17 RUDARSTVO IN PREDELOVALNE DEJAVNOSTI MINING AND MANUFACTURING

št./No 34

POSLOVNE TENDENCE V PREDELOVALNIH DEJAVNOSTIH, SLOVENIJA, OKTOBER 2005

BUSINESS TENDENCY IN MANUFACTURING, SLOVENIA, OCTOBER 2005

- Desezonirana vrednost kazalnika zaupanja v predelovalnih dejavnostih je bila v oktobru 2005 enaka kot v septembru 2005. V primerjavi z istim mesecem lani je bila nižja za 3 odstotne točke, v primerjavi z lanskim povprečjem je vrednost padla za 2 odstotni točki.
- Na kazalnik zaupanja so vplivala višja raven skupnih naročil in nižja proizvodna pričakovanja ter zaloge končnih izdelkov.
- Kazalniki stanj so se v primerjavi s preteklim mesecem večinoma izboljšali, pričakovanja za naslednje tri mesece so večinoma ugodna.
- In October 2005 the seasonally adjusted value of the confidence indicator remained the same as in August 2005. In comparison to October 2004 the value was down by 3 percentage points and 2 percentage points below last year's average.
- The confidence indicator was influenced by the rise of overall order-books and the fall of production expectations and stocks of finished products.
- The observed indicators for appreciation of the situation mainly improved in comparison to the previous month. The expectations for the next three months are mostly favourable.

1. KAZALNIK ZAUPANJA ¹⁾ V SLOVENIJI IN EU ²⁾, JANUAR 1996 - OKTOBER 2005

1. CONFIDENCE INDICATOR ¹⁾ IN SLOVENIA AND EU ²⁾, JANUARY 1996 – OCTOBER 2005

1) Kazalnik zaupanja je povprečje odgovorov (ravnotežij) na vprašanja o proizvodnih pričakovanjih, skupnih naročilih in zalogah končnih izdelkov (obrnjen predznak). Podatki so desezonirani. The confidence indicator is an average of responses (balances) to questions on production expectations, overall order-books and stocks of finished products (the latter with inverted sign). Data are seasonally adjusted.

4. GIBANJE EKONOMSKIH KAZALNIKOV V PREDELOVALNIH DEJAVNOSTIH V SLOVENIJI IN EU, 1. ČETRTLETJE 1996 - 4. ČETRTLETJE 2005 - ČETRTLETNI PODATKI

EVOLUTION OF ECONOMIC INDICATORS IN MANUFACTURING IN SLOVENIA AND EU, 1st QUARTER 1996 – 4th QUARTER 2005 - QUARTERLY DATA

4.1 Omejitve v proizvodnji v Sloveniji

Production obstacles in Slovenia

Graf o omejitvah v proizvodnji prikazuje delež zaposlenih, ki se soočajo z naslednjimi skupinami problemov:

- Skupina **"šibko povpraševanje"** zajema zaposlene, ki imajo probleme z nezadostnim domačim povpraševanjem, nezadostnim tujim povpraševanjem in/ali konkurenčnim uvozom.
- Skupina **"ni omejitev"** zajema zaposlene, ki nimajo nobenih proizvodnih težav.
- Skupina **"težave s preskrbo"** zajema zaposlene, ki imajo probleme s pomanjkanjem delavcev, surovin, izdelkov, opreme in/ali finančne probleme. Ta skupina zajema še zaposlene, ki jih pri proizvodnji omejuje tudi nejasna zakonodaja in negotove gospodarske razmere.
- Skupina **"hude omejitve"** zajema zaposlene, ki imajo hkrati težave tako z dejavniki iz skupine "šibko povpraševanje" kot tudi z dejavniki iz skupine "težave s preskrbo".

The chart on production obstacles shows the share of employees who are facing the following groups of problems:

- Group **"weakness in demand"** includes employees who are facing insufficient domestic and foreign demand and competitive imports.
- Group **"no limits"** includes employees with no limits to production.
- Group **"supply difficulties"** includes employees who are facing shortage of labour in general, shortage of raw materials and semi-finished products, lack of appropriate equipment, problems with unpaid bills, financial problems and unclear economic conditions.
- Group **"severe obstacles"** includes employees who are facing at the same time problems from the group "weakness in demand" and those from the group "supply difficulties".

4.2 Ustreznost proizvodnih zmogljivosti glede na pričakovano povpraševanje v naslednjih 12 mesecih, Slovenija in EU

Assessment of current production capacities according to expected demand in the next 12 months, Slovenia and EU

4.3 Izkoriščenost proizvodnih zmogljivosti v Sloveniji in v EU¹

Current capacity utilisation in Slovenia and EU¹

4.4 Konkurenčni položaj na domačem trgu, trgih držav članic EU in trgih zunaj EU²

Competitive position on the domestic market, foreign market inside the EU and outside the EU²

¹ Prikazana je povprečna stopnja izkoriščenosti zmogljivosti (tehnično-tehnoloških, človeških itd.) / The chart shows the average capacity utilisation (technology, human resources, etc)

² Podatki so desezonirani. / Data are seasonally adjusted.

