slovenia are collected each year by the statistical report R-RD.

Included in this report are all public research institutions, economic companies and economic public services, namely those which are:

a) registered (entered in the evidence, Official Journal of the Republic of Slovenia, No. 8/91, Law on Research Activity, Article 8) at the Ministry of Science and Technology,

b) only registered at the Ministry of Science and Technology,

c) research organizations according to the law (Slovenian Academy of Science and Art,public higher education institutions: universities, faculties and art academies).

ZAJETJE

VkljuËno od leta 1978 prikazujemo javne visokoöolske zavode kot raziskovalne organizacije.

V ta popis niso vkljuËene raziskovalne organizacije, ki jih ustanovita Ministrstvo za obrambo in Ministrstvo za notranje zadeve, ter gospodarske druűbe in organizacije, ki se ukvarjajo preteűno s poskusno proizvodnjo, kontrolo vpeljane proizvodnje, trűnimi raziskavami itd., Ëe pri tem ne gre za tehniËno izboljöavo izdelka ali postopka.

COVERAGE

Since 1978, public higher education institutions are presented as research organizations.

Research organizations, founded by the Ministry of Defence and the Ministry of Internal Affairs, economic companies and organizations, which mainly deal with trial production, market research, etc., are not included in this register unless a tehnical improvement of a product or a procedure is involved.

DEFINICIJE

Podatki so pridobljeni na osnovi letnega statistiËnega raziskovanja o dejavnosti znanstvenoraziskovalnih in raziskovalno-razvojnih organizacij, ki je prilagojeno mednarodni metodologiji OECD - Frascati. Le-ta zajema mednarodna priporoËila za merjenje dveh temeljnih kazalnikov na znanstvenoraziskovalnem podroËju, delovno silo ter finanËna sredstva.

Znanstveno raziskovanje in eksperimentalni razvoj obsegata ustvarjalno in sistematiËno delo, namenjeno poveËanju znanja o Ëloveku, kulturi in druűbi, ter uporabo tega znanja za razvoj novih aplikacij.

Znanstveno raziskovanje in eksperimentalni razvoj pokrivata tri dejavnosti:

- temeljna raziskovanja
- aplikativna raziskovanja
- eksperimentalni razvoj

Temeljno raziskovanje je eksperimentalno in teoretiËno delo, katerega osnovni cilj je pridobivanje novega znanja na podlagi temeljnih pojavov ali opazovanih dejstev.

Aplikativno raziskovanje je tudi izvirno raziskovanje, usmerjeno k pridobivanju novega znanja, vendar s specifiËnimi praktiËnimi cilji in nameni. Rezultati temeljnega in aplikativnega raziskovanja se v znanosti povezujejo kot sistem znanj o pojavih in zakonitostih v naravi in druűbi.

Eksperimentalni razvoj je sistematiËna uporaba znanja, pridobljenega s temeljnim in aplikativnim raziskovanjem oz. s praktiËnimi izkuönjami, ki je usmerjeno v proizvodnjo novih materialov, izdelkov ali naprav ter k vzpostavljanju novih procesov, sistemov in storitev.

Raziskovalno dejavnost opravljajo raziskovalci v raziskovalnih in drugih organizacijah ter zasebni raziskovalci ob sodelovanju strokovnega, tehniËnega in drugega osebja (Zakon o raziskovalni dejavnosti, Ur. l. öt. 8/91).

Raziskovalec je oseba, ki izpolnjuje naslednje pogoje:

- ima doktorat znanosti
- ima objavljena znanstvena dela v zadnjih treh letih
- izkazuje sposobnost za organiziranje in vodenje raziskovalne skupine
- je praviloma v delovnem razmerju, kjer izvaja projekt ali je zasebni raziskovalec.

Odgovorni nosilec razvojnega projekta je lahko raziskovalec, ki izpolnjuje naötete pogoje. Odgovorni nosilec razvojnega projekta pa je lahko tudi strokovnjak, ki ne izpolnjuje prvih dveh pogojev, Ëe ima objavljena raziskovalna ali razvojna dela, registrirane patente oziroma inovacije.

Raziskovalna dela so projekti, ki se uresniËujejo v okviru znanstveno-raziskovalnih in raziskovalno-razvojnih organizacij ter raziskovalnih enot in so rezultat odkrivanja in razvijanja obstojeËih znanj in izkuönj ter njihove ustvarjalne uporabe.

KonËana raziskovalna dela so tista, ki so bila konËana in recenzirana

DEFINITIONS

The data are the result of the annual statistical survey on activities of scientific-research organizations and R&D organizations, which was harmonized with the international OECD methodology - Frascati. It includes international recommendations for measuring two basic indicators on the field of science and research, data on the employees and financial data.

Scientific research and experimental development comprise creative and systematic work, intended to increase knowledge of human beings, culture and society, and usage of this knowledge for the development of new applications.

Scientific research and experimental development cover three activities:

- *basic research,*
- *applied research,*
- *experimental development.*

Basic research *is experimental and theoretical work, the main objective of which is to obtain new knowlege on the basis of basic phenomena or observed facts.*

Applied research *is also original research, aimed at obtaining new knowledge. It is aimed at specific practical aims and purposes. The results of basic and applied research are connected in science as a system of knowledge of phenomena and laws in nature and society.*

Experimental development *is systematic usage of knowledge, obtained with basic and applied research or practical experience, which is aimed at producing new materials, products or devices and creating new processes, systems and services.*

Research activity is performed by researchers in research and other organizations and private researchers in cooperation with other professional and assistant staff (Research Activity Act, Official Journal of the Republic of Slovenia, No. 8/91).

Researcher *is a person who fulfill following terms:*

- *has doctorate of science*
- *has published scientific works in the last three years*
- *has capacity to organize and controll the research team*
- *is employed in research organization, where is working on a project or is independent researcher*

Responsible holder of research project can be researcher, who fulfill the abovementioned terms. Responsible holder of research project can also be an expert, who does not fulfill the first two terms, if he has published R&D works, registered patents or innovations.

Research works *are projects which are realised in the framework of scientific-research organizations and R&D organisations and research units and are the result of finding new and developing existing knowledge and experience and its creative use.*

Completed research projects *are those which have been finished and*

od 1. 1. do 31. 12. 1995, ne glede na to, kdaj so bila zaËeta.

Zaposlene osebe so prikazane po stanju 31. 12.

Notranji odhodki so vsi stroöki, ki se nanaöajo na raziskovalno-razvojno dejavnost znotraj raziskovalne organizacije in nekega sektorja, ne glede na vir financiranja.

Sem so vöteti vsi tekoËi in investicijski izdatki.

Zunanji odhodki so vsa plaËila neki drugi organizaciji za opravljene storitve in usluge s podroËja raziskovalno-razvojne dejavnosti.

reviewed from 1 January through 31 December, irrespective of when they were started.

***Persons in paid employment** are shown as of 31 December.*

***Intramural expenditure** is all expenditure on R&D within the research organization or a sector, irrespective of the source of financing.*

Included is all current and investment expenditure.

***Extramural expenditure** is every payment to another organization for the performed R&D service.*

1) Do leta 1995 se tabeli o bruto domaËih izdatkih za RR po finanËnih virih in po vrsti stroökov razlikujeta. Ta razlika oz. primanjkljaj finanËnih sredstev raziskovalne organizacije pokrivajo z lastnimi sredstvi. V letu 1995 je ta razlika vkljuËena med lastna sredstva raziskovalnih organizacij. V tabeli 1 so prikazani RR prihodki.
Until 1995 the tables on gross domestic expenditure on R&D by sources of funds and type of costs differed. Research organisations cover this difference (deficit) with their own funds. In 1995 this difference was included among own funds of research organisations. Table 1 shows R&D income.

8. KULTURA

CULTURE

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o kulturi zbiramo na podlagi vsakoletnih, triletnih in obËasnih statistiËnih raziskovanj. Izjema so podatki o knjiűni proizvodnji ter serijskih publikacijah; te podatke je do leta 1990 za vso nekdanjo SFRJ zbiral Jugoslovanski bibliografski inötitut in obdeloval Zvezni zavod za statistiko, od vkljuËno leta 1991 te podatke zbira in obdeluje Narodna in univerzitetna knjiűnica v Ljubljani, raËunalniöke storitve pa opravljata Univerzitetni inötitut informacijskih znanosti v Mariboru ter StatistiËni urad Republike Slovenije. Podobno velja tudi za podatke o knjiűnicah, do leta 1989 jih je zbiral in obdeloval StatistiËni urad Republike Slovenije, od vkljuËno leta 1990 pa to delo opravlja Narodna in univerzitetna knjiűnica v Ljubljani; to je matiËna knjiűnica za vso Slovenijo, ki zbira in obdeluje podatke o vseh knjiűnicah, le podatke o öolskih knjiűnicah öe vedno zbira SURS. Izjema so tudi podatki o radijskih in TV-naroËnikih, ki jih posreduje naroËniöka sluűba RTV Slovenije. Podatke o branosti serijskih publikacij ter posluőanosti in gledalnosti radijskih in TV-postaj pa smo povzeli iz Mediane-PovpreËje 1996 (Inötitut za raziskovanje medijev).

SOURCES AND METHODS OF DATA COLLECTION

The data on culture are collected by means of annual, three-yearly and occasional statistical surveys. The exception are the data on book production, and periodicals and newspapers (press); until 1990 these data had been collected for the whole former SFRY by the Yugoslav Bibliographical Institute and processed by the Federal Statistical Office. Since 1991 these data have been collected and processed by the National and University Library in Ljubljana, while computer services have been performed by the University Institute of Information Sciences in Maribor and the Statistical Office of the Republic of Slovenia. The same holds good for the data on libraries. Until 1989 the data had been collected and processed by the Statistical Office of the Republic of Slovenia, while since 1990 this work has been performed by the National and University Library in Ljubljana, which is the central library for the whole Slovenia and collects and processes data on all libraries in the country, except data on school libraries which are collected by the Statistical Office. An exception are also the data on television and radio licences, which are been mediated by the subscription service of Radio and Television Slovenia. Data on press by the number of readers, radio programmes by the number of listeners and TV programmes by the number of viewers were taken from Mediana-PovpreËje 1996 (Institute for Media Research).

ZAJETJE

V letnih poroËilih statistike kulture prikazujemo podatke o zaloűbah, galerijah in razstaviöËih, gledaliöËih, filharmoniji in poklicnih orkestrih, kinematografih, filmskih proizvajalcih in distributerjih (vsakoletna raziskovanja), öolskih knjiűnicah, muzejih in muzejskih zbirkah, arhivih, zavodih za kulturo in kulturnih domovih (triletna raziskovanja) ter kulturno-umetniökih druötvih (obËasno raziskovanje). Podatke o gledaliöËih, filharmoniji in poklicnih orkestrih, zavodih za kulturo in kulturnih domovih ter kulturno-umetniökih druötvih zbiramo po gledaliőkih sezonah, podatke o drugih kulturnih zavodih pa po koledarskih letih. Upoötevali smo vse kulturne zavode, enote, druötva itd., ki so delovali ob popisu.

COVERAGE

In annual reports of culture statistics the following are included: publishing houses, galleries and exhibition grounds, theatres, philharmonic society and professional orchestras, cinemas, film producers and distributors (annual surveys), school libraries, museums and museum collections, archives, institutions for culture and homes of culture (three-year surveys), and cultural and arts societies (occasional surveys). The data on theatres, philharmonic society and professional orchestras, institutions for culture and homes of culture as well as cultural and arts societies are collected by theatre seasons, while the other data are collected by calendar years. We took into consideration all institutions active at the time of census.

DEFINICIJE

Knjiűna proizvodnja. Knjige (dela ali naslovi) so tiskane ali drugaËe razmnoűene neperiodiËne publikacije v knjiűni obliki. Lahko imajo en zvezek ali veË zvezkov (fiziËnih enot). Naslovi knjig ali del so po vsebini razvröËeni po univerzalni decimalni klasifikaciji (UDK).

Serijske publikacije so publikacije v tiskani ali netiskani obliki, ki izhajajo v zaporednih delih, navadno s öteviläenimi in Ëasovnimi oznakami, nedoloËen Ëas. Sem sodijo Ëasniki, Ëasopisi (revije, magazini, űurnali), almanahi, koledarji, obËasni zborniki itd.

Knjiűnice so samostojni zavodi ali enote v sestavi drugih zavodov, organizacij itd. Njihova glavna dejavnost je knjiűniËarska dejavnost; po Zakonu o knjiűniËarstvu (Ur. l. SRS, öt. 27/82) je to "sistematiËno zbiranje, strokovno obdelovanje, hranjenje in predstavljanje knjiűniËnega gradiva, njegovo oddajanje v uporabo ter drugo bibliografsko, informacijsko, dokumentacijsko in komunikacijsko delo, namenjeno javnosti".

Vrste knjiűnic glede na oűji namen delovanja in na krog obiskovalcev, ki so jim predvsem namenjene, so:

a) narodna (NUK)

b) visokoöolske oziroma univerzitetne knjiűnice (knjiűnice fakultet, akademij, visokih in viőjih öol, kateder, oddelkov in inötitutov v okviru univerze)

c) sploönoizobraűevalne knjiűnice - obmoËne

d) öolske (osnovnoöolske, srednjeöolske, vzgojno-varstvenih zavodov).

KnjiűniËno gradivo je vse gradivo, ki je strokovno obdelano (inventarizirano, katalogizirano, klasificirano) in je na voljo uporabnikom.

Knjiűno gradivo zajema knjige in broöure ter serijske publikacije, neknjiűno gradivo pa avdiovizualno gradivo, mikrooblike, kartografsko gradivo, slikovno gradivo itd.

Letni prirast zajema nove enote knjiűniËnega gradiva, pridobljene v enem letu, tj. od 1. 1. do 31. 12.

Obisk - vsak uporabnik (oseba) je ötet tolikokrat, kolikorkrat je v enem letu obiskal knjiűnico, da bi si izposodil ali vrnil gradivo, podaljöal izposojo ali dobil doloËene informacije.

Muzeji so organizacijsko samostojni zavodi, muzejske zbirke pa so enote v sestavi drugih podjetij, zavodov, organizacij, skupnosti in druötev ter civilnopravnih oseb. Muzeji so zavodi, ki delujejo na osnovi Zakona o naravni in kulturni dediöËini (Ur. l. SRS, öt. 1/81, Ëleni 13, 71, 87).

DEFINITIONS

***Book production**. Books (works or titles) are printed or otherwise multiplied non-periodic publications in book form. They may consist of one or more volumes (physical units). Titles of books or works are arranged according to universal decimal classification (UDC).*

***Press** are serial publications in printed or non-printed form issued in consecutive parts, usually with number and time signs, for an indefinite period of time. Press includes newspapers, periodicals (reviews, magazines, journals), almanacs, calendars, occasional miscellanies, etc.*

***Libraries** are independent institutions or constituent units of other institutions, organizations, etc. Their main activity is library activity. According to the Library Activity Act (Official Gazette of the Socialist Republic of Slovenia, No. 2/82) library activity is "systematic collecting, professional processing, keeping and presenting of book material, its borrowing and other bibliographic, documentation and communication work intended for public."*

According to the basic purpose and the circle of visitors they are intended for, libraries are:

a) National and University Library

b) university libraries (university libraries, faculty libraries, academy libraries, department libraries and libraries of institutes within the university)

c) public libraries

d) school libraries (elementary, upper secondary, kindergarten libraries).

Library material is all material which has been professionally processed (inventoried, catalogued, classified) and is available to users.

Book material includes books and brochures, and serial publications, while other library material includes audio-visual materials, microforms, maps, images, etc.

Annual additions include new volumes and units, obtained in one year, i.e. from 1 January to 31 December.

Visitors - each user (person) is shown as many times as the number of visits to the library to borrow or return a book, to prolong the borrowing of a book or to obtain information in the course of one year.

***Museums** are organisationally independent institutions, whereas museum collections are constituent parts of other enterprises, institutions, organizations, communities and societies, and civil and legal entities. Museums are institutions acting on the basis of the Law on Natural and Cultural Heritage (Official Gazette of SRS, No. 1/81, articles 13, 71, 87).*

Muzeje in muzejske zbirke delimo glede na muzejsko gradivo na sploöne in posebne. Posebni muzeji in muzejske zbirke imajo muzejsko gradivo doloËene vrste, delimo pa jih na druűbenozgodovinske, naravoslovne, ekonomsko-tehniöke ter umetnostne.

Predmeti, obiskovalci ter zaposleno osebje enot v sestavi muzejev so prikazani pri matiËnih muzejih.

Galerije in razstaviöËa so samostojni zavodi ali enote v sestavi drugih podjetij, zavodov, organizacij, skupnosti, druötev, druűb z omejeno odgovornostjo, trajnih delovnih skupnosti samostojnih kulturnih delavcev, ki redno ali obËasno pripravljajo razstave.

Arhivi so zavodi, ki opravljajo arhivsko javno sluűbo, tj. varujejo javno arhivsko gradivo po Zakonu o arhivskem gradivu in arhivih (ZAGA) (Ur. l. RS, öt. 20/97, Ëleni 7, 8, 9, 11).

"Arhivsko gradivo je izvirno in reproducirano (pisano, risano, tiskano, fotografirano, filmano, fonografirano, magnetno, optiËno ali kako drugaËe zapisano) dokumentarno gradivo, ki je bilo prejeto ali je nastalo pri delu pravnih oziroma fiziËnih oseb in ima trajen pomen za znanost in kulturo. Arhivsko gradivo je kulturni spomenik." (Ur. l. RS, öt. 20/97, Ëlen 2)

Gledaliöka in glasbena dejavnost. Prikazujemo dejavnost raznih gledaliöË, skupin, kulturnih zavodov itd.

Poklicno gledaliöËe je zavod, v katerem je zaposleno poklicno umetniöko in tehniËno osebje. Sem spadajo tudi eksperimentalna poklicna gledaliöËa in vsi drugi odri (npr. mala drama, mali oder), ki delujejo v svoji dvorani in pripravljajo samostojne predstave, ne glede na to, ali so samostojni ali pa v sestavi poklicnih (matiËnih) gledaliöË.

Poklicna mladinska in otroöka gledaliöËa so zavodi, v katerih je zaposleno poklicno umetniöko in drugo osebje. Redno prirejajo predstave za mladino in otroke. Od 1992/93 so prikazana samo lutkovna gledaliöËa.

Amaterska gledaliöËa so druötva, umetniöko osebje je veËinoma nepoklicno, ljubiteljsko, pri posameznih predstavah pa sodelujejo tudi poklicni reűiserji, igralci, scenografi itd. V tabeli 8.11, stolpec " osebe, zaposlene s polnim delovnim Ëasom" prikazujemo podatke o amaterjih (ljubiteljskih sodelavcih).

Neodvisne gledaliöke skupine so druötva ali trajne delovne skupnosti samostojnih kulturnih delavcev, umetniöko osebje pa so profesionalni sodelavci, zaposleni po pogodbi o delu.

Producenti gledaliöke dejavnosti. Prikazujemo podatke o dejavnosti Cankarjevega doma, Doma öpanskih borcev ter Inart centra, od 1994/ 95 pa samo o dejavnosti Cankarjevega doma in Doma öpanskih borcev.

Filharmonija in poklicni orkestri. Prikazujemo podatke o poklicnih orkestrih in zborih, katerih umetniöko osebje so profesionalni glasbeniki, ki so v rednem delovnem razmerju v tem orkestru ali zboru.

Zavodi (centri) za kulturo in kulturni domovi so zavodi, ki opravljajo kulturno-umetniöko, vzgojno-izobraűevalno in kongresno dejavnost. Do gledaliöke sezone 1987/88 smo upoötevali samostojne zavode, od 1990/ 91 pa poleg teh tudi nekatere obËinske zveze kulturnih organizacij po izboru ZKOS-a.

Kulturno-umetniöka druötva se ukvarjajo z eno ali veË panogami kulturne ali umetniöke dejavnosti. Druötva, katerih dejavnost nima izkljuËno kulturno-umetniökega znaËaja (npr. druötva esperantistov), tukaj niso upoötevana. V tabeli 8.11, stolpec " osebe, zaposlene s polnim delovnim Ëasom" prikazujemo podatke o aktivni Ëlanih, ljubiteljih.

Radiotelevizija. Radijske in TV-postaje predvajajo in proizvajajo radijski oziroma TV-program za javnost. Organizacijsko so lahko samostojni ali pa delujejo v sestavi drugih zavodov, organizacij itd. RTV Slovenija ima nacionalni oziroma matiËni pomen, druge RTV postaje pa lokalni. V tabeli 8.16 so prikazane TV postaje, ki predvajajo TV program, v tabeli 8.12 pa tudi tiste, ki imajo samo videostrani in reklame, ne pa tudi predvajanega TV-programa.

V podatkih o rednih radijskih in TV-naroËnikih so upoötevani uporabniki samo tistih radijskih in TV-sprejemnikov, za katere se plaËuje naroËnina. Niso upoötevani naroËniki, oproöËeni plaËevanja naroËnine, ter nadaljnji sprejemniki, za katere se ne plaËuje naroËnina, ker o njih ni natanËne evidence.

Kinematografi so kinematografske dvorane, kjer se prikazujejo filmi za javnost. Navedeni so podatki o obiskovalcih in predstavah celoveËernih filmov in tistih kratkometraűnih filmov, ki so izpolnjevali ves spored ene kinematografske predstave. CeloveËerni film izpolnjuje osnovni spored ene javne kinematografske predstave in traja okoli 90 minut (od 2000 m

Museums and museum collections are divided according to the museum material they have into general and special. Special museums and collections have museum material of a certain kind and are divided into social history, natural history, economical-technical and art museums.

Exhibits, visitors and persons in paid employment in units which are constituent parts of museums are shown at central museums.

***Galleries and exhibition grounds** are independent institutions or units which are constituent parts of other enterprises, institutions, organizations, societies, communities, limited liability companies, permanent working associations of independent cultural workers, who prepare exhibitions regularly or occasionally.*

***Archives** are institutions performing archival public service, i.e. preservation of public archive material according to the Law on Archive Material and Archives (Official Journal of the Republic of Slovenia, No. 20/ 97, articles 7, 8, 9, 11).*

"Archive material is original and reproduced (written, drawn, printed, photographed, filmed, phonographed, magnetically, optically or otherwise recorded) documentary material which was received or created by legal entities or natural persons and has permanent significance for science and culture. Archive material is a monument of culture." (Official Journal of the Republic of Slovenia, No. 20/97, Article 2).

***Performing arts.** Activity of various theatres, companies, institutions, etc. is shown.*

***Professional theatre** is an institution where art and technical staff is employed. Experimental professional theatres and all other stages (e.g. small drama, small stage), which act in their own hall and prepare independent performances, regardless of whether being independent or constituent parts of professional (central) theatres, are included here.*

***Professional youth and children's theatres** are institutions employing art and other staff. They regularly perform for youth and children. Since 1992/93 only puppet theatres are included.*

***Amateur theatres** are societies, art staff is mainly non-professional and amateur. Professional directors, actors and scene-painters, etc. cooperate only in individual performances. In Table 8.11 the column " persons in full-time employment" shows only amateurs.*

***Independent theatre companies** are societies or permanent working associations of independent cultural workers. Art staff is professionally employed under work contract.*

***Producers of theatres activity.** Data of Cankarjev dom, äpanski borci and Inart center are shown, and since 1994/95 only of Cankarjev dom and äpanski borci.*

***Philharmonic society and professional orchestras.** Data on professional orchestras and choirs whose art staff are professional musicians regularly employed in such orchestras or choirs are shown.*

***Institutions (centres) for culture and homes of culture** are institutions, performing cultural-artistic, educational and congress activity. Until the 1987/88 theatre season independent institutions are shown, and from 1990/91, besides these, also some community associations of cultural organizations, according to the choice of the Association of Cultural Organizations of the Republic of Slovenia.*

***Cultural-art societies** deal with one or more branches of cultural and art activity. Societies whose activity does not have only cultural-artistic character (e.g. societies of Esperanto speakers) are not included. In Table 8.11 the column " persons in full-time employment" shows only active members - amateurs.*

***Broadcasting.** Radio and TV stations broadcast and produce radio and TV programme for public. They can be organisationally independent or they can act as constituent parts of other institutions, organisations, etc. RTV Slovenia is of national or central significance, whereas other radio and TV stations are of regional or local significance. Table 8.16 shows TV stations broadcasting TV programmes and Table 8.12 shows also those that have only video pages and advertising but no TV programme.*

Data on radio and TV licenses include only those users of radio and television sets for which subscription is paid. Temporarily not licensed sets and subscribers exempted from paying subscription as well as further sets for which subscription is not paid are not included, as there are no exact records about them.

***Cinemas** are halls where films are shown publicly. Data on attendance and long films and those short films which fulfilled the whole feature of a cinema performance are shown. A long film fulfils the main feature of a public cinema performance and lasts for about 90 minutes (at least 2000 m for 35-mm film reel or at least 900 m for 16-mm film reel).*

dalje pri 35-mm filmskem traku ali od 900 m pri 16-mm filmskem traku).

Proizvodnja filmov. Prikazujemo podatke o ötevilu proizvedenih celoveËernih filmov, namenjenih za prikazovanje v kinematografih.

1) Podatki o programu v koprodukciji (POP TV) so prikazani pri vsakem koproducentu, zato skupno ötevilo ur programa pomeni dejansko ötevilo ur programa (zaradi koprodukcije se torej podatki ne podvajajo).
Data on coproduced programme (POP TV) are shown at each coproducer, therefore the total number of hours is the actual number of hours (due to coproduction the data do not duplicate).

9. ZDRAVSTVO

HEALTH

VIRI PODATKOV

Podatke o zdravstvu pošilja Statističnemu uradu Republike Slovenije Inštitut za varovanje zdravja Republike Slovenije. Ta jih zbira neposredno od poročevalskih enot. Vse zdravstvene ustanove so dolžne po posebnih navodilih o organizaciji službe pošiljati poročila Inštitutu za varovanje zdravja Republike Slovenije, da jih obdela in objavi rezultate.

Območni zavodi za zdravstvo mu pošiljajo podatke vsake tri mesece. V okviru zdravstvenih regij zbirajo podatke vsak mesec.

Podatki o številu zdravstvenih ustanov in njihovem osebju se nanašajo na 31. december.

Vsi podatki o zdravstvu so objavljeni v letopisu Inštituta za varovanje zdravja Republike Slovenije.

SOURCES OF DATA

The data on health service are sent to the Statistical Office of the Republic of Slovenia by the Institute of Public Health of the Republic of Slovenia, which collects them directly from reporting units. All institutes are to send reports, according to special instructions on organization of health service, to the Institute of Public Health of the Republic of Slovenia, which processes the reports and publishes the results. Regional health insitutes send him the data in three-month intervals. Within health regions these data are collected every month.

Data on the number of health institutions and their staff apply to 31 December.

All data on health service are published in the yearbook of the Institute of Public Health of the Republic of Slovenia.

10. SOCIALNA VARNOST

SOCIAL PROTECTION

ZDRAVSTVENO, POKOJNINSKO IN INVALIDSKO ZAVAROVANJE

VIRI IN METODE ZBIRANJA PODATKOV

Vir podatkov o zdravstvenem, pokojninskem in invalidskem zavarovanju so redna poroËila in letopisi o zdravstvenem in socialnem varstvu v Sloveniji; od leta 1978 jih izdajajo Ministrstvo za zdravstvo, Ministrstvo za delo, druűino in socialne zadeve ter Zavod za pokojninsko in invalidsko zavarovanje Slovenije.

Podatke o nesreËah pri delu in podatke o aktivnih zavarovancih zbira Inötitut za varovanje zdravja Republike Slovenije. Povzeti so iz letnih poroËil. Podatki o uűivalcih pokojnin, invalidnin in odhodkih invalidsko-pokojninskega zavarovanja so povzeti iz letnih poroËil Zavoda za pokojninsko in invalidsko zavarovanje Slovenije.

DEFINICIJE IN METODOLOäKA POJASNILA

Za **aktivne zavarovance** ötejemo zaposlene osebe, ki so zaposlene v podjetjih in drugih organizacijah najmanj polovico polnega delovnega Ëasa, in osebe, ki so z njimi izenaËene (zaposlene osebe pri zasebnikih, samozaposlene osebe, osebe, ki sklenejo delovno razmerje v tujini).

V **obveznem pokojninskem in invalidskem zavarovanju** so zavarovane zaposlene osebe v delovnem razmerju v podjetjih in drugih organizacijah ter pri delodajalcih, ki opravljajo samostojno gospodarsko ali poklicno dejavnost, in kmetje ter Ëlani njihovih gospodarstev. Zavarovanje je v Republiki Sloveniji enotno za vse zavarovance.

ZaËasna odsotnost z dela zaradi bolezni, poökodb, poklicnih bolezni, izolacije in spremstva ter nege bolnega druűinskega Ëlana je bolniöki dopust, izraűen v treh kazalnikih (primerih, dnevih in povpreËnem trajanju v dnevih).

Podatki za zaËasno odsotnost z dela zaradi noseËnosti in poroda od leta 1980 do 1989 so bili povzeti po podatkih o druűbenem varstvu otrok v Sloveniji (Letopis o zdravstvenem in socialnem varstvu).

V letu 1991 je bil sprejet Zakon o invalidskem in pokojninskem zavarovanju v Republiki Sloveniji. Zakon naj bi celovito urejal podroËje, ki so ga dotlej urejali zvezni in republiöki zakoni ter statut in drugi akti Zavoda za pokojninsko in invalidsko zavarovanje. Najpomembnejöe in najpogostejöe pravice iz pokojninskega in invalidskega zavarovanja so starostne, invalidske, druűinske in kmeËke pokojnine, denarna nadomestila iz invalidskega zavarovanja, denarna nadomestila za telesno okvaro, varstveni dodatek in dodatek za pomoË in postreűbo.

V zadnjih letih je bila rast ötevila starostnih upokojencev nadpovpreËno visoka. Na tako rast so vplivali predvsem naslednji razlogi:

- uvedba predËasne pokojnine od leta 1983 in skokovita rast predËasnega upokojevanja, ki ga je v letu 1991 pospeöila priprava novega zakona o pokojninskem in invalidskem zavarovanju z napovedjo zaostritve pogojev upokojevanja;
- dokup pokojninske dobe za posamezne kategorije zavarovancev (vrhunski öportniki, obrtniki), zlasti ugoden dokup dobe za Ëas opravljanja kmetijske dejavnosti;
- uvedba dokupa delovne dobe za delavce, katerih delo ni veË potrebno, in za delavce, ki jim je prenehalo delovno razmerje zaradi steËaja ali likvidacije podjetij oz. organizacij, kar je pospeöilo upokojevanje starejöih brezposelnih oseb;
- upokojevanje generacije zavarovancev, ki se je zaposlila po drugi svetovni vojni, ko je bila znaËilna visoka stopnja zaposlovanja;
- priznanje dobe iz starostnega zavarovanja kmetov zakoncem kmetov in prevzemnikom kmetij.

Invalidski upokojenci. Na dinamiko rasti ötevila invalidskih upokojencev vpliva predvsem velikost in dinamika gibanja populacije zaposlenih oseb ter stopnja organiziranosti in razvitosti zdravstva, varstva pri delu v najöiröem smislu ter bolezni in poökodbe zunaj dela. Med vzroki nastanka invalidnosti prevladujejo bolezni in poökodbe zunaj dela. NesreËe pri delu in poklicne bolezni imajo na invalidsko upokojevanje le manjöi vpliv. Razmere v gospodarstvu so v letu 1992 vplivale na poveËan pritisk invalidskega upokojevanja.

Delovni invalidi s preostalo delovno zmoűnostjo imajo pravico do dela z delovnim Ëasom, ki ustreza njihovi zmoűnosti, do zaposlitve oziroma razporeditve na drugo ustrezno delo, do poklicne rehabilitacije in do ustreznih denarnih nadomestil.

HEALTH, PENSION AND DISABILITY INSURANCE

SOURCES AND METHODS OF DATA COLLECTION

Sources of data on health, pension and disability insurance are regular reports and yearbooks on health and social security in Slovenia, published since 1978 by the Ministry of Health, the Ministry of Labour, Family and Social Affairs and the Institute for Pension and Disability Insurance of Slovenia.

Data on accidents at work and the active insured are gathered by the Health Care Institute of the Republic of Slovenia from annual reports. Data on recipients of pensions, disability benefits and disbursements from pension and disability insurance are taken from annual reports of the Institute for Pension and Disability Insurance of Slovenia.

DEFINITIONS AND EXPLANATION OF METHODOLOGY

***Active insurance** covers people who are employed for at least half of the full-time working hours and people equated with them (people employed in independent personal work, the self-employed and people employed abroad).*

*Insured under **compulsory pension and disability insurance schemes** are people employed in enterprises and organizations and with other employers performing an independent commercial or professional activity, as well as farmers and members of their households. Insurance in the Republic of Slovenia is unified for all insured.*

***Temporary absence from work** for reasons of illness, injury, occupational disease, isolation, accompaniment and attending to a sick family member are treated as sick leave. Sick leave is expressed in terms of three indicators - cases, days and average number of days.*

Data on temporary absence from work due to pregnancy or maternity leave for the period 1980 to 1989 were taken from the data on child care in Slovenia (Health Care and Social Security Yearbook).

The Law on Pension and Disability Insurance in the Republic of Slovenia was adopted in 1991. It is intended to regulate this whole field, which was previously administered according to federal and republic laws, statutes and other acts issued by the Institute for Pension and Disability Insurance. The most important and most frequent rights deriving from pension and disability insurance are old-age, disability, survivor' s and farmers' pensions, disability benefit, disability allowance, supplementary benefit and allowance for care and help.

In recent years the growth in the number of old-age pensioners has been above average, influenced particularly by the following factors:

- *the introduction of early retirement in 1983 and the leaping increase of people taking early retirement, accelerated in 1991 with the preparation of the new Law on Pension and Disability Insurance, which envisaged stricter pension conditions;*
- *the opportunity for independent categories of insured persons (top athletes, tradesmen) to buy up their pension qualification period and the particularly favourable conditions for buying up the pension qualification period for time spent in performing agricultural activities;*
- *the introduction of the opportunity to buy up the working period for workers whose work is no longer needed and whose employment has been terminated due to the bankruptcy or liquidation of their enterprise or organization, which has increased the pressure on the provision of pensions to the older unemployed persons;*
- *providing pensions to a generation of the insured who took up employment after World War II when the level of employment was high;*
- *granting the years earned towards old-age pension of a farmer to the farmer's spouse or the recipient of the farm.*

***Disability pensioners.** The major influence on the dynamics of the growth in the number of disability pensioners has come from the size and dynamics of the trends in the employed population and the level of organization and development of health, safety at work in the widest sense and illnesses and injuries outside work. Illnesses and injuries outside work are the main cause of disability. Accidents at work and occupational diseases have a smaller effect on the number of disability pensioners. The economic circumstances in 1992 led to an increased pressure on disability insurance.*

Disabled persons who retain some working capacity - the working disabled - have the right to work for the number of hours corresponding to their remaining working capacity, to employment or reallocation to other suitable work, to occupational rehabilitation and to appropriate benefits.

Uűivalci drugih denarnih dajatev

Poleg pokojnin in nadomestil delovnim invalidom Zavod za pokojninsko in invalidsko zavarovanje priznava in izplaËuje varstvene dodatke, invalidnine za telesne okvare in dodatke za pomoË in postreűbo.

Varstveni dodatek prejemajo upokojenci z nepopolno pokojninsko dobo, ki so socialno ogroűeni.

Pravico do **denarnega nadomestila za telesno okvaro** si pridobi zavarovanec, Ëe je telesna okvara posledica:

- poökodbe pri delu ali poklicne bolezni in Ëe je najmanj 30-odstotna ne glede na pokojninsko dobo in
- bolezni ali poökodbe zunaj dela, Ëe je najmanj 50-odstotna in Ëe ima zavarovanec ob nastanku telesne okvare pokojninsko dobo, ki je doloËena za pridobitev invalidske pokojnine, ne glede na to, ali telesna okvara povzroËa invalidnost ali ne.

Telesne okvare so po teűavnosti razvröene v 8 stopenj, ki jim je prilagojena tudi viöina denarnega nadomestila, pri Ëemer se upoöteva tudi vzrok nastanka telesne okvare.

Dodatek za pomoË in postreűbo. Pravico do tega dodatka imajo uűivalci pokojnin (razen kmetov, ki so zavarovani le starostno, ob izgubi delovne sposobnosti ali smrti), Ëe invalidska komisija ugotovi, da potrebujejo pomoË druge osebe za opravljanje veËine ali vseh ûivljenjskih potreb. Pravico do tega dodatka imajo tudi slepi in nepokretni aktivni zavarovanci.

Preűivninsko varstvo kmetov. Od zaËetka veljavnosti Zakona o preűivninskem varstvu kmetov je bilo do konca leta 1992 sklenjenih 200 pogodb, na podlagi katerih se za prodano zemljiöËe in druge nepremiËnine pridobi pravica do pokojnine.

Uűivalci **vojaökih pokojnin** in uűivalci **pokojnin, uveljavljenih v drugih republikah nekdanje SFR Jugoslavije.** Po doloËilih Ustavnega zakona za izvedbo temeljne listine o samostojnosti in neodvisnosti Republike Slovenije je Republika Slovenija z odloki Izvröenega sveta SkupöËine Republike Slovenije z dne 31. 10. in 14. 11. 1991 s 1. 11. 1991 prevzela obveznosti izplaËevanja vojaökih pokojnin in zaËasno prevzela izplaËevanje akontacij pokojnin in drugih dajatev iz pokojninskega in invalidskega zavarovanja osebam s stalnim prebivaliöËem v Republiki Sloveniji, ki so to pravico uveljavile v drugih republikah nekdanje SFR Jugoslavije.

Po zakonu o zagotavljanju socialne varnosti slovenskim drűavljanom, ki dobivajo pokojnino iz republik nekdanje SFR Jugoslavije, imajo drűavljani Republike Slovenije, ki so prejemniki teh pokojnin, pravico do **dodatka k pokojnini.** Dodatek k pokojnini odmeri in izplaËuje Zavod za pokojninsko in invalidsko zavarovanje.

Recipients of other financial assistance

In addition to pensions and benefits for the working disabled persons the Institute for Pension and Disability Insurance pays supplementary benefit, disability benefit and allowances for care and help.

Pensioners who have not completed the full pension qualification period and who have insufficient income receive ***care allowances****.*

People with a disability have the right to ***a disability allowance*** *if the disability arose as a result of:*

- *an injury at work or an occupational disease and if the disability is at least 30 per cent, irrespective of the pension qualification period;*
- *illness or injury outside work, if the disability is at least 50 per cent and provided that, when the disability was incurred, the insured individual had a pension qualification period sufficient to obtain a disability pension, irrespective of whether or not the disability causes invalidity.*

Disability is classified according to degree of severity into eight levels. Each level has a corresponding allowance, whereby the cause of the disability is taken into consideration.

Allowance for care and help. *Pension recipients (apart from farmers insured for retirement, loss of the ability to work or death) have the right to an allowance if the disability board establishes that they require the help of another person to perform most or all of their essential needs. Blind and immobile active insured also have the right to this allowance.*

Protecting the livelihood of farmers. *From the time the Law on Protecting the Livelihood of Farmers came into force until the end of 1992, 200 contracts were signed forming the basis for the acquisition of pension rights against the sale of land and other real estate.*

Recipients of ***military pensions*** *and* ***recipients of pensions established in other republics of the former SFR Yugoslavia.*** *Pursuant to the Constitutional Law for the Implementation of the Basic Constitutional Charter on the Sovereignty and Independence of the Republic of Slovenia, the Republic of Slovenia assumed on 1 November 1991, by decrees of the Executive Council of the Assembly of the Republic of Slovenia of 31 October and 14 November 1991, the obligation to pay military pensions, and temporarily took over the payment of pensions and other contributions from pension and disability insurance to persons with permanent residence in the Republic of Slovenia who had established that right in other republics of the former SFR Yugoslavia.*

According to the law guaranteeing social security to Slovenian citizens who receive pensions from other republics of the former SFR Yugoslavia, citizens of the Republic of Slovenia recipients of such pensions have the right to a ***pension supplement.*** *The pension supplement is calculated and paid by the Institute for Pension and Disability Insurance.*

SOCIALNO VARSTVO

VIRI IN METODE ZBIRANJA PODATKOV

Podatki so rezultat rednih letnih statistiËnih raziskovanj s podroËja socialnega varstva. Objavljamo tudi podatke Ministrstva za delo, druűino in socialne zadeve o druűinskih prejemkih ter podatke o varstvu vojaökih in civilnih invalidov vojne in űrtev vojaöke agresije.

ZAJETJE

V prikazanih podatkih so zajeti domovi za otroke, zavodi za usposabljanje otrok in mladostnikov z motnjo v razvoju, domovi za starejöe, posebni socialnovarstveni zavodi, varstveno-delovni centri, zavodi in podjetja za strokovno usposabljanje in zaposlovanje invalidov. Prikazujemo tudi podatke o druűinskih prejemkih, in sicer: otroökih dodatkih, upraviËencih do nadomestila plaËe med porodniökim dopustom, upraviËencih do pomoËi pri opremi novorojenca, upraviËencih do staröevskega dodatka. Prikazujemo öe podatke o uűivalcih invalidskih prejemkov in izdatkih za varstvo vojaökih invalidov, civilnih invalidov vojne in űrtev vojaöke agresije.

DEFINICIJE

Otroöki domovi so varstvene in vzgojne ustanove za otroke brez staröev, otroke pod skrbstvom in otroke, ki so jih staröi zapustili.

Zavodi za usposabljanje otrok in mladostnikov z motnjo v razvoju vkljuËujejo tudi varstvene oddelke, ki nudijo trajno nego, oskrbo in zdravstveno varstvo otrokom s teűjo duöevno ali telesno prizadetostjo.

Zavodi in podjetja za poklicno rehabilitacijo in zaposlovanje

SOCIAL WELFARE

SOURCES AND METHODS OF DATA COLLECTION

The data are the result of annual statistical social welfare surveys. We also publish the data of the Ministry of Labour, Family and Social Affairs on family allowances and welfare for military and civil war invalids and victims of military aggression.

COVERAGE

Covered are homes for children, institutions for training moderately and seriously handicapped children and youth, old people' s homes, special social welfare institutions, centres for protection and training, institutions and companies for vocational training and employment of the disabled. Presented are also family recept and child allowances, persons entitled to maternity leave compensation, assistance for goods for a new born child and parental allowance, recipients of disability allowances and spending of welfare for military invalids, civil war invalids and victims of military aggression.

DEFINITIONS

Homes for children *are intended for care and upbringing of orphans, children in care and children abandoned by their parents.*

Institutions for training moderately and seriously handicapped children and youth *include welfare departments intended for permanent care (including health care) of children with serious mental or physical handicaps.*

Institutions and companies for vocational rehabilitation and

invalidov strokovno usposabljajo in zaposlujejo invalide, ki so zaradi posledic nezgod, bolezni ali drugih vzrokov funkcionalno manj sposobni za űivljenje.

employment of the disabled *train and employ disabled people whose functional abilities have been reduced as a consequence of accident, illness or some other handicap.*

Domovi za starejöe so ustanove za varstvo starejöih, ki jim ti domovi nadomeöËajo ali dopolnjujejo funkcije dó ma in lastne druűine (organizirana prehrana in varstvo ter zdravstveno varstvo).

Old people' s homes *provide institutional welfare for old persons with which they replace or supplement the functions of home and family, nutrition, protection and health care.*

Posebni socialnovarstveni zavodi so ustanove, ki nudijo posebne oblike varstva odraslim duöevno in telesno prizadetim osebam.

Special social welfare institutions *provide special forms of institutional welfare for mentally and physically handicapped adults.*

Varstveno-delovni centri so ustanove, ki nudijo varstvo in vodenje ter organizirano zaposlitev v posebnih razmerah duöevno in telesno prizadetim odraslim osebam.

Centres for protection and training *provide guidance, protection and organised work under special conditions for mentally and physically handicapped adults.*

Prikazujemo tudi podatke o otrocih in odraslih, ki so deleűni socialnega varstva.

Data on children and adults recipients of social welfare are also shown.

Otroci in mladostniki, prikrajöani za normalno druűinsko űivljenje, so otroci in mladostniki brez obeh staröev, iz nepopolnih druűin, iz neurejenih druűin, materialno in vzgojno ogroűeni in ogroűeni v razvoju zaradi neurejenih stanovanjskih razmer.

Children and youth deprived of a normal family life *are children and youth without parents, from single-parent families and disorderly families, as well as those who are materially and educationally deprived and those whose development is threatened due to unsettled accommodation circumstances.*

Med **otroke in mladostnike z motnjami v telesnem razvoju** uvröËamo otroke in mladostnike, ki so slepi in slabovidni, ki imajo sluöne, govorne ali druge telesne motnje ali veË motenj.

Children and youth considered to have disturbances in their physical development *are those who are blind or weak-sighted, those with hearing and speech difficulties, those with other physical retarded and those with several disturbances.*

Med **otroke, mladostnike in mlajöe polnoletne osebe z motnjami v duöevnem razvoju** uvröËamo take, ki so laűe, zmerno, teűe ali teűko duöevno prizadeti, pa tudi tiste, ki so na meji normalnih sposobnosti.

Children, youth and young adults considered to have disturbances in their mental development *are those with low, moderate, high or severe mental disturbances, as well as all those who are on the limit of normal abilities.*

Kot **vedenjsko in osebnostno moteni otroci in mladostniki** so obravnavani tisti, ki so uűivalci mamil oz. prestopniki (otroci: do 14 let starosti; mlajöi mladoletniki od 14 do pod 16 **let** starosti; starejöi mladoletniki: od 16 do pod 18 let starosti).

Behaviourally and personally disturbed *are those children and youth who use drugs, children (offenders under 14 years of age), younger and older juveniles.*

Drugi otroci in mladostniki v druűbenem varstvu so otroci s statusnimi vpraöanji, ki se nanaöajo na premoűenjske razmere itd.

Other children and youth in social welfare are those involved in status questions relating to financial circumstances, etc.

Otroöki dodatek je dopolnilni druűinski prejemek za delno pokrivanje stroökov in vzdrűevanje otroka. Do otroökega dodatka so upraviËeni otroci, Ëe dohodek na druűinskega Ëlana ne presega 43 % povpreËne plaËe v Sloveniji (to je veljalo od 1. 1. do 1. 5. 1994) oziroma 50 % povpreËne plaËe v Sloveniji (velja od 1. 5. 1994 dalje).