METODOLOŠKA POJASNILA

NAMEN STATISTIČNEGA RAZISKOVANJA

Namen kvalitativne Ankete o poslovnih tendencah (PA-IND/M) je mesečno pridobivanje informacij o trenutnih stanjih glavnih ekonomskih kazalnikov ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati anket so osnova za izračun kazalnika zaupanja v predelovalnih dejavnostih in kazalnika gospodarske klime, ki vključuje poleg kazalnika zaupanja v predelovalnih dejavnostih tudi kazalnik zaupanja pri potrošnikih in kazalnik zaupanja v trgovini na drobno.

Panelno anketo o poslovnih tendencah v predelovalnih dejavnostih izvajamo v Sloveniji od aprila 1995 s poenotanim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kot jo izvajajo v državah članicah Evropske unije že več desetletij. Zato so vsi podatki neposredno primerljivi.

ENOTA OPAZOVANJA

Opazujemo podjetja, ki so razvrščena v predelovalne dejavnosti, to je v oddelke Standardne klasifikacije dejavnosti (SKD) od 15 do 36, ter so bila izbrana v panel podjetij na podlagi dveh meril:

- velikosti podjetja (število zaposlenih, skladno z zakonom o gospodarskih družbah) in
- razvrstitve podjetja po SKD-ju.

VIRI

Na vprašalnik odgovarjajo direktorji podjetij ali drugi vodilni delavci med 1. in 10. v mesecu. Rezultate pa objavimo že okoli 20. v istem mesecu.

ZAJETJE

V panelni vzorec smo zajeli vsa velika podjetja, 59 % srednjevelikih (ali 64 % zaposlenih) in 18 % malih podjetij (ali 22 % zaposlenih). Panelni vzorec pokriva 39 % podjetij vzorčnega okvira ali 76 % zaposlenih v predelovalnih dejavnostih.

NAČIN ZBIRANJA PODATKOV

Anketo izvajamo mesečno po pošti, vsako četrletje (januar, april, julij in oktober) pa mesečni anketi dodamo še sedem četrletnih vprašanj.

UTEŽEVANJE ODGOVOROV

Odgovori so uteženi tako, da odražajo relativno pomembnost posameznega podjetja v vzorcu. Znotraj oddelkov SKD so odgovori uteženi s številom zaposlenih.

NEODGOVORI

Neodgovore vsak mesec obdelamo skladno s poenoteno metodologijo; delež neodgovorov se giblje med 3 % in 15 % (povprečno 9 %).

DEFINICIJE

Grafikoni prikazujejo ravnotežja po posameznih vprašanjih. Ravnotežje je razlika med pozitivnimi in negativnimi odgovori, izražena v odstotkih.

METHODOLOGICAL EXPLANATIONS

PURPOSE OF STATISTICAL SURVEY

The purpose of the qualitative Survey on Business Tendency (hereinafter: PA-IND/M) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The results of the survey are the basis for evaluation of the confidence indicator in manufacturing and latter on also for the sentiment indicator, which also includes the consumer confidence indicator and the confidence indicator in retail trade.

We have been carrying out the Survey on Business Tendency in Manufacturing in Slovenia since April 1995 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

OBSERVATION UNITS

We are monitoring units that are registered in manufacturing - divisions 15 to 36 of the Standard Classification of Activities (SKD). They were selected into the panel by two criteria:

- the size of the enterprise (the number of employees in accordance with the Companies Act) and
- the classification of the enterprise according to the SKD.

SOURCES

Respondents are managers of enterprises or other executives. They respond between the 1st and the 10th in the month. Results are published approximately on the 20th day of the current month.

COVERAGE

The panel includes all large enterprises, 59% of medium-sized enterprises (or 64% of employees) and 18% of small enterprises (or 22% of employees); the panel covers 39% of the enterprises of the studied population or 76% of employees in manufacturing.

METHOD OF DATA COLLECTING

The survey is carried out monthly by mail; we include seven additional questions to the monthly survey each quarter (January, April, July and October).

WEIGHTS FOR RESPONSES

Responses to individual questions are weighted so that they reflect the relative importance of an individual enterprise in the panel. Inside divisions of the Standard Classification of Activities (SKD), responses are weighted with the number of employees.

NON-RESPONSES

Non-responses are processed every month according to the harmonised methodology and vary between 3% and 15% (9% on average).

DEFINITIONS

The **charts** show the balance by individual questions. The balance is the difference between positive and negative answers, expressed in percent. The

Ravnotežja prikazuje gibanje opazovanih ekonomskih spremenljivk (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskih kazalnikov.