Child allowance *is supplementary income for a family for partial covering of expenses and supporting a child. Entitled to child allowance are those children whose parents' income per family member does not exceed 43% of average income in Slovenia (this was in force from 1 January 1994 to 1 May 1994) or 50% of average income in Slovenia (in force since 1 May 1994).*

Nadomestilo plaËe med porodniökim dopustom je nadomestilo plaËe v Ëasu dopusta ob rojstvu otroka, dopusta za nego in varstvo otroka ter daljöega dopusta za nego in varstvo otroka.

Maternity leave compensation *is compensation of income for the time of maternity leave at childbirth, leave for the care and nursing of the child, or longer leave for the care and nursing of the child.*

PomoË za opremo novorojenca je enkratna pomoË ob rojstvu otroka kot zavitek za novorojenca ali kot denarna pomoË.

Assistance for goods for a new born child *is a single assistance at childbirth. It is assured as a package for a newborn child or as financial assistance.*

Staröevski dodatek je denarna pomoË staröem ob in po rojstvu otroka in znaöa 52 % zajamËene plaËe. Pravico do staröevskega dodatka ima vsaka mati, ki ne izpolnjuje pogojev za pravico do denarnega nadomestila med porodniökim dopustom ali kakönega drugega nadomestila plaËe, Ëe je drűavljanka Republike Slovenije in ima stalno prebivaliöËe v Sloveniji.

Parental allowance *is financial assistance for parents at or after childbirth and amounts to 52% of the guaranteed wage. Every mother who does not fulfil the conditions for maternity leave compensation or some other wage compensation, on condition that she is a citizen of the Republic of Slovenia and has permanent residence in Slovenia, has the right to parental allowance.*

11. KRIMINALITETA

CRIME

VIRI IN METODE ZBIRANJA PODATKOV

Podatki o storilcih kaznivih dejanj in gospodarskih prestopkov so rezultat rednih statistiËnih raziskovanj s podroËja statistike kriminalitete. Objavljamo tudi nekatere podatke Ministrstva za pravosodje, Ustavnega sodiöËa, Drűavnega toűilstva in Republiökega senata za prekröke.

ZAJETJE

Zajetje kriminalitete kot druűbeno negativnega pojava je popolno, ker so s statistiËnimi raziskovanji zajeti vsi storilci kaznivih dejanj in gospodarskih prestopkov in tudi kazniva dejanja neznanih storilcev.

Prikazane so vse polnoletne in mladoletne osebe, ki jim je bila v doloËenih letih izdana pravnomoËna odloËba na okroűnih drűavnih toűilstvih in okrajnih oziroma okroűnih sodiöËih.

Prav tako so zajete vse reöene zadeve pri rednih sodiöËih in vse obsojene osebe pri obËinskih sodnikih za prekröke v doloËenih letih. Podatki o ötevilu sodiöË, drűavnih toűilstev, organov za sojenje prekrökov, delovnih in socialnih sodiöË in ötevilu zaposlenih oseb v teh inötitucijah so prikazani po stanju dne 31. 12. 1996.

DEFINICIJE

Kriminaliteta z vidika statistiËnih raziskovanj obsega pojav od vloűitve ovadbe za storjeno kaznivo dejanje oziroma gospodarski prestopek do pravnomoËnega konËanja postopka pri pristojnem organu.

Kaznivo dejanje je protipravno dejanje, ki ga zakon zaradi njegove nevarnosti doloËa kot kaznivo dejanje in hkrati doloËa njegove znake (Kazenski zakonik RS, Ëlen 7).

Kazniva dejanja vsebujejo kazenski zakoni in kazenske doloËbe nekaterih drugih zakonov. Do 31. 12. 1994 sta bila v veljavi Kazenski zakon RS (Ur. l. SRS, 12/77) in Kazenski zakon SFRJ (Ur. l. SFRJ, 44/76), od 1. 1. 1995 pa imamo nov Kazenski zakonik Republike Slovenije (Ur. l. RS, 63/94). ée zaradi novel k starima kazenskima zakonoma je bila kontinuiteta podatkov ponekod oslabljena, zaradi nove kazenske zakonodaje pa öe bolj[1]. Da bi se kontinuiteta Ëim bolj ohranila tudi v prihodnje, so podatki po skupinah kaznivih dejanj preurejeni v skladu s Kazenskim zakonikom Republike Slovenije (Ur. l. RS, 63/94). Kljub temu je primerjanje podatkov za pretekla leta oteűeno.

Enote opazovanja so storilci kaznivih dejanj. » e stori ena oseba veË kaznivih dejanj, se kot lastnost storilca spremlja samo glavno kaznivo dejanje. Kadar je veË oseb udeleűenih pri storitvi enega kaznivega dejanja, je enota opazovanja vsak udeleűenec posebej.

Polnoletni storilci kaznivih dejanj so osebe, ki so ob storitvi kaznivega dejanja űe dopolnile 18 let, zoper katere je postopek na podlagi kazenske ovadbe in predhodni postopek (pri drűavnem toűilstvu) konËan, in obtoűene osebe, zoper katere je kazenski postopek pravnomoËno konËan.

Z izrazom **znani storilec** razumemo polnoletnega storilca kaznivega dejanja, proti kateremu je postopek pri drűavnem toűilstvu konËan z izdajo odloËbe, s katero je:

- ovadba zavrűena,
- preiskava ustavljena,
- vloűena obtoűnica - obtoűni predlog,
- odstop tuji drűavi in ovadbe, reöene na drug naËin.

Pod pojmom **neznani storilec** razumemo neznano osebo, proti kateri je podana kazenska ovadba drűavnemu toűilstvu za storjeno kaznivo dejanje, a ta oseba po preteku enega leta od dne ovadbe öe ni odkrita.

Pod pojmom **obtoűena oseba, zoper katero je kazenski postopek pravnomoËno konËan**, razumemo polnoletno osebo, zoper katero je vloűen obtoűni akt, proti kateri je kazenski postopek pravnomoËno konËan z odloËitvijo sodiöËa, s katero je:

- obtoűni akt zavrűen,
- postopek ustavljen,
- oseba oproöËena obtoűbe,
- obtoűba zavrnjena,
- izreËen varnostni ukrep brez izreka kazni,
- storilec spoznan za odgovornega.

1) S 1. 1. 1995 je priËel veljati Zakon o kazenskem postopku (Ur. l. RS, 63/94). Zakon o sodiöËih (Ur. l. RS, 19/94) in Zakon o drűavnem toűilstvu (Ur. l. RS, 63/94) sta priËela veljati v letu 1994, reorganizacija toűilstev in sodiöË pa je bila izvedena s 1. 1. 1995.

SOURCES AND METHODS OF DATA COLLECTION

Data on perpetrators of criminal offences and economic crimes are the result of regular statistical surveys in the field of statistics on crime. We also publish certain data of the Ministry of Justice, the Constitutional Court, the Office of the Public Prosecutor and the National Senate for Minor Offences.

COVERAGE

Crime as a negative social phenomenon is fully covered since statistical surveys encompass all perpetrators of criminal offences and economic crimes as well as criminal offences committed by unknown perpetrators.

Data are presented on all adults and juveniles who in defined years were the subject of a legally binding order from regional public prosecutors and regional or district courts.

Also covered are all matters solved at regular courts and all persons sentenced by magistrates for minor offences committed in defined years. The data on the number of courts, public prosecutors' offices, magistrates' courts, labour and social courts and the number of people employed in these institutions are as of 31 December 1996.

DEFINITIONS

*Statistical research of **crime** ranges from the filing of the charge for a criminal offence to the conclusion of the legal proceedings at the competent body.*

***Criminal offence** is an unlawful activity determined by the law because of its danger as crime and at the same time given a code (Penal Code of the RS, Article 7).*

Criminal offences are contained in penal laws and the penal provisions of certain other laws. Until 31 December 1994 the Penal Code of the RS (Official Gazette of the SRS, 12/77) and Penal Code of the SFRJ (Official Gazette of the SFRJ, 44/76) had been in force, and since 1 January 1995 the Penal Code of the RS (Official Journal of the RS, 63/94) has been in force. Because of the novels to the old penal codes the continuity of the data had in some cases been worse, but because of the new penal code it has been even worse[1]. With the purpose to keep continuity of the data in the future, we have rearranged data by type of crimes on Penal Code of the RS (Official Journal of the RS, 63/94). Nevertheless, the comparison of data for past years is made difficult.

***Units of observation** are perpetrators of criminal offences. If one perpetrator committed several criminal offences, the attribute of the perpetrator is only the main criminal offence. When more than one perpetrator participated in committing one criminal offence, each participant is a separate unit of observation.*

Adult perpetrators of criminal offences are people who had reached the age of 18 years when they committed an offence, and against whom proceedings based on a criminal charge and committal proceedings (through the public prosecutor) have been concluded, and accused persons against whom criminal proceedings have been legally concluded.

*The term **known perpetrator** means an adult perpetrator of a criminal offence against whom proceedings through the public prosecutor have been concluded with the issuing of an order by which:*

- *the charge is rejected,*
- *the investigation is terminated,*
- *an indictment (proposed indictment) is filed,*
- *he is surrendered to a foreign country or the charge is solved in another way.*

*The term **unknown perpetrator** refers to an unknown person against whom a criminal charge has been filed with the public prosecutor relating to a criminal offence but where such a person remains unknown one year from the day the charge was filed.*

*The term **accused person against whom criminal proceedings have been legally concluded**, refers to an adult against whom an indictment was filed and against whom criminal proceedings have been concluded with a court decision, by which:*

- *the indictment is rejected,*
- *the proceedings are terminated,*
- *the charge is dropped,*

1) On 1 January 1995 the Law on Criminal Proceeding came into force (Official Journal of the RS, 63/94). The Law on Courts (Official Journal of the RS, 19/94) and the Law on Public Prosecutor' s Office (Official Journal of the RS, 63/94) came into force in 1994, but the reorganisation of the courts and public prosecutor' s offices had been made by 1 January 1995.

Obsojena oseba je polnoletna oseba, ki je spoznana za odgovorno in proti kateri so izreËene kazenske sankcije: kazen (zaporna ali denarna), pogojna kazen, sodni opomin, varnostni ali vzgojni ukrep, in tudi oseba, spoznana za krivo in oproöËena kazni.

Mladoletni storilci kaznivih dejanj so osebe, ki so ob storitvi kaznivega dejanja űe dopolnile 14, ne pa öe 18 let, proti katerim:

- postopek po kazenski ovadbi ni uveden - ovadba zavrűena,
- je pripravljalni postopek ustavljen,
- je podan predlog za izrek kazni ali vzgojnega ukrepa (konËan postopek pri drűavnem toűilstvu), kakor tudi osebe, zoper katere je kazenski postopek pred senatom pravnomoËno konËan.

Z izrazom **mladoletna oseba, zoper katero je kazenski postopek pred senatom pravnomoËno konËan**, razumemo mladoletnika, proti kateremu je podan predlog za izrek kazni ali vzgojnega ukrepa, in je:

- postopek pred senatom ustavljen,
- izreËen varnostni ukrep brez izreka kazni,
- izreËen vzgojni ukrep ali izreËena kazen.

Mladoletne storilce delimo na mlajöe mladoletnike, ki so ob storitvi kaznivega dejanja dopolnili 14, ne pa öe 16 let, ter na starejöe mladoletnike, ki so ob storitvi kaznivega dejanja űe dopolnili 16, ne pa öe 18 let. Mlajöi mladoletnik ne more biti kaznovan, izreËe se mu lahko le vzgojni ukrep, starejöega mladoletnika pa se lahko tudi obsodi na kazen mladoletniökega zapora ali denarno kazen.

Gospodarski prestopek je druűbeno ökodljiva krötitev predpisov o gospodarskem ali finanËnem poslovanju, ki je povzroËila ali bi bila lahko povzroËila hujöe posledice in je s predpisom pristojnega organa doloËena kot gospodarski prestopek (Zakon o gospodarskih prestopkih, Ëlen 2).

- the charge is rejected,
- a security measure is passed without penal sentence,
- the perpetrator is recognised as being responsible.

***A convicted person** is an adult who has been recognised as responsible and against whom penal measures have been imposed: sentence (imprisonment or fine), suspended sentence, judicial caution, security or educational measure, and a person recognised as guilty but not given a sentence.*

***Juvenile perpetrators** of criminal offences are persons who had reached the age of 14 years but not yet 18 years at the time of committing a criminal offence and against whom:*

- criminal proceedings have not been initiated - charge was rejected,
- committal proceedings have been terminated,
- a proposal for a penal sentence or an educational measure has been filed, (concluded proceedings at the public prosecutor), as well as persons against whom criminal proceedings through a senate have been legally concluded.

*The term **juvenile perpetrator against whom criminal proceedings through a senate have been concluded**, refers to a juvenile against whom a proposal for a penal sentence or an educational measure has been filed, where:*

- proceedings before a senate have been terminated,
- a security measure is passed without penal sentence,
- an educational measure or sentence has been imposed.

Juvenile perpetrators are divided into younger juveniles, aged 14 or 15, and older juveniles, aged 16 or 17 at the time of committing the offence. Younger juveniles may not be punished, they may only be given educational measures. Older juveniles may be sentenced to juvenile prison or fine.

*An **economic crime** is a socially harmful violation of regulations on economic or financial operations which has or could have serious consequences and which is stipulated as an economic crime by the regulation of the competent body (Law on Economic Crimes, Article 2).*

12. ZAPOSLENOST

EMPLOYMENT

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o zaposlenih osebah v podjetjih in drugih organizacijah dobivamo od leta 1992 z rednim meseËnim raziskovanjem ZAP-M (MeseËno poroËilo o plaËah in zaposlenih osebah v podjetjih in drugih organizacijah). Od leta 1963 do 1991 smo te podatke zbirali z meseËnim raziskovanjem RAD-1, pred letom 1963 pa dvakrat letno, in sicer marca in septembra.

Podatke o zaposlenih osebah pri zasebnikih in o samozaposlenih osebah smo zbirali z rednim ÈetrtletnimraziskovanjemZAP-» L do vkljuËno leta 1994 prek Zavoda za zdravstveno zavarovanje Slovenije. Podatke o stopnji strokovne izobrazbe in stopnji strokovne usposobljenosti za opravljanje doloËenih del in nalog smo zbirali s statistiËnim raziskovanjem RAD-10 (PoroËilo organizacij in skupnosti o delavcih). Podatke o zaposlenih osebah po stopnji strokovne izobrazbe in stopnji strokovne usposobljenosti za leta 1967, 1976 in 1986 pa smo zbrali s popisom zaposlenih oseb RAD-20.

Baza podatkov o zaposlenih osebah je bila vzpostavljena na osnovi popisa zaposlenih oseb leta 1986. AűurirasesopodatkiizobrazcevM,to je Prijava podatkov za uvedbo in vodenje matiËne evidence pokojninskega in invalidskega zavarovanja in zdravstvenega varstva (evidence o sklenitvi delovnega razmerja).

Anketa o delovni sili (ADS) je bila v Sloveniji uvedena kot razvojni projekt leta 1989. Razvojna faza, ki jo je izvajal Inötitut za druűbene vede, je trajala do konca leta 1992. V letu 1993 je bila anketa vkljuËena v Nacionalni program statistiËnih raziskovanj in preneöena na Republiöki zavod za zaposlovanje, ki jo je izvedel skupaj z Zavodom Republike Slovenije za statistiko.

Anketo o delovni sili smo izvedli skladno z navodili mednarodne organizacije za delo (ILO), sprejetimi na 13. Konferenci statistikov dela ter skladno z zahtevami Eurostata, ki se nanaöajo na harmonizirano anketo Evropske skupnosti.

Podatke o registriranih brezposelnih osebah in o prostih delovnih mestih posreduje Republiöki zavod za zaposlovanje.

Zajetje

V statistiËna raziskovanja o zaposlenih osebah v podjetjih in drugih organizacijah so bila do leta 1991 zajeta vsa podjetja in organizacije, razen zasebnih oziroma enot v njihovi sestavi. Od leta 1992 pa so zajeta tudi podjetja v zasebni lasti s tremi ali veË zaposlenimi osebami. Prav tako so od leta 1992 v to raziskovanje vkljuËene zaposlene osebe v oboroűenih silah, od l. 1993 dalje pa tudi zaposlene osebe v upravah za notranje zadeve.

Da bi zagotovili podatke o zaposlenih osebah po obËinah Republike Slovenije, smo po letu 1960 raziskovanja izvajali po organizacijsko-teritorialnem naËelu, po katerem je obËina osnovna teritorialna enota. NajveËkrat se organizacijsko naËelo sklada s teritorialnim. Do razlik prihaja samo pri organizacijah, ki imajo svoje delovne enote v drugih obËinah. LoËene dele organizacij smo upoötevali v podatkih kot samostojne poroËevalske enote po dejavnosti, ki so jo dejansko opravljale, ne pa po preteűni dejavnosti organizacije, ki so ji pripadale. LoËene enote na obmoËju obËine, kjer je sedeű organizacije, smo opazovali v sklopu matiËne organizacije kot eno poroËevalsko enoto po njeni preteűni dejavnosti.

Od leta 1977 dalje zbiramo podatke o zaposlenih osebah po teritorialnem naËelu in po Ëistih dejavnostih. PoroËila so sestavljena posebej za vsako podjetje oziroma organizacijo ter za vsako poslovno in drugo enoto v njihovi sestavi (teritorialno loËeno enoto ali enoto, ki je zaokroűena poslovna ali proizvodna celota, v kateri se opravlja dejavnost, ki je praviloma razliËna od dejavnosti, v katero sta matiËno podjetje ali organizacija razvröËena po preteűnosti).

Izjema je poroËilo organizacij in skupnosti o zaposlenih osebah RAD-10, kjer je bilo pri zbiranju podatkov do leta 1988 vedno upoötevano organizacijsko-teritorialno naËelo.

Baza podatkov o zaposlenih osebah zajema podatke o zaposlenih osebah, ki so v delovnem razmerju v podjetjih in drugih organizacijah ne glede na lastnino. V zasebnih podjetjih so med zaposlene osebe zajeti tudi njihovi lastniki.

Anketa o delovni sili zajema vzorec stalnega prebivalstva, ki je vzet iz Centralnega registra prebivalcev, to je oseb, ki imajo prebivaliöËe na ozemlju Republike Slovenije. V anketo je zajeto samo tisto prebivalstvo, ki űivi v individualnih gospodinjstvih. Zaposlitveni status posameznika se je doloËal glede na njegovo aktivnost v tednu pred anketiranjem. Enota opazovanja so bili posamezniki, ki obiËajno űivijo v izbranem

SOURCES AND METHODS OF DATA COLLECTION

Data on persons in paid employment in enterprises and other organizations have been collected since 1992 with monthly surveys of earnings and persons in paid employment in enterprises and other organizations (ZAP-M). From 1963 to 1991 these data were collected with the RAD-1 monthly survey. Prior to 1963 the data were collected twice a year, in March and September.

Data on persons employed by private entrepreneurs and self-employed persons were collected with the ZAP-» L quarterly surveys until the end of 1994 through the Health Insurance Office of Slovenia. Data on the level of professional attainment and the level of professional qualification required by post were collected with the RAD-10 statistical survey (Report on Workers by Organizations and Communities). Data on persons in paid employment by level of professional attainment and level of professional qualification for the years 1967, 1976 and 1986 were collected with the RAD-20 Census of Persons in Paid Employment.

The database of persons in paid employment was set up on the basis of Census of Persons in Paid Employment in 1986. It is updated from M-forms, i.e. Registration data for introduction and monitoring of records on retirement and disablement insurance and health insurance (records on stipulated employment).

The Labour Force Survey (LFS) was introduced as a developmental project in Slovenia in 1989. The developmental phase lasted until the end of 1992 and was carried out by the Institute for Social Sciences. In 1993 the survey became part of the National Programme of Statistical Surveys and was transferred to the National Employment Office, which - together with the Statistical Office of the Republic of Slovenia - conducted the 1993 LFS.

The Slovenian LFS was carried out in compliance with the International Labour Office guidelines for labour force statistics, adopted at the 13th International Conference of Labour Statisticians and in compliance with Eurostsat requirements which refer to harmonized EU survey.

Data on registered unemployed persons and job vacancies are forwarded by the National Employment Office.

COVERAGE

Until 1991, the statistical surveys on persons in paid employment in enterprises and other organizations covered all enterprises and organizations, (other than private ones) and their constituent units. Coverage since 1992 has included enterprises in private ownership with three or more persons in paid employment, and armed forces staff, while since 1993 studies have included staff in internal affairs administrations.

In order to provide data on persons in paid employment by communities of the Republic of Slovenia, after 1960 we carried out surveys on organizational and territorial lines, in which the community was the basic territorial unit. In most cases the organizational principle coincides with the territorial principle, with differences coming only where organizations have work units in other communities. Separated parts of an organization were considered as independent reporting units in the activity they actually performed, and not according to the predominant activity of the organization to which they belonged. Separated units in the territory of a community containing the headquarters of the organization were observed together with the parent organization as one reporting unit according to its predominant activity.

Since 1977 we have collected data on persons in paid employment according to the territorial principle and by kind of activity. The reports are compiled separately for each enterprise or organization and for each of their business or other constituent unit (territorially separated constituent units or constituent units representing a whole, in the business or production sense, in which the activity is performed, as a rule, different from the predominant activity under which the company or organization is classified).

An exception is the RAD-10 Report on Persons in Paid Employment in Organizations and Communities, where the organizational-territorial principle was taken into consideration in the collecting of data until 1988.

The database on persons in paid employment covers all persons in paid employment in enterprises and other organizations regardless of ownership. In private enterprises, owners are also included.

Labour Force Survey sample covers the resident population, i.e. all persons whose usual place of residence is in the territory of Slovenia. The survey covered only the population living in private households. Employment status of a person was assessed by reference to his previous week's activities. The observational units were all individuals usually living within the selected households. Non-response and non-

gospodinjstvu, ki so stari veË kot 15 let in ki niso odsotni iz gospodinjstev. Skupna stopnja neodgovorov, tj. neodgovorjenih vpraöalnikov (odsotnost, nesposobnost sodelovanja ipd.) je bila v ADS 1996 10,0 %, stopnja zavrnjenih odgovorov pa 7,9 %.

DEFINICIJE

Kot **zaposlene osebe v podjetjih in drugih organizacijah** obravnavamo:

- osebe, zaposlene v podjetjih in drugih organizacijah, ki so sklenile delovno razmerje za doloËen ali nedoloËen Ëas, ne glede na to, ali delajo v podjetju oz. organizaciji poln delovni Ëas ali delovni Ëas, ki je krajöi od polnega (tudi pripravnike);
- osebe, zaposlene pri zasebnikih.

Med zaposlene osebe ne öetejemo:

- oseb, ki v podjetjih in drugih organizacijah opravljajo zaËasno ali obËasno delo po pogodbi o delu ali po avtorski pogodbi in
- oseb, drûavljanov Republike Slovenije, stalno zaposlenih v slovenskih predstavniötvih, na gradbiöËih ipd. v tujini.

Strokovna izobrazba (formalnopravna izobrazba) zaposlene osebe je stopnja izobrazbe, ki jo je zaposlena oseba pridobila s konËano ustrezno öolo, z opravljenim izpitom ali s priznanjem na osnovi dela. Zaposlena oseba jo lahko uveljavi na osnovi splooöno formalnopravno priznane dokumentacije: diplome, spriËevala, odloËbe.

Strokovna usposobljenost za opravljanje doloËenih del in nalog je potrebna stopnja izobrazbe in drugi izpolnjeni pogoji (strokovni izpit, praksa itd.), ki so doloËeni z akti poslovnega subjekta kot pogoji za opravljanje dela.

äolska izobrazba je vrsta öole, s katero si je zaposlena oseba pridobila najviöjo stopnjo v svojem izobraûevanju s öolanjem na verificiranih vzgojno-izobraûevalnih ustanovah. Zaposlena oseba jo dokazuje s spriËevalom oziroma z diplomo. TeËajev, ki ne zagotavljajo enakovrednega spriËevala kot redna öola, ali teËajev, ki jim ni priznana stopnja doloËene öole, ne upoötevamo.

Izmenski koeficient je izraËunan po naslednjem obrazcu:

$$\frac{S}{S1 + 1/2\ S2 + 1/3\ S3}$$

S = öetevilo zaposlenih oseb v vseh izmenah

S1 = öetevilo zaposlenih oseb na enoizmenskih delovnih mestih

S2 = öetevilo zaposlenih oseb na dvoizmenskih delovnih mestih

S3 = öetevilo zaposlenih oseb na triizmenskih delovnih mestih (in v turnusu)

Fluktuacija zaposlenih oseb se nanaöa na meseËno, in ne na letno fluktuacijo. IzraËunana je po naslednjem obrazcu:

$$\% F = \frac{O}{ZS + P \times 100}$$

Pomen simbolov: % F - odstotek fluktuacije, O - odöli v mesecu, ZS - zaËetna stopnja zaposlenih oseb in P - priöli v mesecu.

Iskalca zaposlitve öetejemo za **registrirano brezposelno osebo** v naslednjih primerih:

- Ëe nima redne zaposlitve ali samozaposlitve, Ëe ni lastnik ali solastnik poslujoËega podjetja ali Ëe ni lastnik ali uporabnik nepremiËnin, s katerimi bi se lahko preûivljal;
- Ëe je sposoben in voljan delati ter je pripravljen sprejeti zaposlitev, primerno njegovi strokovni izobrazbi oziroma z delom pridobljeni delovni usposobljenosti;
- Ëe se zaradi zaposlitve prijavi na pristojnemu zavodu za zaposlovanje.

Novo prijavljene registrirane brezposelne osebe so osebe, ki so se prijavile v doloËenem roku na pristojnem zavodu za zaposlovanje.

Preko zavoda zaposlene osebe so tiste, ki so bile pri zavodu prijavljene in so se v doloËenem Ëasu zaposlile.

Podatke o **prostih delovnih mestih** sporoËajo podjetja in druge organizacije zavodu za zaposlovanje.

coverage: the total non-response rate in the 1996 LFS was 10,0% and the refusal rate 7,9%.

DEFINITIONS

Persons in paid employment in enterprises and other organizations *are:*

- *persons in paid employment in enterprises and other organizations who have signed a work contract for a fixed or unspecified period of time, irrespective of whether they work in the enterprise or other organization full time or less than full time (including trainees);*
- *persons in paid employment in private establishments.*

The following categories are not counted as persons in paid employment:

- *persons performing temporary or occasional contract work,*
- *citizens of the Republic of Slovenia employed permanently in Slovenian representations, on construction sites, etc., abroad.*

Professional attainment *(formal education) of persons in paid employment is the level of education acquired by such a person upon completing an appropriate school after sitting for exams or receiving recognition based on course work. A person can demonstrate the level acquired with a general legally and formally recognized document: diploma, certificate, decree.*

Professional qualification *for performing certain types of work and certain tasks are represented by the necessary level of education and the fulfilment of other conditions (professional examinations, experience, etc.), which are determined by act of the enterprise or organization as conditions for performing work.*

School education *means the type of school at which persons in paid employment acquired their highest level of education through schooling at verified educational institutions. A person can demonstrate the level acquired with a certificate or a diploma. Courses not leading to a regular school certificate or courses not recognized as having the equivalent level of a certain type of school are not taken into consideration.*

The ***shift coefficient*** *is calculated according to the following formula:*

$$\frac{N}{N1 + 1/2\ N2 + 1/3\ N3}$$

where,

N = No. of persons in paid employment in all shifts

N_1 *= No. of persons in paid employment in single-shift jobs*

N_2 *= No. of persons in paid employment in twin-shift jobs*

N_3 *= No. of persons in paid employment in triple-shift jobs (shift rotation)*

Fluctuation *of persons in paid employment refers to monthly and yearly turnover and is calculated by the formula:*

$$\% F = \frac{D}{IL + A \times 100}$$

Where %F = percentage fluctuation, D = departures in month, IL = initial level of persons in paid employment and A = arrivals in month.

Job-seekers are considered ***registered unemployed persons:***

- *if they do not have a regular job or are not self-employed, if they are not the owner or co-owner of an operating enterprise, and if they are not the owner or user of property which could provide a living;*
- *if they are capable of and willing to work and are prepared to accept a job suitable to their professional attainment or working skills acquired through work;*
- *if they have registered as job-seekers with the NEO.*

Newly registered unemployed persons *are persons who have registered with the NEO within a certain period.*

Persons employed through the NEO *are those who were registered with the NEO and who obtained a job within a certain period.*

Enterprises and other organizations report data on ***job vacancies*** *to the NEO.*

Po Zakonu o zaposlovanju in zavarovanju za primer brezposelnosti (Ur. l. RS, öt. 5/91 in 71/93) imajo registrirane brezposelne osebe, ki jim je delovno razmerje prenehalo brez njihove volje ali krivde, pravico do **denarnega nadomestila**, Ëe so se najkasneje v roku 30 dni po prenehanju delovnega razmerja prijavile na zavodu za zaposlovanje. Pravico do denarnega nadomestila lahko uveljavi brezposelna oseba, ki je bila v delovnem razmerju nepretrgano najmanj 9 mesecev ali 12 mesecev s presledki v zadnjih 18 mesecih. Po izteku pravice do denarnega nadomestila lahko brezposelna oseba v roku 30 dni uveljavi pravico do **denarne pomoËi**, Ëe njeni dohodki skupaj z dohodki druűinskih Ëlanov na osebo v zadnjih treh mesecih pred uveljavitvijo denarne pomoËi ne presegajo 80 % zajamËenega osebnega dohodka.

Z anketo o delovni sili se je uveljavil öe izraz **delovno aktivno prebivalstvo.** Gre za osebe, ki so v zadnjem tednu pred anketiranjem opravile kakrönokoli delo za plaËilo (denarno ali naturalno) ali za dobiËek in tisti, ki so sicer zaposleni ali samozaposleni, a so bili v zadnjem tednu pred anketiranjem z dela zaËasno odsotni. Med delovno aktivno prebivalstvo so vkljuËene tudi zaposlene osebe, ki so zaËasni in trajni preseűki do prenehanja delovnega razmerja ter pomagajoËi druűinski Ëlani (osebe, ki pomagajo na druűinski kmetiji ali v druűinskem podjetju, obrti). **Brezposelne osebe** so tiste osebe, ki v zadnjem tednu pred anketiranjem niso bile zaposlene ali samozaposlene in niso opravile nikakrönega dela za plaËilo ter:

- so aktivno iskale zaposlitev in bi bile le-to takoj (v dveh tednih) pripravljene sprejeti, Ëe bi jo naöle, ali
- so iskale moűnosti za samozaposlitev ali
- so űe naöle zaposlitev, ki jo bodo zaËele opravljati kasneje.

Aktivno prebivalstvo tvorijo delovno aktivni prebivalci in brezposelne osebe. **Neaktivno prebivalstvo** so tisti, ki niso razvröËeni niti med delovno aktivne prebivalce niti med brezposelne osebe.

Navedene definicije se nanaöajo na populacijo, staro 15 let in veË.

Stopnja aktivnosti je odstotni deleű aktivnega prebivalstva v delovno sposobnem prebivalstvu.

Stopnja delovne aktivnosti je odstotni deleű delovno aktivnega prebivalstva v delovno sposobnem prebivalstvu.

Stopnja brezposelnosti je odstotni deleű brezposelnih oseb v aktivnem prebivalstvu.

Podatki, ki jih dobimo iz administrativnih virov (Baza podatkov o zaposlenih osebah), se razlikujejo od podatkov, pridobljenih neposredno od podjetij in drugih organizacij (ZAP-M), in od podatkov iz Ankete o delovni sili, ki temelji na anketiranju gospodinjstev.

Razlike nastanejo zaradi razliËnega naËina zbiranja podatkov in zaradi razliËnih definicij, vendar te razlike omogoËajo pogled na problem z razliËnih metodoloökih vidikov, kar omogoËa veËjo zanesljivost pri ugotavljanju in reöevanju problemov zaposlenosti in brezposelnosti. Metodologija meseËnega raziskovanja ZAP-M je usmerjena k drugi ciljni populaciji kot Anketa o delovni sili.

STATISTI» NE PUBLIKACIJE

Pregled zaposlenega osebja v l. 1951.

Letni pregled o zaposlenem osebju 1952.

Letni pregled zaposlenih 1953.

Zaposleni julija 1954.

Zaposleni 31. III. 1955.

Zaposleni v LRS 30. IX. 1955 in 1956.

Usluűbenci v ustanovah 1. IV. in 1. X. 1957.

Javni usluűbenci in delavci v ustanovah 31. 12. 1958.

Zaposleni v LRS 30. IX. 1959.

StatistiËno gradivo: 1972, öt. 11, 12; 1974, öt. 2, 7.

Rezultati raziskovanj öt. 1, 23, 69, 111, 112, 121, 157, 177, 189, 192, 224, 249, 273, 278, 319, 335, 349, 371, 387, 406, 432, 451, 474, 497, 554, 584, 607, 623, 643, 663, 675 in 683.

StatistiËni podatki po obËinah Republike Slovenije: 1960, zv. II; 1962, zv. II; 1963, zv. IX; 1964, zv. VII; 1965, zv. X; 1966, zv. XI; 1969, zv. IX; 1970, zv. II; 1971, zv. VII; 1972, zv. I; 1973, zv. III; 1974, zv. II; 1975, zv. V; 1976, zv. III; 1977, zv. XI; 1978, zv. VIII; 1979, zv. IV, IX, XVI, XXI; 1980, zv. I, XII; 1981, zv. IX; 1982, zv. V; 1983, zv. XV; 1984, öt. 13; 1985, öt. 7; 1986, öt. 10; 1989, öt. 4; 1990, öt. 3, 16; 1991, öt. 5; 1992, öt. 13 in 1996 öt. 2.

Pursuant to the Law on Employment and Insurance Against Unemployment (Official Journal of RS, No. 5/91 and 71/93), registered unemployed persons who lost their job against their will and through no fault of their own have the right to ***unemployment benefit*** *if they register with the NEO within 30 days of losing their job. The right to unemployment benefit may be exercised by unemployed people who worked uninterrupted for at least 9 months or for 12 months with interruptions over the previous 18 months. Upon expiry of the right to unemployment benefit, an unemployed person may claim supplementary benefit within 30 days if their total income, together with the total earnings per person of their family members, in the 3 months prior to the claim for supplementary benefit did not exceed 80% of the guaranteed earnings.*

In Labour Force Survey ***persons in employment*** *are those, who during the last week prior to the interview, did any work for payment (in cash or kind) or profit, or were not working but had jobs from which they were temporarily absent. Family workers and workers on temporary or permanent lay-off are included in labour force.* ***Unemployed persons*** *are those who, during the last week prior to the interview, had no employment, were not self-employed and did no work for payment, and:*

- *were actively looking for paid employment and were available to start work immediately (within two weeks), or*
- *were looking to set up their own business or professional practice, or*
- *had found a job to start later.*

The labour force *is defined as the sum of persons in employment and unemployed persons.* ***Inactive persons*** *are those who are not classified as persons in employment or as unemployed persons.*

These definitions relate to the population of working age 15 years or over.

Activity rate *represents the labour force as a percentage of the population of working age.*

Employment/population ratio *represents persons in employment as a percentage of the population of working age.*

Unemployment rate *represents unemployed persons as a percentage of the labour force.*

Data obtained by administrative records (Database on Persons in Paid Employment) or by enterprise survey (ZAP-M) or by Labour Force Survey (survey implemented in households) are not equal because of different definitions, survey methods and ways of data collection.

However, these differences enable examination of problems from different methodological aspects, which enables greater reliability in ascertaining and solving problems of employment and unemployment. The methodology of monthly survey ZAP/M is directed towards a different target population than Labour Force Survey.

WAGES

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o povpreËnih meseËnih plaËah pridobimo na podlagi rednega meseËnega raziskovanja o plaËah in zaposlenih osebah v podjetjih in drugih organizacijah (ZAP-M). Od leta 1992 so zajeta tudi podjetja v zasebni lasti.

Podatke o strukturi zaposlenih oseb po velikosti bruto plaË pridobivamo iz rednega polletnega raziskovanja o plaËah in zaposlenih osebah za marec in september (ZAP-PL). Podatke o plaËah zaposlenih oseb po stopnjah strokovne usposobljenosti za opravljanje doloËenih del in nalog za leti 1994 in 1995 smo zbrali z letnim raziskovanjem ZAP-1, za .leto 1993 pa z raziskovanjem ZAP-3, ki je razöirjena razliËica raziskovanja ZAP-1 in ga izvajamo vsaka tri leta.

ZAJETJE

V statistiËno raziskovanje o plaËah in zaposlenih osebah so vkljuËena podjetja in druge organizacije (podjetja v zasebni lasti le, Ëe imajo zaposlene najmanj 3 osebe).

Od leta 1992 so v raziskavo vkljuËena zasebna podjetja in oboroűene sile, od leta 1993 pa tudi policija. Upoötevane so vse zaposlene osebe, ne glede na delovni Ëas, niso pa zajeti prejemki zunanjih sodelavcev.

DEFINICIJE

PovpreËne meseËne plaËe sestavljajo prejemki zaposlenih oseb. Poleg prejemkov za dejansko opravljeno delo v rednem delovnem Ëasu zajemajo tudi vse ostale prejemke, ki se oblikujejo na tej osnovi: prejemke za delo nad polnim delovnim Ëasom, nadomestila za letni dopust, bolezen do 30 dni, zastoj brez krivde zaposlenih oseb, drűavne praznike, opravljanje drűavljanskih dolűnosti, plaËane odsotnosti ipd., nagrade, premije, prejemke za minulo delo, stimulativne dodatke ter prejemke po periodiËnem obraËunu in zakljuËnem raËunu.

Neto plaËa je bruto plaËa, ki sta ji odöteta prispevek za socialno varnost in davek od osebnih prejemkov.

Indeks nominalnih plaË raËunamo iz podatkov o povpreËnih meseËnih plaËah.

Indeks realnih plaË je razmerje med indeksom nominalnih plaË in indeksom cen ûivljenjskih potreböin za isto obdobje.

RazvröËanje zaposlenih oseb v podjetjih in drugih organizacijah po velikosti plaËe opravimo na podlagi skupno izplaËanih plaË oziroma akontacij plaË za marec in september. Zaposlene osebe, ki so imele najmanj 160 in najveË 200 plaËanih ur v polnem delovnem Ëasu oz. prek polnega delovnega Ëasa, so razvröËene po velikosti bruto plaË.

Druge definicije so v poglavju Zaposlenost.

SOURCES AND METHODS OF DATA COLLECTION

Data on average monthly earnings are based on regular monthly surveys of persons in paid employment and earnings in enterprises and other organizations (ZAP-M). Since 1992 this information has included private enterprises.

Data on the structure of persons in paid employment by amount of gross earnings are from the regular half-yearly study on earnings and persons in paid employment for March and September (ZAP-PL). The data on earnings of persons in paid employment by level of professional attainment required by post for 1994 and 1995 have been collected from the annual survey ZAP-1, while for 1993 they have collected by the thriennial survey ZAP-3.

COVERAGE

The statistical survey of persons in paid employment and earnings includes enterprises and other organizations (private enterprises are included only if they have 3 or more persons in paid employment).

Private enterprises and members of the armed forces have been included since 1992, while the police have been included since 1993. All persons in paid employment, employed for fixed or unspecified period of time, irrespective of whether they work full time or part-time, are taken into consideration. The earnings of external associates and consultants are not covered.

DEFINITIONS

Average monthly earnings *are composed of income received by persons in paid employment. In addition to income earned for work actually done during regular working hours, all other income is counted, and is set out on the following basis: income from overtime, supplements for annual leave, sickness pay for up to 30 days, slowdown through no fault of the persons in paid employment, public holidays, performing of civic duties, paid leave and similar, awards, premiums, income for past work, incentive bonuses and bonuses after periodic and final balance sheets.*

Net earnings *are gross earnings less contributions for social security and earnings tax.*

The index of nominal earnings *is calculated from information on average monthly earnings.*

The index of real earnings *represents the relationship between the index of nominal earnings and the consumer price index.*

The categorization of persons in paid employment in enterprises and other organizations by amount of gross earnings is made for March and September. Persons in paid employment who had a minimum of 160 and a maximum of 200 paid hours of full working time or overtime are categorized according to the amount of gross earnings.

For other definitions see chapter Employment.

14. éIVLJENJSKA RAVEN / *LEVEL OF LIVING*

VIRI IN METODE ZBIRANJA PODATKOV

Podatke zberemo z anketo o porabi v gospodinjstvih, ki se v tej obliki izvaja od leta 1984 in zdruűuje dotedanjo anketo o druűinskih proraËunih delavskih druűin in anketo o kmeËkih gospodinjstvih.

Vzorec za anketo je dvostopenjski, stratificiran. Znotraj öestih stratumov je izbranih 218 enot prve stopnje - segmentov, ki so naËeloma popisni okoliöi. Enote druge stopnje so gospodinjstva. V vsakem segmentu je sistematiËno izbranih 5 do 7 oseb, ki doloËajo gospodinjstva, vkljuËena v vzorec. Skupno je v vzorcu 1 331 gospodinjstev, kar je 0,2 % slovenskega prebivalstva. Od leta 1994 ne izbiramo veË nadomestnih gospodinjstev, s katerimi bi zamenjali tista, ki niso sodelovala. Namesto tega izberemo veËji vzorec na podlagi neodziva iz prejönjih let.

Gospodinjstva kot enote opazovanja so skupnosti oseb, ki skupaj stanujejo, se skupaj hranijo in skupaj porabljajo svoje prejemke, ali samske osebe, ki űivijo same ter porabljajo sredstva in se hranijo samostojno.

V anketi ne upoötevamo skupinskih gospodinjstev, kot so ustanove za varstvo in nego otrok in starejöih, bolniönice, dijaöki in ötudentski domovi ipd.

Podatke o razpoloűljivih in porabljenih sredstvih v gospodinjstvu oziroma podatke o osnovnih elementih osebne porabe so dajali Ëlani gospodinjstva neposredno (v obliki intervjuja) anketarju, ki ga je za to delo pooblastil StatistiËni urad Republike Slovenije.

Podatke objavljamo za vsa gospodinjstva skupaj in za vsako kategorijo posebej (meöana in nekmeËka). Zaradi majhnega ötevila kmeËkih gospodinjstev v vzorcu, so ocene nenatanËne in jih ne objavljamo. Razvrstitev gospodinjstev v posamezne kategorije smo opravili glede na prevladujoËi vir dohodkov Ëlanov anketiranega gospodinjstva.

SOURCES AND METHODS OF GATHERING DATA

Data are colleted with the Household Budget Survey, which has been conducted quarterly since 1984 and contains the previous Survey on Family Budgets of Worker's Households and the Survey on Private Agricultural Holdings.

The sample for the survey is a stratified two-stage probability sample. Within six strata we select 218 primary sampling units - segments. In principle the primary sampling units are enumeration areas. The units of the second stage are households. In each segment 5 to 7 persons are systematically selected and they determine the households that are included in the sample. The sample comprises a total of 1,331 households, or in other words, 0.2 % of the Slovene population. In 1996 we did not select substitute households which would replace the households that dropped out.

The households as observation units are either communities of persons who live together, eat together and spend their income together, or single persons who live and eat on their own and independently use the means.

The survey does not cover collective households (nursing homes for children, homes for the elderly, hospitals, secondary school boarding homes and student hostels).

Data on available and allocated assets of households were given by the members to the interviewers who have authorisation from the Statistical Office of the Republic of Slovenia.

The results of the survey are published per household and separately per individual categories (mixed and non-agricultural). Because the number of agricultural households in the sample is small, the estimations are inaccurate and we are not published. The classification of households into one of the socio-economic categories is determined by the source of income of household members.

ZAJETJE

V anketi o porabi v gospodinjstih, ki jo je Urad izvedel v decembru 1996, je bilo zajetih 875 gospodinjstev, od tega 24 kmeËkih, 280 meöanih in 571 nekmeËkih.

Podatke, ki jih dobimo s to anketo, lahko posploöimo na vse enake tipe gospodinjstev.

ätevilo in sestava anketiranih gospodinjstev po socialnoekonomskih kategorijah, 1996

	ätevilo anketiranih gospodinjstev	Ocenjeno ötevilo gospodinjstev	PovpreËno öt. Ëlanov gospodinjstev

COVERAGE

The Household Budget Survey, which was conducted in December 1996 by our Statistical Office, covered 875 households, of that 24 agricultural, 280 mixed and 571 non-agricultural.

Data gathered with this survey can be generalised to all households of the same type.

The number and composition of surveyed households by socio-economic categories, 1996

	Number of households in the sample	*Estimated number of households*	*Average number of household members*
Total	875	636330	3,06
Agricultural	24	17724	2,75
Mixed	280	203575	3,48
Non-agricultural	571	415031	2,87

DEFINICIJE

KmeËko gospodinjstvo ima lastno kmeËko gospodarstvo in vsi njegovi Ëlani, stari veË kot 15 let, delajo na tem gospodarstvu kot kmetje. Nobeden izmed Ëlanov ni v delovnem razmerju zunaj gospodarstva, ni zasebnik ali podjetnik, ni upokojenec ali druga oseba z lastnimi prejemki, lahko pa nekateri med njimi (eden ali veË) obËasno delajo zunaj gospodarstva, da si tako pridobijo dodatna sredstva.

Med kmeËka sodijo tudi naslednja gospodinjstva:

- gospodinjstvo kmetijskih delavcev brez lastne zemlje, katerih Ëlani redno delajo na drugih zasebnih kmeËkih gospodarstvih;
- gospodinjstvo ostarelih kmetov, ki imajo gospodarstvo, pa niso veË sposobni za delo in jim zemljo obdelujejo drugi, tako da jim za to plaËajo, pa tudi tako, da jo dajo v zakup ali na spolovino. Njihovi dohodki torej izvirajo samo iz gospodarstva in nimajo nobenih drugih prejemkov;
- gospodinjstvo katerega Ëlani so si kot kmeËki - zavarovanci (Zakon o pokojninskem in invalidskem zavarovanju, Zakon o starostnem zavarovanju kmetov) pridobili pravico do kmeËke pokojnine ali zaradi odtujitve zemlje pravico do preűivnine (Zakon o preűivninskem varstvu kmetov);

DEFINITIONS

An agricultural household *is ahousehold which has its own agricultural holding and all its members, older than 15 years, work on the holding as farmers. None of the household members holds an employment outside the holding, none of them is an entrepreneur, a pensioner or any other person with personal income. One or more household members, however, can occasionally work outside the household in order to earn some additional income.*

An agricultural household can also be a household:

- *comprising farm workers without their own land, whose household members regularly work on other private agricultural holdings;*
- *comprising aged farmers who have a holding but are not capable of working and other people who cultivate their land - whereas the latter are either being paid for their work or they hold a lease for the land or are share-croppers. Thus their income stems only from the holding and they do not have any other income;*
- *whose members have gained, as farmers - insured persons (Law on Pension Insurance and Disability Insurance, Law on Old-age Insurance of Farmers) the right to the farmers' pension or have acquired the right to an alimony (Law on Protection of Farmers to Survive);*

- gospodinjstvo katerega Ëlan je na zaËasnem delu v tujini.

Meöano gospodinjstvo ima lastno kmeËko gospodarstvo, v katerem pa je poleg tistih, ki delajo na njem, tudi en ali veË Ëlanov, ki je v delovnem razmerju zunaj gospodarstva, je zasebnik ali podjetnik, upokojenec ali ima druge lastne prejemke.

Meöano gospodinjstvo je tudi tisto, ki ima kmeËko gospodarstvo, vsi njegovi aktivni Ëlani pa so v delovnem razmerju zunaj gospodarstva, so zasebniki ali podjetniki, upokojenci ali druge osebe z osebnimi prejemki, v prostem Ëasu (popoldne, ob nedeljah in praznikih) pa delajo na gospodarstvu ali plaËujejo za obdelovanje pod svojim nadzorstvom, dajejo zemljo v zakup ali na spolovino, torej izvira del njihovih dohodkov tudi iz kmetijstva.

NekmeËko gospodinjstvo nima kmeËkega gospodarstva, en ali veË njegovih Ëlanov je v delovnem razmerju, je zasebnik ali podjetnik, upokojenec ali ima druge lastne prejemke.

Zasebno kmeËko gospodarstvo je vsako kmeËko posestvo, ki ima najmanj 10 arov obdelovalne zemlje. Posestvo, manjöe od 10 arov, ötejemo za kmeËko gospodarstvo, Ëe na njem pridelujejo za prodajo zelenjavo, sadje, cvetje, aromatiËna, zdravilna zeliËa ali redijo ûivino, in sicer najmanj:

- kravo in tele ali kravo in mlado goved ali
- kravo in dve odrasli drobnici ali
- pet odraslih ovac ali
- tri odrasle praöiËe ali
- ötiri odrasle ovce in praöiËe skupaj ali
- 50 glav odrasle perutnine ali
- 20 Ëebeljih panjev.

Razpoloûljiva sredstva zajemajo vsa denarna sredstva ter potroöniöka in investicijska posojila, ki so bila gospodinjstvu na voljo v anketnem obdobju.

Denarna sredstva gospodinjstva zajemajo vse denarne prejemke, ki so jih Ëlani gospodinjstva dobili v letu 1996:

- prejemke iz delovnega razmerja (plaËe in drugi prejemki zaposlenih Ëlanov);
- prejemke iz honorarnega dela (vkljuËno s prejemki na podlagi avtorskih pravic in od prodaje predmetov domaËe obrti);
- prejemke iz samozaposlitve (plaËa podjetnika, dohodek iz kmetijstva in iz dejavnosti);
- prejemke iz socialnega zavarovanja (pokojnine z dodatki, otroöki dodatek, nadomestilo za porodniöki dopust, socialne pomoËi, invalidnine, ötipendije, nadomestila nezaposlenih);
- druge prejemke (prejemki od oddajanja sob, denarna darila in dobitki, denarni prejemki od Ëlanov, ki delajo v tujini, preûivnine, vzdrûevalnine, denarna darila in prejemki iz tujine, prejemki od prodaje premiËnin in nepremiËnin, nadomestila za nacionalizirano in razlaöeno imetje, posojila od drugih oseb);
- zmanjöanje prihrankov (prejemki na podlagi prodaje vrednostnih papirjev, iz naslova ûivljenjskega zavarovanja, od zavarovalnic, vraËanje posojil, zmanjöanje gotovine v gospodinjstvu).

Potroöniöka in investicijska posojila so posojila, najeta in porabljena za nakup predmetov osebne porabe ter za nakup in gradnjo stanovanjskih objektov.

Porabljena sredstva obsegajo izdatke za ûivljenjske potreböine (denarne izdatke - vrednost kupljenega blaga ne glede na to, ali je bilo plaËano v gotovini ali na kredit), odplaËila posojil, izdatke gospodinjstev za stanovanje oz. hiöo in prihranke. Upoötevani so vsi izdatki Ëlanov gospodinjstva, ne glede na to, ali so jih porabili za lastne potrebe ali za darila drugim osebam.

STATISTI» NE PUBLIKACIJE

Rezultati ankete o ûivljenju kmetov 1. 4. 1952 - 31. 5. 1953.

éivljenje kmetov v gospodarstvu l. 1953/54.

StatistiËno gradivo: 1966, öt. 7; 1969, öt. 23; 1973, öt. 26; 1978, öt. 15; 1983, öt. 8; 1983, öt. 9; 1988, öt. 10; 1988, öt. 11; 1988, öt. 12; 1993, öt. 4.

Rezultati raziskovanj öt. 8, 61, 67, 90, 141, 176, 241, 280, 485, 539, 543, 572, 609, 639 in 684.

- *whose member is temporarily working abroad.*

***A mixed household** is that household which has its own agricultural holding in which, besides those who work on the holding, there are one or more members who are employed outside the holding, are entrepreneurs, pensioners or other persons with personal income.*

A mixed household is also a household which has an agricultural holding and all its active household members hold an employment outside the holding, are entrepreneurs, pensioners or other persons with personal income, and in their spare time (in the afternoons, on Sundays and holidays) they work on the holding or pay for the cultivation of land under their supervision, they lease their land or give it to the share-croppers, as part of their income also stems from the holding.

***A non-agricultural household** is that household which does not comprise an agricultural holding, one or more of its household members hold an employment, are private legal persons or entrepreneurs, pensioners or other persons with personal income.*

***A private agricultural holding** is every agricultural holding which comprises at least 0.1 ha of cultivable land. A holding, smaller than 0.1 ha, is considered to be an agricultural holding only in case vegetables, fruit, flowers, aromatic and medicinal herbs, are cultivated for sale or cattle is reared, where by the minimum number of cattle is:*

- *a cow and calf or a cow and young cattle or*
- *a cow and two grown-up small cattle (sheep, goat and pigs) or*
- *five grown-up sheep or*
- *three grown-up pigs or*
- *four grown-up sheep and pigs together or*
- *50 grown-up fowls or*
- *20 beehives.*

***Available assets** within a household are available financial assets (income), and consumer and investment loans that a household had at its disposal in the survey period.*

***Available money assets** within a household include all money income that was received by household members during 1996:*

- *income from work under employment (wages and other income of employed members);*
- *income from work under contract or copyright agreement or for direct pay;*
- *income from selfemployment (income of entrepreneur, from agricultural holding, of independent craftsmen and lawyers);*
- *pension and social receipts (supplement for children, compensation for maternity leave, social benefits, disability allowances, scholarships, unemployment benefits);*
- *other income (income from property, money gifts and winnings, financial income from members working abroad, alimonies, money gifts and income from abroad, income from sale of intangible and tangible goods, compensations for nationalised and dispossessed property, loans from other persons);*
- *decrease of savings (income on the basis of the sale of securities, income from life insurance, from insurance companies, repayment of loans, decrease of cash in a household).*

***Consumer and investment loans** are raised and spent loans for the purchase of consumption goods and for purchase and constructing of a dwelling or a house.*

***Allocated assets** include consumption expenditure (money expenditure - value of purchased goods, regardless if they were paid in cash or by credit), repayment of loans, households' expenditure for a dwelling or a house and savings. All expenditure that household members had during the year is included, regardless if they spent them for their personal needs or for presents to other persons.*

15. CENE

PRICES

VIRI IN METODE ZBIRANJA PODATKOV

Cene na drobno (kmetijskih pridelkov, industrijskih izdelkov in storitev), cene gostinskih storitev ter cene na debelo zbirajo opazovalci cen v stalno določenih krajih, na stalnih prodajnih mestih in v stalno določenih razdobjih. Cene na drobno za kmetijske pridelke opazovalci zbirajo dvakrat na mesec, vse ostale cene na drobno pa enkrat mesečno.

Cene določenih industrijskih izdelkov pri proizvajalcih zbiramo mesečno z vprašalniki pri izbranih industrijskih in drugih podjetjih.

ZAJETJE

Cene na drobno so osnova za izračun indeksa cen na drobno in indeksa cen življenjskih potrebščin. Drobnoprodajne cene spremljamo za okoli 490 predmetov in storitev v 4 izbranih mestnih naseljih na okoli 500 prodajnih mestih. Tako zberemo skupno okrog 10.000 drobnoprodajnih cen.

Cene industrijskih izdelkov pri proizvajalcih spremljamo za približno 450 industrijskih izdelkov v okoli 290 izbranih podjetjih.

Cene gostinskih storitev spremljamo v 27 gostinskih podjetjih v 4 izbranih mestnih naseljih. Seznam gostinskih storitev zajema okoli 60 vrst storitev.

Cene na debelo smo do konca leta 1996 spremljali za okoli 160 industrijskih izdelkov v 4 izbranih mestnih naseljih pri izbranih trgovskih podjetjih na debelo. Za spremljanje cen na debelo so bili izbrani enaki izdelki kot za spremljanje cen na drobno.

DEFINICIJE IN METODOLOŠKA POJASNILA

Indeksi cen so izračunani po (modificirani) Laspeyresovi formuli na osnovi cen predmetov in storitev ter njihovih uteži (ponderjev). Uteži predstavljajo relativne deleže predmetov in storitev v skupni vrednosti vseh opazovanih predmetov in storitev. Tako določajo relativen pomen spremembe cene posameznega izmed njih na skupno spremembo. Uteži spreminjamo praviloma najmanj na vsakih pet let.

Indeks cen na drobno je indeks, ki kaže spremembe drobnoprodajnih cen izdelkov in storitev z vidika strukture prodaje le-teh na domačem trgu ne glede na namen njihove nadaljnje uporabe in ne glede na vrsto potrošnika. **Drobnoprodajna cena** je tista, po kateri trgovina na drobno, kmetijski pridelovalci in druga podjetja prodajajo svoje izdelke in zaračunavajo storitve uporabnikom. To so hkrati končne cene, po katerih uporabniki plačujejo predmete široke porabe in storitve. **Ponderacija (uteževanje)** temelji na podatkih o strukturi vrednosti prodaje pridelkov, izdelkov in storitev v prodaji na drobno. Nazadnje je bila spremenjena v letu 1997 na podatkih iz leta 1994.

Indeks cen življenjskih potrebščin meri spremembe v ravni **drobnoprodajnih** cen izdelkov in storitev glede na strukturo izdatkov, ki jih individualna rezidenčna gospodinjstva namenjajo za končno porabo. **Ponderacija** temelji na podatkih o strukturi porabe v gospodinjstvih po anketah o porabi gospodinjstev. Nazadnje je bila spremenjena v letu 1995 na podlagi ankete iz leta 1993.

Indeks cen življenjskih potrebščin ne kaže sprememb v ravni in strukturi življenjskih stroškov, kar opazujemo s posebnimi anketami. Odraža le spremembe cen in je posebna vrsta indeksa cen na drobno. Najpomembnejša razlika med indeksom cen na drobno in indeksom cen življenjskih potrebščin je ponderacijska shema. Obstajajo še manjše razlike glede zajema izdelkov in storitev. Tako npr. indeks cen življenjskih potrebščin ne zajema izdelkov, ki niso namenjeni končni porabi (npr. določeni predstavniki za reprodukcijske namene v kmetijstvu), sicer pa so vključeni v spremljanje indeksa cen na drobno. Po drugi strani pa so upoštevane nekatere storitve, ki niso vključene v spremljanje indeksa cen na drobno (npr. hrana in pijača v gostinstvu).

Indeks cen industrijskih izdelkov pri proizvajalcih je indeks, ki meri spremembe cen industrijskih izdelkov, ki jih proizvajalci v Sloveniji prodajo na domačem trgu. **Cena industrijskih izdelkov pri proizvajalcu** je tista, po kateri podjetje proda svoj izdelek v največjih količinah na domačem trgu - franko tovarna. V njej niso upoštevani trgovski rabat in popusti. **Ponderacija** temelji na podatkih o strukturi vrednosti prodaje industrijskih izdelkov na domačem trgu.

Indeks cen industrijskih izdelkov v trgovini na debelo je indeks, ki kaže spremembe cen izdelkov, ki jih v izbranih krajih prodaja trgovina na debelo preteżno trgovini na drobno. **Prodajna cena industrijskih izdelkov v trgovini na debelo** je fakturirana cena (franko skladišče), po kateri trgovina na debelo prodaja izdelke v opazovanem obdobju po odbitku rabata in popustov, ki jih odobri kupcu. **Ponderacija** temelji na podatkih o strukturi vrednosti prodaje v trgovini na debelo v Sloveniji.

Indeks cen gostinskih storitev meri spremembe v ravni končnih cen gostinskih storitev z vidika strukture njihove prodaje na domačem trgu.

SOURCES AND METHODS OF DATA COLLECTION

Retail prices (of agricultural products, industrial products and services), prices of catering services and wholesale prices *are collected in fixed locations, at fixed outlets and in regular periods within each month. With the exception of retail prices for agricultural products, which are collected twice per month, the other prices are collected monthly.*

Producers prices of certain manufactured goods *are collected monthly via questionnaires at selected industrial and other enterprises.*

COVERAGE

Retail prices*, which are the basis for calculating the retail price index and consumer price index, are monitored for about 490 articles and services in 4 selected towns. In fact we monitor retail prices in about 500 sales outlets and get a total of about 10,000 prices.*

Producers prices of manufactured goods *are monitored for about 450 industrial products in about 290 selected enterprises.*

Prices of catering services *are monitored in 27 catering enterprises in 4 selected towns. The list of catering services comprises about 60 kinds of services.*

Until the end of 1996, ***wholesale prices*** *were monitored for about 160 industrial products in 4 selected towns at selected wholesale trade enterprises. The products whose wholesale prices we monitored are equal to those for which we monitored retail prices.*

DEFINITIONS AND EXPLANATIONS ON METHODOLOGY

The price indices are calculated by using the (modified) Laspeyres formula on the basis of prices of goods and services and their weights. These weights represent relative shares of goods and services in the common value of all monitored goods and services. In this way determine the relative importance or impact of the change in price of any products or service on the total change. By rule, weights are changed every five years.

The ***retail price index*** *is the index which indicates the changes of retail prices of goods and services from the point of view of the sales structure of these on domestic market, irrespective of both: the purpose of their further use and the type of consumer. The* ***retail price*** *is the price at which retail sales outlets, agricultural producers and other enterprises sell their products and charge their services to users. At the same time these are final prices, at which users pay for consumption goods and services.* ***Weighting*** *is based on data on the value structure of sale of products and services in retail sale. Its last revision was made in 1997 at 1994 data.*

The ***consumer prices index*** *measures changes at the level of retail prices of goods and services in view of the structure of expenditure which are designated by each individual residential household for final consumption.* ***Weighting*** *is based on data on the structure on consumption within a household as per the Family Budget Survey. Its last revision was made in 1995 on the basis of the 1993 survey.*

The consumer price index does not show any changes in the level and structure of costs of living. This is monitored by separate surveys. It only reflects the changes in prices and is special kind of the retail price index. The most important difference between the retail price index and consumer price index is the weighting scheme. There exist some minor differences in view of coverage of goods and services as well. For instance: the consumer price index does not cover the goods which are not intended for final consumption (e. g. certain representatives for breeding purposes in agriculture), but these are included in the monitoring of retail prices. On the other hand, there are included some services which are not covered in the monitoring of the retail price index (e. g. food and drinks in catering).

The ***producer price index of manufactured goods*** *is the index which measures changes in prices of manufactured goods which are produced and sold in Slovenia. The* ***producer price of manufactured goods*** *is the price at which factory sells their products in largest quantities on domestic market - Ex Works. Price does not include rebate and discounts.* ***Weighting*** *is based on data of the structure of sales value of manufactured goods on domestic market.*

The ***producer price index of manufactured goods in wholesale trade outlets*** *is the index which indicates the price changes of products which the wholesale trade outlet sells in selected areas mainly to the retail trade outlet. The* ***sales price of manufactured goods in wholesale trade outlets*** *is the invoice price (Ex Warehouse) at which the wholesale trade outlet sells the products in the observed period upon having deducted the rebate and discounts to which the buyers are entitled.* ***Weighting*** *is based on data on the value structure of sale in wholesale trade outlet in Slovenia.*

The ***index of prices of catering services*** *measures the changes in the*

Cena gostinskih storitev je cena, po kateri gostinski objekti zaraËunavajo storitve porabnikom na podlagi jedilnega lista oziroma cenika prenoËitev. Cena prenoËitve zajema tudi vse druge pripadajoËe stroške: prijavo in odjavo, ogrevanje sob. **Ponderacija** temelji na podatkih o vrednostnem prometu hrane, pijaË in prenoËitev v gostinstvu v Sloveniji.

*level of final prices of catering services from the point of view of the structure of their sale on the domestic market. The **price of catering services** is the price upon which the catering enterprises charge their customers for their services on the basis of the bill of fare or price list for overnight stays. The latter comprises all other costs that are included as well: registration, heating of rooms. The **weighting** is based on data regarding the value of turnover with food, drinks and overnight stays in catering in Slovenia.*

16. KMETIJSTVO IN RIBIäTVO

AGRICULTURE AND FISHING

¥IRI IN METODE ZBIRANJA PODATKOV

Podatki so rezultati statistiËnih raziskovanj s podroËja kmetijstva ter popisov kmetijstva (1960, 1969) in prebivalstva (1981, 1991). Statistika kmetijstva zbira podatke loËeno za druűbeni in zasebni sektor kmetijstva.

Podatki o kmetijski dejavnosti (rastlinska pridelava, űivalska prireja in nekatere storitve v kmetijstvu) podjetij, zadrug in drugih organizacij so prikazani kot podatki o druűbenem sektorju. Podatki o zasebnem sektorju pa prikazujejo drugo kmetijsko dejavnost, ki ni definirana kot druűbeni sektor.

Nekatera veËja odstopanja podatkov za leti 1993 in 1994 so posledica nekaterih űe opravljenih sprememb v prilagajanju metodologije mednarodnim standardom.

Indeksi vse kmetijske pridelave so zraËunani iz podatkov o rastlinski pridelavi in űivalski prireji ter iz triletnih drseËih sredin za povpreËne odkupne cene. Indeksi konËne kmetijske pridelave so zraËunani na podlagi vrednosti vse kmetijske pridelave, zmanjöane za vrednost pridelkov, porabljenih za krmo űivali. Spremembe v izraËunu űivalske prireje so vplivale na izraËun indeksov, zato so indeksi od 1993 do 1995 popravljeni.

Podatki o zemljiökih kategorijah, posevkih, sadovnjakih in vinogradih ter podatki o pridelkih kmetijskih kultur so zbrani s statistiËnimi raziskovanji in so ocena statistiËnih ocenjevalcev za zasebni sektor, za druűbeni sektor pa poroËajo kmetijske zadruge in podjetja. K zemljiöËem druűbenega sektorja ötejemo öe vsa preostala zemljiöËa, ki niso zasebna last in jih ne uporabljajo kmetijske zadruge in podjetja.

ätevilo űivine prikazujemo po naËelu lastniötva. Podatke o űivini v druűbeni lasti zbiramo z letnim PoroËilom o űivinoreji. Vsa podjetja in zadruge, ki imajo lastno űivino, poroËajo o njej, ne glede na to, kje je űivina vhlevljena. Podatke o ötevilu űivine v zasebni lasti zbiramo z Anketo o ötevilu űivine na vzorËnih kmetijah. V anketo je vkljuËenih 6,7 % gospodinjstev, ki so ob popisu redila vsaj eno vrsto űivine. Zaradi razliËne zastopanosti posameznih vrst oziroma kategorij űivine je relativna standardna napaka ocene ötevila űivine v lasti kmetov razliËna. Podatki o ötevilu űivine, pri katerih je relativna standardna napaka ocene ötevila veËja od 10 % (pri nobenem podatku pa ni veËja od 20 %), so objavljeni z opombo. Podatki so reprezentativni le za Slovenijo.

Podatke o űivini, zaklani v klavnicah, zbiramo z rednimi meseËnimi poroËili vseh klavnic v Sloveniji. ätevilo vseh zaklanih űivali v bilancah (tabele 16.15, 16.17 in 16.19) je od leta 1993 zraËunano iz razlike med ötevilom űivali na zaËetku in koncu leta, ötevilom rojenih in poginulih űivali ter ötevilom uvoűenih in izvoűenih űivali. Podatki o zakolu praöiËev v klavnicah za leti 1993 in 1994 so popravljeni. Za ti dve leti je ötevilo zaklanih praöiËev v klavnicah zraËunano iz podatkov o oddaji praöiËev iz druűbenih farm in kooperacije, odkupu klavnih praöiËev od kmetov in podatkov o uvozu praöiËev. Zakol na gospodarstvih je zraËunan iz razlike v ötevilu vseh zaklanih űivali in űivali, zaklanih v klavnicah. Strukturo ötevila glede na kategorije űivali in povpreËne mase za posamezne kategorije smo prevzeli iz Anket o ötevilu űivine, deleűe klavnosti pa iz podatkov klavnic. Zaradi navedenih popravkov so popravljeni tudi podatki o prirastu űivine.

O porabi mineralnih gnojil v druűbenem sektorju poroËajo podjetja in zadruge. Ta so do leta 1991 poroËala tudi o oskrbi in prodaji mineralnih gnojil kmetom in tako zbrane podatke smo objavili kot porabo mineralnih gnojil v zasebnem sektorju. Od leta 1992 pa so objavljeni podatki o zasebnem sektorju zraËunani iz podatkov o uvozu, izvozu in proizvodnji mineralnih gnojil in podatkov o mineralnih gnojilih, porabljenih v druűbenem sektorju v Sloveniji.

Kmetijska podjetja in zadruge letno sporoËajo podatke o porabi sredstev za varstvo rastlin za lastno pridelavo in o oskrbi in prodaji teh zasebnikom. Zato podatki o sredstvih za varstvo rastlin, prikazanimi za zasebni sektor, lahko pomenijo razpoloűljiva, in ne nujno tudi porabljena sredstva.

Podatki o morskem ribiötvu so zbrani z meseËnimi poroËili, ki jih izpolnjujejo podjetja in zasebni ribiËi, katerim je ribolov glavna ali dopolnilna dejavnost. Podatkov o öportnem ribolovu v morju ne zbiramo. Podatke o sladkovodnem ribiötvu povzemamo iz letnih poroËil podjetij in öportnih ribiËev.

SOURCES AND METHODS OF DATA COLLECTION

The sources of data are the results of regular agricultural statistical surveys and agricultural (1960, 1969) and population censuses (1981, 1991). Data are collected separately for the social and private sector.

Data on the social sector are data on agricultural activity (crop production, livestock production and some services in agriculture) of agricultural enterprises and cooperatives in social, cooperative and mixed property. Data on the private sector are data on agricultural activity other than agricultural activity in the social sector.

Some greater differences between 1993 and 1994 data are the result of some changes made in harmonizing the methodology with international standards.

Agricultural total production indices are calculated from the data on crop and animal production and from triennial moving arithmetic mean of average purchasing prices. The index of final agricultural production is calculated from total value, excluding the value of agricultural products used as fodder. Changes in the calculation of total indigenous meat production influenced the volume indices of agricultural output, therefore incides from 1993 to 1995 are corrected.

The data on land use, crops, fruit trees and vineyards as well as the data on production are collected by means of regular statistical surveys. The data on the private sector are assessed by statistical estimators. The data on the social sector are reported by agricultural enterprises and cooperatives. Social sector land includes land used by the social sector as well as other land which is not in private property and is not used by cooperatives and enterprises.

The number of livestock is reported by owners. The data on livestock in the social sector are collected by the Annual Report on Livestock. All enterprises and cooperatives owning livestock are reporting, regardless of where their livestock is stabled. The data on the number of livestock in the private sector are collected by the Survey on the Number of Livestock by means of a sample survey on the farms. The sample includes 6.7% of agricultural households, which were breeding at least one category of livestock at the time of census. Due to different share of different livestock breeds and categories, the coefficient of variation for livestock number varies for different livestock breeds and categories. Data on livestock breeds, where the coefficient of variation exceeds 10% (there are no data with the coefficient of variation greater than 20%), are published with a remark. The data are representative for the Republic of Slovenia only.

The data on slaughtered livestock in slaughterhouses are collected by regular monthly reports from all slaughterhouses in the Republic of Slovenia. Since 1993 the number of all slaughtered animals in alterations (tab. 16.15. 16.17. and 16.19) is calculated from the difference in the number of animals at the beginning and the end of the year, the number of born and lost animals and the number of imported and exported animals. For 1993 and 1994 the data on slaughter of pigs in slaughterhouses have been corrected. For this two years, the number of slaughtered pigs in slaughterhouses is calculated from the data on delivery of pigs from social farms and cooperatives, purchase of pigs for slaughter from farmers and data on import of pigs. Slaughter on agricultural holdings is calculated from the difference in the number of all slaughtered animals and animals slaughtered in slaughterhouses. The structure of the number in view of the categories of animals and the average weight for individual categories was taken from surveys on the number of animals and conversion coefficients from live in to carcass weight were taken from data of slaughterhouses. Due to mentioned corrections the data on total indigenous meat production were also corrected.

Until 1991 agricultural enterprises and cooperatives have reported also on supplying and selling of mineral fertilizers to farmers and the data have been presented as use of mineral fertilizers in the private sector. Since 1992 the data on the private sector have been calculated from data on import, export and production of mineral fertilizers and from data on their consumption in the social sector.

Agricultural enterprises and cooperatives annually report on consumption of pesticides for own crop production and supply and sale of these to private persons. Quantities of pesticides published as used in the private sector are therefore available and not necessarily used up.

The data on marine fishing are collected with monthly reports from enterprises and fishermen whose main or supplementary activity is fishing. The data on marine sport fishing are not collected. The data on freshwater fishing are taken from annual reports from enterprises and anglers.

ZAJETJE

V tem poglavju so zbrani podatki o kmetijstvu in ribiötvu. PodroËje kmetijstva zajema rastlinsko pridelavo in ûivalsko prirejo, ne zajema pa lova in gozdarstva, ki sta po Standardni klasifikaciji dejavnosti v istem podroËju. Podatki o ribiötvu so zajeti v tem poglavju, Ëeprav je ribiötvo po Standardni klasifikaciji dejavnosti samostojno podroËje.

DEFINICIJE

Obdelovalna zemljiöËa so njive in vrtovi, sadovnjaki, vinogradi in travniki.

Kmetijska zemljiöËa so obdelovalna zemljiöËa, paöniki, ribniki, trstiöËa in moËvirja.

Rodovitna zemljiöËa so kmetijska in gozdna zemljiöËa.

Med **sadna drevesa** ötejemo vsa drevesa, rodna in nerodna (mlada), bodisi da rastejo v strnjenem nasadu v sadovnjaku ali pa posamezno zunaj sadovnjakov.

Za **rodna drevesa** ötejemo sadna drevesa, ki so ûe rodila, ne glede na to, ali so rodila v opazovanem letu. Enako velja za **vinsko trto.**

Prirast ûivine je zraËunan iz ûive mase zaklanih ûivali, razlike v masi izvoûenih in uvoûenih ûivali in razlike v masi ûivali na zaËetku in koncu leta (razlika v zalogah).

Meso je masa primarno obdelanih trupov, ki so definirani v Pravilniku o ocenjevanju in razvröËanju govejih trupov in polovic na klavni liniji (Ur. l. RS, öt. 28/94) in Pravilniku o kakovosti zaklanih praöiËev in kategorizaciji svinjskega mesa (Ur. l. RS, öt. 68/95).

Vse pridobljeno meso je meso vseh v Sloveniji zaklanih ûivali, zrejenih v Sloveniji in v Slovenijo uvoûenih.

DomaËa prireja mesa je meso zrejenih ûivali na obmoËju Slovenije in v meso preraËunana masa ûivih izvoûenih ûivali.

KmeËko gospodarstvo ima tisto gospodinjstvo, ki uporablja:

a) najmanj 10 arov obdelovalnih zemljiöË;
b) manj kot 10 arov obdelovalnih zemljiöË, vendar ima najmanj:
   - kravo in tele ali kravo in mlado govedo ali
   - kravo in dve odrasli drobnici ali
   - pet odraslih ovac ali
   - tri odrasle praöiËe ali
   - ötiri odrasle ovce in praöiËe skupaj ali
   - 50 vratov odrasle perutnine ali
   - 20 Ëebeljih panjev.

Gospodinjstva s kmeËkim gospodarstvom po viru dohodka

Podatek o **viru dohodka** je izveden iz odgovora o poklicu posameznih Ëlanovgospodinjstvaninjihovihrednihdohodkov.

Dohodek samo iz kmetijstva imajo gospodinjstva, katerih Ëlani so aktivni samo na lastnem kmeËkem gospodarstvu, ki je tudi edini vir dohodka tega gospodinjstva. Vsaj en Ëlan gospodinjstva mora biti aktivni kmet.

Meöani vir dohodka imajo gospodinjstva, katerih Ëlani so aktivni na lastnem kmeËkem gospodarstvu in zunaj njega oziroma imajo lasten vir dohodka. To gospodinjstvo mora imeti vir dohodka iz kmetije in vsaj en vir dohodka zunaj nje.

Vir dohodka iz nekmetijstva imajo gospodinjstva, v katerih je aktivnost Ëlanov omejena na nekmetijske dejavnosti. Noben Ëlan gospodinjstva ni aktivni kmet.

V kategorijo gospodinjstev **brez vira dohodka** ötejemo gospodinjstva, katerih Ëlani so vzdrûevani oziroma delajo v tujini in po metodologiji popisa prebivalstva niso uvröËeni po poklicih.

V zbranih podatkih o **kmetijskih strojih in prevoznih sredstvih** so prikazani najpomembnejöi za delo uporabni kmetijski stroji in traktorski priklju Ëki, in to samo tisti, ki so v lasti gospodinjstva oziroma so njihova delna last (skupno lastniötvo).

COVERAGE

This chapter covers data on agriculture and fishing. Agriculture covers crop production and livestock production but does not cover hunting and forestry, which are according to the Standard Classification of Activities in the same field. Data on fishing are covered in this chapter, although fishing is an independent field in the Standard Classification of Activities.

DEFINITIONS

Utilized land *consists of arable land and kitchen gardens, orchards, vineyards and meadows.*

Agricultural land *consists of utilized land, rough grazing, fish-ponds, reeds and marshes.*

Fertile land *consists of agricultural land and forests.*

Fruit trees *are all trees, fertile and non-fertile (young), irrespective of whether growing in orchards or individually outside them.*

Fertile trees *are those trees, which have borne fruit, irrespective of whether they borne fruit in the year of reporting. The same criteria is used for vine.*

Total indigenous production *is calculated from the live weight of slaughtered animals, the difference between the weight of exported and imported live animals and the difference in weight of animals at the beginning and the end of the year (changes in stocks).*

Meat *is expressed in dressed carcass weight as defined by the Regulation on Estimating and Classifying Cattle Carcasses and Halves on the Line of Slaughter (Official Journal of the Republic of Slovenia, No. 28/ 94) and the Regulation on the Quality of the Slaughtered Pigs and Categorisation of Pork Meat (Official Journal of the Republic of Slovenia, No. 68/95).*

Meat production from slaughtered animals is *meat of all animals slaughtered in Slovenia (indigenous and imported).*

Gross indigenous production *is production from slaughtered animals plus the meat equivalent of all animals exported alive minus the meat equivalent of all animals imported alive.*

An agricultural holding *is a household that uses:*

a) at least 0.1 ha of utilized land
b) less than 0.1 ha of utilized land but owns at least:
   - a cow and a calf or a cow and young cattle or
   - a cow and two full-grown sheep or goats or
   - five full-grown sheep or
   - three full-grown pigs or
   - four full-grown sheep and pigs in total or
   - 50 heads of full-grown poultry or
   - 20 beehives.

Households with an agricultural holding by source of income

Data on ***sources of income*** *are based on answers made by household members regarding their occupation and their permanent income.*

Income only from agriculture *applies to those households whose members' activities are limited to their own agricultural holding, which is also the sole source of income of this household. At least one member of this household must be listed as an active farmer.*

Mixed sources of income *apply to those households whose members are active in their own agricultural holding, outside it or they have their own source of income. A household with mixed source of income must have a source of income from its agricultural holding and at least one other source of income.*

A source of income from non-agricultural activities *applies to those households in which the members' activities are limited to non-agricultural activities. None of the members of the household is an active farmer.*

Households without a source of income *are all those whose members are dependants and households whose members all work or live abroad, and are according to the census methodology not classified by occupations.*

Data on the most important ***agricultural machinery and tractor*** *accessories used for work were collected, but only those in household ownership or joint ownership (co-ownership) were included.*

Zbrani so podatki o zmogljivosti lastnih in v najem vzetih **kmetijskih stavb in drugih objektov**, ki jih je gospodinjstvo uporabljalo za vhlevljenje űivine, shranjevanje kmetijskih strojev in kmetijskih pridelkov.

*Data on the capacity of owned and rented **agricultural buildings and other facilities**, used at the time of the census by a household for stables, for storing agricultural machinery and agricultural products, were collected.*

1) Indeksi od leta 1993 do 1995 so popravljeni, ûivalska prireja je zraËunana s popravljenim prirastom in vinogradniötvo brez samorodnice.
Indices for 1993 - 1995 are corrected, livestock breeding is calculated with the corrected data on total indigenous meat production and wine growing is calculated without self-grown plants.

17. GOZDARSTVO IN LOV

FORESTRY AND HUNTING

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o gozdnem fondu (povröinah, lesni zalogi, prirastku) so za leta 1953, 1956 in 1958 sporoËali gozdarski organi pri okrajih, za leto 1961 gozdarski organi pri obËinskih skupoËinah, za nadaljnja leta pa so podatki prevzeti iz popisov za gozdnogospodarske naËrte.

Podatki o gojitvenih delih, poseku in gozdnih sortimentih, gozdni mehanizaciji in gozdnih cestah so bili do leta 1990 zbrani z letnimi poroËili; poöiljale so jih organizacije, ki so gospodarile z gozdovi. Od leta 1991 poroËa o teh podatkih Zavod za gozdove Slovenije, le podatke o gozdni mehanizaciji öe vedno dobimo z letnimi statistiËnimi poroËili poslovnih subjektov, registriranih za izvajanje gozdarskih del.

Podatke o poökodovanosti gozda je prispeval Gozdarski inötitut Slovenije.

PoroËila o lovu so dale lovske druűine in organizacije, ki se ukvarjajo z lovnim gospodarstvom.

Uvoz in izvoz gozdnih sortimentov sta preraËunana v m^3 iz ton, vir pa je statistika zunanje trgovine.

DEFINICIJE

Gozd. V letih 1953, 1956 in 1958 so kot gozd prikazovali povröine, porasle z gozdnim drevjem, in vse manjöe vkljuËene gozdne povröine (gozdni osredki). Od leta 1961 kot gozd prikazujemo povröino, veËjo od 5 arov, obraslo z gozdnim drevjem, ne glede na viöino dreves in zarast. Drevoredov, parkov v naseljih, gozdnih drevesnic in skupin dreves na povröini, manjöi od 5 arov, ne ötejemo kot gozd.

Varovalni gozd je tisti, v katerem je poudarjena katerakoli ekoloöka funkcija, in je zato doloËen poseben reűim gospodarjenja z njim.

Sanacijski posek je posek okuűenega, od mrËesa napadenega ali moËno poökodovanega drevja.

Varstvo gozdov obsega dela za prepreËitev in zatrtje rastlinskih bolezni, prerazmnoűenih populacij űuűelk, zaöËito pred ökodo, ki jo povzroËa divjad, zaöËito pred poűari in naravnimi ujmami.

SOURCES AND METHODS OF DATA COLLECTION

Data on forestry reserves (acreage and standing volume) for 1953, 1956, 1958 and 1961 were supplied by the district forestry authorities. For 1980 and 1990 data were drawn from the inventory for the forestry management plan.

Data on fellings, cultivation works, forest damages and production of raw wood were gathered from the annual reports submitted by forest management organisations until 1990. Since 1991 reporting has been entirely the responsibility of the Institution for Forest Managemen of Slovenia, except data on forest mechanization which are still gathered with the statistical reports from forestry enterprises and organisations.

Data on forest damages have been supplied by the Slovenian Forestry Institute.

Data on hunting have been supplied by hunting societies and organizations involved in the management of hunting.

Forestry imports and exports have been recalculated from tons into cubic metres, with the source being foreign trade statistics.

DEFINITIONS

Forest: *In 1953, 1956 and 1958, all areas grown over with forest trees as well as smaller incorporated forest areas were shown as forest. Since 1961 the term forest covers areas larger than 0.05 ha that are covered with forest trees, irrespective of their height and growth. Trees lining paths, parks in inhabited areas, forest nurseries and groups of trees on areas smaller than 0.05 ha are not considered as forest.*

Protective forest *is forest with outstanding ecological function, where special management is required.*

Sanitation removals *are removals of trees attacked by insects or desease or injuried and damaged trees.*

Protection of forest *includs forestry works on preventing and exterminating tree deseases, too large populations of insects, damages caused by game and protection from fire and natural disasters.*

18. RUDARSTVO IN PREDELOVALNE DEJAVNOSTI

MINING AND MANUFACTURING

VIRI IN METODE ZBIRANJA PODATKOV

Podatke za dejavnosti rudarstva, predelovalnih dejavnosti in oskrbe z elektriko zbira StatistiËni urad Republike Slovenije s statistiËnima raziskovanjema MeseËno poroËilo industrije in Letno poroËilo industrije.

SOURCES AND METHODS OF DATA COLLECTION

Data on mining and manufacturing are collected by the Statistical Office of the Republic of Slovenia with the statistical surveys Monthly Industrial Report and Annual Industrial Report.

ZAJETJE

V statistiËno raziskovanje *MeseËno poroËilo industrije* so vkljuËena industrijska podjetja in obrati, ki zaposlujejo vsaj deset oseb in opravljajo eno ali veË dejavnosti podroËja Industrija in rudarstvo po Enotni klasifikaciji dejavnosti. V raziskovanje *Letno poroËilo industrije* pa so zajeta industrijska podjetja in obrati, ki imajo eno ali veË dejavnosti, ki sodijo v podroËje Rudarstva, Predelovalnih dejavnosti in Oskrbe z elektriko, plinom in vodo po Standardni klasifikaciji dejavnosti in imajo vsaj pet zaposlenih oseb.

Rezultati MeseËnega poroËila industrije so vir podatkov v tabelah: 18.1, 18.3, 18.4, 18.5, 18.6, 18.10 in 18.12; rezultati Letnega poroËila industrije pa so vir podatkov v tabelah: 18.2, 18.7, 18.8, 18.9 in 18.11.

COVERAGE

According to the National Classification of Activities the industry sector includes manufacturing, mining and electricity supply and according to the Standard Classification of Activities this sector covers Mining and quarrying (C), Manufacturing (D) and Electricity supply (part of E). Statistical units of the monthly survey are enterprises and establishments which are primarily engaged in these activities and have at least ten employees. Statistical units of the annual survey are enterprises and establishments with at least five employees.

Source for tables 18.1, 18.3, 18.4, 18.5, 18.6, 18.10 in 18.12 is the monthly survey and for tables 18.2, 18.7, 18.8, 18.9 in 18.11 the annual survey.

DEFINICIJE

Industrijska podjetja in industrijski obrati, ki so v sestavi neindustrijskih podjetij, imajo za glavno dejavnost industrijsko proizvodnjo in so po Standardni klasifikaciji dejavnosti v Poslovnem registru Slovenije uvrÖËeni v eno od podroËij Rudarstva, Predelovalnih dejavnosti in Oskrbe z elektriko, plinom in vodo.

DEFINITIONS

Industrial enterprises and establishments which are part of non-industrial enterprises *are predominantly engaged in one or more industrial activities and are listed in the Business Register of Slovenia.*

Industrijski proizvodi so definirani z Nomenklaturo industrijskih proizvodov. Za vsak proizvod prikazujejo podjetja in obrati celotno proizvodnjo, ne glede na to, ali je proizvod dokonËan ali pa se uporabi pri nadaljnji proizvodnji v istem ali drugem podjetju.

Industrial products *are defined by the National Nomenclature of Industrial Products. Data are gathered for products and semi-finished products which could be used in further manufacturing processes in the same or other enterprise.*

Osnova za raËunanje **indeksov industrijske proizvodnje** so podatki o proizvodnji v fiziËnih merskih enotah, zbrani po Nomenklaturi industrijskih proizvodov, in ponderacijski koeficienti, ki pomenijo oceno dodane vrednosti za posamezne industrijske proizvode. Indeks industrijske proizvodnje za celotno podroËje industrije in rudarstva se izraËuna s ponderacijskimi faktorji, ki industrijskim panogam doloËijo njihovo relativno pomembnost in hkrati uravnajo razliËno stopnjo zajetja proizvodnje med panogami. Ponderacijski faktorji pomenijo deleû dodane vrednosti posamezne industrijske panoge v skupni dodani vrednosti podroËja industrije in rudarstva. Ponderacijski sistem za obraËun indeksov industrijske proizvodnje se vsako leto sistematiËno popravi glede na strukturne spremembe v industrijskih panogah med predpreteklim in preteklim letom.

Production volume indices *are calculated with quantities of products and their weighting coefficients, which represent the estimated value added of products. Production volume index of the total industry sector is calculated by computing activity indices, using the share of value added of particular industrial activity as weights. Weighting coefficients are systematically updated every year considering the changes in the shares of value added in activities during the preceding year and the year before that.*

Indeksi industrijske proizvodnje so izraËunani po Enotni klasifikaciji dejavnosti, s pomoËjo prevajalnika med Nomenklaturo industrijskih proizvodov in klasifikacijo dejavnosti EU NACE Rev. 1 pa tudi po Standardni klasifikaciji dejavnosti, ki je s klasifikacijo dejavnosti EU usklajena.

Production volume indices are calculated according to the National Classification of Activities. Indices are also calculated according to the Standard Classification of Activities through the conversion table between the National Nomenclature of Industrial Products and NACE Rev. 1.

Indeks zaposlenih oseb po dejavnosti proizvodnje zajema samo zaposlene osebe v industrijskih dejavnostih, ne pa tistih, ki v okviru industrijskih podjetij delajo v gozdarstvu, gradbeniötvu, trgovini in drugih neindustrijskih dejavnostih. Zaposleni v podjetjih so razvrÖËeni v dejavnosti, ki jih podjetja opravljajo.

The index of employed persons by activity *covers only persons employed in industrial activities, and not those who within industrial enterprises work in forestry, construction, retail trade and other non-industrial activities. Persons in paid employment in enterprises are classified into activities of their enterprises.*

Indeks produktivnosti v industriji pomeni razmerje med indeksom industrijske proizvodnje in indeksom zaposlenih oseb.

The index of productivity in industry *represents the relationship between the production volume index and the index of employed persons.*

Izmenski koeficient na osnovi zaposlenih oseb prikazuje povpreËno ötevilo izmen, v katerih delajo industrijska podjetja. IzraËuna se iz podatkov zasedenosti delovnih mest tako, da vse zaposlene osebe na delovnih mestih, na katerih so delale v eni izmeni, uvrÖËamo v prvo izmeno; polovico zaposlenih oseb na delovnih mestih, na katerih so delale v dveh izmenah, uvrÖËamo v prvo, polovico pa v drugo izmeno; tretjino zaposlenih oseb z delovnih mest, na katerih so delali v treh izmenah, uvrÖËamo v prvo, tretjino v drugo in tretjino v tretjo izmeno. Koeficient izmen na osnovi zaposlenih oseb pa je razmerje med skupnim ötevilom zaposlenih oseb in ötevilom zaposlenih oseb prve izmene.

Coefficient of work in shifts on the basis of persons in paid employment *presents the average number of shifts in which industrial enterprises work. It is calculated according to the occupancy level of work places in the following: all employed persons working at their working place in one shift are listed in the first shift; one half of the employed persons working at their working place in two shifts is listed in the first shift and the other half in the second shift; one third of the employed persons working at their working place in three shifts is listed in the first, the second third in the second shift and a third in the third shift. The coefficient represents the relationship between the total number of employed persons and the number of employed persons in the first shift.*

Izmenski koeficient na osnovi pogonskih strojev in motorjev je izraËunan iz podatka o moËi pogonskih strojev in motorjev, ki so bili izkoriöËeni v treh izmenah, pomnoûenega s tri, in iz podatka o moËi strojev, ki so bili izkoriöËeni v dveh izmenah, pomnoûenega z dva. Zmnoûkoma je dodan podatek o moËi pogonskih strojev in motorjev, ki so bili izkoriöËeni za delo v eni izmeni. Dobljena vsota je deljena s skupno moËjo pogonskih strojev in motorjev.

Coefficient of work in shifts on the basis of machine drives and motors *is calculated from the power of the machine drives and motors used in three shifts, multiplied by three, while the power of the machines used in two shifts is multiplied by two. The power of machine drives and motors used for work in one shift is added to these multiplications. The sum obtained is divided by the total power of machine drives and motors.*

MoË pogonskih strojev in motorjev na zaposleno osebo je izraËunana po stanju na izbrani dan v mesecu najintenzivnejöe proizvodnje leta tako, da je podatek o moËi pogonskih strojev in elektromotorjev, ki so obratovali v prvi, drugi in tretji izmeni, deljen s

The power of machine drives and motors per person in paid employment *is calculated according to the situation on a selected day of the month in which the production is the most intensive by dividing the power of machine drives and electrical motors which were in operation*

ötevilom zaposlenih oseb v prvi, drugi in tretji izmeni.

Poraba elektriËne energije na zaposleno osebo je razmerje med skupno porabljeno elektriËno energijo in letnim povpreËjem zaposlenih oseb v industriji in rudarstvu.

ätevilo zaposlenih oseb v proizvodnji na neproizvodno zaposleno osebo je razmerje ötevila zaposlenih oseb v proizvodnji in ötevila zaposlenih oseb pri vodstvenih, strokovnih, splooönih in raziskovalnih delih (direktorji, vodje obratov, inűenirji, tehniki, komercialisti, knjigovodje, evidentiËarji, skladiöËniki, drugi administrativni delavci, kurirji, snaűilke).

Podatki o zaposlenih osebah po izmenah so prikazani za izbrani dan v mesecu najintenzivnejöe proizvodnje za posamezno leto. Njihovo razporeditev prikazujemo po delovnih mestih, na katerih so zaposleni delali v eni, dveh ali treh izmenah. Na enem delovnem mestu lahko dela samo ena zaposlena oseba v dopoldanski izmeni, ena zaposlena oseba v popoldanski izmeni in ena zaposlena oseba v noËni izmeni, Ëe se na tem delovnem mestu dela v treh izmenah.

MoË pogonskih strojev in motorjev, izkoriöËenih za delo po izmenah, je prikazana za isti dan, kakor so prikazani podatki o zaposlenih osebah po izmenah. Pogonske stroje in motorje razvröËamo v skupine glede na to, ali so bili izkoriöËeni za delo v eni, dveh ali treh izmenah. Za prikaz zajemamo pogonske stroje, ki ne poganjajo generatorjev, in elektromotorje.

Primarni pogonski stroji so zaganjalniki, ki poganjajo generatorje in katerih moË se v celoti ali deloma izkoriöËa za proizvodnjo elektriËne energije z zagonom generatorja.

Generatorji pa so stroji, ki pretvarjajo mehansko energijo primarnih zaganjalnikov v elektriËno energijo.

Primarni zaganjalniki, ki ne poganjajo generatorjev, so stroji in motorji, katerih moË neposredno izkoriöËamo za pogon delovnih strojev, transmisij in podobno.

Elektromotorji so vsi samostojni motorji in motorji, vdelani v delovne stroje, ki dajejo mehansko energijo, poganja pa jih elektriËna energija.

ElektriËne peËi in druge termiËne naprave so elektriËne peËi, suöilnice, grelci, bojlerji in podobne naprave za gretje s priklju Ëno moËjo, veËjo od 1 kW, ki se uporabljajo v industrijski dejavnosti. Med hladilne naprave, ki se uporabljajo v industrijski dejavnosti, sodijo npr. v hladilnice za zamrzovanje sadja, vrtnin in mesa v podjetju.

Podatki o **porabi elektriËne enegije in nekaterih goriv** v industrijskih podjetjih zajemajo porabo elektriËne energije in goriv za pogonske namene, notranji prevoz, ogrevanje delovnih in pisarniökih prostorov in porabo za pogonske in tehnoloöke namene v proizvodnji.

Podatki o **urah dela elektromotorjev** pomenijo razmerje med porabljeno elektriËno energijo za elektromotorje in instalirano moËjo elektromotorjev.

Poraba surovin in materialov v industrijskih panogah obsega le tiste surovine in materiale, ki so predvideni z Nomenklaturo surovin in materialov.

during the first, second and third shift by the number of employed persons in the first, second and third shift.

Consumption of electrical power per person in paid employment *represents the relationship between the total of the consumed electrical power and the annual average of employed persons.*

The number of persons employed in production per person employed in non-production *is calculated by dividing the number of employed persons in production by the number of employed persons in managerial, professional, general and research work (general managers, plant managers, engineers, technicians, sales managers, accountants, ledger managers, warehouse operatives, other administrative workers, couriers and cleaners).*

Persons in paid employment by shift *are represented for the selected day of the month in which the production is the most intensive in the individual year. They are classified according to the places of work at which they worked in one, two or three shifts. Only one employed person can work at one place of work in the first shift, one person in the second shift and one person in the third shift if work is organised in three shifts.*

Capacity force of machine drives and motors by shift *is shown for the same day as the presentation of persons in paid employment by shift. Machine drives and motors are listed in groups with regard to whether they were used for work in one, two or three shifts. This presentation covers machine drives that do not drive generators or electric motors.*

Primary machine drives and motors *are those machines and motors which drive generators (turbines, etc.).*

Generators *are machines which transform mechanical power from primary motors into electricity.*

Primary machine drives *which do not drive generators are machines and motors whose power is used directly to drive machine tools, transmissions and similar.*

Electrical motors *cover all motors that are either free-standing or built-in parts of machines which provide mechanical power and which are driven by electrical power.*

Electric ovens and thermal apparatuses *include electrical ovens, dryers, boilers and devices for heating with their own power source, greater than 1 kW, and which are used in industrial activities. Cold-storage installations are installations used in industrial activities like cold-storage chambers for freezing fruit, vegetables and meat.*

Consumption of electricity and fuels *includes consumption for driving purposes, internal transport, heating in enterprises, including operation units and offices, and consumption for driving and technological purposes.*

The hours of work of electrical motors *is calculated by dividing the consumption of electrical power for electrical motors by the installed power of the electrical motors.*

Consumption of raw materials and materials *by branch of industry comprises only those raw materials and materials as foreseen by the National Nomenclature of Raw Materials.*

19. ENERGETIKA

ENERGY

VIRI IN METODE ZBIRANJA PODATKOV

Podatke iz energetike zbiramo z naslednjimi statističnimi raziskovanji:

KOM-PL je letno poročilo plinarn. Z njim zbiramo podatke o nabavi, proizvodnji in distribuciji plinov, o porabi električne energije in goriv ter o dobavi plinov končnim porabnikom.

KOM-TPL je letno poročilo javnih toplarn in kotlovnic. Z njim zbiramo podatke o nabavi, proizvodnji in distribuciji toplotne energije, o porabi električne energije in goriv ter o dobavi toplotne energije končnim porabnikom.

IND-4a je letno poročilo Podjetja za prenos električne energije (ELES) in podjetij za distribucijo električne energije. S tem poročilom zbiramo podatke o proizvodnji v javnih elektrarnah, o nakupu od samoproizvajalcev in individualnih proizvajalcev, o izvozu in uvozu, o izgubah v omrežju, o končni porabi, o porabi goriv ter o ötevilu, tipu in nazivni moči javnih elektrarn.

IND-4b je letno poročilo samoproizvajalcev električne energije. To so podjetja, ki poleg osnovne dejavnosti proizvajajo öe električno energijo za lastne potrebe in jo prodajajo (ali tudi ne) podjetjem za distribucijo električne energije. Tudi s tem poročilom spremljamo proizvodnjo električne energije, porabo goriv ter ötevilo, vrsto in nazivno moč elektrarn.

Poleg tega se podatki s področja energetike zbirajo öe z mesečnim poročilom industrije (proizvodnja in poraba električne in toplotne energije ter poraba goriv) ter z letnimi poročili s področja gradbeništva in prometa.

ZAJETJE

Pri oskrbi z zemeljskim plinom in toplotno energijo so zajeta vsa podjetja, ki se ukvarjajo s proizvodnjo in oskrbo, ne glede v kateri panogi so registrirana.

Pri oskrbi z električno energijo so zajeti Podjetje za prenos električne energije (ELES), podjetja za distribucijo električne energije in pa samoproizvajalci električne energije.

DEFINICIJE

TE-TO (termoelektrarna-toplarna) je objekt, ki je namenjen sočasni proizvodnji električne in toplotne energije.

Samoproizvajalci so podjetja, ki poleg svojih osnovnih proizvodov proizvajajo öe električno energijo za lastne potrebe in jo prodajajo (ali tudi ne) podjetjem za prenos in distribucijo.

Energetski sektor zajema pridobivanje plina, nafte, premoga ter plinarne, elektrarne in toplarne (lastna poraba tu ni vöteta).

Transformacija zajema porabo goriv za proizvodnjo električne in toplotne energije.

G.C.V. (gross calorific value) pomeni celotno količino toplotne energije, ki se sprosti pri izgorevanju goriva.

N.C.V. (net calorific value) pomeni tisti del toplotne energije pri izgorevanju goriv, ki jo lahko uporabimo. Drugi del se porabi za izparevanje vlage iz goriva.

LPG (liquefied petroleum gas): tekoči naftni plin je butan oziroma propan ali pa meöanica obeh.

SOURCES AND METHODS OF DATA COLLECTION

The data on energy are collected by the following statistical surveys:

***KOM-PL** is an annual report of gas-works. By means of this report the data on purchase, production and distribution of gases as well as on consumption of electricity and fuels and on supply of gases to final consumers are collected.*

***KOM-TPL** is an annual report of public heating plants and boiler houses. By means of this report the data on purchase, production and distribution and of heat as well as on consumption of electricity and fuels and on supply of heat to final consumers are collected.*

***IND-4a** is an annual report of the Company for the Transfer of Electricity (ELES) and companies for the distribution of electricity. By means of this report the data on electricity production in public power plants, purchase from autoproducers and individual producers, import and export, network losses, final consumption, fuel consumption and number, type, and power of power plants are collected.*

***IND-4b** is an annual report of electricity autoproducers. These are enterprises which have electricity production beside their basic production. They produce electricity for their own use and (or not) sell it to the Companies for the distribution of Electricity. Electricity production, fuel consumption and number, type and power of power plants are also collected by means of this report.*

Besides, the data from energy are collected with industry' s monthly report (production and consumption of electricity and heat and fuel consumption) and with annual construction and transport reports.

COVERAGE

At natural gas and heat supply are covered all undertakings which produce and supply irrespective of their registration.

At electricity supply are covered the Company for the Transfer of electricity (ELES), companies por for the distribution of electricity and autoproducers.

DEFINITIONS

***CHP** (combined heat and power) refers to a plant which is designed to produce both heat and electricity.*

***Autoproducers** are enterprises which generate electricity wholly or partly for their own use as an activity which supports their primary activity.*

***Energy sector** includes gas and crude oil extraction, coal mining, gas-works, electricity and heat power plants (own use is not included).*

***Transformation** includes fuel consumption in electricity and heat power plants.*

***G.C.V.** (gross calorific value) measures the total amount of heat produced by fuel combustion.*

***N.C.V.** (net calorific value) measures the amount of heat we can use. The other part is used for evaporation of fuel moisture.*

***LPG** (liquefied petroleum gas) is made up of propane, butane or a mixture of both.*

20. OBRT

CRAFTS

VIRI IN METODE ZBIRANJA PODATKOV

Podatki, ki osvetljujejo **razvoj obrti,** so bili zbrani s polletnimi in letnimi poročili različnih statističnih raziskovanj, ki so navedena v opombah pri tabelah.

Podatki, ki osvetljujejo **obrt kot način opravljanja dejavnosti** s prikazom števila obrtnih obratov z obrtno ali obrti podobno dejavnostjo ter z domače ali umetno obrtjo, so prevzeti iz Obrtnega registra Slovenije. Obrtni register je javna knjiga. Vodi ga Obrtna zbornica Slovenije. Vodenje tega registra je opredeljeno v Pravilniku o postopku izdaje obrtnega dovoljenja in o obrtnem registru (Ur. l. RS, št. 10/95).

ZAJETJE

V prikazanem obdobju je bilo področje obrti različno definirano.

Glede na lastnino sta bili ločeni družbena in zasebna obrt.

V **družbeno obrt** so spadale do vključno leta 1976 samostojne obrtne organizacije proizvajalnih, gradbenih in storitvenih dejavnosti, dalje obrtne delavnice državnih organov in ustanov, družbenih organizacij, kmetijskih zadrug in delavnice, ustanovljene po 27. členu splošnega zakona o obrtnih delavnicah samostojnih obrtnikov (Ur. l. SFRJ, št. 14/63). S sprejetjem Odloka o Enotni klasifikaciji dejavnosti (Ur. l. SFRJ, št. 34/76, 52/76, 62/77, 72/80, 77/82, 71/83, 68/84, 76/85, 28/86, 72/86, 78/87, 63/88, 6/89, 29/90, 47/90) je bilo področje družbene obrti (področje: Obrt in osebne storitve) zmanjšano za proizvajalne dejavnosti, ki so bile razvrščene v področje: Industrija in rudarstvo. S sprejetjem Uredbe o uvedbi in uporabi Standardne klasifikacije dejavnosti (Ur. l. RS, št. 34/94, 3/95, 33/95, 15/96) in z njeno uveljavitvijo pa se področje: Obrt in osebne storitve več ne pojavlja kot dejavnost.

Zasebna obrt je bila urejena z obrtnimi zakoni, ki so bili večkrat na novo izdani in spreminjani. Z njimi se je postopoma širil obseg zasebne obrti. Obrtni zakon, izdan v Ur. l. SRS, št. 26/73, je določal, da lahko občani z osebnim delom in s svojimi sredstvi samostojno opravljajo obrtno, gostinsko, avtoprevozniško in brodarsko dejavnost ter prodajo na drobno pod pogoji, ki jih je določal zakon. Vključene so bile tudi obrtne storitve kot postranski poklic. Obrtne dejavnosti zasebne obrti so bile nato z letom 1977 definirane s področjem dejavnosti Obrt in osebne storitve Enotne klasifikacije dejavnosti in z dejavnostjo stavbne in gradbene obrti. Po določilih Obrtnega zakona, objavljenega v Ur. l. SRS, št. 1/79, 6/83, 37/85, so zasebno obrt do leta 1985 sestavljale obrtna, gostinska, avtoprevozniška in brodarska dejavnost ter prodaja na drobno, od leta 1986 pa še turistična dejavnost ter druge gospodarske in negospodarske dejavnosti; pri tem so bile dejavnosti, ki jih ni bilo dovoljeno opravljati kot obrt, posebej naštete. S sprejetjem novega Obrtnega zakona (objavljenega v Ur. l. SRS, št. 35/88, 24/89) pa je zasebna obrt zajemala obrtno, gostinsko, turistično, prometno, kmetijsko, gozdarsko in ribiško dejavnost, trgovino na drobno, intelektualne storitve gospodarskega značaja ter druge dejavnosti gospodarskega značaja, katerih opravljanje ni bilo prepovedano z zakonom.

S sprejetjem zdaj veljavnega obrtnega zakona je **obrt** definirana **kot način opravljanja dejavnosti.** Zanjo so veljavni naslednji pravni akti:

1. Zakon o gospodarskih družbah (Ur. l. RS, št. 30/93, 29/94, 82/94)
2. Obrtni zakon (Ur. l. RS, št. 50/94)
3. Uredba o uvedbi in uporabi Standardne klasifikacije dejavnosti (Ur. l. RS, št. 34/94, 3/95, 33/95, 15/96)
4. Uredba o listi A obrtnih dejavnosti in listi B obrti podobnih dejavnosti (Ur. l. RS, št. 76/94)
5. Pravilnik o postopku izdaje obrtnega dovoljenja in o obrtnem registru (Ur. l. RS, št. 10/95)
6. Pravilnik o opravljanju preizkusa strokovne usposobljenosti za opravljanje obrti podobne dejavnosti (Ur. l. RS, št. 18/95)
7. Pravilnik o minimalnih tehničnih in drugih pogojih za opravljanje obrtnih in obrti podobnih dejavnosti (Ur. l. RS, št. 14/96)
8. Pravilnik o minimalnih sanitarno-zdravstvenih pogojih poslovnih prostorov, funkcionalnega zemljišča, drugih zunanjih površin, opreme, naprav in delavcev v obrtni obratovalnici (Ur. l. RS, št. 17/96)
9. Zakon o gostinstvu (Ur. l. RS, št. 1/95) z nanj vezanimi podzakonskimi akti
10. Zakon o prevozih v cestnem prometu (Ur. l. RS št. 72/94)
11. Pravilnik o pogojih za pridobitev licenc za prevoze v cestnem prometu, načinu in postopku njihove pridobitve ter o načinu vodenja evidence o izdanih licencah (Ur. l. RS, št. 33/96)

SOURCES AND METHODS OF DATA COLLECTION

*Data throwing light upon **craft development** were collected with semi-annual and annual reports of various statistical surveys stated in the notes to tables.*

*Data throwing light upon **craft as a way of performing activity** with the presentation of craft establishments performing craft activity or activity similar to craft and home or art manufacture are from the Craft Register of Slovenia. The Craft Register is a public register kept by the Chamber of Crafts. The keeping of this register is defined in the Regulation on Issuing Trade Licences and on the Craft Register.*

COVERAGE

In the presented period the field of craft was defined in different ways. As regards the ownership we distinguish between social and private crafts.

*Until 1976 **social crafts** included independent craft organisations of industrial, construction and service activities, craft establishments of government bodies and institutions, and social organisations, agricultural co-operatives, and workshops established according to Article 27 of the General Law on Craft Establishments of Independent Craftsmen (Official Gazette of the Socialist Federal Republic of Yugoslavia, No. 14/63). With the adoption of the Decree on National Classification of Activities (Official Gazette of SFRY, No. 34/76, 52/76, 61/77, 72/80, 77/82, 71/83, 68/84, 76/85, 28/86, 72/86, 78/87, 63/88, 6/89, 29/90, 47/90) the field of social crafts (Craft and personal service activities) was reduced by production activities classified into the field Manufacturing, mining and electricity supply. With the adoption of the Decree on Introduction and Use of the Standard Classification of Activities (Official Journal of the Republic of Slovenia, No. 34/94, 3/95, 33/95, 15/96) and its enforcement the field of craft as activity no longer exists.*

***Private crafts** were regulated by craft legislation which changed during the years and expanded the field of private crafts. The Law on Crafts (Official Gazette of the Socialist Republic of Slovenia, No. 26/73) defined that citizens can with personal work and their own funds independently perform craft, catering and transport activities, and retail sale under conditions defined by law. Included were also craft services as a side job. Private craft activities were in 1977 defined with the field of activity Craft and personal service activities of the National Classification of Activities and with the activity of construction crafts. According to the Law on Crafts (Official Gazette of SRS, No. 1/79, 6/83, 37/85) until 1985 private crafts were craft, catering and transport activities, and retail sale, and since 1986 also tourist activity and other economic and non-economic activities. Activities which could not be performed as crafts were enumerated. With the adoption of the new Law on Crafts (Official Gazette of SRS, No. 35/88, 24/89) private crafts covered craft, catering, tourist, transport, agriculture, forestry and fishing activities, retail trade, intellectual services of economic character and other activities of economic character whose performing was not forbidden by law.*

*With the adoption of the present Law on Crafts, crafts are defined as a **way of performing activity.** Legal acts regulating this field are:*

1. *Law on Economic Companies (OJ RS, No. 30/93, 29/94, 82/94)*
2. *Law on Crafts (OJ RS, No. 50/94)*
3. *Decree on Introduction and Use of the Standard Classification of Activities (OJ RS, No. 34/94, 3/95, 33/95, 15/96)*
4. *Decree on List A of Craft Activities and List B of Activities Similar to Craft (OJ RS, No. 76/94)*
5. *Regulation on Issuing Trade Licences and on the Craft Register (OJ RS, No. 10/95)*
6. *Regulation on Taking a Test in Qualification for Performing Activity Similar to Craft (OJ RS, No. 18/95)*
7. *Regulation on Minimum Technical and Other Conditions for Performing Craft Activity and Activity Similar to Craft (OJ RS, No. 14/96)*
8. *Regulation on Minimum Sanitary Conditions in Business Premises, on Functional Area, Other External Areas, Equipment, Devices and Workers in Craft Establishment (OJ RS, No. 17/96)*
9. *Law on Catering (OJ RS, No 1/95) with legal acts connected with it*
10. *Law on Road Transport (OJ RS, No. 72/94)*
11. *Regulation on Conditions for Obtaining Licences for Road Transport, Way and Procedure for Obtaining Them, and Method of Keeping Records on Issued Licences (OJ RS, No. 33/96)*

12. Pravilnik o minimalnih tehniËnih in drugih pogojih za parkiriöËa in mesta za vzdrűevanje vozil (Ur. l. RS, öt. 33/96)
13. Pravilnik o programu preizkusa usposobljenosti ter o postopku in naËinu opravljanja preizkusa za pridobitev licence za prevoze v cestnem prometu (Ur. l.RS, öt. 33/96).

DEFINICIJE

Obrtna oziroma **obrti podobna dejavnost** je po Obrtnem zakonu pridobitna dejavnost, doloËena z Uredbo o listi A obrtnih dejavnosti in listi B obrti podobnih dejavnosti.

Z**a** obe vrsti dejavnosti je znaËilno**:**

- da gre za **proizvodno ali storitveno dejavnost** navadno na podlagi **individualnih naroËil,**
- da se **proizvodnja** opravlja **le v majhnih serijah,**
- da **serijska proizvodnja ne obsega preteűnega dela dejavnosti**,
- da se **uporabljajo stroji, orodja in tehniËne naprave,** primerni za opravljanje obrtne in obrti podobne dejavnosti ter da nimajo **znaËilnosti tekoËih trakov ali avtomatiziranega delovnega procesa.**

Pri doloËenih storitvenih dejavnostih se lahko osebam, za katere se opravi storitev zaradi zaokroűitve oziroma dopolnitve celovitosti dejavnosti, **proda na drobno doloËeno blago,** ki ga obrtnik uporablja pri opravljanju teh storitev. Prodaja teh izdelkov mora biti vpisana v obrtno dovoljenje.

Gostinska dejavnost se lahko opravlja kot **obrti podobna dejavnost** le, Ëe jo opravlja gostinec kot samostojni podjetnik posameznik v gostinskem obratu: penzionu, restavraciji, gostilni, slaöËiËarni, kavarni in okrepËevalnici. Upoötevati pa mora Zakon o gostinstvu in na njegovi podlagi sprejete podzakonske akte.

Prevozniöka dejavnost v cestnem prometu se öteje kot **obrti podobna dejavnost** le, Ëe jo opravlja prevoznik kot fiziËna oseba na podlagi pridobljene licence kot samostojni podjetnik posameznik. Upoötevati pa mora Zakon o prevozih v cestnem prometu in nanj vezane podzakonske akte.

Za **dejavnost domaËe in umetne obrti** je znaËilen **enostaven naËin dela** s **preteűnim roËnim delom ter umetniöko in oblikovalsko ustvarjanje.**

Mnenje o tem, ali je izdelek predmet domaËe ali umetne obrti, daje Obrtna zbornica Slovenije po mnenju strokovne komisije, sestavljene iz etnografov, likovnih umetnikov in zgodovinarjev, ki pregleda in oceni posamiËni predmet.

Do uveljavitve predpisov, ki bodo urejali **dopolnilne dejavnosti na kmetijah**, lahko kmetje in Ëlani njihovega gospodinjstva opravljajo dejavnosti po Obrtnem zakonu **na podlagi priglasitve Obrtni zbornici Slovenije**. Ni jim treba izpolnjevati pogojev za opravljanje dejavnosti.

Pravica do opravljanja obrtne dejavnosti, obrti podobne dejavnosti ter dejavnosti domaËe in umetne obrti se pridobi na podlagi obrtnega dovoljenja in vpisa v Obrtni register. Po Pravilniku o postopku izdaje obrtnega dovoljenja in o obrtnem registru lahko pridobijo obrtno dovoljenje: fiziËna oseba, tuja fiziËna ali pravna oseba, samostojni podjetnik posameznik, druűba z neomejeno odgovornostjo, komanditna druűba, druűba z omejeno odgovornostjo in delniöka druűba.

Ugotovitvena odloËba je osnova za izdajo obrtnega dovoljenja**.** Izda jo upravna enota, ko na osnovi strankine vloge preveri, ali so izpolnjeni pogoji za opravljanje pridobitne dejavnosti na obrtni naËin. Poleg dokazil je potrebno v vlogi natanËno opredeliti, katere dejavnosti bo stranka opravljala in na kaköen naËin. PooblaöËena oseba v upravni enoti, pristojni za gospodarstvo, preveri in opredeli dejavnosti po Uredbi o Standardni klasifikaciji dejavnosti in po Uredbi o listi A obrtnih dejavnosti ter listi B obrti podobnih dejavnosti ter v ugotovitveno odloËbo **navede toliko dejavnosti, za kolikor se je stranka opredelila.**

Pogoji za pridobitev obrtnega dovoljenja so:

Samostojni podjetnik posameznik mora za pridobitev obrtnega dovoljenja najprej **izpolnjevati pogoj o izobrazbi**:

- za opravljanje obrtne dejavnosti je potreben mojstrski izpit,
- za opravljanje obrti podobne dejavnosti je potrebna konËana ustrezna poklicna öola ali opravljen preizkus strokovne usposobljenosti za opravljanje dejavnosti ali strokovna izobrazba V.,

12. Regulation on Minimum Technical and Other Conditions for Parking Places and Areas for Repairing Vehicles (OJ RS, No. 33/96)
13. Regulation on the Programme of the Test in Qualification and on Procedure and Method of Taking the Test in Obtaining the Licence for Road Transport (OJ RS, No. 33/96).

DEFINITIONS

***Craft activity** or **activity similar to craft** is according to the Law on Crafts a gainful activity defined with the Decree on List A of Craft Activities and List B of Activities Similar to Craft.*

For both types of activities it is characteristic that:

- *they are **production or service activities**, usually based on **individual orders**,*
- ***production** is performed only **in small series**,*
- ***mass production** is **not a major part of activity**,*
- ***machines, tools and technical devices** suitable for performing craft activity or activity similar to craft are used, they do not have **conveyor belts or automated process of work**.*

***In certain service activities** certain material can be sold to persons for whan the service is performed, but only material used by the craftsman in performing the service. Sale of products must be written in the trade licence.*

***Catering activity** can be performed as an **activity similar to craft** only if it is performed by the caterer as an independent entrepreneur in a catering facility: boarding house, restaurant, inn, confectionery, coffee-house or snack bar. The Law on Catering and legal acts adopted on its basis have to be taken into consideration.*

***Road transport activity** can be performed as an **activity similar to craft** only if it is performed by the transporter as a natural person on the basis of obtained licence as independent entrepreneur. The Law on Road Transport and legal acts adopted on its basis have to be taken into consideration.*

*Characteristic for **activity of home and art manufacture** are **simple methods of work with predominantly manual work, and artistic and designing creation**.*

Opinion on whether an object is a work of home or art manufacture is given by the Chamber of Crafts, i.e. its expert commission composed of ethnographers, artists and historians who examine and evaluate individual products.

*Until the enforcement of regulations which will regulate **supplementary activities on farms** farmers and members of their households can perform activities according to the Law on Crafts on the basis of **application at the Chamber of Crafts**. They do not have to fulfil the requirements for performing the activity.*

The right to perform craft activities, activities similar to craft and activities of home and art manufacture is gained on the basis of a trade licence and registration in the Craft Register. According to the Regulation on Issuing Trade Licences and on the Craft Register trade licences can be obtained by: natural persons, foreign natural or legal persons, independent entrepreneurs, general partnerships, limited partnerships, limited liability companies and joint stock companies.

Assessment decrees** are the basis for issuing trade licences. They are issued by administrative units after checking, on the basis of individual applications, whether the requirements for performing gainful activity in a craft way are fulfilled. In adition to enclosed documents proving that the requirements are fulfilled, the application must include exact definition of activity which the applicant would like to perform and the way of its performing. An authorised person at the department dealing with economic issues at the administrative unit checks and defines the activity according to the Decree on the Standard Classification of Activities and the Decree on List A of Craft Activities and List B of Activities Similar to Craft and states in the assessment decree **as many activities as the applicant defined.

The requirements for obtaining a trade licence are:

*In order to obtain a trade licence an **independent entrepreneur** must first fulfil the **education requirement**:*

- *for performing a craft activity an award of master' s degree,*
- *for performing an activity similar to craft a finished vocational school, or a passed examination of qualification for performing activity, or professional education of the V, VI or VII degree which gives*

VI. ali stopnje, ki daje ustrezno strokovno oziroma praktično znanje za obrt.

Samostojni podjetnik posameznik, ki sam ne izpolnjuje izobrazbenega pogoja, pridobi obrtno dovoljenje, če zaposluje vsaj eno osebo, ki ta pogoj izpolnjuje.

Gospodarske družbe si pridobijo obrtno dovoljenje tako, da osebe, ki bodo kot zastopniki vpisane v Obrtni register, vložijo vlogo, v kateri priložijo dokazila, da izpolnjujejo zahtevane pogoje, in sicer:

- **družba z omejeno odgovornostjo** oziroma **družba z neomejeno odgovornostjo** mora zaposlovati vsaj eno osebo z zahtevano izobrazbo ali pa mora ta pogoj izpolnjevati vsaj eden od družbenikov;
- **komanditna družba** mora zaposlovati vsaj eno osebo z zahtevano izobrazbo ali pa mora ta pogoj izpolnjevati vsaj eden od komplementarjev;
- **delniška družba**, mora zaposlovati vsaj eno osebo, ki izpolnjuje pogoj o izobrazbi, lahko pa ta pogoj izpolnjuje vsaj eden v poslovodstvu.

Samostojni podjetnik posameznik in gospodarska družba morata izpolnjevati tudi v ustreznih pravilnikih **predpisane minimalne pogoje za opravljanje dejavnosti.**

Izdelovalci izdelkov domače in umetne obrti si pridobijo obrtno dovoljenje na podlagi mnenja Strokovne komisije za preverjanje izdelkov domače in umetne obrti pri Obrtni zbornici Slovenije.

Odločbo o obrtnem dovoljenju za opravljanje obrtne in obrti podobne dejavnosti ter za dejavnost domače in umetne obrti izda Obrtna zbornica Slovenije.

Samostojni podjetnik posameznik se mora z ugotovitveno odločbo in obrtnim dovoljenjem priglasiti pristojnemu davčnemu organu, ki ga vpiše v **vpisnik podjetnikov.**

Definicije za samostojnega podjetnika posameznika, družbo z neomejeno odgovornostjo, komanditno družbo, družbo z omejeno odgovornostjo ter delniško družbo so v Zakonu o gospodarskih družbah.

corresponding professional or practical knowledge for performing the craft.

*An **independent entrepreneur who does not fulfil the necessary education requirement** can obtain a trade licence if (s)he employs at least one person who fulfils this requirement.*

***Economic companies** can obtain trade licences so that persons who will be recorded as representatives in the Craft Register apply for the licence and enclose in their application the proof of fulfilling the necessary requirements, i.e.:*

- *a **limited liability company** or a **general partnership** has to employ at least one person who fulfils the education requirement or it has to be fulfilled by at least one of the partners,*
- *a **limited partnership** has to employ at least one person who fulfils the education requirement or it has to be fulfilled by at least one of the partners,*
- *a **joint stock company** has to employ at least one person who fulfils the education requirement or it has to be fulfilled by at least one person in the management.*

*Independent entrepreneurs and economic companies have to fulfil the **prescribed minimum requirements for performing the activity** which are listed in the corresponding regulations.*

***Manufacturers of home and art manufacture products** can obtain trade licences on the basis of an opinion of the expert commission of the Chamber of Crafts for checking home and art manufacture products.*

*The **decree on trade licence** for performing craft activity or activity similar to craft, and home and art manufacture is issued by the Chamber of Crafts.*

*Independent entrepreneurs must take the assessment decree to the authorised tax authority which registers them in the **record of entrepreneurs**.*

Independent entrepreneurs, general partnerships, limited partnerships, limited liability companies and joint stock companies are defined by the Law on Economic Companies.

21. GRADBENIäTVO

CONSTRUCTION

VIRI IN METODE ZBIRANJA PODATKOV

Podatki o razvoju gradbeništva, stanju in rezultatih dela gradbenih podjetij in organizacij ter podatki o organizaciji in strukturi gradbeništva so zbrani s podatki v zaključnih raËunih (Agencija za plaËilni promet, nadziranje in informiranje), z MeseËnim raziskovanjem o zaposlenih osebah in plaËah, s podatki Republiške uprave za javne prihodke, z MeseËnim poroËilom o gradbeništvu in z Letnim poroËilom o gradbenem objektu.

Drugi podatki so zbrani z Letnim poroËilom o gradbenem objektu, z Letnim poroËilom o porabi gradbenega in pogonskega materiala, s TrimeseËnim poroËilom o izvajanju gradbenih del v tujini ter storitvah projektiranja, inűeniringa in tehniËnega svetovanja pri graditvi objektov v tujini, z Letnim poroËilom o ruöitvah in spremembah namembnosti stanovanj ter s Polletnim poroËilom o cenah novih stanovanj.

ZAJETJE

Z Letnim poroËilom o gradbenem objektu so po Nomenklaturi gradbenih objektov in del zajeti objekti, na katerih so gradbena podjetja in organizacije opravljala gradbena, obrtniška in/ali inötalacijska dela. Z Letnim poroËilom o stavbi, grajeni v reűiji individualnega lastništva, so poleg stanovanjskih zajete tudi druge stavbe, na katerih so v letu poroËanja obËani v lastni reűiji opravljali gradbena, obrtniška in/ali inötalacijska dela pri novih gradnjah, poveËavah in adaptacijah.

Vrednost opravljenih del na objektih, ki so jih gradila podjetja, temelji na letnih ali konËnih obraËunskih situacijah, vrednost del na objektih, ki so jih gradili obËani v lastni reűiji, pa ocenjujejo referenti v upravnih enotah.

Podatki o stanovanjski gradnji so zbrani z Letnim poroËilom za vsako stavbo, v kateri je stanovanje in na kateri so bila v tekoËem letu izvedena gradbena, obrtniška in/ali inötalacijska dela. Zajeta so vsa stanovanja v novih stavbah, v prizidkih k starim stavbam in stanovanja, pridobljena z rekonstrukcijo ali adaptacijo drugih prostorov. Stanovanja so klasificirana po investitorju kot pravni ali fiziËni osebi.

Z Letnim poroËilom o porabi gradbenega in pogonskega materiala je zajeta poraba v gradbenih in drugih delovnih organizacijah.

Podatki o gradbeni dejavnosti v tujini so zbrani s TrimeseËnim poroËilom o izvajanju gradbenih del v tujini ter storitvah projektiranja, inűeniringa in tehniËnega svetovanja pri graditvi objektov v tujini. PoroËajo podjetja ter druge organizacije, ki opravljajo gradbena, obrtniška in inötalacijska dela ter projektantske, inűeniring in svetovalne storitve za tujino.

Polletno poroËilo o cenah novih stanovanj zajema cene za dokonËana stanovanja, ki so jih gradila gradbena podjetja in druge organizacije.

Podatki o ruöitvah in drugih spremembah stanovanjskega sklada so zbrani v letnem poroËilu upravnih organov, podjetij ter drugih organizacij, ki imajo dokumentacijo za to vrsto gradbenih del. PoroËilo zajema vsako podrto stavbo, v kateri je bilo vsaj eno stanovanje. Niso zajete stavbe brez stanovanj, stavbe, ki so se uporabljale samo med sezonskimi deli, stavbe za skupinska stanovanja (internati, domovi, samski hoteli, barake ipd.) niti zasilno naseljeni prostori (lope, garaűe ipd.).

Skupni stanovanjski sklad predstavljajo podatki o stanovanjih (glej definicijo), zbrani ob Popisu prebivalstva, gospodinjstev, stanovanj in kmeËkih gospodarstev 31. 3. 1991. Ker so k tem prištеta tudi po Popisu 1991 zgrajena stanovanja, so zajeta vsa stanovanja na območju Republike Slovenije, namenjena za stalno stanovanje, ne glede na to, ali so bila ob popisu naseljena ali ne.

V stanovanjskem skladu niso upoötevana stanovanja, ki se uporabljajo samo obËasno za poËitek ali rekreacijo ali med sezonskimi deli v kmetijstvu. Prav tako niso upoötevani zasilno naseljeni prostori (poslovni prostori, barake, kleti, podstreöja itd.) ter skupinska stanovanja (domovi, internati itd.). Praviloma so zajeta samo dokonËana stanovanja, v katerih so bila opravljena vsa gradbena, inötalacijska in obrtniška dela. Izjemoma so bila ob popisu zajeta tudi nedokonËana stanovanja, Ëe jih je gospodinjstvo űe uporabljalo za stalno stanovanje. Popisan je bil le del, ki se je uporabljal za stanovanje, ne glede na to, do katere stopnje je bil objekt zgrajen.

SOURCES AND METHODS OF DATA COLLECTION

The development of construction, the situation and results of construction enterprises and organizations and data on organization and structure of construction are collected from data in balance sheets (the Agency for Payment, Supervision and Information), by Monthly Surveys on Employed Persons and their Wages, by data from the National Office of Public Income, by the Monthly Report on Construction Works and by the Annual Report on Building or Civil Engineering Work.

Other data are gathered through the Annual Report on Building or Civil Engineering Work, the Annual Report on the Consumption of Construction and Propulsion Materials, the Quarterly Report on Construction Work abroad and Designing, Engineering and Consulting Services for Foreign Countries, the Annual Report on Demolitions and Other Changes in the Dwelling Stock, and the Half-yearly Report on Prices of New Dwellings.

COVERAGE

With the Annual Report on Building or Civil Engineering Work, in accordance with the Nomenclature of Structures and Construction Works, we cover facilities at which construction enterprises and organizations have carried out construction, finishing and/or installation works. With the Annual Report on Building Constructed Under the Direction of Individual Ownership we cover, besides residential buildings, other buildings in which construction, finishing and/or installation works have been carried out by citizens under their own direction in the year under review. Three types of building activities are distinguished: new construction, extension, and adaptation.

The value of construction works carried out by enterprises is based on the annual or final state of accounts. The value of construction works carried out by citizens under their own direction is assessed by municipality officials.

Data on residential building are gathered by means of the Annual Report on Building or Civil Engineering Work for each building containing dwellings where, during the current year, construction, finishing and/or installation works have been carried out. We cover all dwellings in new buildings and in extensions to old buildings, as well as dwellings created through the renovation or conversion of other premises. Dwellings are classified according to the investor, who may be a legal or physical person.

The Annual Report on the Consumption of Construction and Propulsion Materials covers consumption within construction and other organizations.

Data on construction activity abroad are gathered by means of the Quarterly Report on Construction Works and Designing, Engineering and Consulting Services for Foreign Countries. Reports are received from enterprises and other organizations and groups carrying out construction, finishing and/or installation works and designing, engineering and consulting services for foreign partners.

The Half-yearly Report on Prices of New Dwellings covers only the prices of new dwellings built by construction enterprises and other organizations.

Data on demolitions and other changes in the dwelling stock are gathered in the annual report of municipal organs, enterprises and other organizations and groups which keep files of construction works of this kind. The report covers every demolished building with at least one dwelling. The report does not cover buildings without dwellings, buildings which were used only during seasonal labour periods, buildings in multiple occupation where the occupants do not form a single household (boarding homes, homes, dormitory hostels, huts, etc.) and temporary accommodation premises (garages, hangars, etc.).

The total dwelling stock is made up of data on dwellings (see Definitions) gathered during the Census of Population, Households, Housings and Agricultural Holdings on 31 March 1991. Since dwellings built after the Census are also counted, we include all dwellings on the territory of the Republic of Slovenia intended for permanent residence, irrespective of whether they were occupied at the time of the Census or not.

The dwelling stock does not include dwellings used temporarily for rest or recreation or during seasonal farming labour periods. Living quarters other than conventional dwellings (business premises, huts, cellars, attics, etc.) and residences in multiple occupation (homes, boarding homes, etc.) are also excluded. Dwellings where all construction, finishing and installation works have been completed are included. Conventional dwellings under construction are only included in exceptional cases where they have already been used as permanent residence by a household. The part used for residence is recorded irrespective of its state of completion.

Posebej so prikazani podatki za naselja mestnega tipa. Seznam mestnih naselij je bil izdelan za potrebe statistike pri obdelavi podatkov popisa in drugih statistiËnih raziskovanj v sodelovanju Republiöke geodetske uprave, Urada za makroekonomske analize in razvoj, UrbanistiËnega inötituta, Geodetskega inötituta ter StatistiËnega urada Republike Slovenije.

Data for urban settlements are given separately. The list of urban settlements was created for statistical purposes in connection with the processing of data of the census and other statistical surveys in collaboration with the Surveying and Mapping Authority, the Institute for Social Planning, the Urban Planning Institute, the Geodetic Institute and the Statistical Office of the Republic of Slovenia.

DEFINICIJE

Gradbeni objekt je vsaka podzemna ali nadzemna zgradba, ki je v gradbenem pomenu celota z vnaprej doloËenim namenom, vezana na doloËen prostor. Podkategorije objektov in gradbene velikosti so navedene po Nomenklaturi gradbenih objektov in del (Metodoloöko gradivo, öt. 1/92).

Nova gradnja je na novo zgrajen objekt na kraju, kjer je ûe stal objekt, ki je bil poruöen, ali na kraju, kjer pred gradnjo ni bilo drugega objekta. Za novo gradnjo se öteje tudi poveËava objekta v vodoravni ali v navpiËni smeri.

Izboljöave kot **rekonstrukcije in adaptacije** so gradbena dela, s katerimi se spremeni konstrukcijski sistem objekta zato, da se izboljöa njegova uporabnost. Namen gradbenega objekta pri rekonstrukciji ostane isti, pri adaptaciji pa se spremeni.

Velika popravila so gradbena dela, s katerimi se obnovijo dotrajani deli stavb in drugih objektov. Razporeditev prostorov, konstrukcijski sistem in namen objekta pri teh delih ostanejo nespremenjeni.

Dela rednega vzdrûevanja so manjöa gradbena dela, katerih izvedba je potrebna za normalno uporabo gradbenega objekta.

Vrednost opravljenih del je izraûena v tekoËih cenah in vkljuËuje tudi vgrajeni material in opremo.

Pri **vrednosti pogodb za dela v tujini** so zajete vse pogodbe, ki so jih sklenila podjetja ali druge organizacije neposredno ali prek poslovnih zdruûenj oziroma za te posle specializiranih organizacij.

Vrednost opravljenih del na gradbenih objektih v tujini zajema skupno vrednost del ter porabljenega materiala in vgrajene opreme, ne glede na to, od kod oboje izvira.

Podatki o stanovanjih, zbrani s Popisom prebivalstva, gospodinjstev, stanovanj in kmeËkih gospodarstev v Republiki Sloveniji 1991, so objavljeni v poglavju Pregled po obËinah StatistiËnega letopisa Republike Slovenije 1994.

Stanovanje je vsaka gradbeno povezana celota, ki je namenjena za stanovanje in ima eno ali veË sob z ustreznimi pomoûnimi prostori (kuhinja, shramba, predsoba, kopalnica, straniöËe) ali je brez njih ter ima vsaj en poseben vhod.

Stanovanja so razvröËena po öevilu sob. **Soba** je prostor, ki je s stalnimi stenami loËen od drugih stanovanjskih prostorov, ima neposredno dnevno svetlobo in najmanj 6 m^2 povröine.

Pri **enosobnih stanovanjih** so prikazane: posebne sobe, garsonjere in enosobna stanovanja. Posebna soba je stanovanje s sobo brez kuhinje in kopalnice. Lahko ima predsobo, straniöËe ali shrambo, vendar mora biti uporabna povröina teh pomoûnih prostorov manjöa od 6 m^2. Garsonjera je stanovanje z eno sobo, kopalnico in predsobo, z majhno kuhinjo (do 4 m^2) ali brez nje. Enosobno ali veËsobno stanovanje ima eno ali veË sob, kuhinjo (ali pa ne) in druge pomoûne prostore, katerih uporabna povröina je veËja kot 6 m^2.

V **povröini stanovanja** je upoötevana uporabna povröina sob, kuhinje in drugih pomoûnih prostorov, povröina zaprtih teras in verand ter povröina pod vgrajenimi omarami. Debelina sten ter povröina odprtih teras in balkonov nista upoötevani.

Stanovanje v gradnji je stanovanje, ki je predvideno z naËrtom v posamezni stavbi in bo dokonËano v prihodnjih letih.

DokonËano stanovanje je stanovanje, v katerem so v vseh prostorih opravljena z naËrtom predvidena gradbena, obrtniöka in inötalacijska dela.

DEFINITIONS

*Any freestanding under- or aboveground structure is considered to be a **building or civil engineering work**, whose purpose is determined in advance and is located in a specific area. Subcategories and building sizes are cited according to the Nomenclature of Structures and Construction Works (Methodological Material, No. 1/92).*

*A **new construction** is a newly-built structure built on a location previously cleared by demolition or on a location where there was no previous structure. New construction works include extensions of existing structures, both horizontally or vertically.*

***Improvements**, such as **restorations and adaptations**, relate to structural changes of a building in such a way as to increase its utility. The purpose of the structure remains the same in the case of restoration and is altered in the case of adaptation.*

***Capital repairs** are construction works which comprise the renewal of buildings and other structures, while the arrangement, structure system and purpose of these facilities remain the same.*

***Current maintenance works** are minor construction works which keep the structure in a state of normal functioning.*

*The **value of construction** put in place is given at current prices. It comprises the value of all materials and equipment built in and the manhours as well.*

*The **contractual value of works abroad** encompasses all contracts signed by an enterprise or other organization directly or through commercial associations or organizations specialised in such business.*

*The **value of construction works done abroad** covers the total value of such works including the value of the material used and equipment fitted, irrespective of their origin.*

Data on dwellings gathered with 1991 Census of Population, Households, Housings and Agricultural Holdings in the Republic of Slovenia are published in the Review by municipalities in the Statistical Yearbook of the Republic of Slovenia 1994.

*According to the definition, a **dwelling** is any structurally unified whole intended for residence, with one or more rooms, with or without appropriate utility spaces (kitchen, larder, hallway, bathroom, toilet) and with at least one separate entrance.*

*Dwellings are classified according to the number of rooms they consist of. A **room** is an interior space separated from others by permanent walls, which receives direct daylight and has an area of at least six square metres.*

***One-room dwellings** comprise: separate rooms, bedsit and one room dwellings. A separate room is a dwelling with a room, with no kitchen or bathroom. It may have a hallway, toilet or larder, but only if the area of such auxiliary interiors does not exceed six square metres. A bedsit is a dwelling with a room, hallway and bathroom and which may have a small kitchen (up to four square metres of area). A one-room or multi-room dwelling has one or more rooms, which may have a kitchen and has other auxiliary interiors with an area greater than six square metres.*

*The **useful floor space of a dwelling** covers the utilisable area of the rooms, kitchen and other auxiliary interiors, the area of terraces and verandas enclosed and the area enclosed by fitted cupboards. The thickness of the walls and the area of open terraces and balconies are not included.*

*A **dwelling under construction** is a dwelling planned for a particular building and which will be completed in future.*

*A **dwelling completed** is a dwelling in which all designed construction, installation and finishing works in all interiors have been accomplished.*

22. PROMET IN ZVEZE

TRANSPORT AND COMMUNICATIONS

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o űelezniökem prometu smo zbrali pri Slovenskih űeleznicah. Podatke o PTT-prometu vkljuËno do leta 1994 smo zbrali pri PTT-podjetju Slovenije, za leti 1995 in 1996 pa pri Poöti Slovenije (podatke o poötnih storitvah) in Telekomu Slovenije (podatke o telekomunikacijskih storitvah).

Podatke o cestnem omreűju je posredovalo Ministrstvo za promet in zveze, podatke o registriranih motornih vozilih in prometnih nezgodah pa Ministrstvo za notranje zadeve.

Druge podatke smo zbrali z rednimi statistiËnimi raziskovanji s podroËja statistike prometa in zvez.

ZAJETJE

éelezniöko gospodarstvo Ljubljana do leta 1991 ni upoötevalo vseh prog na ozemlju Slovenije. Tako ni bila upoötevana proga pri Lendavi, zajete pa so bile proge na obmoËju Hrvaöke: äapjane - Reka (brez reöke postaje), Buzet - Pula in Lupoglav - Raöa. Podatki za éG Ljubljana in Slovenijo so se zato razlikovali. Podatki o ötevilu űelezniökih postaj in dolűini proge so bili objavljani za obe obmoËji, vsi drugi podatki pa so se nanaöali na éG Ljubljana.

Od leta 1992 se vsi podatki o űelezniökem prometu nanaöajo na ozemlje Slovenije.

Promet v pristaniöËih se nanaöa na pristaniöËa Koper, Izolo in Piran. Pri prometu ladij ötejemo ladje trgovske mornarice in ribiöke ladje s 5 NRT ali veË, namenjene za prevoz potnikov ali blaga, in ladje z manj kot 5 NRT, Ëe vozijo na redni progi.

Pomorski in zraËni prevoz ter promet na letaliöËih so v celoti zajeti v prikazanih podatkih (upoötevali smo vse poslovne subjekte, ki se ukvarjajo z navedenimi dejavnostmi).

V javnem cestnem prevozu od leta 1992 spremljamo izbrane poslovne subjekte, ki so registrirani v dejavnosti cestnega prometa (potniöki in blagovni). Enote izberemo v januarju tekoËega leta glede na spodnji prag na osnovi doseűenega prometa v doloËenem preteklem obdobju in glede na ötevilo zaposlenih oseb (pet in veË). Zasebnega prevoza potnikov s taksiji, avtobusi in osebnimi avtomobili ter prevoza blaga, ki ga opravljajo samostojni avtoprevozniki, nismo upoötevali.

V podatke o cestnem prevozu za lastne potrebe so zajeti poslovni subjekti, ki sicer niso registrirani v dejavnosti cestnega prometa, opravljajo pa cestni prevoz. Izbrani so bili vsi poslovni subjekti, ki imajo veË kot eno vozilo (avtobus, tovorno vozilo ali kombinacijo obeh). Upoötevani so le avtobusi z 10 sedeűi in veË ter tovorna vozila z nosilnostjo 1 tone in veË. Prevoz (potnikov in blaga) za lastne potrebe, ki ga opravljajo javni cestni prevozniki, zasebni prevoz s taksiji, avtobusi in osebnimi avtomobili ter prevoz blaga, ki ga izvajajo samostojni avtoprevozniki, niso vkljuËeni.

Pri mejnih prehodih v űelezniökem, pomorskem in zraËnem prometu upoötevamo vse mejne prehode, v cestnem prometu pa mednarodne, meddrűavne in obmejne prehode. Upoötevamo tiste obmejne prehode, prek katerih je mogoË prehod s cestnimi vozili. Planinskih mejnih prehodov in prehodov po posebnem sporazumu ne upoötevamo.

Pri registriranih motornih vozilih upoötevamo vsa vozila iz registra vozil Ministrstva za notranje zadeve, razen diplomatskih vozil in mopedov .

Podatki o poötnih in telekomunikacijskih storitvah se nanaöajo na celotno ozemlje drűave.

Pri prekladanju v pristaniöËih je prikaz podatkov popoln, prav tako tudi pri drugih prekladalnih mestih, saj smo upoötevali vse poslovne subjekte, ki opravljajo to dejavnost.

Podatki o mestnem prometu se nanaöajo na promet v Ljubljani in Mariboru.

Pri vseh vrstah prometa se notranji in mednarodni promet vkljuËno do leta 1991 nanaöata na ozemlje nekdanje Jugoslavije, od tedaj pa na ozemlje Slovenije.

DEFINICIJE

Promet v öiröem pomenu je dejavnost, ki se ukvarja s prometom in zvezami.

Prevoz je prevaűanje potnikov ali blaga na doloËeno razdaljo, torej od vstopa oz. nakladanja do izstopa oz. razkladanja.

Promet potnikov ali blaga v oűjem pomenu besede pomeni ötevilo potnikov, ki so prispeli ali odpotovali, oziroma koliËina blaga prispelega ali odpravljenega blaga na postajaliöËih (űelezniöke, avtobusne postaje, pristaniöËa, letaliöËa, skladiöËa).

Potniöki kilometri (pkm) so seötevek zmnoűkov ötevila potnikov in razdalj, na

SOURCES AND METHODS OF DATA COLLECTION

Data on railway traffic are supplied by the Slovenian Railways. Data on P.T.T. traffic were supplied by PTT Slovenia until (including) 1994, for 1995 and 1996 they were supplied by the Post of Slovenia (data regarding postal services) and Telekom of Slovenia (data regarding telecommunication services).

Data on the road network are supplied by the Ministry of Transport and Communications. Data on registered motor vehicles and road accidents are supplied by the Ministry of Internal Affairs.

Other data are compiled from regular statistical surveys in the area of transport and communications.

COVERAGE

Until 1991 the territory of the Ljubljana Rail Authority did not cover all routes on the territory of Slovenia. Thus, the route in the vicinity of Lendava was not included, while the following routes on the territory of Croatia were covered: äapjane - Rijeka (excluding Rijeka station), Buzet - Pula and Lupoglav - Raöa. Data for the Ljubljana Rail Authority and for Slovenia were therefore not identical. Data on the number of railway stations and the length of routes were published for both territories, while all other information related to the Ljubljana Rail Authority.

As of 1992, all data on rail traffic relate to the Republic of Slovenia.

Harbour traffic relates to the ports of Koper, Izola and Piran. Under shipping we include merchant vessels and fishing vessels with 5 NRT or more, intended for carrying passengers or goods, and vessels with less than 5 NRT if they ply regular routes.

Coverage of maritime and air transport and of airport traffic is complete (all business units conducting such activities are covered).

Under road transport for hire or reward we cover all business units whose registered activity is road carriage (of goods or passengers). Road transport for hire or reward from 1992 on cowers selected enterprises and other entities whose registered activity is road carriage (of goods or passengers). The selection of units is made in January and the lower threshold is defined on the basis of the turnover achieved in a certain past period and the number of employees (five and more). Transport of passengers by taxis, buses by independent transporters and passenger cars as well as transport of goods by independent transporters i.e. individual entrepreneurs are not included.

Under road transport on own account we cover business units whose registered activity is not road carriage but who are engaged in road transport. We have selected all business units with two or more vehicles (buses, motor vehicles or both). Only buses with ten or more seats and motor vehicles with carrying capacity of one tonne or more are considered. Transport (of passengers and goods) on own account performed by carriers in road transport for hire or reward, transport of passengers by taxis, buses by independent transporters and passenger cars as well as transport of goods by independent transporters i.e. individual entrepreneurs are not included.

Under border crossings we take into consideration all border crossings in rail, marine and air transport and of international, interstate and local border crossings in road transport. We consider those border crossings which may be crossed by road vehicles. Mountain border crossings and crossings under special agreement are not included.

Registered motor vehicles refer to all vehicles from the register of vehicles of the Ministry of Internal Affairs except diplomatic vehicles and mopeds.

Data on postal and telecommunication services relate to the entire territory of the Republic of Slovenia.

Coverage of transshipment in harbours is comprehensive. Under transshipment at other places, all business units which perform transshipment activities are included.

Data on urban traffic relate to traffic in Ljubljana and Maribor.

National and international traffic in all modes of transport refer until (including) 1991 to the territory of the former Yugoslavia, after that they refer to the territory of the Republic of Slovenia.

DEFINITIONS

***Transport in the broad sense** is used for an activity in the area of transport and communications.*

***Transport** in the narrow sense is the conveying of passengers or goods over a given distance, and thus from boarding/loading to alighting/unloading.*

***Traffic** of passengers or goods is the number of passengers who have arrived or departed or the quantity of goods at stations (railway stations, bus stations, ports, airports, depots, etc.).*

***Passenger-kilometres** are the aggregate product of the number of*

katerih so se ti potniki peljali.

Tonski kilometri (tkm) so seötevek zmnoűkov koliËine blaga in razdalj, na katerih je bilo to blago prepeljano.

éELEZNIäKI PROMET

Meöane postaje so postaje za potnike in blago. Dejanska dolűina proge za doloËen odsek proge je dolűina od sredine postajnega poslopja zaËetne postaje do sredine postajnega poslopja konËne postaje.

Vlakovni kilometri (km) so razdalje (v km), ki jih prevozijo vlaki.

Brutotonski kilometri (km) so seötevki zmnoűkov celotne teűe blaga (tovora in teűe vagonov, brez pogonskega vozila) z razdaljami, na katerih se ta teűa pri prevozu ni spreminjala.

Normalno gorivo je teűa goriva v tonah (stvarno gorivo), pomnoűena z ekvivalentom kurilne vrednosti goriva. Ekvivalent 1 ima gorivo s kurilno vrednostjo 4800 kal. » e ima gorivo veËjo kurilno vrednost, je ekvivalent veË kot 1, sicer pa manj kot 1.

Odpotovali potniki so potniki, ki so odpotovali z űelezniökih postaj (po evidenci prodanih vozovnic).

Netotonski kilometri (km) so seötevki zmnoűkov teűe prepeljanega blaga z dejanskimi razdaljami, na katerih je bilo to blago prepeljano.

POMORSKI PROMET

Brutoregistrska tonaűa (BRT) je ves zaprt ladijski prostor pod palubo in nad njo (od tod naziv bruto) in se meri v m^3. 1 registrska tona je 2,83 m^3.

Netoregistrska tonaűa (NRT) je ladijski prostor, namenjen izkljuËno za prevoz potnikov in blaga.

Bruto nosilnost ladje (DWT) je najveËja nosilnost ladje. Poleg neto nosilnosti ladje, ki je na voljo za prevoz tovora, je v bruto nosilnost zajeta tudi teűa pogonskega goriva, posadke, hrane itd.

Indicirana moË pogonskih motorjev (v kW) je moË, ki jo je oznaËil proizvajalec.

Jadran je obmoËje prevozov med pristaniöËi Jadranskega morja skupaj s pristaniöËema Otranto in Valona.

Mediteran je obmoËje prevozov med pristaniöËi Sredozemskega, » rnega in Azovskega morja skupaj s pristaniöËema Gibraltar in Tanger.

Prekomorska plovba so vsi drugi prevozi, ki ne spadajo v prejönji dve skupini.

ZRA» NI PROMET

Letalski kilometri (km) so razdalje v km, ki jih prevozijo letala.

» arterski leti so pogodbeni leti.

Bruto nosilnost letala je razlika med najveËjo dovoljeno teűo letala pri vzletu in teűo praznega letala (brez potnikov, tovora in pogonskega goriva).

CESTNI PROMET

Magistralna cesta je mednarodna javna cesta, ki povezuje glavna mesta ali pomembnejöa gospodarska obmoËja drűav.

Regionalna cesta je javna cesta, ki povezuje gospodarska obmoËja znotraj drűave ali pa je posebno pomembna za drűavo.

Lokalna cesta je javna cesta, ki povezuje vasi in naselja znotraj obËin ali pa je posebno pomembna za promet na obmoËju obËine.

Mednarodna E-cesta je javna cesta, ki je z mednarodnim aktom uvröËena v mreűo mednarodnih cest.

Avtocesta je javna cesta, namenjena izkljuËno prometu z motornimi vozili. OznaËena je s predpisanim prometnim znakom. Ima dva med seboj loËena vozna pasova za promet v nasprotni smeri, je brez kriűiöË s cesto, űeleznico ali tramvajsko progo v isti ravnini in ima posebej zgrajene prikljuËke na drugo javno cestno omreűje.

Specialna vozila so gasilska, sanitetna (reöilna), pogrebna vozila itd.

VleËna vozila so sedlasti vlaËilci za prevoz kontejnerjev ipd. Od traktorjev so bili do leta 1985 upoötevani le registrirani, od leta 1986 pa prikazujemo evidentirane, ker se od tedaj le öe evidentirajo.

Mejni prehod za mednarodni promet je kraj, kjer je dovoljeno prestopiti mejo drűavljanom Slovenije in drugim drűavljanom.

passengers multiplied by the distances they have travelled.

***Tonne-kilometres** are the aggregate product of the quantity of goods multiplied by the distances over which they have been conveyed.*

RAILWAY TRANSPORT

***Mixed stations** are stations for passengers and goods. The actual length of line for a given section of railway is the length between the mid-point of the building of the departure station to the mid-point of the building of the terminal station.*

***Train-kilometres** are the distances in kilometres travelled by trains.*

***Gross tonne-kilometres** are the aggregate products of the total weight of goods (the load and weight of the wagons, not including the locomotive) multiplied by the distances over which this weight remains constant during transport.*

***Normal fuel** is the weight of fuel in tonnes (actual fuel) multiplied by the equivalent of the calorific value of the fuel. Fuel with a calorific value of 4800 cal has an equivalent of 1. If the fuel has a higher calorific value, the equivalent is higher than 1, otherwise it is lower.*

***Passenger departures** are the number of passengers who have departed from railway stations on the basis of recorded ticket sales.*

***Net-tonne kilometres** are the aggregate products of the weight of conveyed goods multiplied by the actual distances over which they have been conveyed.*

MARITIME TRANSPORT

***Gross register tonnage** (GRT) is the total enclosed space below deck and above (hence gross) and is measured in cubic metres. 1 registered tonne is 2,83 m^3.*

***Net register tonnage** (NRT) is the space of the vessel which is exclusively intended for carrying passengers and goods.*

*The **gross carrying capacity** (DWT) of a ship is the maximum load it can carry. In addition to the net carrying capacity available for the carriage of cargo, the gross capacity also includes the weight of engine fuel, the crew, provisions, etc.*

*The **indicated engine power** (in kW) is the power specified by the manufacturer.*

***Adriatic** is the shipping area between the ports on the Adriatic Sea, including the ports of Otranto and Valona.*

***Mediterranean** is the shipping area between the ports of the Mediterranean, the Black Sea and the Sea of Azov, including the ports of Gibraltar and Tangier.*

***Transoceanic shipping** is all maritime transport which does not fall under the above two groups.*

AIR TRANSPORT

***Air kilometres** are the distances in kilometres travelled by aircraft.*

***Charter flights** are contractual flights.*

*The **gross carrying capacity of an aircraft** is the difference between its maximum permitted weight at take-off and its weight when empty (without passengers, cargo and engine fuel).*

ROAD TRANSPORT

***Major roads** are international highways connecting capital cities or major economic regions of countries.*

***Regional roads** are highways connecting economic regions within the country or which are of particular importance to the country.*

***Local roads** are public roads connecting villages and settlements within communities or which are of particular importance to traffic within the community.*

***International E-roads** are highways included in the international road network under international agreements.*

***Motorways** are highways designated exclusively for motor vehicle traffic and marked with a prescribed traffic sign, having two non-adjoining carriageways for traffic in either direction, no crossings with roads, railways or tramways on the same level, and specially constructed junctions for access to the rest of the highway network.*

***Special vehicles** are fire engines, emergency (rescue) vehicles, hearses, etc.*

***Road tractors** are tractive units for transporting containers, etc. In the case of agricultural tractors, only registered vehicles were included until 1985; since 1986 we show noted agricultural tractors, as from that year on they are only noted.*

*The **border crossing for international traffic** is intended for cross-border traffic of citizens of the Republic of Slovenia and citizens of other countries.*

Mejni prehod za meddrűavni promet je kraj, kjer je dovoljeno prestopiti mejo drűavljanom Slovenije in drűavljanom sosednjih drűav.

Mejni prehod za obmejni promet je kraj, kjer je dovoljeno prestopiti mejo drűavljanom z doloËenega obmoËja Slovenije in doloËenega obmoËja sosednje drűave v skladu z mednarodno pogodbo.

Promet Ëez meddrűavne mejne prehode je priötet k mednarodnemu prometu.

Hudo poökodovani so osebe, ki so v prometni nezgodi utrpele zlom, pretres moűganov, notranje poökodbe itd.

POäTNE IN TELEKOMUNIKACIJSKE STORITVE

Redna poöta je tista, na kateri opravljajo vsa poötna opravila.

Pomoűna poöta je tista, na kateri opravljajo poötna opravila v omejenem obsegu. Po posebni pogodbi jih lahko opravlja tudi delavec, ki ni poötni usluűbenec.

Zmogljivost central je zgrajeno ötevilo priklju Ënih toËk za naroËniöke priklju Ëke.

ätevilo telefonskih aparatov v uporabi je ötevilo priklju Ënih telefonskih aparatov, vklju Ëno z dvojËki in s stranskimi aparati.

Impulz (telefonski, telegrafski) je koli Ëinska obra Ëunska enota pri avtomatskih centralah. Pri pogovorih (brzojavkah) v lokalnem in medkrajevnem prometu je impulz odvisen od razdalje med uporabnikoma telefona (telegrafa).

PREKLADANJE

Prekladalna prometna tona je enota za koli Ëine blaga, ki ga je prevzel in odpremil poslovni subjekt. Blago je v tej enoti prikazano samo enkrat, ne glede na njegova premeö Ëanja.

Premanipulirana tona je enota delovnega u Ëinka, ki obsega celotno premikanje blaga (razlaganje, nalaganje, direktno prekladanje in premeö Ëanje).

*The **border crossing for interstate traffic** is intended for cross-border traffic of citizens of the Republic of Slovenia and citizens of the neighbouring country.*

*The **border crossing for local traffic** is intended for cross-border traffic of citizens from a certain area of the Republic of Slovenia and a certain area of the neighbouring country according to international agreement.*

The traffic across interstate border crossings is added to the international traffic.

***Seriously injured** are persons sustaining fractures, concussion, internal injuries, etc. in traffic accidents.*

POST AND TELECOMMUNICATIONS

*A **regular post office** is one where all postal services are performed.*

*An **auxiliary post office** is one where limited postal services are performed. Under special contracts these may be carried out by a worker who is not a postal clerk.*

*The **exchange capacity** is the number of connection points constructed for exchange connections.*

*The **number of telephone sets in use** is the number of connected telephone sets, including doublets and extension sets.*

*A **(telephone, telegraph) impulse** is the quantitative billing unit at automatic exchanges. In local and long-distance calls (telegram messages) the impulse depends on the distance between the two telephone (telegraph) users.*

TRANSSHIPMENT

***Transshipment tonnes** denote the quantity of goods received and forwarded by a business unit. Goods are shown with transshipment tonnes once only, irrespective of multiple transfers.*

***Manipulated tonnes** are the unit of working effect represented by complete moving of goods (unloading, loading, direct transshipment and transfer).*

23. ZUNANJA TRGOVINA

EXTERNAL TRADE

VIRI IN METODE ZBIRANJA PODATKOV

Vir podatkov za statistiko zunanje trgovine so carinske deklaracije. Te so bile za razliËne vrste carinskih postopkov do leta 1996 razliËne. Z zaËetkom leta 1996 je bila uvedena enotna carinska listina (ECL), ki se uporablja v EU in drugih drűavah. StatistiËni urad prejema od Carinske uprave Republike Slovenije kumulativne podatke (izbor podatkov iz ECL) v meseËnih presledkih. Te podatke nam posredujejo na raËunalniökih medijih za vse carinske postopke.

Statistika dopolni podatke s carinskih deklaracij z dodatnimi podatki in klasifikacijami, potrebnimi za statistiËno poroËanje. Pri tem so upoötevana priporoËila StatistiËnega urada OZN tako glede obsega zajetja podatkov kakor drugih metodoloökih elementov, ki doloËajo naËin prikaza zunanjetrgovinskih podatkov tako, da so mednarodno Ëim bolj primerljivi.

ZAJETJE

Statistika zunanje trgovine zajema samo **specialno trgovino**, kar pomeni, da so predmet statistiËnega opazovanja vsi blagovni tokovi, ki poleg drűavne meje prestopijo tudi carinsko mejo drűave.

Izvoz zajema:

- blago, izvoűeno iz Slovenije, ki izvira iz proizvodnje v naöi drűavi oziroma iz notranjega blagovnega prometa;
- izvoz pridobljenih proizvodov po zaËasnem uvozu v oplemenitenje;
- izvoz pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem odloga);
- izvoz pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem povraËila);
- zaËasni izvoz v oplemenitenje.

Uvoz zajema:

- blago, uvoűeno v Slovenijo, ki je bilo sprooËeno v prost promet in deklarirano za domaËo porabo;
- zaËasni uvoz blaga v oplemenitenje;
- uvoz blaga zaradi proizvodnje za izvoz (sistem odloga);
- uvoz blaga zaradi proizvodnje za izvoz (sistem povraËila);
- uvoz blaga po oplemenitenju.

Statistika doloËa zajetje transakcij v zunanjetrgovinsko statistiko glede na vrsto carinskega postopka. Pri zajetju se v doloËeni meri upoöteva tudi vrsta posla (njegove komercialne znaËilnosti). Carinski postopki so bili v letu 1996 v okviru nove carinske zakonodaje usklajeni s carinskimi postopki v EU. Navedeni obseg zajetja izvoznih in uvoznih transakcij je doloËen na osnovi carinskih postopkov, veljavnih v letu 1996.

Izvoz in uvoz na osnovi oplemenitenja in izvoz in uvoz z drűavami na ozemlju nekdanje Jugoslavije sta vkljuËena v zunanjetrgovinske podatke Slovenije od leta 1992 dalje.

V statistiki zunanje trgovine ne upoötevamo transakcij blaga, ki se bo v doloËenem Ëasu vrnilo v nespremenjenem stanju (v letu 1996 so obstajale pri tem doloËene omejitve na izvozni strani zaradi predvidenih carinskih postopkov), storitev, popravil, denarja, monetarnega zlata, oskrbe tujih vozil z gorivom v naöi drűavi in naöih vozil v tujini, osebne prtljage potnikov, komercialnih vzorcev in poötnih poöiljk manjöe vrednosti.

DEFINICIJE IN POJASNILA

StatistiËna vrednost blaga temelji na carinski vrednosti, tj. na transakcijski vrednosti blaga. Fakturna vrednost se preraËuna na pariteto franko slovenska meja, tako da se fakturni vrednosti v celoti ali delno priötevajo ali se od nje odötevajo stroöki prevoza, natovarjanja in zavarovanja glede na prikazano pariteto dobave v pogodbi. StatistiËna vrednost izvoűenega blaga je prikazana po pariteti tipa FOB, statistiËna vrednost uvoűenega blaga pa po pariteti tipa CIF. Tako definirane izvozne in uvozne vrednosti se preraËunajo po tekoËih teËajih, ki veljajo na dan predloűitve carinske deklaracije oziroma na drug datum, ki se uporablja za izvajanje carinskih predpisov. Vrednostni podatki o izvoűenem in uvoűenem blagu se objavljajo v nacionalni valuti (tolarjih) in v ameriökih dolarjih.

Kot drűava trgovinska partnerica **je pri izvozu prikazana namembna drűava, pri uvozu pa drűava porekla**. Kadar ta ni znana, je pri uvozu prikazana drűava, od koder je blago prispelo, pri izvozu pa drűava, kamor je blago naslovljeno, in sicer vedno zadnja öe znana drűava.

SOURCES AND METHODS OF DATA COLLECTION

The source of data for external trade statistics are customs declarations. Until 1996 for different customs procedures different customs declarations were used. In the beginning of 1996 the Single Administrative Document (SAD), used in EU and other countries, was introduced. The Statistical Office receives from the Customs Administration in monthly periodicity cumulative data (selection of data from SAD). Data are on magnetic tapes and refer to all customs procedures.

Statistics completes data from customs declarations with the additional data and classifications, required for statistical reporting. At this process the recommendations of the Statistical Office of the United Nations are taken into consideration, from the aspect of data coverage as well as other methodological elements which determine the manner of presentation of external trade statistics with the aim of achieving maximum international comparability.

COVERAGE

*External trade statistics covers the **special trade** only; which means that all the flows of goods which cross not only the national but also the customs borders represent the object of the statistical observation.*

***Exports** cover:*

- *all goods exported from Slovenia, originating from the production in Slovenia or from free circulation in internal market;*
- *export of compensating products after temporary import for inward processing;*
- *export of compensating products after import for export production (suspension system);*
- *export of compensating products after import for export production (drawback system);*
- *temporary import for outward processing.*

***Imports** cover:*

- *all goods imported into Slovenia and released for free circulation and consumption;*
- *temporary import for inward processing;*
- *import for export production (suspension system);*
- *import for export production (drawback system);*
- *import after outward processing.*

Statistics defines the coverage of external trade statistics by kinds of customs procedures. Commercial characteristics of transaction are also taken into consideration to a certain extent. In 1996 customs procedures were harmonised with the EU customs procedures in the framework of the new customs legislation. The stated coverage of export and import transactions is defined on the basis of the customs procedures, valid in 1996.

Exports and imports on the basis of processing and exports and imports with the countries on the territory of the former Yugoslavia have been included in external trade statistics of Slovenia since 1992.

External trade statistics does not cover: goods which will return after a certain period in unchanged condition (in 1996 certain limitation existed due to anticipated customs procedures), services, repairs, money, monetary gold, fuel supply of foreign cars in Slovenia and Slovenian cars abroad, personal baggage of travellers, commercial samples and postal packages of minor value.

DEFINITIONS AND EXPLANATIONS

***The statistical value of goods** is based on the customs value, i.e. on the transaction value of goods. Invoice value is recalculated on the value at Slovenian border by adding or subtracting on whole or in part costs of transport, loading, unloading and insurance, depending on terms of delivery set down in the contract. The statistical value of exported goods is thus FOB-type valuation and the statistical value of imported goods is CIF-type valuation. Thus defined statistical values of the exported and imported goods are recalculated to the current exchange rates valid on the day of submission of the customs declaration, or, if this date is not used for implementing customs regulations, on the date which is specially stated for this purpose. Value of the exported and imported goods is published in the national currency (Tolars) and in US Dollars.*

*As a trading partner country **in exports a country of destination** is shown, and **in imports a country of origin**. In cases where the country of origin or destination is unknown, for imports we show the country from where the goods arrived, and for exports the country to which the goods were dispatched, always to the most distant known country.*

Namembna drűava je tista, v kateri je blago dano v notranji promet, kjer ga potem uporabljajo ali dalje predelujejo.

Drűava porekla blaga je tista, v kateri je bilo blago proizvedeno. Za blago, ki je bilo predelano ali obdelano drugje, kot je bilo proizvedeno, je kot drűava porekla prikazana drűava, v kateri je bila opravljena predelava.

Podatki o izvozu in uvozu blaga **po podroËjih in panogah Enotne klasifikacije dejavnosti** so razvröËeni po pripadnosti proizvodov v panogo, in ne po dejavnosti podjetja oziroma organizacije, ki je te proizvode izdelala oziroma uporabila.

Blago je klasificirano po **Standardni mednarodni trgovinski klasifikaciji** Zdruűenih narodov (SMTK). Podatke obdelujemo po omenjeni klasifikaciji űe od leta 1953. Od 1. 1. 1988 se uporablja SMTK-Rev3.

Podatki **o ekonomskem namenu izvoza in uvoza** so prikazani **po nacionalni statistiËni klasifikaciji**, ki ni usklajena s klasifikacijo Zdruűenih narodov o konËni porabi proizvodov. Ekonomski namen se doloËa za vsak proizvod carinske nomenklature po naËelu preteűnosti.

Podatki **o stopnji predelave izvoznih in uvoznih proizvodov** so prikazani glede na to, ali so proizvodi pridobljeni neposredno iz narave, ali so samo pripravljeni za nadaljnjo predelavo, ali pa gre za proizvode z visoko stopnjo predelave, predvsem za tiste za investicije in za öiroko porabo.

Dopolnitve in popravke podatkov vkljuËujemo v mesec opazovanja po datumu prejema deklaracije. Letne podatke objavljamo dvakrat: prviË kot predhodne oz. prve podatke v rednem Ëasovnem presledku, drugiË kot konËne (predvidoma v juniju za prejönje leto).

V letu 1996 je priölo zaradi ötevilnih sprememb pri izpolnjevanju deklaracij (uvedba ECL) do sistematiËnih napak pri izpolnjevanju statistiËne vrednosti pri poslih oplemenitenja. Pri ötevilnih transakcijah je bila statistiËna vrednost izpolnjena le po dodani vrednosti, zato je bila vrednost izvoza in uvoza po oplemenitenju podcenjena. Problem smo v soglasju z drugimi institucijami reöili z avtomatiËnimi popravki. Opravljeni so bili po statistiËnih metodah, zato ostajajo podatki, ki se nanaËajo na posle oplemenitenja v letu 1996, statistiËna ocena. Podrobnejöa pojasnila o izpeljavi avtomatiËnih popravkov so na voljo v StatistiËnem uradu Republike Slovenije.

Vrednosti izvoza in uvoza so v Letopisu prikazane v nacionalni valuti in v dolarjih. Podatki so v vsaki tabeli najprej prikazani v tolarjih po tekoËih teËajih. V drugi razliËici iste tabele so vrednosti izraűene v dolarjih. Izjema je Tabela 23-1., kjer so vrednosti prikazane samo v dolarjih, in sicer do leta 1986 po letni teËajni listi, ki se je uporabljala za potrebe plaËilne bilance in statistike, od leta 1987 pa po tekoËih teËajih. Dolgoletna vrsta v nacionalni valuti ni moűna, ker Republika Slovenija od 8. 10. 1991 pri izpolnjevanju vrednosti franko slovenska meja na carinski deklaraciji ne uporablja veË letne teËajne liste. Kombinacija Ëasovne vrste v nacionalni valuti po letnih in po tekoËih teËajih vsebinsko ni sprejemljiva, saj gre za bistveno razliËne podatke; uËinek te metodoloöke spremembe je znatno manjöi, Ëe so podatki izraűeni v dolarjih.

Zaradi zaokroűevanja se seötevki ponekod ne ujemajo.

The country of destination *is the country in which the goods are released into the free circulation for consumption or further processing.*

The country of origin *of goods is the country in which goods were produced. For goods that were processed somewhere else than where they were produced, the country where the processing took place is shown.*

Data on exports and imports ***by the National Classification of Activities*** *are classified according to the activity to which the products belong and not according to the activity of the enterprise or organization which produced or used the products.*

Goods are classified according ***to the Standard International Trade Classification (SITC)*** *of the United Nations. We have been processing data according to this classification since 1953. Since 1 January 1988 SITC-Rev3 has been used.*

Exports and imports ***by end-use*** *are presented according* ***to the national statistical classification*** *which is not harmonised with the Classification by Broad Economic Categories of the United Nations. The end-use of each product in the customs nomenclature is determined according to the principle of predominance.*

The level of processing *of export and import products is shown according to whether the products were obtained directly "from nature" or simply prepared for further processing, or whether the products concerned have a high level of processing, which includes mainly capital goods and consumption goods.*

Completion and data corrections *are included in the month of observation according to the date of submission of the customs declaration. Annual data are published twice: the first time as preliminary data with the regular delay and the second time as final data (presumably in June for the previous year).*

In 1996 systematic errors occurred in filling in statistical values of transactions referring to processing, which was due to many differences between the Single Administrative Document and the old declarations. In many declarations the statistical value was filled in only by value added, therefore the value of exports and imports following the processing was underestimated. The problem was solved in accordance with other institutions with automatic data corrections. The corrections were made with statistical methods, therefore the data for 1996 which refer to processing remain statistical estimates. Detailed information about the procedures of automatic data corrections are available at the Statistical Office of the Republic of Slovenia.

In this Yearbook, the values of exports and imports are shown in the national currency and in US Dollars. *In each table the values are shown first in Tolars at current exchange rates. In the second variant of the same table the values are expressed in Dollars. The only exception is Table 23.1, where the values are only expressed in Dollars; until 1986 according to the annual exchange rate lists that were used for balance of payments and statistical purposes, and thereafter according to current exchange rates. It is not possible to continue this many years series in the national currency, because from 8 October 1991 on, annual exchange rate lists are no longer used for filling in statistical values on customs declarations. In terms of content, a combination of time series in the national currency by annual and current exchange rates is unacceptable because the data are fundamentally different; the effect of this methodological change is considerably smaller if the data are expressed in Dollars.*

In some cases the totals do not agree with data due to rounding up.

INDEKSI POVPREÚNIH CEN ZUNANJE TRGOVINE

EXTERNAL TRADE UNIT VALUE INDICES

VIRI IN METODE ZBIRANJA PODATKOV

Vir podatkov za indekse povpreËnih cen zunanje trgovine so isti podatki, kot se uporabljajo za statistiko zunanje trgovine. V osnovi so to carinske deklaracije na raËunalniökem mediju.

SOURCES AND METHODS OF DATA COLLECTION

The source of data for external trade unit value indices are the same data that are used for external trade statistics, i.e. customs declarations on electronic media.

ZAJETJE

V izraËun indeksa povpreËnih cen zunanje trgovine so vkljuËeni vsi proizvodi, doloËeni z devetmestno öifro carinske tarife rednega izvoza oz. uvoza, razen nekaterih zelo heterogenih skupin proizvodov. Deleű vrednosti teh nezajetih proizvodov je manjöi od 1 % skupne vrednosti izvoza oz. uvoza doloËenega obdobja. Zaradi primerljivosti Ëasovne vrste so iz izraËuna izloËeni tudi podatki o menjavi z drűavami na obmoËju nekdanje Jugoslavije.

V nadaljnjem postopku raËunanja indeksa povpreËnih cen zunanje trgovine pa so izloËeni öe posamezni dokumenti, razvröËeni v isto öifro carinske tarife, pri katerih ni podatka o koliËini ali vrednosti oz. je vrednost neznatna, dokumenti, katerih cena je zunaj intervala povpreËna cena +/ - 2 standardna odklona, ter tiste öifre carinske tarife, katerih indeks je veËji od zgornje oz. manjöi od spodnje meje.

COVERAGE

The calculation of the external trade unit value indices includes all products - determined with a 9-digit code number of the customs tariff of regular exports or imports - except some very heterogeneous groups of products. The share of value of these products is smaller than 1% of the total value of exports or imports in a certain period. In order to produce a comparable time series also the data on commodity exchange with the countries on the territory of the former Yugoslavia are excluded.

In further procedure of calculating the unit value indices some individual documents are eliminated, i.e. those - classified in the same code number of the customs tariff - which are lacking data on quantity or value or the value is very small, those whose prices exceed the interval average price +/- 2 standard deviations, and those code numbers of the customs tariff whose indices are larger than the upper or smaller than the lower limit.

Meje, v katerih naj bi bili izraËunani indeksi öe sprejemljivi, se doloËajo izkustveno. V izraËunih indeksov cen zunanje trgovine, ki jih je SURS opravil za leta od 1991-1995, je bila zgornja meja tehtano povpreËje indeksa 300 z deleűem dolarskih valut in indeksa 400 z deleűem nedolarskih valut v vrednosti izvoza oz. uvoza (približno 380). Spodnja meja je bila tehtano povpreËje indeksa 45 z deleűem nedolarskih valut in indeksa 60 z deleűem dolarskih valut (približno 40). Za leto 1996 je spodnja meja 40 in zgornja meja 400.

KonËna vrednost zajetih proizvodov v izraËunu indeksov povpreËnih cen zunanje trgovine znaöa v posameznih obdobjih nad 85 odstotkov rednega izvoza ter približno 90 odstotkov rednega uvoza.

DEFINICIJE IN POJASNILA

Indeksi povpreËnih cen (vrednosti) **zunanje trgovine so zraËunani iz dolarskih vrednosti po tekoËih teËajih**, ki veljajo na dan carinjenja izvoza oz. uvoza blaga.

V indeksih povpreËnih cen zunanje trgovine v dolarjih so upoötevane tudi **medvalutne spremembe** vrednosti drugih valut v primerjavi z ameriökim dolarjem, tako kot so te spremembe vkljuËene tudi v podatke o sami vrednosti zunanje trgovine v dolarjih.

PovpreËna cena ni cena doloËenega proizvoda, temveË povpreËna vrednost na fiziËno enoto (kilogram) vseh proizvodov, razvröËenih v isto öifro carinske tarife. Kadar v eno öifro carinske tarife ni razvröËen en sam proizvod, temveË veË proizvodov razliËnih vrst ali razliËne kakovosti, lahko relativna sprememba povpreËne cene izraűa spremembo tako cene kot sestave blaga. Ne glede na to pa se indeks povpreËnih cen zunanje trgovine lahko uporablja kot približna ocena razvoja cen v zunanji trgovini oz. kot deflator, posebno za veËje skupine blaga.

Indeksi povpreËnih cen zunanje trgovine so raËunani kot **verižni indeksi** po **Laspeyresovem (uteži so koliËine iz baznega leta)** in **Paaschejevem obrazcu (uteži so koliËine iz tekoËega leta)**, objavljamo pa jih kot **geometriËno povpreËje obeh (Fisherjev indeks)**.

Za leto 1996 so indeksi cen zaradi prehoda stare carinske nomenklature na Kombinirano nomenklaturo **izraËunani iz 6-mestne ravni proizvoda** (obe klasifikaciji sta primerljivi na prvih 6 mestih). Ker gre na tej ravni za zelo öiroke in nehomogene skupine proizvodov, lahko te indekse uporabljamo samo kot grobe ocene gibanja izvoznih in uvoznih cen v letu 1996.

Novejöi podatki na ravni proizvodov (po Standardni mednarodni trgovinski klasifikaciji in po Carinski nomenklaturi) so dostopni na StatistiËnem uradu Republike Slovenije kot raËunalniöki izpisi.

The range limits of the still acceptable indices are set on the basis of experience. In the calculation of indices for the years 1991-1995 the upper limit was the weighted average of the index 300 with the share of Dollar currencies and index 400 with the share of non-Dollar currencies of the total value of imports or exports (ca. 380). The lower limit was the weighted average of the index 45 with the share of non-Dollar currencies and index 60 with the share of Dollar currencies (ca. 40). For 1996 the lower limit is 40 and the upper limit is 400.

The final value of products covered in the calculation of the unit value indices, in individual periods, amounts to over 85 percent of regular exports and about 90 percent of regular imports.

DEFINITIONS AND EXPLANATIONS

***External trade unit value indices are calculated from Dollar values at current exchange rates**, valid on the day of customs clearance of export or import of goods.*

*External trade unit value indices in Dollars comprise also the **intercurrency changes** of values of other currencies in comparison with the US Dollar, since these changes are comprised already in the value of external trade in Dollars.*

*The **unit value** is not the price of a determined product, but the average value per physical unit (kg) of all products classified under the same code number of the customs tariff. In cases when not only one product but more products of various kinds or various quality are classified into one code number of the customs tariff, the relative change of the average price can reflect the change of price as well as the change of composition of goods. Irrespective of this, the external trade unit value index can be used as an approximate estimate of price development of the value of external trade or as a deflator, especially for larger groups of goods.*

*The unit value indices are calculated as **chain indices** by the **Laspeyres (the weights are quantities from the base period)** and **Paasche formulas (the weights are quantities from the current period).** They are published as the **geometrical average of both, i.e. the Fisher index.***

***For 1996 the indices are calculated from the 6-digit level of the customs tariff nomenclature** because of the transition from the old customs tariff nomenclature to the Combined nomenclature (both nomenclatures are comparable on the first six digits). Since on this level the groups of products are very wide and heterogeneous, these indices can only be used as a rough estimate of the movement of exports and imports prices in 1996.*

1) Izvoz in uvoz z drůavami na obmoËju nekdanje Sovjetske zveze sta do leta 1992 prikazana skupaj v okviru evropskih drůav, od leta 1993 imamo loËene podatke za posamezne drůave na obmoËju nekdanje Sovjetske zveze v okviru evropskih in azijskih drůav.
Until 1992 exports and imports with countries on the territory of the former Soviet Union are shown together in the framework of European countries, from 1993 we have separate data for countries on the territory of the former Soviet Union in the framework of European and Asian countries.

2) Od leta 1993 so podatki loËeni za vse drůave na obmoËju nekdanje Jugoslavije. Za leto 1992 sta bila izvoz in uvoz z drůavami na obmoËju nekdanje Jugoslavije prikazana skupaj, razen s Hrvaöko.
For 1993 data are shown separately for all countries on the territory of the former Yugoslavia. For 1992 exports and imports with countries on the territory of the former Yugoslavia were shown jointly, except for Croatia, for which we had separate figures.

3) Od leta 1993 so podatki za » eöko republiko in Slovaöko prikazani loËeno, do leta 1992 so skupni podatki za » eökoslovaöko.
Since 1993 we have separate figures for the Czech Republic and the Slovak Republic, until 1992 data refer to Czechoslovakia.

1) Izvoz in uvoz z drûavami na obmoËju nekdanje Sovjetske zveze sta do leta 1992 prikazana skupaj v okviru evropskih drûav, od leta 1993 imamo loËene podatke za posamezne drûave na obmoËju nekdanje Sovjetske zveze v okviru evropskih in azijskih drûav.
Until 1992 exports and imports with countries on the territory of the former Soviet Union are shown together in the framework of European countries, from 1993 we have separate data for countries on the territory of the former Soviet Union in the framework of European and Asian countries.

2) Od leta 1993 so podatki loËeni za vse drûave na obmoËju nekdanje Jugoslavije. Za leto 1992 sta bila izvoz in uvoz z drûavami na obmoËju nekdanje Jugoslavije prikazana skupaj, razen s Hrvaöko.
For 1993 data are shown separately for all countries on the territory of the former Yugoslavia. For 1992 exports and imports with countries on the territory of the former Yugoslavia were shown jointly, except for Croatia, for which we had separate figures.

3) Od leta 1993 so podatki za »eöko republiko in Slovaöko prikazani loËeno, do leta 1992 so skupni podatki za »eökoslovaöko.
Since 1993 we have separate figures for the Czech Republic and the Slovak Republic, until 1992 data refer to Czechoslovakia.

24. TRGOVINA

DISTRIBUTIVE TRADE

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o podjetjih in drugih organizacijah, ki opravljajo trgovinsko dejavnost, ter o prodajalnah in prometu v dejavnosti trgovine na drobno in trgovine na debelo zberemo z rednimi statistiËnimi poroËili trgovine: Ëetrtletno (vrednost prometa, ötevilo zaposlenih in ötevilo prodajaln) in praviloma triletno (prodajna zmogljivost v trgovini na drobno). Letno raziskovanje (struktura prometa po predmetih) je bilo z letom 1995 odpravljeno, saj zaradi spremenjenih razmer poslovanja (tudi raËunovodskih standardov) ne moremo veË zagotoviti sprejemljivih rezultatov po ustaljeni, za poroËevalske enote izredno obremenjujoËi metodologiji. Izpad teh podatkov smo delno nadomestili s podatki o vrednostnem prometu po 24 blagovnih skupinah. Zbiramo jih Ëetrtletno, in sicer le za trgovino na drobno.

Zaradi nestabilnih razmer v trgovski dejavnosti nismo izvedli popisa prodajnih zmogljivosti v trgovini na drobno, predvidenega v letu 1995.

Podatki po trgovinski dejavnosti so grupirani glede na to, v katero dejavnost je razvröËen opazovani poslovni subjekt.

Do leta 1976 je upoötevana Nomenklatura za razvröËanje gospodarskih in drugih organizacij (Ur. l. SFRJ, öt. 10/62), od leta 1977 pa Enotna klasifikacija dejavnosti (Ur. l. SFRJ, öt.6/76). Podatki za leto 1996 so prikazani po Standardni klasifikaciji dejavnosti, kar zaradi nepopolne primerljivosti povzroËa trganje statistiËne vrste in s tem manjöo primerljivost vsebine podatkov.

SOURCES AND METHODS OF DATA COLLECTION

Data on enterprises and other organizations performing trading activities, sales outlets, retail trade and wholesale trade turnover are compiled from the regular statistical reports of shops, which are quarterly (turnover, persons in paid employment, sales outlets), and triennial (retail trade sales area and retail trade in-store storage space). Because the annual survey on the structure of turnover by goods and relevant groups of goods was abandoned in 1995, due to the changed conditions of trading (including new accounting standards) and very demanding reports for the responding units, we could not provide proper results with the existing methodology. We have partly substituted the lack of these data with the retail trade turnover for 24 groups of goods, collected quarterly.

Because of unstable conditions in retail trade in 1995 we did not take the planned census of retail trade capacities.

The data by trade activities are grouped with regard to the activity of the observed business subject.

Until 1976 we used the Nomenclature for the Classification of Commercial and Other Organizations (Official Gazette of SFRY No. 10/62) and since 1977 we used the National Classification of Activities (Official Gazette of SFRY, No. 6/76). For 1996 the data are represented by the Standard Classification of Activities, which causes the breake of the data series, because it can not be entirely compared with the previous figures.

ZAJETJE

PoroËila o trgovini poËiljajo opazovana trgovska ter druga podjetja in organizacije, ki sama ali pa v svojih poslovnih enotah opravljajo dejavnost trgovine na drobno ali na debelo in imajo veË kot dve zaposleni osebi.

COVERAGE

Trade reports are sent by trading and other enterprises and organizations which, themselves or through their branches, perform retail or wholesale trade and have more than two persons in paid employement.

DEFINICIJE

Za **promet trgovine na drobno** ötejemo prodajo blaga v prodajalnah (upoötevane so tudi lekarne, komisijske trgovine in zasebne prodajalne) in prodajo na drobno neposredno iz skladiöË. Promet na ûivilskih trgih ni upoötevan (ne pri podatkih o zasebnih proizvajalcih ne pri potroönikih).

Prodajalna je poslovni prostor (lokal ali poseben objekt) trgovskega podjetja ali druge organizacije ali samostojne trgovine, kjer poteka promet blaga na drobno in kjer se sprejema, razloûi, hrani in prodaja blago neposrednim potroönikom. Prodajalna ima praviloma prodajni prostor, priroËno skladiöËe in pomoûne prostore. Po tipih loËimo naslednje vrste prodajaln: klasiËna prodajalna, samopostreûna prodajalna, blagovna hiöa, kiosk, bencinski servis in lekarna.

Pri podatkih o **prodajnem prostoru** in o priroËnih skladiöËih niso upoötevane lekarne in komisijske trgovine. Pri raËunanju povpreËij so upoötevane le zaposlene osebe v prodajalnah in promet, opravljen v njih. Promet, opravljen zunaj prodajaln, ni upoötevan. Vsi ti podatki se s posebnimi poroËili zbirajo vsako tretje leto.

Za **promet trgovine na debelo** ötejemo prodajo blaga na debelo, ki so jo opravila trgovska podjetja, druge organizacije in prodajna skladiöËa proizvodnih organizacij ter konsignacijska skladiöËa. Skupni promet trgovine na debelo zajema prodajo trgovskemu omreûju in prodajo drugim odjemalcem. K slednjim ötejemo gostinska in proizvodna podjetja ter druge organizacije in ustanove. Pri skupnem prometu ne ötejemo izvoza blaga. Ta promet je prikazan posebej, podrobno ga spremlja statistika zunanje trgovine po metodologiji, ki je drugaËna kot za notranjo trgovino.

Promet blaga po vrednosti je v trgovini na drobno in trgovini na debelo prikazan z dveh vidikov: po trgovinski dejavnosti podjetij in drugih organizacij ter po skupinah in podskupinah blaga.

Za **zaposlene osebe** v notranji trgovini ötejemo tiste osebe, ki opravljajo izkljuËno ali preteûno dela in naloge trgovine na drobno oziroma trgovine na debelo. Osebe, ki opravljajo dela in naloge netrgovinskih dejavnosti v opazovani enoti, se ne ötejejo med zaposlene osebe v notranji trgovini. Izvzete so tudi zaposlene osebe za doloËen Ëas in po pogodbi o delu, Ëeprav so ta delovna mesta znaËilno trgovinska. Pri zaposlenih osebah v trgovini na drobno niso zajete zaposlene osebe v lekarnah.

DEFINITIONS

***Retail trade** is sale of goods in sales outlets (including pharmacies, commission shops and private shops) and retail sales directly from a warehouse. Trade at food markets (between private producers and consumers) is not included.*

***Sales outlets** are business premises (shops or special facilities) of a trading enterprise or other organization or private shops where retail trade is conducted and where goods are received, stored, unloaded and sold directly to consumers. As a rule, a sales outlet will have sales premises, a convenient storage area and additional premises. The following types of sales outlets are distinguished: traditional shop, department store, self-service shop, kiosk, petrol station and pharmacy.*

*The data on **sales premises** and on convenient storage areas do not include pharmacies and commission shops. In calculating average figures we take into consideration only people in employment and trade performed in the sales outlet. Trade performed outside sales outlets is not included. All these data are collected every three years with special reports.*

***Wholesale trade** is wholesale performed by trading enterprises and other organizations, from sales warehouses of production organizations and from consignment warehouses. Total wholesale trade includes sales to trading networks and sales to other customers. Other customers are hotels and restaurants and production enterprises as well as other organisations and institutions. Goods exports are not included in total trade. External trade is shown separately and is monitored in detail according to a different methodology than that used for distributive trade.*

***Goods trade by value** is shown from two aspects for retail and wholesale trade: by activities of enterprises and other organizations and by groups and subgroups of goods.*

***Persons in paid employment** in domestic trade are those employed individuals who perform exclusively or predominantly work related to retail or wholesale trade. Persons in employment performing work of a non-trade nature in the reporting units were not included as persons employed in distributive trade. Also not included were temporarily employed persons and individuals employed on the basis of a work contract, irrespective of whether or not their jobs involved them in trade. Employees in pharmacies are not included among employed workers in retail trade.*

25. ODKUP

PURCHASE

METODE ZBIRANJA PODATKOV

Podatki o odkupu kmetijskih pridelkov in proizvodov so vzeti iz meseËnih poroËil. Izpolnjujejo jih vsa podjetja, zadruge in druge organizacije, ki prodajajo pridelke in proizvode iz lastne pridelave ali jih odkupujejo neposredno od zasebnega sektorja. Upoötevani so le tisti kmetijski pridelki in proizvodi, ki so bili pridelani na obmoËju Republike Slovenije. Do leta 1959 je statistika spremljala odkup in prodajo skupaj, od leta 1959 dalje pa loËeno. Od leta 1964 spremlja loËeno tudi odkup lesa iz zasebnih gozdov. Po letu 1985 ne spremljamo veË odkupa oziroma prodaje po vrsti organizacij.

ZAJETJE

O **odkupu kmetijskih pridelkov in proizvodov** poroËajo vsa podjetja, zadruge in druge organizacije, ki jih odkupujejo od zasebnega sektorja. Niso pa tu zajete odkupljene koliËine kmetijskih pridelkov in proizvodov, ki jih kupujejo gostinska podjetja in druge organizacije neposredno pri zasebnih pridelovalcih, in tiste, ki jih ti pridelovalci sami pripeljejo na ûivilske trge.

O **prodaji kmetijskih pridelkov in proizvodov** poroËajo vse organizacije, ki jih prodajajo iz lastne pridelave (vsa kmetijska podjetja in druge organizacije, öole, zavodi itd.).

O **odkupu lesa iz zasebnih gozdov** poroËajo zadruge in gozdno-gospodarske organizacije.

O **dovozu kmetijskih pridelkov in proizvodov zasebnih pridelovalcev** na ûivilske trge poroËajo podjetja in organizacije, ki o prodaji vodijo ustrezno evidenco. Po tej evidenci so v letu 1996 zajeti trgi v Celju, Kopru, Kranju, Ljubljani, Mariboru, Murski Soboti, Novi Gorici, Novem mestu, Piranu, TrûiËu in Velenju.

DEFINICIJE

Odkup od zasebnega sektorja je odkup kmetijskih pridelkov in proizvodov neposredno od zasebnih pridelovalcev prek organizacij, ki so pooblaöËene, da pridelke odkupijo in potem predelajo ali prodajo naprej. Za odkup ötejemo tudi vse koliËine pridelkov in proizvodov, ki jih dobijo organizacije od svojih kooperantov ali iz zdruûene pridelave.

Prodaja zajema podatke o prodaji kmetijskih pridelkov in proizvodov iz lastne pridelave. K prodaji pa ne ötejemo pridelkov, Ëe so dani kot surovine lastnim enotam za predelavo mleka ali grozdja, ûganjarnam, suöilnicam sadja, pitaliËem ûivine in perutnine.

V tem primeru ötejemo k prodaji izdelke teh enot, npr.: mleËne izdelke, alkoholne pijaËe, suho sadje, pitano govedo itd.

V skladu z metodoloökimi navodili ni od leta 1981 veË vkljuËena v prodajo vrednost prodanega lesa.

V vrednosti odkupa od zasebnih pridelovalcev kakor tudi v prodaji je vötet davek, ki ga plaËa pridelovalec. Niso pa v vrednost odkupa oziroma prodaje vöteti premije, regresi, kompenzacije ipd., ki jih ti dobijo za doloËene pridelke.

STATISTI» NE PUBLIKACIJE

METHODS OF DATA COLLECTION

Data on the purchase of agricultural products are taken from the monthly reports. These are filled in by all enterprises, cooperatives and other organizations that sell products from their own production or purchase products directly from the private sector. Only agricultural products produced in the Republic of Slovenia are included. Until 1959 the Statistical Office monitored the purchase and sale of agricultural production together, and since 1959 separately. Since 1964, statistics on the purchase of wood from private forests have also been monitored separately. From 1985 on we do not monitor the purchase or sale by type of organization.

COVERAGE

*Reports **on the purchase of agricultural products** are submitted by all enterprises, cooperatives and other organizations that purchase agricultural products from the private sector. These reports do not include the quantities of agricultural products bought directly by catering enterprises and other organizations directly from private producers, nor do they include the products taken to food markets by private producers themselves.*

*Reports on **the sale of agricultural products** are submitted by all organizations that sell agricultural products from their own production (all agricultural enterprises and other organizations, schools, institutes, etc).*

*Reports **on the purchase of wood from private forests** are submitted by cooperatives and forest management organizations.*

*Reports on **the supply of the products of private producers to food markets** are submitted by enterprises and organizations which keep the relevant records of sales. In 1996 these records covered the markets in Celje, Koper, Kranj, Ljubljana, Maribor, Murska Sobota, Nova Gorica, Novo mesto, Piran, TrûiË and Velenje.*

DEFINITIONS

***Purchase from the private sector** is the purchase of agricultural products directly from private producers, through authorised organizations, for processing or further sale. All quantities of products obtained by organizations from their cooperators or from joint production are also considered as purchases.*

***Sale** covers data on the sale of agricultural products from own production. Not considered as sale is the giving of raw materials to own distilleries, fruit drying operations, plants for the fattening of livestock and poultry, and units for the processing of milk or grapes.*

In this case only the products of these units, e.g. dairy products, alcoholic drinks, dried fruit, fattened cattle, etc., are considered as sale.

In accordance with the Explanations on methodology, since 1981 sales have no longer included the value of sold wood.

The tax paid by the producer is included in the value of purchases from private producers as well as in the sale. Not included in the value of purchase or sale are bonuses, reimbursements, compensations, etc., which producers obtain for certain products.

26. GOSTINSTVO IN TURIZEM

HOTELS AND RESTAURANTS, TOURISM

VIRI IN METODE ZBIRANJA PODATKOV

Osnovne podatke o poslovanju v gostinstvu zberemo od podjetij, druűb in drugih organizacij (pravnih oseb) Ëetrtletno, od podjetnikov posameznikov (fiziËnih oseb) v gostinstvu pa letno; v te podatke ni vkljuËeno oddajanje sob.

Podjetja, druűbe in druge organizacije poroËajo vsako leto tudi o porabi surovin za pripravo hrane. Podatki o zaposlenih osebah v tem poglavju so iz dveletnega raziskovanja o podjetjih, druűbah in drugih organizacijah.

O turistiËnem prometu (gostje in prenoËitve) in o ötevilu leűiöË meseËno poroËajo podjetja, druűbe in druge organizacije, ki nudijo gostom nastanitve ali jim to storitev samo posredujejo, kakor tudi obËani, ki oddajajo zasebne turistiËne sobe. Najpogosteje sestavljajo poroËila po svojih evidencah recepcijske sluűbe.

ZAJETJE

Vsa raziskovanja so bila do leta 1992 zasnovana na popolnem zajetju, vendar je iz praktiËnih razlogov ostalo nezajeto predvsem doloËeno ötevilo zasebnih gostiöË.

Zaradi teűav pri zajemanju podatkov Ëedalje ötevilËnejöih enot smo za letno raziskovanje o obratovalnicah (GO - 11a) z letom 1993 (podatki za leto 1992) preöli na enostavni naključni izbor poroËevalskih enot.

Pri podatkih za leta od 1992 do 1995 je ta izbor zajel 10 % enot. Tudi za leto 1996 smo izmed registriranih gostinskih obratov podjetnikov posameznikov vnoviË izbrali 10 % enot in jih opredelili kot poroËevalske enote.

To pomeni, da rezultati, prikazani za leta 1992, 1993, 1994, 1995 in 1996, zaradi nepopolnega zajetja ne pomenijo dejanske mreűe obratovalnic niti celotnega obsega gostinskih storitev. Tudi zajem podjetij, druűb in drugih organizacij (pravnih oseb) ni popoln, saj nam zasebna podjetja, druűbe in druge organizacije űal ne poroËajo redno. Ocenjujemo, da je v rezultate zajeta le Ëetrtina manjöih zasebnih podjetij, druűb in drugih organizacij.

Ker so torej podatki o gostinskih podjetjih, druűbah in drugih organizacijah praviloma öe vedno zajeti popolno, podatki o obratih podjetnikov posameznikov pa so rezultat vzorËne populacije, podatkov za leta od 1992 do 1996 ne prikazujemo skupaj, paË pa loËeno.

DEFINICIJE

Gostinski obrat je gostinsko podjetje, druűba ali druga organizacija oziroma vsaka gostinska enota podjetja, druűbe ali druge organizacije, ki v poslovnem, gradbenem in funkcionalnem pogledu sestavlja celoto, kakor tudi gostinski obrat podjetnika posameznika. Po vrsti gostinskih storitev, ki jih nudijo, po tehniËni opremljenosti in po naËinu streűbe se gostinske enote delijo v posamezne vrste obratov (hotele, motele, restavracije ...).

Zasedenost leűiöË zraËunamo po ötevilu leűiöË na viöku sezone (avgusta). Odstotek zasedenosti leűiöË zraËunamo za vsa leűiöËa (stalna in pomoűna) po naslednjem obrazcu:

$$\frac{\text{ötevilo prenoËitev}}{\text{leűiöËa x Ëas}} \times 100$$

Pri sedeűih ötejemo sedeűe v objektu in zunaj njega.

Med **zaposlene osebe v gostinski dejavnosti** ötejemo tiste, ki so sklenile delovno razmerje za nedoloËen ali doloËen Ëas (tudi v upravi); ne ötejemo pa uËencev v gospodarstvu ter zaposlenih oseb, ki delajo polni delovni Ëas drugje, v gostinstvu pa so dopolnilno zaposlene; prav tako ne ötejemo samostojnih gostincev in pomagajoËih druűinskih Ëlanov, ki nimajo statusa zaposlene osebe.

Vrednostni promet izraűamo v tekoËih cenah. Obsega ves promet, ki ga je dosegla poroËevalska enota s prodajo hrane in pijaË ter z blagovnimi in neblagovnimi storitvami. Skupni iztrűek torej obsega iztrűek za hrano in napitke, alkoholne pijaËe, brezalkoholne pijaËe, druge blagovne storitve ter prenoËitve in druge neblagovne storitve.

Turist je oseba, ki v kraju zunaj svojega stalnega prebivaliöËa prenoËi vsaj eno noË v gostinskem ali kakem drugem nastanitvenem objektu zaradi poËitka ali rekreacije, zdravja, ötudija, öporta, religije, druűine, dela, javne misije ali shoda.

SOURCES AND METHODS OF DATA COLLECTION

Basic data on business results and conditions in hotels and restaurants are collected for enterprises, companies and other organizations with a quarterly report, and for independent operators (natural persons) with an annual report, excluding private accommodations.

Every year, enterprises, companies and other organizations also report on the ingredients used in the preparation of food. Data on persons in paid employment in this chapter are taken from the biannual survey of enterprises, companies and other organizations.

Enterprises, companies and other organizations offering accommodation to tourists or providing such service as an agency, as well as individuals who let private rooms, report monthly on tourist turnover (number of guests and overnight stays) and on the number of beds offered. The reports are usually compiled from the reception records.

COVERAGE

Until 1992 the coverage in all surveys was complete, although for practical reasons a certain number of private hotels and restaurants (independent operators) were omitted.

Due to difficulties data collection, the coverage of Annual Survey of Private Units (GO-11a) in 1993 (data for 1992) was based on a simple random selection of reporting units.

In the data for 1992 to 1995 that selection covered only 10% of the units. In the data for 1996 we selected 10% of the registered hotels and restaurants as reporting units.

This means that the results presented for 1992, 1993, 1994, 1995 and 1996 do not show the existing network of private hotels and restaurants, due to the difference in coverage, neither do they show the overall extent of hotels and restaurants. The coverage of enterprises, companies and other organizations (legal persons) is also not complete since private enterprises, companies and other organizations do not always report. We estimate that the results cover only a quarter of small private enterprises.

Since the data on enterprises, companies and other organizations are, as a rule, still fully covered, while the data on private units are results of the sample, for 1992 to 1996 the data for private units are shown separately from the data for enterprises and other organizations.

DEFINITIONS

***Hotels and restaurants** are enterprises, companies and other organisations providing services of hotels and restaurants or units of enterprises, companies and other organisations providing services of hotels and restaurants and forming a whole in the business, construction and functional sense, as well as private hotels and restaurants. According to the type of service offered and technical facilities, hotels and restaurants are divided into individual types of units (hotel, motel, restaurant, etc.).*

***Bed occupancy** is calculated according to the number of beds in the high season (August). The percentage occupancy of beds is calculated for all beds (permanent and temporary) using the formula:*

$$\frac{\textit{No. of overnight stays}}{\textit{beds x time}} \times 100$$

Data on seats include seats inside and outside a building.

*Included among **persons in paid employment** in hotels and restaurants are persons who have signed an employment contract for an unlimited or a fixed period (including persons employed in administration); not included among those persons are apprentices and employed persons who work full time elsewhere and who are additionally employed in the hotel or restaurant. Also excluded are independent hoteliers and restaurant owners and their family members who help out but who do not have the status of employed persons in an enterprise or other organization.*

***The value of turnover** is expressed in current prices and includes all turnover generated by the reporting unit through the sale of food and beverages and through the provision of goods and non-goods services. Total revenues therefore include all revenues from food and beverages, alcoholic drinks, non-alcoholic drinks, other goods services, overnight stays and the provision of non-goods services.*

***Tourists** are people who, in a location outside their place of permanent residence, spend at least one night in a hotel or some other accommodation facility for reasons of rest, recreation, health, study, sport, religion, family, work, a public task or a meeting.*

DomaËi turist je oseba s stalnim prebivaliöËem v Sloveniji, ki zaËasno prebiva v kakem drugem kraju v Sloveniji ter tam prenoËi vsaj eno noË v gostinskem ali drugem nastanitvenem objektu. Pred letom 1992 so bili k domaËim turistom öteti tudi turisti iz vseh drugih republik nekdanje Jugoslavije.

Tuji turist je oseba, ki je priöla iz tujine in se zaËasno nastanila v nekem kraju v Sloveniji ter tam vsaj eno noË prenoËila v gostinskem ali kakem drugem nastanitvenem objektu. Tujim turistom doloËamo pripadnost po potnem listu. Od leta 1992 so mednje öteti tudi turisti iz drűav na ozemlju nekdanje Jugoslavije.

TuristiËni kraj. V Sloveniji ni sploönih predpisov o pogojih, ki bi jih kraji morali izpolnjevati, da bi dobili naziv turistiËnega kraja. Zato uporabljamo statistiËne definicije pojma turistiËnega kraja in merila za razvrstitev krajev v doloËene vrste.

Za turistiËni kraj ötejemo tistega, ki izpolnjuje:

1. atraktivne pogoje (naravne lepote, zdravilni vrelci, kulturno-zgodovinski spomeniki, kulturne, zabavne in öportne prireditve itd.);
2. komunikacijske pogoje (moűnost dostopa, prometne zveze itd.);
3. receptivne pogoje (namestitveni objekti s spremljajoËimi trgovskimi, obrtniökimi, PTT- itd. storitvenimi objekti, pa tudi parki, sprehajaliöËa, kopaliöËa ipd.).

Po omenjenih merilih so kraji razvrröËeni v te vrste:

1. Glavno mesto Slovenije - Ljubljana - pritegne obiskovalce predvsem kot administrativno-politiËni center, nato pa s svojimi zgodovinskimi, etniËnimi, gospodarskimi, urbanistiËno-arhitektonskimi in drugimi znaËilnostmi.
2. Zdraviliöki kraji so kraji, pri katerih je znanstveno, medicinsko ali izkustveno ugotovljen zdravilni uËinek termalnih ali mineralnih voda ali drugih geoloöko-mineraloökih sestavin. Sem spadajo klimatska, mineralna in termalna zdraviliöËa, ki imajo praviloma tudi ustrezne objekte za zdravljenje in rehabilitacijo obiskovalcev.
3. Obmorski kraji so kraji vzdolű morske obale.
4. Gorski kraji so praviloma tisti, ki leűijo nad 500 metrov nadmorske viöine ali v teritorialnem obmoËju gore.
5. Drugi turistiËni kraji so tisti, ki so privlaËni zaradi podnebnih razmer, kulturnozgodovinskih spomenikov ipd., kraji ob rekah in jezerih in drugi kraji, ki jih ne moremo uvrstiti v prej navedene.
6. Drugi kraji so vsi, ki jih ne moremo uvrstiti v nobeno od prej navedenih skupin.

Opombe:

Od 1970 so podatki o ötevilu gostinskih objektov in sedeűev navedeni po stanju 31. avgusta, podatki o zaposlenih osebah pa po stanju 30. septembra.

Podatki o ötevilu zaposlenih oseb v tabeli 26.10 niso popolnoma usklajeni z ustreznimi podatki v drugih tabelah, ker so zajeti z drugim raziskovanjem.

Pri uporabi podatkov iz tabel 26.6, 26.7 in 26.8 opozarjamo na spremenjeno kakovost podatkov v Ëasovni vrsti.

V letih 1990 in 1991 so zasebna podjetja priklju Ëena k zasebni lastnini, od leta 1992 pa so kot zasebna lastnina obravnavani le podatki o obratovalnicah podjetnikov posameznikov (fiziËnih osebah) v gostinstvu.

Domestic tourists *are people with permanent residence in Slovenia who temporarily stay in some other place in Slovenia and in that place spend at least one night in a hotel or some other accommodation facility. Data prior to 1992 included among domestic tourists all tourists from other countries of the former Yugoslavia.*

Foreign tourists *are people who come to Slovenia from abroad and temporarily stay in a certain place in this country where they spend at least one night in a hotel or some other accommodation facility. We record the nationality of foreign tourists according to their passports. Since 1992 foreign tourists have included tourists from other countries of the former Yugoslavia.*

Tourist resorts *- in Slovenia there are no general conditions that a place would have to meet in order to receive the title "tourist resort". Therefore, we use a statistical definition of the term tourist resort and of the criteria for classification of locations into different types.*

Any place meeting the following specifications is considered to be a tourist resort:

1. *is attractive (natural beauty, health spas, cultural and historical monuments, cultural, entertainment and sporting events, etc.);*
2. *has communications (ease of access, transport connections, etc.);*
3. *has reception facilities (accommodation facilities and accompanying facilities providing trade, crafts and postal services as well as parks, promenades and bathing facilities, etc.).*

According to these criteria, places are classified into the following types:

1. *The Slovenian capital - Ljubljana - attracts visitors mainly as an administrative and political centre, and also for its historical, ethnic, economic, town-planning, architectural and other features.*
2. *Health resorts are places where the healing effect of thermal or mineral waters or other geological mineral components is medically or empirically proven. These include climatic, mineral water and thermal water health resorts which, as a rule, offer suitable facilities for healing and rehabilitation of visitors.*
3. *Seaside resorts are places located along the sea coast.*
4. *Mountain resorts are, as a rule, places lying more than 500 metres above sea level or in the territorial area of a mountain.*
5. *Other tourist resorts are places with particularly attractive elements (e.g. climate conditions, cultural or historical monuments, etc.), riverside and lakeside areas and other places that cannot be classified among any of the places mentioned.*
6. *Other places are all those places not falling within any of the above groups.*

Notes:

Since 1970 data on the number of hotels and restaurants and seats are taken as of 31 August, and data on the number of persons employed as of 30 September.

The data on the number of persons employed in Table 26.10 do not fully conform with the relevant data in other tables since they were gathered by a different survey.

For use of the data from Tables 26.6, 26.7 and 26.8 we would point out the difference in quality of the data in the time series.

In 1990 and 1991 private enterprises were included within private ownership. Since 1992, however, only data on private units or individuals working in hotels and restaurants were treated as private ownership.

27. BRUTO DOMA» I PROIZVOD

GROSS DOMESTIC PRODUCT

VIRI IN METODE ZBIRANJA PODATKOV

Glavni viri podatkov so letni zakljuËni raËuni in bilance gospodarskih druûb ter organizacij, letni podatki davËnih sluûb o poslovanju fiziËnih oseb, osnovna statistiËna raziskovanja, davËne evidence in finanËna statistika ter drugi viri.

SOURCES AND METHODS OF DATA COLLECTION

The main source of data are annual final accounts and balances of enterprises and organizations, annual data of tax authorities on operation of unincorporated enterprises and selfemployed persons, basic statistical surveys, tax records, financial statistics and other sources.

ZAJETJE

V obraËun so zajete vse dejavnosti v skladu s konceptom proizvodnje po Sistemu nacionalnih raËunov iz leta 1993.

COVERAGE

The calculation covers all activities following the concept of production by the 1993 System of National Accounts.

PRIKAZ PODATKOV

Do vkljuËno leta 1992 so podatki na ravni posameznih dejavnosti prikazani po Standardni klasifikaciji dejavnosti na podlagi prevajalnika z Enotne klasifikacije dejavnosti, od leta 1994 pa na podlagi podatkov Poslovnega registra Slovenije poslovnih subjektov in njihovih enot v sestavi. Za obdobje 1980-1995 so v tekoËih cenah prikazani osnovni agregati obraËuna bruto domaËega proizvoda po proizvodni metodi in zaposlenost po podroËjih Standardne klasifikacije dejavnosti. Za obdobje 1990-1995 je prikazan bruto domaËi proizvod po izdatkovni in po proizvodni metodi v tekoËih in v stalnih cenah leta 1992 ter za leto 1996 po proizvodni metodi v tekoËih cenah. Temeljni agregati in kategorije so vsebinsko in pojmovno usklajeni s Sistemom nacionalnih raËunov iz leta 1993. Do leta 1993 je dodana vrednost po dejavnostih prikazana v cenah faktorjev, od leta 1994 pa v osnovnih cenah. RaËun proizvodnje in raËun oblikovanja dohodkov po dejavnostih in za institucionalne sektorje je prikazan za leti 1994 in 1995.

DATA PRESENTATION

Until 1992 inclusive, the data at the level of individual activities are shown by the Standard Classification of Activities (NACE Rev. 1) on the basis of conversion tables from the National Classification of Activities, and since 1994 on the basis of data from the Business Register. For the 1980-1995 period are shown, the basic aggregates of the calculation of gross domestic product by production method at current prices and employment data by activities of the Standard Classification of Activities. For the 1990-1995 period, gross domestic product is shown by the expenditure and production method at current and constant prices 1992 and for 1996 by production approach at current prices. The basic aggregates and categories are, as regards the contents and terminology, harmonized with the 1993 System of National Accounts. Until 1993 value added by activities was shown at factor prices and since 1994 it is stated at basic prices. The production and generation of income account by activities and for institutional sectors is given for the years 1994 and 1995.

PRIMERLJIVOST PODATKOV

Podatki so primerljivi za obdobje 1980-1995. Zaradi metodoloökih dopolnitev ocene dodane vrednosti po dejavnostih je primerljivost dodane vrednosti in zaposlenosti po podroËjih med letoma 1993 in 1994 slaböa. Metodoloöke dopolnitve niso vplivale na raven ocene skupne dodane vrednosti in bruto domaËega proizvoda.

DATA COMPARABILITY

The data are comparable for the 1980-1995 period. Due to methodological completion of the estimation of value added by activities, the comparability of value added by fields of activities between 1993 and 1994 is less favourable. Methodological completion had no effect on the level of the estimation of total value added and gross domestic product.

DEFINICIJE (agregati in kategorije imajo v oklepaju navedeno oötevilËenje iz Sistema nacionalnih raËunov 1993).

DEFINITIONS *(parentheses after aggregates and categories indicate the numeration in the 1993 System of National Accounts)*

Prozvodnja (P.1) je enaka vrednosti dokonËanih proizvodov in opravljenih storitev od zaËetka do konca leta. Z letom 1994 je proizvodnja po panogah dejavnosti vrednotena v osnovnih cenah. V osnovnih cenah so iz vrednosti proizvodnje izloËeni vsi davki na proizvode in storitve (D.21), vkljuËene pa vse subvencije po proizvodih in storitvah (D.31).

Output (P.1) *equals the value of finished products and performed services from the beginning to the end of the year. Since 1994 the output by fields of activities is evaluated at basic prices, from which all taxes on products and services (D.21) are excluded, but all subsidies on products and services are included (D.31).*

Vmesna poraba (P.2) je vrednotena v cenah kupcev kot vrednost proizvodov in storitev, ki jih posamezni proizvajalec nabavi zato, da proizvede druge proizvode in storitve. VkljuËeni so vsi proizvodi z ûivljenjsko dobo, krajöo od enega leta, in proizvodi z vrednostjo do 300 ekujev in z daljöo ûivljenjsko dobo ter storitve tekoËih popravil in vzdrûevanja, ki ne poveËujejo osnovne vrednosti in ûivljenjske dobe osnovnih sredstev.

Intermediate consumption (P.2) *is given at purchaser' s prices, as the value of goods and services which are purchased by an individual producer in order to produce other goods and services. These comprise all products with the life time up to one year and value up to ECU 300, if life time is over one year and services of current repair and maintenance, which do not increase the value and life time of fixed assets.*

Dodana vrednost v osnovnih cenah (B.1g) je enaka proizvodnji v osnovnih cenah, zmanjöani za vmesno porabo v cenah kupcev. Dodana vrednost v osnovnih cenah je tudi enaka vsoti sredstev za zaposlene (D.1), plaËanim drugim davkom na proizvodnjo (D.29), minus prejete druge subvencije na proizvodnjo (D.39), bruto poslovni preseûek (B.2g) in bruto raznovrstni dohodek (B.3g).

Value added at basic prices (B.1g) *equals the output at basic prices, reduced by intermediate consumption at purchaser' s prices. Value added at basic prices also equals the sum of compensation of employees (D.1), other taxes on production (D.29), minus other subsidies on production (D.39), gross operating surplus (B.2g) and gross mixed income (D.3g).*

Med davke na proizvode in storitve (D.21) so vkljuËene vse carine in uvozne dajatve, davki po proizvodih in storitvah, posebne dajatve na naftne derivate, cigarete, alkohol, igre na sreËo in igralne avtomate ter davki na transakcije nepremiËnin.

Taxes on products (D.21) *are all taxes and import duties, taxes for products and services, special duties on petrol, cigarettes, alcohol, gambling and slot machines and taxes on real estate transactions.*

Drugi davki na proizvodnjo (D.29) so davki, ki jih podjetja plaËujejo za uporabo doloËenih osnovnih sredstev, in davki na delovno silo kot dejavnik proizvodnje.

Other taxes on production (D.29) *are taxes which are paid by enterprises for the use of certain fixed assets, and taxes on labour force as production input.*

Subvencije po proizvodih in storitvah (D.31) so nepreklicna plaËila trûnim proizvajalcem s strani drûavnih institucij. Iz kategorije so z letom 1994 izloËene **druge subvencije (D.39),** s katerimi drûava subvencionira zaposlovanje.

Subsidies on products (D.31) *are irrevocable payments to market producers, made by government institutions. Since 1994,* ***other subsidies on production (D.39)*** *with which the government subsidizes employment have been eliminated from this category.*

Bruto domaËi proizvod (B.1*g) je enak dodani vrednosti v osnovnih cenah (B.1g), poveËani za davke na proizvode in storitve (D.21) in zmanjöani za subvencije po proizvodih in storitvah (D.31). Bruto domaËi proizvod je tako enak vsoti dodane vrednosti v osnovnih cenah vseh domaËih (rezidenËnih) proizvodnih enot in neto davkov na proizvode in storitve (davki minus subvencije po proizvodih in storitvah).

Gross domestic product (B.1*g) *equals value added at basic prices (B.1g), increased by taxes on products (D.21), and reduced by subsidies on products (D.31). Gross domestic product thus equals the sum of value added at basic prices of all domestic (resident) production units and net taxes on products (taxes minus subsidies on products).*

Poraba fiksnega kapitala (K.1) je v oceni bruto domaËega proizvoda po podatkih zakljuËnih raËunov in bilanc podjetij in organizacij. V stanovanjski dejavnosti in v dejavnostih samozaposlenih oseb in nekorporativnih podjetij je poraba stalnega kapitala posebej ocenjena.

Consumption of fixed capital (K.1) *is in the estimation of gross domestic product taken from the data in final accounts and balances of enterprises and organizations. In housing activity and in activities of self-employed persons and unincorporated individual enterprises of households, the consumption of fixed capital is estimated separately.*

Sredstva za zaposlene (D.1) so bruto plaËe, bruto nadomestila plaË (boleznine do enega meseca in nadomestila plaË med letnim dopustom, prazniki ipd.) in prejemki zaposlenih (D.11) ter obvezni prispevek delodajalcev za socialno varnost zaposlenih (D.121). Osebne prejemke sestavljajo denarna nadomestila zaposlenim za hrano, prevoz na delo in z dela, regresi za letni dopust, vsa bruto plaËila delodajalcev za pogodbene, zaËasne in enkratne zaposlitve. V obrambnih storitvah so vsi izdatki za prehrano vojakov sestavni del sredstev za zaposlene.

Poslovni preseűek (B.2) je rezidualna kategorija dodane vrednosti v finanËnih in nefinanËnih gospodarskih druűbah ter v stanovanjski dejavnosti v okviru gospodinjstev. Kategorija je lahko prikazana neto (B.2) ali pa bruto (B.2g) skupaj s porabo stalnega kapitala. V netrűnih dejavnostih je bruto poslovni preseűek enak obraËunani porabi stalnega kapitala.

Raznovrstni dohodek (B.3) je rezidualna kategorija v obraËunu dodane vrednosti samozaposlenih oseb in nekorporativnih podjetij. Kategorija je lahko prikazana kot neto (B.3) ali bruto (B.3g) vrednost skupaj s porabo stalnega kapitala.

Zaposlenost zajema vse stalno zaposlene osebe po domaËem konceptu ter samozaposlene osebe v kmetijstvu in v drugih dejavnostih gospodinjstev.

Izdatke konËne potroönje (P.3) sestavljata agregata **individualni izdatki za potroönjo (P.31)** in **kolektivni izdatki drűave za potroönjo (P.32).** Individualno potroönjo sestavljajo izdatki za konËno potroönjo gospodinjstev, izdatki institucij neprofitnih storitev gospodinjstvom (NPISG) in izdatki drűavnih inötitucij. Individualne izdatke in potroönjo drűave sestavljajo izdatki za netrűne storitve drűave (izobraűevanje, zdravstvo in socialno skrbstvo, kultura, öport itd.) in izdatki za trűne proizvode in storitve (zdravila, ortopedski pripomoËki, koncesijske pravice zasebnemu sektorju, storitve zdraviliöË ipd.). Kolektivni izdatki drűave so izdatki za upravne, administrativne, obrambne, ekonomske, razvojno-raziskovalne in druge skupne netrűne storitve drűave. Drűavni izdatki in izdatki NPISG za konËno potroönjo so enaki razliki med vrednostjo proizvodnje po stroökovni metodi in vrednostjo prodaj.

Bruto investicije so sestavljene iz **bruto investicij v osnovna sredstva (P.51)** in **sprememb v zalogah (P.52).** Bruto investicije v osnovna sredstva so sestavljene iz investicij v nova osnovna sredstva, stroökov transakcij rabljenih osnovnih sredstev in iz nabav nematerialnih osnovnih sredstev.

Spremembe v zalogah so obraËunane za nedokonËano proizvodnjo in dokonËane proizvode pri proizvajalcih, zaloge trgovskega blaga v trgovini in zaloge surovin, materiala, rezervnih delov ipd. pri vseh trűnih proizvajalcih. Pri netrűnih proizvajalcih so stroöki proizvodov enaki sprotnim nabavam. V analizi izdatkovne strukture bruto domaËega proizvoda je v agregat sprememb v zalogah vkljuËena statistiËna napaka kot razlika med oceno bruto domaËega proizvoda po proizvodni metodi in po izdatkovni metodi.

Kategoriji **izvoz in uvoz** proizvodov zajemata izvoz in uvoz proizvodov v zvezi z oplemenitenjem po bruto naËelu. Izvozna vrednost proizvodov je obraËunana po pariteti FOB, uvozna vrednost je po podatkih Banke Slovenije iz paritete CIF, zmanjöana na pariteto FOB. Izvoz in uvoz storitev je iz plaËilne bilance po podatkih in metodologiji Banke Slovenije razen vrednosti investicijskih del v tujini, ki je do leta 1994 ocenjena iz podatkov statistike gradbeniötva, ter neposrednih nakupov nerezidentov v Sloveniji in rezidentov v tujini, ki so statistiËne ocene. Nove metodoloöke spremembe in dopolnitve v plaËilni bilanci Banke Slovenije, ki so bile objavljene po letu 1996, v tej publikaciji öe niso upoötevane.

Compensation of employees (D.1) *are gross wages, gross wage compensations (sick benefits up to one month and compensation of wages during annual vacation, holidays, etc.), personal allowances (D.11), and employers' social contributions (D.121). Personal allowances comprise expenses for food, transport to and from work, reimbursement for annual vacation, all gross payments of employers for contract, temporary or part-time employment. In defense services all expenditure on soldiers' food is part of compensation of employees.*

Operating surplus (B.2) *is the residual category of value added in financial and non-financial corporations and in housing activities of households. The category can be shown either as net (B.2) or gross (B.2g), together with consumption of fixed capital. In non-market activities, gross operating surplus equals the consumption of fixed capital.*

Mixed income (B.3) *is the residual category in the calculation of value added of self-employed persons and unincorporated enterprises of households. The category can be shown either as net (B.3) or gross (B.3g), together with consumption of fixed capital.*

Employment *covers all permanently employed persons according to the domestic concept and self-employed persons in agriculture and other household activities.*

Final consumption expenditure (P.3) *is composed of aggregates* ***individual consumption expenditure (P.31)*** *and* ***collective consumption expenditure (P.32).*** *Individual consumption is composed of expenditure of households, non-profit institutions serving households and government. Individual government expenditure comprises payments for non-market government services (education, health, social care, culture, sport, etc.) and market goods and services (pharmaceutical and therapeutical products, concessions to private sector, health resort services, etc.). Collective government expenditure consists of expenditure on administrative, defence, economic, R&D and other non-market government services. Governemnt and NPISHs final consumption expenditures are calculated as the difference between the output value by cost method and sales.*

Gross capital formation *is composed of* ***gross fixed capital formation (P.51)*** *and* ***increase in stocks (P.52).*** *Gross fixed capital formation consists of investments into new fixed assets, costs of transactions of existing fixed assets and of additions to the value of non-produced assets.*

Increase in stocks *is calculated for work-in-progress and finished goods at producers, stocks of trade goods in stores, and stocks of raw material, spare parts, etc. at all market producers. At non-market producers costs of goods equal current purchase. In the analysis of expenditure structure of gross domestic product the aggregate increase in stocks contains a statistical error as a difference between the estimation of gross domestic product by production method and by expenditure method.*

Exports and imports *of goods cover exports and imports of goods in connection with processing by gross principle. The export value of goods is calculated by FOB and the import value of goods has been reduced from CIF to FOB according to the data supplied by the Bank of Slovenia. Exports and imports of services are taken from the balance of payments according to the data and methodology of the Bank of Slovenia, except the value of investment work abroad, which has been until 1994 estimated from the data of construction statistics, and direct purchase of non-residents in Slovenia and residents abroad, which are statistical estimates. Recent methodological changes and completion in the balance of payments, which were published in 1996, were not taken into consideration in this Yearbook.*

28. INVESTICIJE

GROSS FIXED CAPITAL FORMATION (GROSS INVESTMENT)

VIRI IN METODE ZBIRANJA PODATKOV

Viri za prikazane podatke o investicijah so:

- Letno poročilo o investicijah v osnovna sredstva (INV-01) (izvaja Statistični urad Republike Slovenije), s katerim se zajemajo pravne osebe (podjetja in ostale organizacije) s sedežem na območju Slovenije in
- ocene investicij fizičnih oseb (ostali zasebni sektor), ki temeljijo na rezultatih rednih statističnih raziskovanj Statističnega urada.

ZAJETJE

Statistični urad zbira podatke o investicijah že od leta 1966 neposredno pri investitorjih. Do leta 1992 smo zbirali podatke o investicijah samo pri podjetjih in ostalih organizacijah v družbeni, mešani in zadružni lasti (INV-01). Za leto 1992 smo uvedli še dodatno raziskavo Letno poročilo o investicijah v osnovna sredstva za podjetja v zasebni lasti (INV-03). Glede na spremembe v sistemu lastninjenja podjetij smo za leto 1995 obe raziskavi nadomestili z enotnim Letnim poročilom o investicijah Statističnega urada Republike Slovenije. S tem poročilom zbiramo podatke o investicijah pri vseh enotah, ki so pravne osebe in imajo več kot 10 zaposlenih.

Ocene investicij enot zasebnega sektorja, ki niso pravne osebe, temeljijo predvsem na posameznih statističnih raziskavah naslednjih področij: gradbeništva, kmetijstva, trgovine in transporta. Upoštevani so obrtniki, kmetje, samostojni raziskovalci in odvetniki. Med gradbenimi deli je upoštevana tudi stanovanjska gradnja občanov.

V tabeli 28.1 so prikazane ustvarjene investicije pravnih oseb v družbeni in zasebni lasti (vključno od leta 1992 dalje) in v zasebnem sektorju (fizične osebe). V izračunu investicij za leta 1993, 1994 in 1995 v skladu z metodologijo SNA niso upoštevane investicije v rabljena osnovna sredstva, razen uvoženih.

V drugih tabelah prikazujemo podatki o investicijah za podjetja ter druge organizacije, ki so rezultat raziskave INV-01 (zajema le pravne osebe, ki so bile pred lastninskimi spremembami v družbeni, zadružni ali mešani lasti). V podatke za leto 1995 so vključena tudi zasebna podjetja.

Podatki so prikazani po dveh načelih: po organizacijskem načelu, to je po pretežni dejavnosti in sedežu investitorja ter po načelu čistih dejavnosti, to je po dejavnosti in lokaciji obratov oziroma enot, ki so jim investicije namenjene.

V tem Statističnem letopisu objavljamo podatke o investicijah po Enotni klasifikaciji dejavnosti in Standardni klasifikaciji dejavnosti.

Tabele 28.2 do 28.6 prikazujejo:

- izplačila investicij podjetij in drugih organizacij glede na vrsto glavne dejavnosti investitorja (EKD in SKD) in vrsto vira financiranja (tabeli 28.2 in 28.3)
- ustvarjene investicije podjetij in drugih organizacij glede na vrsto glavne dejavnosti investitorja (EKD) in glede na dejavnost, ki jim je investicijski proizvod (oziroma storitev) namenjen (tabela 28.4)
- ustvarjene investicije podjetij in drugih organizacij glede na vrsto glavne dejavnosti investitorja (EKD in SKD) ter glede na tehnično strukturo in namen investicij. (tabeli 28.5 in 28.6)

DEFINICIJE

Proizvodne dejavnosti so po Enotni klasifikaciji dejavnosti naslednja področja: industrija in rudarstvo, kmetijstvo in ribištvo, gozdarstvo, vodno gospodarstvo, gradbeništvo, promet in zveze, trgovina ter gostinstvo in turizem. V naslednjih področjih so proizvodne samo nekatere dejavnosti: s področja obrt in osebne storitve samo panoga obrtne storitve in popravila; v področju stanovanjsko-komunalne dejavnosti samo panoga komunalne dejavnosti, vendar brez skupin vzdrževanje čistoče naselij in druge komunalne dejavnosti; v področju finance in druge poslovne storitve samo panoge storitve na področju prometa, projektiranje in druge dejavnosti, geološko raziskovanje, raziskovalno razvojne storitve in poslovne storitve; v področju izobraževanje in kultura samo skupini časopisno-založniška dejavnost in kinematografija, vendar slednja brez podskupine predvajanje filmov; v področju zdravstveno in socialno varstvo pa samo lekarne ter poklicna rehabilitacija in zaposlovanje invalidov. Po letu 1977 smo vključili v proizvodne dejavnosti še panogo urejanje naselja in prostora.

Neproizvodne dejavnosti so vse druge dejavnosti v Enotni klasifikaciji dejavnosti.

SOURCES AND METHODS OF DATA COLLECTION

Data on gross fixed capital formation are the result of:

- *the Annual Report on Gross Fixed Capital Formation (INV-01) for legal entities (enterprises and other organisations) collected by the Statistical Office on the territory of Slovenia, and*
- *the estimation of gross fixed capital formation in the private sector (physical persons) based on the results of regular statistical surveys carried out by the Statistical Office.*

COVERAGE

The Statistical Office of the Republic of Slovenia has been collecting data on gross fixed capital formation since 1966 directly from investors. Until 1992 we have been collecting data on gross fixed capital formation only for enterprises and other organisations in social, mixed and co-operative ownership (INV-01). In 1992 we introduced another survey, i.e. Annual Report on Gross Fixed Capital Formation for Privately Owned Enterprises (INV-03). But since the process of ownership transformation of enterprises is coming to an end, in 1995 we combined both reports into one unified Annual Report on Gross Fixed Capital Formation of the Statistical Office of the Republic of Slovenia. With this report we collect data on gross fixed capital formation for enterprises with more than 10 persons in paid employment and for other organisations.

Estimation of gross fixed capital formation in the private sector is based mainly on statistical surveys from the following fields: construction, agriculture, trade and transport. Private sector includes craftsmen, farmers, independent researchers and lawyers. Construction works include also own construction of dwellings.

Table 28.1 shows gross fixed capital formation of legal entities in social and private ownership (since 1992) and in the private sector (physical persons). Gross fixed capital formation for 1993, 1994 and 1995 was calculated by the SNA methodology, which does not take into consideration gross fixed capital formation for used fixed assets except imported.

Other tables show data for enterprises and other organisations as the result of the survey INV-01. Data for 1995 include also private enterprises.

Data are shown according to two principles: by the organisation principle, i.e. by main activity and location of the investor, and by the activity principle, i.e. by activity and location of operating units for which investment is in fact intended.

In this Statistical Yearbook we publish data on gross fixed capital formation according to the National Classification of Activities and the Standard Classification of Activities.

Tables 28.2 to 28.6 show:

- *Financing of gross fixed capital formation of enterprises and other organisations according to main activities (National Classification of Activities - NCA and Standard Classification of Activities - SCA) and financial sources of investor (Tables 28.2 and 28.3)*
- *Gross fixed capital formaton of enterprises and other organisations according to main activities of investor (NCA) and according to activity principle (Table 28.4)*
- *Gross fixed capital formaton of enterprises and other organisations according to main activities of investor (NCA and SCA), tehnical structure and purpose of gross investment (Tables 28.5 and 28.6).*

DEFINITIONS

***Production activities** according to the National Classification of Activities are: manufacturing, mining and quarrying, agriculture and fishing, forestry and hunting, water management, construction, transport and communications, trade, and hotels, restaurants and travel agencies. Only some activities of the following fields are production activities: from the field of crafts and personal service activities only the branch crafts and repairs; from the field of community service activities only the branch municipal activities without groups maintaining the cleanliness of settlements and other municipal activities; from the field financial and other business services only the branch services from the field of transport, project management and other activities, geologic research, R&D services and business services; from the field education and culture only the groups publishing and printing, and cinematography, the latter without the subgroup activities of cinemas; and from the field health and social work only pharmacies and occupational rehabilitation and employment of the disabled. After 1977 we included in production activities the branch management of settlements and environment.*

***Non-production activities** are all other activities in the National Classification of Activities.*

Investicije obsegajo nakupe, lastno izgradnjo in finanËni lizing osnovnih sredstev, ne zajemajo pa porabljenih sredstev za investicijsko in redno vzdrűevanje obstojeËih objektov;

IzplaËila za investicije so prikazana za obdobje, v katerem so bila dejansko izplaËana ne glede na Ëas zgraditve ali nabave.

Ustvarjene investicije zajemajo investicije ob njihovi dejanski uresniËitvi ne glede na izplaËilo.

Investicije v nove zmogljivosti so vlaganja v graditev novih samostojnih organizacij, obratov, prometnih poti, ki jih prej ni bilo ali pa so imeli drugaËen namen kot na novo zgrajeni.

Investicije za razöiritev, rekonstrukcijo in posodobitev so vlaganja v obstojeËe zmogljivosti zaradi poveËanega obsega proizvodnje ali storitev ali zaradi spremembe tehnologije in tehnike proizvodnje; zajemajo tudi preureditev űe obstojeËih objektov, opreme in naprav in tudi graditev ali nabavo novih osnovnih sredstev v sklopu űe obstojeËe organizacijsko samostojne delovne enote.

Investicije za vzdrűevanje obstojeËih zmogljivosti na enaki ravni so vlaganja zaradi zamenjave, intenzifikacije in racionalizacije proizvodnje, ne da bi öirili razpoloűljive zmogljivosti ali bistveno spreminjali sedanjo tehnologijo ali tehniko proizvodnje.

Za gradbena dela öetejemo tudi vrednost opreme, ki je vgrajena v gradbene objekte, pri opremi pa so zajeti tudi stroöki montaűe, transporta in zavarovanja.

Oprema z montaűo vsebuje naloűbe v energetske stroje in naprave, delovne stroje in naprave, prometna sredstva, pisarniöko opremo in stroje za obdelavo podatkov, notranjo opremo ter drugo opremo.

Pod **drugo** spadajo vlaganja v ötudije, projekte, programsko opremo, investicijske elaborate, odkupe patentov in licenc, pogozdovanje, osnovno Ëredo, odkup zemljiöË in podobno.

Opomba: V nekaterih tabelah vsota v vrsticah oz. stolpcih zaradi zaokroűevanja na tisoË din oz. SIT in mio SIT ne ustreza skupni vrednosti.

Gross fixed capital formation *shows capital expenditure in fixed assets, own account production of fixed assets and financial leasing of enterprises and other organisations, but does not cover regular maintenance and repairs of existing fixed assets.*

Financing of gross fixed capital formation *is shown for the period in which the expenditures were actually paid, irrespective of the time of construction or purchase.*

Gross fixed capital formation *is covered for the time of its physical realisation, irrespective of payment.*

Gross fixed capital formation in new capacities *comprises expenditures on new buildings and constructions, machinery and equipment of enterprises and other organisations where previously there were no buildings and constructions, or they had a different purpose from those newly constructed.*

Gross fixed capital formation for enlargement, reconstruction and renovations *comprises expenditures in existing capacities in order to increase the range of production or services or to the change technology and the systems of production. These capital expenditures cover reorganisation or enlargement of existing buildings and constructions, equipment and devices, as well as the construction or purchase of new fixed assets with in the already existing organisationally independent operating unit.*

Gross fixed capital formation for the maintenance of existing capacities *on the same level comprises expenditures in order to change, intensify and rationalise production, but without an expansion of the available capacities or vital changes in the existing technology or production systems.*

Construction works *include the value of the built-in equipment of constructions, while as equipment includes the costs of assembly, transport and insurance.*

Equipment with assembly *covers gross fixed capital formation in machinery, transport equipment, office machinery and computers, business furniture and other equipment.*

The ***other*** *section covers gross fixed capital formation in studies, projects, computer software, capital expenditure plans, buying of patents and licences, land improvement, breeding stocks, purchase of land and similar.*

Note: In some tables the total in the rows and columns does not correspond to the total value due to rounding up to thousands of Dinars or SIT.

29. BILANCA JAVNEGA FINANCIRANJA

BALANCE OF PUBLIC FINANCING

VIRI IN METODE ZBIRANJA PODATKOV

Bilanca javnega financiranja Slovenije za obdobje 1992-1996 je statistiËni prikaz razvejanega segmenta dogajanj v gospodarstvu drűave in nudi osnovni vpogled v tokove, v katere so vkljuËene enote sektorja drűava. Bilanca javnega financiranja sistematiËno izkazuje - za vsako obraËunsko obdobje (1 leto) - transakcije, ki pomenijo realizacijo predpisov o financiranju funkcij drűave preko proraËuna Republike Slovenije, proraËunov obËin in dveh skladov obveznega socialnega zavarovanja - Zavoda za pokojninsko in invalidsko zavarovanje (ZPIZ) in Zavoda za zdravstveno zavarovanje Slovenije (ZZZS).

Bilanco javnega financiranja sestavlja Ministrstvo za finance iz posameznih bilanc, tako da je bilanca javnega financiranja konsolidirani zbirni raËun prihodkov in odhodkov vseh ötirih blagajn " rednega" javnega financiranja v Sloveniji, to je drűavnega proraËuna, Zavoda za pokojninsko in invalidsko zavarovanje, Zavoda za zdravstveno zavarovanje Slovenije (del, ki se nanaöa na obvezno zdravstveno zavarovanje) ter proraËunov obËin. Tokovi med posameznimi javnofinanËnimi blagajnami so izloËeni.

Osnovni viri podatkov za konsolidirano bilanco javnega financiranja so podatki o prihodkih drűavnega proraËuna, ki se vplaËujejo prek evidenËnih raËunov Agencije za plaËilni promet, ter podatki iz tekoËe evidence Ministrstva za finance. Ta vsebuje naslednje vrste podatkov: podatke o realizaciji tistih prihodkov drűavnega proraËuna, ki se vplaËujejo neposredno na raËune proraËuna, podatke o vseh odhodkih drűavnega proraËuna ter podatke iz obveznih meseËnih poroËil o javnofinanËnih prihodkih in odhodkih Zavoda za pokojninsko in invalidsko zavarovanje, Zavoda za zdravstveno zavarovanje Slovenije in vseh slovenskih obËin.

Glavne opredelitve poslovanja preko proraËuna RS in preko obËinskih proraËunov, torej financiranja funkcij, ki jih v skladu z ustavo in zakonom opravljajo Republika Slovenija in obËine (javna poraba), daje Zakon o financiranju javne porabe (Ur. l. RS öt. 48/90). Struktura prihodkov in vrste odhodkov, ki jih doloËa omenjeni zakon skupaj z drugimi predpisi, se odraűa v strukturi bilance javnega financiranja. Posamezne bilance, iz katerih se sestavi konsolidirana bilanca, se sestavljajo v skladu z veljavnimi predpisi.

SOURCES AND METHODS OF DATA COLLECTION

Balance of public financing *in Slovenia for the period 1992-1996 is a statistical record of a ramifying complex of economic relations in a country and provides a basic insight into flows between the general government sector units and other units of the economy. It systematically summarizes - for each particular accounting period (1 year) - transactions, which are the result of implementing legislation on financing general government functions through the central government budget, municipal budgets and the other two (regular) public financing " cash boxes" - the Institute for Pension and Disability Insurance (IPDI) and the Health Insurance Institute of Slovenia (HIIS).*

Balance of public revenues and expenditure is being compiled at the Ministry of Finance. It is compiled from four separate balances so that it is a consolidated collective account of revenues and expenditures of all four " cash boxes" of the public financing in Slovenia, namely of the state budget, the Institute for Pension and Disability Insurance, the Health Insurance Institute of Slovenia (obligatory health insurance transactions only) and the municipal budgets. Flows between the individual " cash boxes" are consolidated (eliminated).

There are two main sources for the consolidated balance of public financing: firstly, included are all data on state budget revenues from payments made through the record accounts of the Agency of the Republic of Slovenia for Payments; secondly, data from the current records of the Ministry of Finance are used including the following data: data on state budget revenues realised through direct payments on the budget accounts, data on expenditure of the state budget and data from obligatory monthly reports on revenues and expenditure of the Institute for Pension and Disability Insurance, the Health Insurance Institute of Slovenia and of all municipalities in Slovenia.

The Law on Financing Public Consumption basically defines administration of the central government budget and the municipal budgets. Structure of revenues and expenditures as defined by the mentioned Law and other regulations is partly reflected in the structure of the consolidated balance of public financing. Structures of the four separate balances, from which the consolidated balance of public financing is compiled, are in line with the valid regulations.

ZAJETJE

V bilanci javnega financiranja je zajet preteűni del transakcij med sektorjem drűava in drugimi sektorji gospodarstva drűave (finanËne in nefinanËne druűbe, gospodinjstva, neprofitne ustanove, ki oskrbujejo gospodinjstva).

To zajetje je oűje v primerjavi z zajetjem raËunov za sektor drűava (general government accounts) po metodologiji Sistema nacionalnih raËunov (System of National Accounts - SNA). S temi raËuni se zajema öe nekatera druga ekonomsko relevantna dogajanja v sektorju drűava ali v zvezi z njim, npr. drűavno proizvodnjo blaga in storitev.

V skladu z zakonodajo, ki doloËa poslovanje preko ötirih blagajn (Zakon o financiranju javne porabe ter drugi zakoni in predpisi), so v bilanci javnega financiranja poleg transferjev iz drugih sektorjev gospodarstva drűave zajeti tudi lastni prihodki enot sektorja drűava. Med javnofinanËnimi odhodki pa so poleg plaËil in transferjev drugim sektorjem prikazani tudi odhodki, ki se porabijo v sektorju drűava.

NaËeloma so v bilanco javnega financiranja za posamezna leta vkljuËeni vsi javnofinanËni prihodki in odhodki, ki so bili v obraËunskem letu dejansko realizirani, ne glede na to, kdaj je nastala obveznost plaËila.

TekoËi del bilance javnega financiranja (tabela 29.1) kaűe, kako enote sektorja drűava porabljajo oziroma razporejajo sredstva, ki jih pridobivajo od drugih sektorjev (javnofinanËni prihodki in odhodki). Razlika med javnofinanËnimi prihodki in odhodki je javnofinanËni preseűek ali primanjkljaj.

JavnofinanËni primanjkljaj se izravna s financiranjem iz razliËnih virov; to je razvidno iz **raËuna financiranja tekoËega dela bilance javnega financiranja** (tabela 29.2). Trije glavni viri izravnavanja primanjkljaja tekoËega javnega financiranja so: zadolűevanje pri drugih sektorjih gospodarstva drűave ali v tujini in Ërpanje lastnih rezervnih sredstev (zajeto v postavke raËuna financiranja) ter notranje zadolűevanje med posameznimi blagajnami (ni prikazano v konsolidirani bilanci).

V raËunu financiranja tekoËega dela bilance javnega financiranja je zajet le en del celotnega zadolűevanja enot sektorja drűava v obraËunskem obdobju in sicer zadolűevanje za financiranje proraËunskega salda in plaËila glavnic. Drugi del - zadolűevanja, ki ima podlago v posebnih predpisih (zadolűevanje za posebne namene), se evidentira samo v premoűenjski bilanci Slovenije.

COVERAGE

Balance of public financing includes most of transactions between the general government sector and other sectors of the economy (non-financial and financial corporations, households, non-profit institutions serving households).

Balance of public financing includes only part of the transactions covered by the general government accounts of the System of National Accounts (SNA). SNA accounts also cover some other complexes of economically relevant changes connected with the general government sector, e.g. the general government production of goods and services.

In accordance with the legislation, determining administration of the four " cash boxes" of public financing (Law on Financing Public Consumption and other legislation) the balance of public financing also includes own revenues of central government units. On the other hand, in addition to transfers to other sectors, it includes among public financing expenditures also expenditures for the use in the general government sector itself.

Included in the balance for each year are, in principle, all revenues and expenditures, which were in the accounting period actually realised, irrespective of the time point at which the duty of payment arose.

The current part of the balance of public financing *(table 29.1) shows in what way and for what purposes the general government sector units dispose revenues, which they acquire by law from other sectors of the economy (public financing revenues and expenditures). The difference between public financing revenues and expenditures is a public financing surplus or deficit.*

Public financing deficit is settled by financing from various sources, as it is shown in the ***financing account of the balance of public financing*** *(table 29.2). There are three main sources of financing the current public financing deficit: incurring financial liabilities towards other sectors and towards the rest of the world, use of general government reserve assets (shown in items of the table) and internal financing flows between the particular " cash boxes" (not seen from the consolidated statement).*

In the financing account only one part of overall new debts of the general government units, incurred in the accounting period, is covered, namely incurring new debts for the purposes of financing the budget deficit and repayment of principals. The other part - incurring debts for special purposes on the basis of special legislation - is only recorded in the balance of general government assets.

Poleg lastnih prihodkov so prenosi iz ene blagajne rednega javnega financiranja v drugo za prejemnike prenosov (to so obËine, ZPIZ in ZZZS) dodatni vir financiranja njihove javne porabe. Agregati teh transferjev iz konsolidirane bilance niso jasno razvidni, saj odhodki iz ene v drugo blagajno javnega financiranja niso vkljuËeni med odhodke. Na velikost teh transferjev kaűejo odhodki prejemnikov na podlagi teh transferjev, ki so zajeti v glavnih podpostavkah odhodkov bilance javnega financiranja.

Na obseg udeleűbe **obËin** v konsolidirani bilanci javnega financiranja vplivajo po eni strani predpisi, ki doloËajo, kaj so funkcije obËin, po drugi pa spremembe v sistemu financiranja obËin. Tudi po novi zakonodaji o financiranju obËin, ki je zaËela veljati v letu 1995 za novih 147 obËin, so obËine subjekt opravljanja vrste funkcij in nalog javnega pomena. Te funkcije in naloge se financirajo na podlagi lastnih prihodkov obËin (veËja ali manjöa avtonomija obËin pri pripravi predpisov o teh dajatvah) ali na podlagi transferjev iz drűavnega proraËuna, namenjenih finanËni izravnavi. Dve osnovni skupini teh transferjev sta: prva, za " zagotovoljeno porabo" obËin in druga, za izvajanje drugih nalog v pristojnosti obËin. Obe ti dve vrsti prihodkov sta sestavini javnofinanËnih prihodkov obËinskih proraËunov.

V bilanci javnega financiranja prikazani javnofinanËni prihodki in odhodki ne zajemajo vsega financiranja javne porabe v Sloveniji, ampak le t.i. " redno financiranje" .

Del **financiranja javne porabe, ki ni redno** in ni izkazano v konsolidirani bilanci javnega financiranja, ima posebne institucionalne nosilce, to so npr. nekateri skladi, agencije ipd., ki so po mednarodnih standardih drűavne ustanove. Razlogi, zaradi katerih nekateri novonastali subjekti javnega financiranja v Sloveniji niso vkljuËeni v bilanco javnega financiranja, in se posebej spremljajo, so razliËni. Nekateri zunajproraËunski skladi imajo npr. ne le prihodke iz drűavnega proraËuna, temveË tudi prihodke, ki jih pridobivajo neposredno na podlagi lastninske zakonodaje. Taki prihodki niso trajne narave in se z doloËenimi izjemami (npr. del dohodkov od privatizacije se steka neposredno v drűavni proraËun) izkazujejo loËeno.

In addition to own revenues, transfers from one public financing " cash box" to another, which are part of the process of public financing, are additional sources of revenues for the recipient institutions (these are municipalities, IPDI and HIIS). Aggregates of those transfers are not explicitly visible from the consolidated balance of public financing. Expenditures of the recipients on the basis of such transfer revenues are included in the overall expenditures from the four " cash boxes" , seen in the expenditure side of the consolidated balance of public financing.

*As for the level of the share of **municipalities** in the revenues and expenditures of the consolidated balance of public financing, it is a result of both changes in legislation defining the functions in the competence of municipalities and changes in the system of financing the implementation of those functions. After adoption of the new legislation on financing municipalities (introduced in 1995 for 147 new municipalities), municipalities remain subject of the wide range of functions and tasks of public importance. These functions and tasks are being financed on the basis of the municipalities' own revenues (greater or lesser autonomy of the municipalities in taking decisions on the preparation legislation on those duties) and on the basis on transfers from the central government budget for the purpose of " financial leveling" . Two basic groups of these transfers are transfers for " assured consumption" of the municipalities and transfers for implementing other tasks in municipalities' competence. Both those sorts of revenues are the components of the whole public financing revenues of the municipal budgets.*

Public financing revenues and expenditures covered in the balance of public financing do not include the overall financing of public consumption, but only " regular" .

*A part of **public financing, which is not " regular"** and is not covered by the balance of public financing, is implemented by special institutions - funds, agencies, etc., which are - in accordance to the international standards - general government units. Reasons for which these newly emerging subjects of public financing in Slovenia are treated separately are different. Some extrabudgetary funds, for example, receive revenues not only from central government budget, but also receive direct revenues on the basis of privatization legislation. Such revenues are not " regular" in nature and are, with some exceptions (e.g. some central government budget revenues are based on privatisation legislation) - shown separately.*

DEFINICIJE

TekoËi del bilance javnega financiranja kaűe na eni strani vrste virov prihodkov, oziroma na kakönih podlagah drűava pridobiva sredstva od enot drugih sektorjev ali iz lastnih virov, na drugi strani pa, kako drűava tako zbrana sredstva razporeja po razliËnih vrstah uporabe in uporabnikov, vkljuËno z uporabo znotraj sektorja drűava. Razlika med javnofinanËnimi prihodki in odhodki v obraËunskem obdobju je javnofinanËni preseűek ali primanjkljaj.

JavnofinanËni prihodki so vsi izvirni prihodki, ki se oblikujejo na raËunih vseh ötirih blagajn javnega financiranja. IzloËeni (pobotani oz. konsolidirani) so vsi tisti prihodki posameznih blagajn, ki ne pomenijo njihovih izvirnih prihodkov, temveË prenose sredstev iz drugih blagajn javnega financiranja. JavnofinanËni prihodki so razËlenjeni po posameznih kategorijah prihodkov, v skladu s pravnimi podlagami, ki jih predpisujejo.

Osnovni dve skupini prihodkov so davËni prihodki (davki in prispevki za socialno varnost - splooöne obvezne dajatve) in nedavËni prihodki. Slednje sestavljajo tri skupine: takse; drugi nedavËni prihodki ter lastni prihodki od premoűenja in lastne dejavnosti.

DavËni prihodki zajemajo davke in prispevke za socialno varnost.

Davki zajemajo izvirne prihodke Republike Slovenije in obËin, ki imajo razliËne pravne podlage in so po podobnosti združeni v nekaj skupin.

Prispevki za socialno varnost so razËlenjeni po posameznih vrstah prispevkov, ki se zbirajo v drűavnem proraËunu ter v Zavodu za pokojninsko in invalidsko zavarovanje ter v Zavodu za zdravstveno zavarovanje Slovenije.

Prispevki za obvezno zdravstveno zavarovanje zajemajo tudi prispevke za obvezno zdravstveno zavarovanje upokojencev, ki se oblikujejo kot prihodek Zavoda za pokojninsko in invalidsko zavarovanje, a se tekoËe nakazujejo v Zavod za zdravstveno zavarovanje Slovenije.

NedavËni prihodki so razËlenjeni po najpomembnejöih kategorijah in so seötevek posameznih vrst nedavËnih prihodkov, ki se v doloËenem obdobju oblikujejo v posameznih javnofinanËnih blagajnah. NedavËni prihodki zajemajo tudi prihodke iz lastnih virov enot sektorja drűava.

Kapitalski prihodki so posebna podskupina nedavËnih prihodkov, ki so v zvezi s spremembami v relevantnih nefinanËnih sredstvih.

V tej postavki so prihodki od prodaje stanovanj in prihodki od privatizacije podjetij v tesni zvezi z zakonodajo, ki opredeljuje proces lastninskega

DEFINITIONS

***Current part of the balance of public financing** shows on the one hand what are the sources of public financing revenues (revenues of the general government units from other sector units and from own sources). On the other hand it shows how the general government units use those collected revenues for various kinds of uses and users, including uses inside the general government sector. The difference between the current public financing revenues and expenditures in a given accounting period is a public financing surplus or deficit.*

***General government revenues** are all original revenues which are formed on the accounts of all four " cash boxes" . Excluded (consolidated) are all such revenues of individual " cash boxes" which are not original revenues but are transfers of funds from one of the other three " cash boxes" . Revenues are broken down into particular categories of revenues in accordance with the legislation which defines them.*

Two basic groups of revenues are tax revenues (taxes and social security contributions - general duties) and non-tax duties. Non-tax duties are composed of three subgroups: fees, other non-tax revenues and revenues from general government units' own sources.

***Tax revenues** cover taxes and social security contributions.*

***Taxes** are broken down into categories as sums of particular categories of taxes which are realised either by the state budget or by municipal budgets.*

***Social security contributions** are broken down into particular types of contributions, which are accumulated either in the state budget or in the Institute for Pension and Disability Insurance and the Health Insurance Institute of Slovenia.*

Contributions for obligatory health insurance also include contributions for obligatory health insurance of pensioners, which is original revenue of the Institute for Pension and Disability Insurance, but is currently transferred to the Health Insurance Institute of Slovenia.

***Non-tax revenues** are broken down into main categories and are the sum of particular types of non-tax revenues which are accumulated in the individual " cash boxes" of public financing. Non-tax revenues include revenues from general government units' own sources.*

***Capital revenues** are a special subgroup of non-tax revenues connected with the relevant changes in non-financial assets.*

In this item revenues from selling flats and revenues from privatisation are in close connection with the legislation determining the process of ownership

preoblikovanja in so torej rezultat izjemnih sprememb v nefinančnih sredstvih, medtem ko imajo prihodki od prodaje osnovnih sredstev naravo stalnejšega proračunskega vira (lastni vir sredstev).

Javnofinančni odhodki so razčlenjeni na štiri osnovne sestavine javnega financiranja: pokojninsko-invalidsko zavarovanje, obvezno zdravstveno zavarovanje, proračunska poraba na ravni države ter proračunska poraba občin.

Proračunska poraba države je razčlenjena po posameznih ekonomskih namenih (izdatki za plače in materialne stroške države in druga sredstva za zagotavljanje storitev državnih organizacij, socialni transferji, plačila storitev javnim zavodom, plačila obresti in državnih garancij in subvencij ter drugi transferji podjetjem, drugi tekoči odhodki, izdatki za investicije ter povečanje proračunskih rezerv).

Izločeni so odhodki, ki se iz državnega proračuna namenjajo za pokrivanje obveznosti do Zavoda za pokojninsko in invalidsko zavarovanje, sredstva za zdravstvo in sredstva za finančno izravnavo občinam.

Proračunska poraba občin je razčlenjena po posameznih namenih porabe v občinah, izločena pa so sredstva, ki se iz proračunov občin namenjajo za zdravstvo.

Odhodki za pokojninsko in invalidsko zavarovanje zajemajo vse javnofinančne odhodke za pokojninsko in invalidsko zavarovanje (tudi tiste iz državnega proračuna).

Odhodki za obvezno zdravstveno zavarovanje zajemajo vse odhodke, namenjene za obvezno zdravstvo, skupaj s sredstvi, ki se za zdravstvo namenjajo iz državnega in iz občinskih proračunov.

Javnofinančni presežek (suficit) oziroma primanjkljaj (deficit) v posameznem obdobju je razlika med celotnimi konsolidiranimi javnofinančnimi prihodki in celotnimi javnofinančnimi odhodki v tem obdobju.

V **računu financiranja bilance javnega financiranja** je razlika med agregatoma "zadolževanje državnega sektorja" in "odplačila dolga" načeloma enaka vsoti vrednosti postavke "povečanje ali zmanjšanje sredstev na računih" in vrednosti javnofinančnega presežka oziroma primanjkljaja. V praksi se zaradi napak in izpustitev pojavlja razlika, ki je prikazana v postavki "računska razlika pri konsolidaciji". Transakcije, ki jih zajema račun financiranja, vplivajo na razliko v stanju premoženjske bilance države na začetku in na koncu obračunskega obdobja.

Zadolževanje državnega sektorja zajema vrednost v obračunskem obdobju na novo prevzetih finančnih obveznosti države do drugih domačih sektorjev in do tujine.

Odplačila dolga zajemajo celotno vrednost v obračunskem obdobju odplačanih dolgov do drugih domačih sektorjev in do tujine.

Neto zadolževanje državnega sektorja je enako zadolževanju državnega sektorja, zmanjšanemu za odplačila dolga in za povečanje oziroma zmanjšanje sredstev na računih enot javnega financiranja.

Statistična razlika pri konsolidaciji je rezultat napak in izpustitev, do katerih pride pri sestavljanju konsolidirane bilance javnega financiranja.

transformation and are therefore the result of exceptional changes in non-financial assets. A more constant budget source are revenues from selling fixed assets (own source of revenues).

***General government expenditure** is broken down into the following four basic components of public financing: old age pension and disability insurance expenditure; obligatory health insurance expenditure; expenditure of the state budget; and expenditure of municipal budgets.*

***Central government expenditure** is broken down into categories of expenditure distinguished on the basis of particular economic purposes (expenditure for wages, contributions and funds for other purchases of goods and services provided by government institutions, social transfers, transfers for social services performed by public institutions, payments for interest and government guarantees and subsidies and other transfers to business sector, other current expenditure, expenditure for investment purposes and for the increase of budget reserves).*

Excluded from this aggregate are use of funds formed in the state budget for the purpose of fulfilling the state' s financial obligations towards the Institute for Pension and Disability Insurance, funds which are formed in the state budget for the obligatory health insurance purposes and funds transferred from the state budget for the purpose of financial leveling of municipal budgets.

***Local government expenditure** is broken down into particular components according to the purpose of expenditure. Excluded from this aggregate are the funds transferred from municipal budgets for public health insurance.*

***Expenditure of Pension and Disability insurance** covers all expenditure of public financing for the purposes of obligatory pension and disability insurance (including funds transferred from the state budget).*

***Expenditure of Obligatory Health Insurance** covers all expenditure for the obligatory health insurance purposes, including funds transferred from the state budget and municipal budgets.*

***General government Surplus or deficit** for a given period is a difference between consolidated revenues of public financing and consolidated expenditure of public financing for the same period.*

*In **financial part of the balance of public financing** the difference between the aggregates "borrowing" and "amortization of debt" is in principle equal to the sum of the values of item "changes in cash and deposits" and the current public financing surplus or deficit. However, due to errors and omissions made in the real accounting practice, a difference appears, which is shown in the item "statistical differences in consolidation". Transactions included in the financing account influence the difference between opening and closing general government sector balance sheet.*

***Borrowing** is the total value of newly incurred debts towards other sectors of the economy and towards the rest of the world, which take place in the accounting period.*

***Amortization of debt** is the total value of repayments of previously incurred debts to other sectors of the economy and to the rest of the world.*

***Net borrowing** is equal to borrowing minus amortization of debt minus changes in cash and deposits.*

***Statistical differences in consolidation** are the result of errors and omissions made in the process of compiling the balance of public financing.*

31. PLA» ILNA BILANCA

BALANCE OF PAYMENTS

VIRI IN METODE ZBIRANJA PODATKOV

Sploöno o plaËilni bilanci

PlaËilno bilanco Slovenije sestavlja Banka Slovenije na podlagi metodologije Mednarodnega denarnega sklada (MDS) - PriroËnika za izdelavo plaËilne bilance (Balance of Payments Manual, Ëetrta razliËica te metodologije je izöla leta 1977, peta pa leta 1993) in v okviru razpoloûljivih podatkov.

PlaËilna bilanca je statistiËni zapis, ki za doloËeno Ëasovno obdobje sistematiËno zajema ekonomske transakcije med subjekti gospodarstva drûave in tujino, praviloma med rezidenti drûave in nerezidenti. V plaËilno bilanco se zajemajo naslednje vrste transakcij: izvoz in uvoz blaga, izvoz in uvoz storitev, prejemki in izdatki iz naslova dohodkov, finanËne terjatve in obveznosti do tujine ter enostranske transakcije - transferji. Te transakcije se zajemajo v dva temeljna podraËuna plaËilne bilance: v tekoËi raËun ter v kapitalski in finanËni raËun.

Uporaba jasnega koncepta rezidenËnosti enote omogoËa ustrezno identificiranje in zajetje transakcij med rezidenti drûave in nerezidenti (tujino). Koncept rezidenËnosti, ki ga uporablja PriroËnik za sestavljanje plaËilne bilance, je identiËen konceptu rezidenËnosti v Sistemu nacionalnih raËunov (SNA, 1993). V skladu s tem konceptom je enota-transaktor rezidenËna enota takrat, kadar ima na ekonomskem ozemlju drûave srediöËe svojega ekonomskega interesa; Ëe tega pogoja ne izpolnjuje, je nerezidenËna enota. Kar zadeva ekonomsko ozemlje v tej definiciji, le-to zajema geografski teritorij, ki ga upravljajo organi drûave, in ne sovpada povsem z ozemljem drûave.

Eno temeljnih naËel pri sestavljanju plaËilne bilance je sistem dvojnega knjigovodstva, tako da je vsaka transakcija knjiûena dvakrat; vsota vseh knjiûenj bi morala teoretiËno biti niË, v resnici pa pride do salda, ki se knjiûi v postavki "neto napake in izpustitve".

PlaËilna bilanca v osnovni razliËici je tudi delno sektorizirana (denarne oblasti, vlada, poslovne banke, drugi). Pomembno je tudi razlikovanje med kratkoroËnimi in dolgoroËnimi terjatvami oziroma obveznostmi.

Vsi podatki so izraûeni v ameriökih dolarjih; v vrednosti v USD so torej po tekoËih teËajih preraËunane tudi vse transakcije - plaËila v nedolarskih valutah.

Negativen predznak (-) pomeni uvoz oziroma preseûek uvoza nad izvozom v tekoËem raËunu, poveËanje terjatev ali zmanjöanje obveznosti v kapitalskem in finanËnem raËunu ter poveËanje mednarodnih rezerv.

Posebnosti plaËilne bilance Slovenije

NaËin obraËuna plaËilne bilance Slovenije je bil po letu 1991 nekajkrat dopolnjen z namenom, da bi se Ëim bolj približali metodoloökim napotkom spremenjene razliËice priporoËil MDS. To je bilo dokaj odvisno od razpoloûljivih virov podatkov; ti so bili ob denarni osamosvojitvi Slovenije (8. oktobra 1991) in takoj po letu 1991 precej pomanjkljivi. Na novo je bilo treba organizirati zbiranje, obdelavo in objavljanje denarnih in finanËnih podatkov.

Do leta 1991, ko je bila Slovenija sestavni del Jugoslavije, se v plaËilno bilanco Slovenije transakcije s tedanjimi jugoslovanskimi republikami niso zajemale. Tako prikazana plaËilna bilanca Slovenije za obdobje 1990-1992 (prvi del tabele - poöevni tisk) zajema le transakcije s t. i. pravo tujino, medtem ko plaËilnobilanËni podatki za obdobje 1992-1996 (drugi del tabele - pokonËni tisk) zajemajo tudi transakcije z nekdanjimi jugoslovanskimi republikami. Bistvena razlika med obema deloma podatkov v plaËilni bilanci je tudi v tem, da je oplemenitenje za obdobje 1990-1992 vkljuËeno po neto naËelu v bilanco storitev, za obdobje 1992-1996 pa po bruto naËelu v bilanco menjave blaga.

Rezidenti Republike Slovenije so za potrebe sestavljanja plaËilne bilance Slovenije opredeljeni kot:

- fiziËne osebe s stalnim prebivaliöËem v Republiki Sloveniji in tuje fiziËne osebe, ki imajo veljavno delovno vizo za öest ali veË mesecev;
- pravne osebe in zasebniki s sedeûem v Republiki Sloveniji in tuje pravne osebe, ki na ozemlju Republike Slovenije s stalno dejavnostjo pridobivajo dohodek;
- diplomatska, konzularna ter druga predstavniötva Republike Slovenije, ki so financirana iz proraËuna, in slovenski drûavljani, ki so zaposleni pri njih, in njihovi druûinski Ëlani;
- registrirana predstavniötva tujih podjetij in poslovne enote, ki

SOURCES AND METHODS OF DATA COLLECTION

General features of the balance of payments

The balance of payments of Slovenia is being compiled by the Bank of Slovenia on the basis of International Monetary Fund' s recommendations (Balance of Payments Manual, the fourth and the fifth editions were issued in 1977 and in 1993 respectively) and under limitations posed by availability of data sources.

The balance of payments is a statistical statement that systematically summarises, for a specific time period, the economic transactions of an economy with the rest of the world. Transactions consist of those involving goods, services and income; those involving financial claims on, and liabilities to, the rest of the world; and those (such as gifts) classified as transfers, which involve offsetting entries to balance - in an accounting sense - one-sided transactions. These transactions are covered by two main subaccounts of the balance of payments: the current account and the capital and financial account.

Use of a clear concept of residency of a unit enables appropriate identification and coverage of all transactions between residents of an economy and non-residents (rest of the world). Concept of residency used in the Balance of Payments Manual is identical to that used in the System of National Accounts. According to this concept, a unit-transactor is a resident unit when it has a center of economic interest in the economic territory of a country. As far as economic territory concerns, it consists of the geographic territory administred by the government and is not completely identical to the territory encircled by the country' s geographical boundaries.

One of the basic principles in compiling the balance of payments is the system of double accounting; the sum of all entries should theoretically be zero, but practically it is a balance (positive or negative), which is then entered into the item "net errors and omissions".

The balance of payments in its basic more structured variant is also partly sectored (monetary authorities; government; commercial banks; others). Another important feature in the balance of payments compilation is distinguishing between short-term and long-term claims and liabilities.

All data in the presented balance of payments are in US dollars; so the conversions to USD have been made in the case of transactions - payments made in non-USD values.

Minus sign (-) indicates imports or surplus of imports over exports in current account, increase in assets or decrease in liabilities in the capital and financial accounts, and growth of reserve assets.

Some specific features of the balance of payments of Slovenia

Methodology for the compilation of the Balance of Payments of Slovenia has been supplemented a few times since 1991 with the objective to come more in line with the IMF recommendations. However, those changes have to a great extent depended on the availability of data sources, which were after the attainment of monetary independence of Slovenia (October 8, 1991) rather deficient. It was necessary to establish a new organization of monetary and financial data collection, processing and publishing.

In the period until 1991, when Slovenia had been a constitutional part of Yugoslavia, the balance of payments of Slovenia did not include transactions with then other Yugoslav republics. Providing that the presented balance of payments of Slovenia for the period 1989-1992 (first part of the table - inclined print) only include transactions with the so called real abroad, while the data for the period 1992-1996 (second part of the table - erected print) also cover transactions with the former other Yugoslav republics. As another important difference between the two sets of data, processing is included into the 1989-1992 data on net principle into the balance of services, while into the 1992-1996 data it is included on gross principle into the balance of goods.

Residents of the Republic of Slovenia are for the purpose of compiling balance of payments of Slovenia defined in the following way:

- *physical entities with a permanent settlement in the Republic of Slovenia and foreign physical entities, which have a working visa valid for six months or more;*
- *legal entities and private persons which have their seats in the Republic of Slovenia, and foreign legal entities, which on the territory of Slovenia acquire income with a permanent economic activity;*
- *diplomatic, consular and other representative organs of the Republic of Slovenia, which are financed out of the budget, and Slovene citizens employed by them, and their family members;*
- *representative agencies of foreign enterprises registered in Slovenia*

opravljajo na ozemlju Republike Slovenije stalno dejavnost, za tisti del dejavnosti, ki ga opravljajo v Republiki Sloveniji;

- dnevni migranti.

Nerezidenti pa so za namene sestavljanja plaËilne bilance zajemajo tudi:

- domaËe fiziËne osebe z veljavno tujo bivalno ali delovno vizo;
- predstavniötva in poslovne enote slovenskih podjetij, ki opravljajo v tujini stalno dejavnost, za tisti del dejavnosti, ki ga opravljajo v tujini;
- diplomatska, konzularna ter druga predstavniötva tujih drűav ali mednarodnih organizacij v Republiki Sloveniji, ki jih financirajo ali sofinancirajo tuje vlade, in tuji drűavljani, zaposleni pri njih, in njihovi druűinski Ëlani.

Viri podatkov in metodologija izkazovanja plaËilne bilance Slovenije za obdobje 1992-1996

Kar zadeva vire podatkov, ima poseben poloűaj v plaËilni bilanci postavka blago, za katero so vir carinske listine. ObraËune blagovne menjave s tujino na podlagi carinskih listin pripravlja StatistiËni urad Republike Slovenije (izvoz blaga FOB in uvoz blaga CIF, vkljuËno oplemenitenje po bruto naËelu), Banka Slovenije pa te podatke vkljuËuje v plaËilno bilanco Slovenije.

Poleg podatkov iz carinskih listin sta za tekoËi raËun plaËilne bilance Slovenije öe dva temeljna sklopa virov podatkov: sistem poroËanja o transakcijah s tujino (International Transaction Reporting System - ITRS) in ocene za posamezne postavke.

Slovenski ITRS je zaprt sistem poroËanja: poroËati so dolűne vse banke, ki opravljajo plaËilni promet s tujino in vsi rezidenti, ki imajo odprte raËune v tujini. ITRS zagotavlja podatke o transakcijah na osnovi poroËanja o plaËilih preko raËunov domaËih bank in drugih domaËih podjetij pri bankah v tujini (tudi raËuni centralne banke) ter preko raËunov nerezidentov pri domaËih bankah in na osnovi poroËanja o poslovanju preko drugih odprtih raËunov med rezidenti in nerezidenti, vkljuËno z izplaËili v SIT.

Uporabljajo se naslednji modeli ocenjevanja postavk tekoËega raËuna plaËilne bilance:

- prilagoditev vrednosti podatkov o izvoűenem blagu in prilagoditev zaobjema podatkov o izvoűenem in uvoűenem blagu (postavki "prilagoditev zaobjema");
- ocena prejemkov iz naslova turizma (postavka "potovanja - prejemki");
- ocena izdatkov za potovanja v tujino (postavka "potovanja - izdatki");
- ocena plaËil iz tujine slovenskim delavcem dnevnim migrantom (postavka "dohodki - prejemki od dela");
- ocena prejemkov iz naslova italijanskih pokojnin (postavka "tekoËi transferi - prejemki").

Za finanËni raËun se uporabljajo öe naslednji dodatni viri:

- podatki o ËrpanjihÍodplaËilih v okviru kreditnih poslov s tujino iz neposrednih poroËil o kreditih, pridobljenih v tujini oziroma danih tujini;
- podatki o spremembah stanj na raËunih terjatev in obveznosti poslovnih bank in BS do tujine;
- ocena transakcij v zvezi s tujo gotovino in vlogami pri bankah v tujini slovenskih gospodinjstev.

Opisani viri podatkov se uporabljajo v okviru sedaj veljavne metodologije. Od leta 1991 naprej so se podatkovni viri postopoma izgrajevali v okviru prilagajanja metodologije sestavljanja plaËilne bilance mednarodnim priporoËilom, tako da uvajanje metodoloökih popravkov v obraËunske sheme delno vpliva na primerljivost podatkov.

Po enotni obraËunski shemi so izkazani podatki plaËilne bilance za leti 1992 in 1993. Metodologija je bila pomembneje spremenjena v letu 1996 in 1997 na podlagi priporoËil MDS. Te spremembe so upoötevane v obraËunih plaËilne bilance za obdobje 1994-1996 in zadevajo izvoz in uvoz blaga (v obraËun je vkljuËena "prilagoditev zaobjema"), nekatere postavke v bilanci storitev (potovanja, konstrukcijske storitve, vladne

and business units, which on the territory of Slovenia implement a permanent activity, for the part which is implemented in the Republic of Slovenia;

- *daily migrants.*

Non-residents for the purpose of compiling balance of payments of Slovenia also include:

- *domestic physical entities with a foreign staying or working visa;*
- *representative agencies and business units of Slovene enterprises which implement a permanent activity abroad, for the part only which is actually implemented abroad;*
- *diplomatic, consular and other representative organs of foreign countries or international organisations in the Republic of Slovenia, which are financed or co-financed by foreign governments, and foreign citizens, employed in them, and their family members.*

Data sources and methodology used in the balance of payments compilation for the period 1992-1996

As for the data sources, a special case is the balance of exchange of goods, which is compiled on the basis of customs data. Calculations of "export FOB" and "import CIF" are prepared by the Statistical Office of the Republic of Slovenia, and then included into the overall balance of payments.

Apart from the customs data there are two additional basic complexes of data sources for the current account of the balance of payments of Slovenia: the system of reporting about international transactions of resident units (International Transactions Reporting System - ITRS) and estimations for particular items.

Slovene ITRS is a closed reporting system: obliged to report are all banks, which implement payments with the rest of the world and all residents having accounts opened abroad. It provides data on transactions on the basis on reporting on payments through accounts opened at domestic banks and through accounts of domestic banks and other domestic enterprises opened at banks abroad (including the central bank' s accounts) and through accounts of non residents opened at domestic banks and on the basis of reporting on businesses done between residents and non-residents through other accounts opened, including payments in SIT.

The following models of estimating items of the current account are in use for the compilation of the current account of the balance of payments of Slovenia:

- *adjustment of the value of the transactions included in the aggregate export of goods, FOB and adjustment of coverage of data on export and import of goods (items "coverage adjustment");*
- *estimations of receipts from tourism (item "travel - receipts");*
- *estimation of expenditure on travel abroad (item "travel - expenditure");*
- *estimation of payments from the rest of the world to Slovene workers-daily migrants (item "income - receipts from work");*
- *estimation of receipts from pensions paid by Italy (item "current transfers - receipts").*

The following additional data sources are used for the financial account items:

- *data on using/repayments of credits from the direct reports about credits, acquired abroad or given to the rest of the world respectively;*
- *data on changes on the accounts of claims and liabilities of commercial banks and the central bank vis-a-vis the rest of the world;*
- *estimations of transactions in foreign cash and deposits in the banks abroad of resident households.*

Data sources described are used in the presently used methodology. Since 1991 data sources have been built up by degrees in the framework of overall adapting of the methodology of compiling balance of payments of Slovenia to international standards, so that introducing methodological addings or corrections in the accounting schemes partly affects comparability of data.

1992 and 1993 balance of payments data are presented according to the same accounting scheme. The methodology has been significantly changed in 1996 and 1997 on the basis of the IMF mission recommendations, so that those changes affect the presented balance of payments data for the period 1994-1996. The mentioned changes, which

storitve) in bilanco dohodkov, bilanco tekoËih transferjev ter del kapitalskega in finanËnega raËuna (zlasti spremenjen izraËun "kratkoroËnih komercialnih kreditov", postavke "prebivalstvo"). Te obraËunske popravke je treba upoötevati pri primerjavi podatkov za leti 1993 in 1994.

VeËina podatkov za leti 1994 in 1995, ki so prikazani v tabeli 31.1, se razlikuje od podatkov, objavljenih v tabeli 31.1 StatistiËnega letopisa 1996. Te razlike so rezultat revizije plaËilne bilance (nekateri metodoloöki popravki in izboljöave ocen).

ZAJETJE IN DEFINICIJE

V pojasnilih za posamezne postavke - standardne sestavine plaËilne bilance Slovenije - so upoötevane opredelitve iz PriroËnika za izdelavo plaËilne bilance MDS (1993), navedene pa so tudi ße omenjene spremembe metodologije za sestavo plaËilne bilance, ki so bile prviË uveljavljene leta 1996 in so upoötevane v izkazu za obdobje 1994-1996.

TekoËi raËun plaËilne bilance zajema vse transakcije, v katere so vkljuËene ekonomske vrednosti in so transakcije med rezidenti v opazovani ekonomiji in nerezidenti, ne spadajo pa v kapitalski in finanËni raËun. Temeljna razvrstitev tekoËih transakcij je: transakcije blaga in storitev, transakcije dohodkov in tekoËi transferji.

Postavka **blago** zajema: blago, blago za oplemenitenje, popravila blaga, blago, ki se dobavlja v pristaniöËa, in nemonetarno zlato. V postavko blago se uvröËajo vse tiste transakcije z blagom, v katerih sta udeleßena rezident in nerezident in pri katerih se spremeni lastniötvo. Od naËela spremembe lastniötva sta vsaj dve pomembni odstopanji - transakcije med rezidenti in nerezidenti na osnovi oplemenitenja in finanËnega zakupa, ki se zajamejo v postavko blago, ËeprAv ni priölo do spremembe lastniötva predmeta, ki je sicer preËkal drßavno mejo.

Izvoz blaga je v plaËilni bilanci izkazan kot izvoz blaga FOB (podatki iz carinskih listin), v podatke za obdobje 1994-1996 pa je vkljuËena öe t.i. "prilagoditev zaobjema", to je: tisti izvoz blaga, za katerega se ne izdelajo carinske deklaracije, izvoz blaga iz popravila in odpisi/pripisi razlik v vrednosti; na novo pa je izkljuËena iz te postavke vrednost podatka o izvozu blaga v okviru izvajanja investicijskih del (vkljuËeno v postavko konstrukcijske storitve, ki je v tem prikazu del postavke druge storitve).

V podatkih o izvozu blaga za obdobje 1992-1996 je tudi s carinskimi listinami zajet izvoz blaga na osnovi oplemenitenja.

Uvoz blaga je v plaËilni bilanci izkazan kot uvoz blaga CIF (podatki iz carinskih listin), zmanjöan za prilagoditev CIF/FOB. V podatke za obdobje 1994-1996 je dodatno zajeta "prilagoditev zaobjema", s katero so v uvozu blaga prikazani öe tile podatki: o tistem uvozu blaga, za katerega se ne izpolnijo carinske listine, o uvozu blaga iz popravila, o odpisih/pripisih razlik v vrednosti ter podatek o prodaji tujega blaga rezidentom v prostih carinskih prodajalnah in konsignacijskih skladiöËih.

V podatkih o uvozu blaga za obdobje 1992-1996 je tudi s carinskimi listinami zajet uvoz blaga na osnovi oplemenitenja.

Storitve (izvoz storitev in uvoz storitev) so v prikazani plaËilni bilanci po vrstah izkazane le s postavkami oplemenitenje (za obdobje pred letom 1992, ko se je posle oplemenitenja izkazovalo po neto naËelu), transport in potovanja, preostale storitvene transakcije pa so zdrußene v postavko druge storitve, in sicer: komunikacijske, konstrukcijske storitve, zavarovanje, finanËne storitve, raËunalniöke in informacijske storitve, pravice in licence, preostale poslovne storitve, osebne, kulturne in rekreativne storitve ter vladne storitve.

Dohodki zajemajo dva tipa transakcij med rezidenti in nerezidenti: (i) tiste, ki zajemajo prejemke za opravljeno delo in se plaËujejo nerezidentom (npr. mejni, sezonski in drugi kratkoroËni delavci) - ti so v prikazani plaËilni bilanci izkazani kot "dohodki od dela" - in (ii) tiste, v katerih so prejemki in izdatki dohodkov na podlagi finanËnih terjatev in obveznosti do tujine. V slednjih so prejemki in izdatki na podlagi neposrednih naloßb, naloßb v vrednostne papirje (portfolio naloßbe) in posojil - v prikazani plaËilni bilanci so izkazani kot "dohodki od kapitala".

V bilancah za obdobje 1994-1996 so dohodki od dela - prejemki ocenjeni na podlagi podatkov centralnih bank sosednjih drßav o vrednostih dohodkov od dela rezidentov Slovenije v Avstriji in Italiji.

are also presented in the framework of explanation of individual components of the balance of payments, concern export and import of goods ("coverage adjustment" is included), some of the items in the balance of services (travel, construction, government services) and the balance of income, the balance of current transfers, and a part of the capital and financial account (mainly the calculation of the item "short-term commercial credits"). These compilation changes should be taken into account when comparing 1994 and 1993 data.

Most of 1994 and 1995 data shown in table 31.1 differ from data for the same period published in the 1996 Statistical Yearbook. The differences are result of the revision of the balance of payments (some methodological changes and improvements of estimations).

COVERAGE AND DEFINITIONS

Explanations for particular items of the presented balance include definitions from the IMF Balance of Payments Manual (1993) and already mentioned changes of methodology for the compilation of the balance of payments of Slovenia, which have come into force in 1996 and influence balance of payments data for the period 1994-1996.

*Covered in **the current account** of the balance of payments are all transactions (other than those in financial items) that involve economic values and occur between the residents of the observed economy and non-residents. Specifically, the major classifications are goods and services, income and current transfers.*

***Goods** covers general merchandise, goods for processing, repairs on goods, goods procured in ports by carriers, and nonmonetary gold. Item goods is a collection of all transactions in goods between residents and non-residents if changes of ownership occurred. There are at least two major deviations from the principle of change of ownership - transactions on the basis of processing and financial leasing, which are included in goods although there were no changes of ownership of the goods that had passed the state border.*

Export of goods is presented in the balance of payments as export of goods FOB (customs data), with the "coverage adjustment" additionally included in the data for the period 1994-1996. Coverage adjustment for export of goods includes the following items: value of export of goods for which customs declarations have not been made; export of goods after the repair; and write-offs and addings of values. Additionally excluded from the item "export of goods" is value of export of goods on the basis of implementing investment works (this part of export is included in the item "services" - construction).

Data on export of goods for the period 1992-1996 also include export of goods on the basis of processing which is covered by the customs documents.

Import of goods is presented in the balance of payments as import of goods CIF (customs data), minus adjustment CIF/FOB, and with the "coverage adjustment" additionally included in the data for the period 1994-1996. Coverage adjustment for import of goods includes the following items: value of import of goods, for which customs declarations have not been made; import of goods after the repair abroad; write-offs and addings of values; and value of imported goods (not covered by customs declarations) which are sold to residents in the duty free shops and the consignment warehouses.

Data on import of goods for the period 1992-1996 also include import of goods on the basis of processing which is covered by the customs documents.

*Data on **services** (export and import of services) are presented in the balance of payments on a highly aggregated level. Separate data are for processing (for the period up to 1992 when it was presented on net principle), transport and travel, while the rest of the service transactions are aggregated into the item other services. Other services is the aggregation of the following standard components of the balance of payments: communication services; construction; insurance; financial services; computer and information services; royalties and licence fees; other business services; personal, cultural and recreational services; and government services.*

***Income** covers two types of transactions between residents and non-residents: (i) those involving compensation of employees, which is paid to non-residents (e.g., border, seasonal, and other short-term workers) - these are presented in the balance of payments as "income from work", and (ii) those involving investment income receipts and payments on external financial assets and liabilities. Included in the letter are receipts and payments on direct investment, portfolio investment, other investment, and loans - these are presented in the balance of payments as "income from capital".*

In the balances for the period 1994-1996, data on income are estimated on the basis of the data from the central banks of the neighbouring

TekoËi transferji zajemajo vse transferje, ki niso prenosi kapitala, razen: (i) transferjev lastniötva osnovnih sredstev; (ii) transferjev sredstev, ki so v zvezi ali so pogojeni s pridobitvijo ali odpravo osnovnih sredstev; (iii) oprostitve obveznosti do upnikov brez kakröenega koli nadomestila.

Za razliko od kapitalnih transferjev tekoËi transferji neposredno vplivajo na raven razpoloûljivega dohodka in na porabo blaga ali storitev, tako da zmanjöujejo dohodkovne in porabne moûnosti dajalcu in jih poveËujejo prejemniku transferja. ZnaËilne vrste tekoËih transferjev so: denarni prenosi za financiranje tekoËih izdatkov drûav, prejemnic tekoËih transferjev, darila in pomoË v naravi (hrana, obleka, zdravila, vojaöka oprema itd.), prispevki drûav Ëlanic mednarodnim organizacijam itd.

V plaËilni bilanci Slovenije so tekoËi transferji razËlenjeni na tekoËe transferje uradnega sektorja (transakcije med rezidenti, ki so drûavne ustanove, in med nerezidenti) in na tekoËe transferje drugih sektorjev. Glede na spremembo metodologije so v podatke za obdobje 1994-1995 dodatno zajete te postavke (predvsem podatki iz carinskih listin): "uvoz blaga brez plaËila protivrednosti", "poseben uvoz prek OZN in Mednarodnega RdeËega kriûa" in "izplaËila iz naslova mednarodnih poötnih nakaznic" na strani tekoËih transferjev v Slovenijo ter "izvoz blaga kot pomoË RS" in "izvoz blaga brez plaËila protivrednosti" na strani tekoËih transferjev v tujino; za leto 1996 in tekoËe leto ti podatki öe niso na voljo. Od 1994 - 1996 pa so ocenjeni öe prejemki v Slovenijo iz naslova italijanskih pokojnin.

Kapitalski in finanËni raËun plaËilne bilance ima dve temeljni sestavini - kapitalski raËun in finanËni raËun, kar je v skladu z raËuni v Sistemu nacionalnih raËunov (1993). Stranki v transakciji s terjatvami ali obveznostmi sta navadno rezident in nerezident, v nekaterih primerih pa sta lahko obe bodisi rezidenta bodisi nerezidenta.

Poglavitni sestavini **kapitalskega raËuna** sta kapitalski transferji ter transakcije z neproizvedenimi nefinanËnimi sredstvi (npr. razliËni patenti in licence).

Glavna struktura **finanËnega raËuna** temelji na funkcionalnem naËelu, tako da je finanËni raËun sestavljen iz bilanc neposrednih naloûb, naloûb v vrednostne papirje, drugih naloûb in sprememb mednarodnih rezerv.

Neposredne naloûbe zajemajo vse transakcije med neposrednimi investitorji in podjetji z neposredno naloûbo.

Podatki o neposrednih naloûbah v plaËilni bilanci Slovenije zajemajo podatke bank iz plaËilnega prometa s tujino o zneskih vloûenega kapitala; pri tem je v to postavko za obdobje 1994-1995 dodatno vkljuËena vrednost "uvoza iz naslova vlaganj sredstev tujih oseb v domaËa podjetja" s carinskih listin, za leto 1996 in tekoËe leto ti podatki öe niso razpoloûljivi.

Naloûbe v vrednostne papirje, ki so v tem prikazu izkazane z ustreznimi podatki bank o plaËilnem prometu s tujino, zajemajo transakcije z lastniökimi in dolûniökimi vrednostnimi papirji; slednji zajemajo obveznice in instrumente finanËnega trga.

Druge naloûbe, ki so v plaËilni bilanci Slovenije razvröËene v terjatve in obveznosti do tujine, zajemajo kratko- in dolgoroËne trgovinske kredite, posojila (skupaj s porabo kreditov MDS, posojili MDS in posojili v zvezi s finanËnimi najemi), gotovino in vloge ter preostale terjatve oziroma obveznosti.

Mednarodne denarne rezerve zajemajo transakcije s tistimi sredstvi, ki so po mnenju denarnih oblasti vedno takoj na voljo za uskladitev plaËilnobilanËnih neravnovesij. Sredstva rezerv zajemajo denarno zlato, posebne pravice Ërpanja (SDR), sredstva rezerv v MDS in tuje valute (gotovina in vrednostni papirji).

Pozitivna ali negativna vrednost postavke **neto napake in izpustitve** je posledica uporabe razliËnih virov za postavke plaËilne bilance, napak v poroËanju in pomanjkljivosti metodologije za sestavo plaËilne bilance. Ker se napake in izpustitve v plaËilni bilanci navadno pobotajo, velikost statistiËne napake ne more biti kazalec natanËnosti bilance.

countries on the value of incomes of the residents of Slovenia in Austria and Italy.

***Current transfers** consist of all transfers that are not transfers of capital. Current transfers thus consist of all current transfers that do not involve: (i) transfers of ownership of fixed assets, (ii) transfers of funds linked to, or conditioned upon, acquisition or disposal of fixed assets, (iii) forgiveness, without any counterparts being received in return, of liabilities by creditors. (All of these are capital transfers.)*

The distinguishing feature of current transfers against capital transfers is that current transfers directly affect the level of disposable income and should influence the consumption of goods and services, so that they would reduce the income and consumption possibilities of the donor and increase these possibilities for the recipient. Characteristic types of current transfers are: financial transfers for financing current expenditure of countries recipients of current transfers, gifts and help in kind (food, clothes, medicines, military equipment, etc.), contributions of member states to international organisations, etc.

In the balance of payments of Slovenia current transfers are broken down into the current transfers of the official sector (transactions between residents, which are governmental institutions, and non-residents) and current transfers of other sectors. Due to methodological changes, data on current transfers in the balance of payments of Slovenia for 1994-1995 additionally include the following items (partly customs data): "import of goods without any counterpart payment"; "special import via UN and International Red Cross"; and "payments out from the international postal money orders"; and the following are additionally included in the current transfers to the rest of the world: "export of goods as the aid of the Republic of Slovenia"; and "export of goods without any counterpart payment"; for the year 1996 and the current year these data are not available yet. Included in 1994-1996 data are estimations of receipts by Slovenia from pensions paid by Italy.

***The capital and financial account** has two major components - the capital account and the financial account - that are in concordance with those same accounts in the System of National Accounts (1993). The two parties to a transaction in asset or liabilities are usually a resident and a nonresident but, in some instances, both parties may be residents or non-residents.*

*The major components of **the capital account** are capital transfers and acquisition/disposal of non-produced, nonfinancial assets (various patents and licences).*

*The main structure of the **financial account** is based on the functional criteria, so as the financial account is composed of the following subaccounts: balance of direct investment, balance of portfolio investment, balance of other investment, and change of reserve assets.*

Direct investment covers transactions between direct investors and direct investment enterprises.

The practical solution for the presented balance is the inclusion into the direct investment of the banks' data on the payments of such capital flows from the rest of the world to Slovenia and vice versa. As for the 1994-1996 data, direct foreign investment in Slovenia additionally includes the item: "import of goods as direct foreign investment into domestic enterprises" (customs data), for the year 1996 and the current year these data are not available yet.

Portfolio investment, which is presented in the balance of payments with the appropriate banks' data on payments between Slovenia and the rest of the world, covers transactions in equity securities and debt securities; the latter are subsectored into bonds and instruments of financial market.

Other investment (claims and liabilities vis-a-vis the rest of the world) covers short- and long-term trade credits; loans (including use of IMF credit, loans from the IMF, and loans associated with financial leases); currency and deposits; and other claims or liabilities.

Reserve assets cover transactions in those assets that are considered, by the monetary authorities of an economy, to be available for use in meeting balance of payments.The items covered are monetary gold, special drawing rights (SDRs), reserve position in the IMF; and foreign exchange assets (currency and securities).

*Positive or negative value of **net errors and omissions** is the result of use of different sources for the components of the balance of payments, reporting mistakes and imperfection of the methodology for the compilation of the balance of payments. Since some of the errors and omissions that occur in the course of compilation usually offset one another, the size of the statistical error does not necessarily provide any indication of the overall accuracy of the statement.*

32. OKOLJE

ENVIRONMENT

ZRAK

VIRI IN METODE ZBIRANJA PODATKOV

Emisije ûveplovega dioksida so ocenjene na podlagi izraËunov StatistiËnega urada Republike Slovenije in Hidrometeoroloökega zavoda Republike Slovenije. Ti temeljijo na statistiËnih podatkih o porabi goriv in surovin po podroËjih dejavnosti.

Podatke o uvoznih in izvoznih koliËinah snovi, ki ökodljivo delujejo na ozonski plaöË, nam je posredovalo Ministrstvo za zdravstvo Republike Slovenije.

ZAJETJE

V prikazanih podatkih so zajeta vsa veËja mesta in kraji, kjer se pojavlja onesnaûenost zraka z ûveplovim dioksidom in dimom.

Onesnaûenost zraka z ûveplovim dioksidom in dimom zaradi gospodarskih dejavnosti in ogrevanja je merjena na doloËenih merilnih mestih.

DEFINICIJE

Onesnaûenost zraka. Podatki o koncentraciji ûveplovega dioksida in dima so prikazani na podlagi analiz 24-urnih vzorcev, meritve se zaËnejo praviloma ob 7. uri zjutraj. Koncentracija ûveplovega dioksida se doloËa z laboratorijsko peroksidno metodo z acidimetriËno detekcijo. Koncentracija dima se doloËa glede na potemnitev filtra po standardni reflektometriËni metodi. Mejna imisijska 24-urna koncentracija ûveplovega dioksida je 125 ($\mu g/m^3$. (Uredba o mejnih, opozorilnih in kritiËnih imisijskih vrednostih snovi v zraku, Uradni list Republike Slovenije, öt. 73/94.)

Ozonu ökodljive snovi so tiste, katerih emisija v zrak povzroËa tanjöanje ozonskega plaöËa.

AIR

SOURCES AND METHODS OF DATA COLLECTION

Sulphur dioxide emissions are estimated on the basis of calculations made by the Statistical Office and the Hydrometeorological Institute of the Republic of Slovenia. The calculations are based on statistical data on fuel and raw material consumption by fields of activities.

Data on the imported and exported quantities of ozone depleting substances have been provided by the Ministry for Health of the Republic of Slovenia.

COVERAGE

Data cover all major towns and places where air pollution by sulphur dioxide and smoke occurs.

Air pollution by sulphur dioxide and smoke due to economic activities and heating is measured at some places.

DEFINITIONS

***Air pollution:** data on the concentration of sulphur dioxide and smoke are made on the basis of analyses of 24-hour samples. As a rule, measurements begin at 7 a.m. every day. The concentration of sulphur dioxide is determined by using laboratory peroxide method with acidimetric detection. The concentration of smoke is determined from the degree of blackness of a filter, according to the standard reflectometric method. The limit 24-hour emission concentration of sulphur dioxide is 125 ($\mu g/m^3$. (Ordinance on Limit, Alarm, and Critical Values of Compounds in the Air, Official Journal of Republic of Slovenia, No. 73/94.)*

***Ozone depleting substances** are those whose emission causes the depletion of the ozone layer.*

VODA

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o vodnem gospodarstvu zbiramo z letnimi poroËili, ki jih poöiljajo podjetja in organizacije s podroËja industrije in rudarstva, kmetijstva in ribiötva, gozdarstva, vodnega gospodarstva, stanovanjsko-komunalne dejavnosti ter krajevne skupnosti, ki upravljajo javni vodovod in javno kanalizacijo.

Osnova za vse podatke so meritve z vodomeri, nameöËenimi na vodnih virih in proizvodnih napravah. » e vodomerov ni, se koliËine zajete vode ocenjujejo na podlagi normativov za doloËeno panogo dejavnosti, ali na osnovi glavnega projekta in obratovalnega Ëasa ter zmogljivosti Ërpalk, ali na podlagi strokovne ocene.

Podatke o kakovosti vode v slovenskih rekah je posredoval Hidrometeoroloöki zavod Republike Slovenije.

ZAJETJE

V prikazanih podatkih so zajeta podjetja in druge organizacije, odgovorne za izkoriöËanje, izpust in preËiöËevanje vode.

Podatke za javni vodovod in javno kanalizacijo spremljamo po upravnih enotah in poreËjih, podatke o koliËini zajete vode in odplak pa tudi po naseljih.

Pri podatkih o vodovodnih in kanalizacijskih sistemih niso zajeti lokalni sistemi, ki jih upravljajo vaöki odbori, in ne vodovodi in kanalizacijski sistemi podjetij, ki jih uporabljajo posamezna gospodinjstva oziroma podjetja.

Vodovodni sistemi dobivajo vodo predvsem iz podtalnic in izvirov, le izjemoma iz odprtih virov. Po ötevilu vodnih virov prevladujejo izviri, po koliËini vode pa podtalnica.

Prikazani so vsi podatki o namakalnih sistemih in regulaciji vodotokov ne glede na to, kdaj so bili zgrajeni, niso pa upoötevani namakalni sistemi v zasebni lasti.

DEFINICIJE

Vodovod je sistem za preskrbo s pitno vodo, ki ima urejen in zavarovan vir, zajetje, zbiralnik in vodovodno omreûje.

Javna preskrba prebivalstva s pitno vodo je preskrba z vodo veË kot

WATER

SOURCES AND METHODS OF DATA COLLECTION

Data on water management are collected from the annual reports forwarded by enterprises and organizations from the fields of manufacture, mining and electricity supply, agriculture and fishing, forestry and hunting, water management, community service activities, and from local communities which manage public waterworks and sewage.

All data are entered on the basis of measurements made with water gauges placed in water sources and production installations. If there is no water gauge, the quantities of collected water are estimated on the basis of the norms for a given branch of activity, main project, operating times and pumping station capacity, or on the basis of an expert assessment.

Data on the quality of water in Slovenian rivers are forwarded by the Hydrometeorological Institute of the Republic of Slovenia.

COVERAGE

The data cover enterprises and organizations involved in the exploatation, release and purification of water.

Data on public waterworks and sewage are monitored by communities and by river basins, and include coverage of the quantities of collected water and waste water by settlements.

With waterworks and drainage systems, local systems managed by village committees are not covered, neither are the waterworks and drainage systems of enterprises and individual households which they themselves manage.

Waterworks systems receive water mainly from underground sources and springs, and only exceptionally make use of open water sources. Springs dominate in terms of the number of water sources, underground sources in terms of quantity.

All data on irrigation systems and water course regulation are shown, irrespective of the year of construction. Privately-owned irrigation systems are not covered.

DEFINITIONS

***Waterworks** is a system for providing drinking water. It comprises an organized and protected source, a system to tap the water, a collector well and a water supply network.*

***Public drinking water supply** is the supply of water to more than five*

petih gospodinjstev oziroma veË kot dvajsetih prebivalcev.

Vir sta voda in kraj, na katerem se zajema voda za javno preskrbo prebivalstva.

Naravne vode zaprtih virov so higieniËno zajeti naravni vrelci, izviri in podtalnice za vodovodne sisteme.

Naravne vode odprtih (povröinskih) virov so nezajeti vrelci, izviri, vodotoki I. in II. razreda, jezera in zbiralniki (akumulacije), Ëe se uporabljajo za preskrbo s pitno vodo.

Zbiralnik (akumulacija) je umetno zgrajen sistem zbiranja vode, ki se po ustreznem ËiöËenju in razkuűevanju uporablja za javno preskrbo prebivalstva.

PoreËje je geografsko ozemlje, s katerega odteka voda v isto reko (npr. poreËje Save).

Primarno vodovodno omreűje sestavljajo cevovodi od ËrpaliöË ali zajetij do sekundarnega vodovodnega omreűja in vodohranov oziroma cevovodi med posameznimi stanovanjskimi ali drugimi obmoËji.

Sekundarno vodovodno omreűje je napeljava**,** ki se uporablja za neposredno priklju Ëevanje porabnikov na posameznem stanovanjskem, industrijskem ali drugem obmoËju.

Kanalizacija je omreűje zaprtih kanalov za odvajanje odplak in padavinskih voda od priklju Ëkov v naselju do izliva v odprte vode, zemljo ali Ëistilne naprave.

Sveűa voda je prevzeta iz virov v naravnem stanju ali je obdelana po obiËajnih metodah.

Tehnoloöka voda se uporablja v proizvodnji in drugod in ne ustreza dogovorjenim normativom za pitno vodo.

Pitna voda je voda, ki po kakovosti ustreza merilom, ki so predpisana v pravilniku o higienski neporeËnosti vode (po mikrobioloökih, fizikalnih, kemiËnih, radioloökih lastnostih ter glede vsebnosti pesticidov in bojnih strupov). Ta pravilnik predpisuje higiensko neporeËnost vode, ki je namenjena za javno preskrbo prebivalstva kot pitna voda ter za proizvodnjo űivil, namenjenih za prodajo.

Uporabljena voda je tista, ki jo je podjetje prviË uporabilo za svoje potrebe (brez recirkulirane in vnoviË uporabljene vode).

Voda v recirkulaciji je letna koliËina vode v cirkulacijskem sistemu. Ista koliËina je obraËunana za vsako kroűenje posebej.

Porabljena voda je tista koliËina vode, ki se izgublja z uparjanjem ali postane del proizvoda in torej ni veË razpoloűljiva, ni veË na voljo.

VnoviË uporabljena voda je bila űe uporabljena in bi bilo treba namesto nje uporabiti dodatne koliËine sveűe vode.

Neonesnaűena voda je primerna za vsako uporabo brez kakröne koli obdelave in med uporabo ne spremeni svojih prvotnih lastnosti.

Onesnaűena voda (odplake) je vsa izpuöËena uporabljena voda, katere fizikalne, kemiËne in bioloöke lastnosti ne dosegajo standardov II. kakovostnega razreda.

Kakovost vode v slovenskih rekah se ocenjuje po analizah vzorcev, ki jih vzamejo za fizikalno-kemijske in bakterioloöke analize 3- do 4-krat na leto, za bioloöke analize pa 1- do 2-krat na leto. Pri oceni kakovosti so upoötevani normativi, ki jih doloËajo veljavni predpisi s podroËja voda (Ur. l. SFRJ, öt. 6/78 in 8/78, ter Ur. l. SRS, öt. 38/81 in 18/85).

I. razred: vode, ki jih lahko ob morebitni dezinfekciji uporabljamo kot pitno vodo in v űivilski industriji, Ëe so povröinske, pa za gojitev plemenitih vrst rib (salmonide).

II. razred: vode, ki so v naravnem stanju primerne za kopanje, vodne öporte, gojitev drugih vrst rib (ciprinide), po obiËajnih metodah predpriprave (koagulacija, filtracija, dezinfekcija) pa tudi za pitje in v űivilski industriji.

III. razred: vode, ki so primerne za namakanje, po obiËajnih metodah predpriprave pa tudi v industriji, razen v űivilski.

IV. razred: vode, ki jih je mogoËe uporabljati za druge namene le po ustrezni obdelavi.

Breűinska zavarovanja prepreËujejo podiranje bregov.

Jezbice so objekti, zgrajeni zaradi oblikovanja űe reguliranih bregov,

households or to more than twenty individuals.

*A **water source** is water and the location at which water is collected for public water supply.*

***Natural waters from closed water sources** are hygienically tapped natural springs, sources and underground waters for waterworks systems.*

***Natural waters from open (surface) water sources** are untapped first and second class springs, sources and water courses, and lakes and reservoirs, if they are used for the supply of drinking water.*

*A **reservoir** is an artificially constructed system for the collection of water, which, after appropriate purification, is used for public water supply.*

*A **river basin** is a geographic area from which the water flows into the same river (e.g. the Sava basin).*

*The **primary waterworks network** consists of pipelines from the pumping or drawing stations to the secondary waterworks network and pipelines between individual residential or other areas.*

*The **secondary waterworks network** is used for direct linking of users in an individual residential, industrial or other area.*

***Sewage** system consists of a network of closed channels for draining waste water and precipitation water from the point of connection in a settlement to the outflow into open water, the ground or a purification plant.*

***Fresh water** is drawn from water sources in its natural state or is processed by the usual methods.*

***Technological water** is used for production and other purposes and does not meet the agreed norms for drinking water.*

***Drinking water** must conform to regulations on the cleanliness of drinking water in terms of microbiological, physical, chemical and radiological content, pesticides and military poisons. These regulations prescribe a level of cleanliness of water intended for supply as public drinking water or water for the production of food intended for sale.*

***Used water** is water used by an enterprise for its own needs, for the first time without recirculation or reuse.*

***Water in recirculation** is the annual quantity of water turned over in the circulation system. The same quantity of water is calculated as many times as there are circulations in the recirculation process in one year.*

***Consumed water** is the quantity of water lost through vaporisation or water which becomes part of a product. Such water is no longer available.*

***Reused water** is water that has already been used and without which it would be necessary to use additional quantities of fresh water.*

***Unpolluted water** is suitable for all types of use with no processing whatsoever and is water whose properties remain unchanged during use.*

***Polluted (waste) water** is all released used water whose physical, chemical and biological properties do not confirm to the second class quality standard.*

***The quality of water** in Slovene rivers is estimated on the basis of samples taken for physical, chemical and bacteriological analyses three or four times a year and for biological analyses once or twice a year. The quality analysis takes account of the norms determined by regulations in the field of water (Official Gazette of the Socialist Federal Republic of Yugoslavia, No. 6/78, and 8/78 and in the Official Gazette of the Socialist Republic of Slovenia, No. 38/81 and 18/85).*

***First class:** water which, with disinfection if required, can be used as drinking water and in the food industry, and surface water which can be used for breeding food fish (salmonidae).*

***Second class:** water which, in its natural state, is suitable for bathing, water sports, breeding other sorts of fish (cyprinidae) and also, with the normal methods of treatment (coagulation, filtration, disinfection), for drinking and use in the food industry.*

***Third class:** water which is suitable for irrigation and also, with the normal methods of treatment, for use in industries other than the food industry.*

***Fourth class:** water which can be used for other purposes only after suitable treatment.*

***Riverbank protection** forbids the destruction of river banks.*

***Small dams** are constructions built to give shape to banks that are*

potekajo pa pod doloËenim kotom s tokom reke.

Hudournik je hribski vodotok z erodirnim zlivnim obmoËjem ali erodirno strugo, razmeroma velikimi padci in velikim razmerjem med pretoki visokih in nizkih voda.

already regulated and are constructed at a certain angle to the flow of the river.

*A **steep mountain stream** is an upland water course with an erodible flow area or an erodible bed, relatively large falls and large difference between high and low water flows.*

RADIOAKTIVNOST V éIVLJENJSKEM OKOLJU

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o radioaktivnosti v ûivljenjskem okolju je posredoval Zavod Republike Slovenije za varstvo pri delu. Zbrani so bili z meritvami in analizami odvzetih vzorcev:

- prsti (vzorci zemlje, dvakrat letno, enkraten vzorec in analiza),
- padavin (dnevno zbiranje, meseËna analiza),
- mleka (meseËno zbiranje, analiza sestavljenega vzorca).

DEFINICIJE

NajveËje meje radioaktivne kontaminacije zraka, pitne vode in ûivil so opredeljene z mejami letnega vnosa radionuklidov v ËloveÜki organizem z dihanjem in prehranjevanjem (Pravilnik o najveËjih mejah radioaktivne kontaminacije ËlovekovegaokolÙa in o dekontaminaciji, Ur. l. SFRJ, ät.8/87).

RADIOACTIVITY IN THE LIVING ENVIRONMENT

SOURCES AND METHODS OF DATA COLLECTION

Data on radioactivity in the living environment have been provided by the Institute of the Republic of Slovenia for Safety at Work. The data were collected with measurements and analyses of samples taken of:

- *soil (samples of earth, twice a year, single sample and analyses),*
- *precipitations (daily collection, monthly analyses),*
- *milk (monthly collection, analyses of compiled samples).*

DEFINITIONS

The upper limits of radioactive contamination of air, drinking water and food are defined by the limits of annual intake of radionucleides in the human body through breathing and eating (Regulation on the upper limits of radioactive contamination of the human environment and on decontamination, Official Gazette of the Socialist Federal Republic of Yugoslavia, No. 8/87).

ODPADKI

VIRI IN METODE ZBIRANJA PODATKOV

Podatke o odpadkih zbiramo z obrazcema KOOP-1 in ODP-1, redno vsaka tri leta. Pri izdelavi metodologije smo upoötevali dosedanjo zakonodajo glede ravnanja z odpadki, veljavno v Republiki Sloveniji, vkljuËili smo tudi metodoloöke prvine nemöke statistike odpadkov ter priporoËila Organizacije zdruûenih narodov in Evropske unije s podroËja statistike okolja.

ZAJETJE

S PoroËilom o javnem odvozu in odlagaliöËih odpadkov (obrazec KOOP-1) smo za leto 1995 pridobili podatke od podjetij, ki imajo koncesijo oz. dovoljenje za opravljanje dejavnosti zbiranja, odvoza in odstranjevanja gospodinjskih, njim po sestavi podobnih in kosovnih odpadkov, ter podjetij, ki upravljajo javna odlagaliöËa odpadkov. KoliËina odpadkov, prikazana v tabelah, se nanaöa na vse tri navedene vrste odpadkov, ki so sicer sestavni del komunalnih odpadkov ter na posebne nenevarne odpadke iz proizvodnih in storitvenih dejavnosti.

V tabeli 32.27 pa smo za leto 1992 obdrûali podatke po regijah, ki se nanaöajo na naselja, iz katerih odvaûajo odpadke, in na prebivalce, zajete s storitvami odvoza.

Podatki o prebivalcih in naseljih, ki so v zvezi s podatki o odvozu odpadkov v letu 1992, se nanaöajo na dan 30. 6. 1992.

Pri poroËevalskih enotah, ki za leto 1992 niso navedle koliËin odpadkov v tonah, je bil manjkajoËi del mase odpadkov zraËunan iz njihove prostornine z enotnim koeficientom 0,17 t/m^3. Pri prostornini odpadkov je upoötevano razsuto (nestisnjeno) stanje.

S statistiËnim poroËilom o odpadkih iz industrije, kmetijstva, gradbeniötva in bolniönic (obrazec ODP-1) smo za leto 1992 zajeli podatke podjetij in organizacij ter njihovih poslovnih enot, ki delujejo v panogah dejavnosti s öiframi 0101-0139, 0201, 0202, 0501-0503 in v skupini dejavnosti s öifro 13013 Enotne klasifikacije dejavnosti (1976).

Podatki o koliËini odpadkov, zbrani z obrazcem ODP-1, so obdelani in dostopni v dveh merskih enotah, v tonah in v kubiËnih metrih. V tabelah je prikazana le koliËina odpadkov v tonah. Pri tem je treba opozoriti, da so nekatere poroËevalske enote za kak odpadek navedle koliËino v tonah, druge pa v kubiËnih metrih. Za vsako mersko enoto je bila zato koliËina vsakega odpadka zraËunana z uporabo ustreznega koeficienta pretvorbe, ki je lahko za vsak odpadek drugaËen. NatanËnost preraËunanih podatkov o koliËini posameznega odpadka in o skupni koliËini odpadkov je odvisna od natanËnosti posameznega koeficienta pretvorbe.

V skupni koliËini odpadkov so vötete vse vrste trdnih in tekoËih odpadkov iz omenjenih dejavnosti kakor tudi posebni in posebej nevarni odpadki ter radioaktivni odpadki. Odpadki, ki so nastali pri posamezni

WASTE

SOURCES AND METHODS OF DATA COLLECTION

The data on waste were collected using the forms KOOP-1 and ODP-1. Data on waste are collected in regular three-year intervals. In formulating the methodology we took into account the current legislation of the Republic of Slovenia for the field of waste management. We also incorporated methodological elements of German waste statistics, as well as the recommendations of the United Nations and the European Union relating to the field of environment statistics.

COVERAGE

Data collected by the Survey on Public Waste Removal and landfill sites for the year 1995 (form KOOP-1) were obtained from enterprises authorized in the removal of household waste, waste similar to household waste and bulky waste, and enterprises that manage public landfill sites. The quantity of waste shown in the tables refers to all three types of waste mentioned, which together make up municipal waste as well as special non-hazardous waste from economic activities.

Data presented in the table 32.27 are from the year 1992 and refer to the settlements included in public waste removal and the number of inhabitants served, sorted by regions.

Data on inhabitants and settlements included in waste removal are given as of 30 June 1992.

For reporting units that did not give the quantity of waste in tons, the missing waste mass was calculated from the volume in cubic metres using the uniform coefficient 0.17 t/m^3. The volume of waste is considered as the loose (uncompressed) volume.

Data on enterprises, organizations and their business units which are involved with branches of the activities coded 0101-0139, 0201, 0202, 0501-0503 and in the group of activities coded 13013 from the National Classification of Activities (1976), for the year 1992, were collected with the Statistical Survey on Waste From Industry, Agriculture, Construction and Hospitals (form ODP-1).

Data on the quantity of waste, collected with ODP-1 form, are processed and made available in both tons and cubic metres. The tables only show the quantity of waste in tons. It should be mentioned that for the same waste type, some reporting units submitted quantities in tons, while others in cubic metres. For each unit of measure, therefore, each waste quantity was calculated using the appropriate conversion coefficient, which could be different for each waste type. The data on individual waste quantities and on the total waste quantity are therefore as accurate as the individual conversion coefficient.

The total waste quantity includes all types of solid and liquid wastes from the relevant activity as well as special (hazardous) waste and radioactive waste. Waste originating at an individual reporting unit in quantities less

poroËevalski enoti v koliËini, manjöi od 0,1 t ali 0,1 m^3, niso zajeti. V tabelah o posebnih oziroma posebej nevarnih odpadkih niso vöteti radioaktivni odpadki, ker jih urejajo posebni predpisi.

DEFINICIJE

Odpadek je snov, ki je lastnik ne more ali ne űeli uporabiti in se je hoËe znebiti oziroma se je je znebil in ki ni bila proizvedena za prodajo.

Za odpadek se öteje tudi snov, ki je nastala kot odpadek in je bila zaradi premiöljenega ravnanja prodana drugim kot uporabna surovina.

Kot odpadek pa ni obravnavana snov, ki jo lastnik sam vnoviË predela ali uporabi v lastnem proizvodnem procesu (vendar ne v napravah za ravnanje z odpadki).

Prav tako se ne öteje za odpadek snov, ki se spusti neposredno v okolje, npr. v zrak, vodo ali kanalizacijo.

Javni odvoz odpadkov je dejavnost, ki jo v javnem interesu opravljajo pristojne javne sluűbe (komunalna in druga podjetja, ki so za opravljanje te dejavnosti pooblaöËena oziroma imajo zanjo dovoljenje ali koncesijo).

Gospodinjski odpadki so trdni odpadki, ki nastajajo v gospodinjstvih in zanje ni potrebna posebna obdelava. Redno jih odvaűajo pristojne javne sluűbe v tipiziranih zabojnikih, ki stojijo na javnih povröinah. Odlagajo jih na javnih odlagaliöËih odpadkov.

Gospodinjskim podobni odpadki so trdni odpadki negospodinjskega izvora, ki so po sestavi podobni gospodinjskim in zanje ni potrebna posebna obdelava. Nastajajo v trgovini in drugih storitvenih in proizvodnih dejavnostih ter jih skupaj z gospodinjskimi odpadki odvaűajo pristojne javne sluűbe. Odlagajo jih na javnih odlagaliöËih odpadkov.

Kosovni odpadki so odpadki, ki jih zaradi teűe, velikosti ali prostornine ni mogoËe odvaűati kakor vsakdanje gospodinjske odpadke, sicer pa zanje ni potrebna posebna obdelava. Odvaűajo jih pristojne javne sluűbe v obËasnih zbiralnih akcijah. Odlagajo jih na javnih odlagaliöËih odpadkov oziroma uporabijo za predelavo v sekundarne surovine.

Posebni odpadki so odpadki, ki jih zaradi koliËine ali lastnosti ni mogoËe varno odstranjevati skupaj s komunalnimi odpadki oziroma je to mogoËe po njihovi posebni obdelavi (Pravilnik o ravnanju s posebnimi odpadki, ki vsebujejo nevarne snovi, Ur. l. SRS, öt. 20/86). Mednje ötejemo odpadke, ki jih je treba nadzorovati (Priloga 2), in posebej nevarne odpadke (Priloga 3). K posebnim odpadkom in posebej nevarnim odpadkom po tem pravilniku ne ötejemo radioaktivnih odpadkov, ker ravnanje z njimi urejajo posebni predpisi.

Sekundarna surovina je proizvod vnoviËne predelave odpadne snovi v procesu recikliranje. Njena uporaba v nekem proizvodnem procesu prispeva k varËevanju primarnih surovin oz. naravnih virov.

OdlagaliöËe gospodinjskih odpadkov je urejen in nadzorovan prostor, namenjen za odlaganje gospodinjskih in njim podobnih ter kosovnih odpadkov, za katere ni potrebna posebna obdelava. Na odlagaliöËe gospodinjskih odpadkov se odlagajo tudi drugi komunalni odpadki, ne pa posebni.

OdlagaliöËe gradbenih odpadkov je urejen in nadzorovan prostor za odlaganje odpadkov, ki nastanejo pri visokih in nizkih gradnjah; sem spada tudi material iz zemeljskih izkopov pri gradnji zgradb in cest.

IKROS je kratica ötudije o ravnanju z odpadki v Sloveniji s polnim naslovom Integralni koncept ravnanja z odpadki v Sloveniji.

than 0.1 tons or 0.1 m^3 is not included. The tables on special (hazardous) wastes do not include radioactive waste, since this is governed by other regulations.

DEFINITIONS

***Waste** is a substance which the owner cannot or does not wish to use himself and wants to remove it or has already removed it and which was not produced for the purpose of sale.*

Also counted as waste is a substance which originated as waste and which, for reasons of good management, was sold to another person as a usable raw material.

Not counted as waste is a substance whose owner reworks or uses it in his own production process, other than in waste management devices.

Also not counted as waste is a substance which is released directly into the environment, for example into the air, water or sewage system.

***Public waste removal** is an activity performed in the public interest by a competent public service (enterprises engaged in community service activities and other enterprises authorised to perform such activity or which hold a licence or a concession).*

***Household waste** is solid waste originating in households which does not require special treatment. Household waste is removed regularly by the competent public service and taken to standardised containers standing on public land. These are then taken to public landfill sites.*

***Waste similar to household waste** is solid waste of non-household origin not requiring special treatment. Such waste originates in commerce and other service activities and is removed, together with household waste, by the competent public service. It is taken to public landfill sites.*

***Bulky waste** is waste which, while not requiring special treatment, cannot be removed as everyday household waste due to its weight, size or volume. Such waste is removed by the competent public service in periodic collections. It is taken to public landfill sites or used as secondary raw material.*

***Special (hazardous) waste** is waste which cannot be safely removed together with municipal waste, or not before special treatment, because of its quantity or properties (Regulations on Handling Special Waste Containing Dangerous Substances /abbr.: Hazardous Waste Treatment Regulation Act/, Official Gazette of the Socialist Republic of Slovenia, No. 20/86). Special (hazardous) wastes require supervision (Supplements 2 and 3 to the Regulations). Under these Regulations radioactive waste is not considered as special (hazardous) waste since it is governed by special regulations.*

***Secondary raw materials** are usable materials that are the result of waste recovery operations. They can be re-used in a production process, thus avoiding the use of primary raw materials.*

***A household waste landfill site** is a regulated and supervised area intended for the dumping of household and similar waste and bulky waste which does not require special treatment. Other municipal waste which is not classified as special (hazardous) waste can also be dumped in a household waste landfill site.*

***A building rubble landfill site** is a regulated and supervised area for dumping waste originating from civil engineering and construction. This includes earth excavation in the construction of buildings and roads.*

***IKROS** is the abbreviation for a study project on waste management in Slovenia entitled Integral Concept of Waste Management in Slovenia.*

INVESTICIJE IN TEKOÈ I IZDATKI ZA VARSTVO OKOLJA

GROSS FIXED CAPITAL FORMATION AND CURRENT EXPENDITURE FOR ENVIRONMENTAL PROTECTION

VIRI IN METODE ZBIRANJA PODATKOV

Podatki o investicijah in tekoËih izdatkih za varstvo okolja so rezultat vsakoletnega raziskovanja StatistiËnega urada Republike Slovenije (INV-01). Pridobivamo jih neposredno od podjetij in drugih organizacij.

SOURCES AND METHODS OF DATA COLLECTION

Data on gross fixed capital formation and current expenditure for environmental protection are the result of annual collections of data by the Statistical Office of the Republic of Slovenia (INV-01), gathered directly from enterprises and other organizations.

ZAJETJE

V tabelah so navedeni podatki za podjetja in druge organizacije (zajete le pravne osebe, ki so bile pred lastninskimi spremembami v druűbeni, zadruűni ali meöani lasti). Prikazani so po organizacijskem naËelu, to je po preteűni dejavnosti in sedeűu investitorja.

COVERAGE

Tables present data for enterprises and other organizations. The data are presented according to the organizational principle, that is according to the predominant activity and location of the investor.

DEFINICIJE

Sploöne definicije so navedene v poglavju o investicijah (28. poglavje).

DEFINITIONS

General definitions are stated in the chapter on gross fixed capital formation (gross investment) (Chapter 28).

Investicije v varstvo okolja so izloËene iz skupnih investicij po znaËaju graditve in so prikazane posebej. Sem spadajo investicije v zemljiöËa, stavbe in druge gradnje, v stroje, naprave in v opremo za:

- zbiranje, prevoz, obdelavo, odlaganje in skladiöËenje odpadkov;
- izogibanje odplakam, zmanjöanje koliËine ali prepreËevanje odplak in za varstvo povröinskih vod;
- zmanjöanje ali prepreËevanje hrupa ali izogibanje hrupu;
- odstranitev ali zmanjöanje koliËine snovi iz odpadnih plinov, ki kvarijo zrak, ali za izogibanje tem snovem;
- varovanje prsti in podzemnih vod;
- varovanje narave in pokrajine.

TekoËi izdatki za varstvo okolja so vsi izdatki v zvezi z napravami in opremo za varovanje okolja, s katerimi se prepreËuje, odstranjuje ali zmanjöuje ökodljive vplive podjetij na okolje (brez investicijskih izdatkov in amortizacije), ter drugi izdatki (za naËrtovanje, raziskave, razvoj ipd.).

Gross fixed capital formation in environmental protection *is separated from gross fixed capital formation by kind of construction and is shown separately. Here belongs investment in land, buildings and other constructions, machinery, devices and equipment for:*

- *collecting, transport, processing, depositing and storage of waste,*
- *avoiding, reducing or preventing the burdening of waste waters and for protection of surface waters,*
- *reduction, avoidance or removal of noise,*
- *removal, avoidance or reduction of waste gas matters which are foreign to air,*
- *protection of soil and underground waters,*
- *protection of nature and landscape.*

Current expenditure *for environmental protection is all expenditure connected with devices and equipment for environmental protection with which to avoid, remove or reduce harmful influence of enterprises on environment (without investment expenditure and amortization), as well as other expenditure (for planning, research, development, etc.).*

1) Glej metodoloöka pojasnila. ätevilka v oklepaju pomeni, da se kakovost vode nekoliko nagiba v razred v oklepaju, vendar s poudarkom na oceni zunaj oklepaja.
See Methodological explanations. Number in parenthesis means, that the quality of water inclines to be the class in parenthesis, but with main emphasis on the values which are not in parenthesis.

2 Ocena po vsebnosti teűkih kovin v sedimentu.
Estimation by the content of heavy metals in the sediment.

1) Stanje 31. 12. 1994.
As of 31. 12. 1994.
2) Stanje 31. 12. 1996.
As of 31. 12. 1996.
3) Povröine statistiËnih regij se spreminjajo skladno s povröinami obËin zaradi natanËnejöih meritev. Povröine obËin so zraËunane iz digitaliziranih obrisov posameznega prostorskega okoliöa na kartah 1:5000 in 1:10000 in so nato seötete na podlagi pripadnosti prostorskega okoliöa viöji prostorski enoti.
Areas of statistical regions change in accordance with areas of municipalities due to more detailed measurements. Areas of municipalities are calculated from digitalised outlines of individual areas on maps 1:5000 and 1:10000 and then added on the basis of affiliation to the higher unit.
4) ObËina ZreËe sega delno v Savinjsko in delno v Podravsko statistiËno regijo.
Municipality ZreËe extends partly to Savinjska and partly to Podravska statistical region.
5) ObËina äkocjan sega delno v Spodnjeposavsko in delno v Dolenjsko statistiËno regijo.
Municipality äkocjan extends partly to Spodnjeposavska and partly to Dolenjska statistical region.
6) ObËina Trebnje sega delno v Spodnjeposavsko in delno v Dolenjsko statistiËno regijo.
Municipality Trebnje extends partly to Spodnjeposavska and partly to Dolenjska statistical region.