Ko so prikazane daljše **časovne vrste** podatkov ali primerjave kazalnikov z EU-jem, so vrednosti desezonirane. To so vrednosti, pri katerih je izključen vpliv sezone, vsebujejo pa trend-cikel in naključno komponento. Podatki za EU so desezonirani z metodo DAINITIES, za Slovenijo pa z metodo TRAMO/SEATS, ki temelji na modelih ARIMA. Pri oblikovanju modelov je upoštevano časovno obdobje od maja 1995 do januarja 2005, pri časovnih vrstah pričakovan izvoz, pričakovano skupno povpraševanje in povprečno število mesecev zagotovljene proizvodnje od januarja 1997 do januarja 2005, pri časovni vrsti stopnja izkoriščenosti zmogljivosti od drugega četrtega 1995 do prvega četrtega 2005, pri časovnih vrstah konkurenčni položaj podjetja na domačem trgu, konkurenčni položaj podjetja na trgih držav članic Evropske unije in konkurenčni položaj podjetja na trgih zunaj Evropske unije pa od prvega četrtega 2001 do prvega četrtega 2005. Zaradi narave podatkov se model za leto 2005 razlikuje v primerjavi z modelom za leto 2004 pri skupnih naročilih. Pri časovnih vrstah pričakovano zaposlovanje in stopnja izkoriščenosti zmogljivosti sezonska komponenta ni prisotna.

Kazalnik zaupanja je povprečje odgovorov (ravnotežij) na vprašanja o proizvodnih pričakovanjih, skupnih naročilih in zalogah končnih izdelkov. (obrnjen predznak).

OBJAVLJANJE PODATKOV

Sodelujoči v anketi prejmejo informacijo o oddelku SKD, v katerega se po dejavnosti razvrščajo in o predelovalnih dejavnostih, vendar le, če so izpolnili vprašalnik za tekoči mesec.

Drugim uporabnikom so dostopni podatki na ravni predelovalnih dejavnosti in njenih oddelkov in po velikostnih razredih podjetij. Podatki so mesečno objavljeni v Statističnih informacijah – Poslovne tendence v predelovalnih dejavnostih in v podatkovni bazi SI-STAT na naslovu <http://www.stat.si/>.

MESEČNA VPRAŠANJA

- Proizvodni ritem v opazovanem mesecu: živahnejši, enak, šibkejši?
- Ocena ravni izvoznih naročil: višja kot normalno, normalna, nižja kot normalno?
- Ocena ravni skupnih naročil: višja kot normalno, normalna, nižja kot normalno?
- Ocena ravni zaloga končnih izdelkov: višja kot normalno, normalna, nižja kot normalno?
- Pričakovana proizvodnja v naslednjih 3 mesecih: naraščala, nespremenjena, padala?
- Pričakovane cene v naslednjih 3 mesecih: naraščale, nespremenjene, padale?
- Pričakovano število zaposlenih v naslednjih 3 mesecih: povečalo, ostalo nespremenjeno, zmanjšalo?
- Pričakovani izvoz v naslednjih 3 mesecih: naraščal, nespremenjen, padal?
- Pričakovano skupno povpraševanje v naslednjih 3 mesecih: krepilo, enako, slabelo?
- Ob sedanjem proizvodnem ritmu je zagotovljena proizvodnja za: mesecev?

balance shows the movement of observed economic variables (present situation and future expectations), and not the real size of economic indicators.

In the charts with longer **time series** or by comparisons with EU indicators, data are seasonally adjusted. Values are adjusted for the seasonal component, but include the trend-cycle component and the irregular component. Data for EU are seasonally adjusted by the DAINITIES method and for Slovenia by the TRAMO/SEATS method, which is based on ARIMA models. The designing of the models is based on the time period from May 1995 to January 2005, the series expected export order-books, expected total demand and average assured production from January 1997 to January 2005, the series level of capacity utilisation from the second quarter of 1995 to the first quarter of 2005, and the series competitive position on the domestic market, competitive position on the foreign markets inside the EU and competitive position on the markets outside the EU from the first quarter of 2001 to the first quarter of 2005. Because of the nature of data, the model for 2005 differs from the model used in 2004 by overall order-books. In the time series expected employment and level of capacity utilisation the seasonal component is not present.

The confidence indicator is defined as the arithmetic mean of the answers (balances) to the questions on production expectation, assessment of overall order-books and assessment of stocks of finished products (the latter with an inverted sign).

PUBLISHING

Respondents participating in the survey receive the special information for the division in which they are classified and for manufacturing. They receive it only if they responded in the current month.

Other users can get data for manufacturing and its divisions and data for different size groups of enterprises. Data are published in the monthly Rapid Reports – Business tendency in manufacturing and in the database SI-STAT which is available on <http://www.stat.si/eng/>.

MONTHLY QUESTIONS

- Production rhythm in the observed month: increased, remain unchanged, decreased?
- Assessment of current export order-books: above normal, normal, below normal?
- Assessment of current overall order-books: above normal, normal, below normal?
- Assessment of current stock of finished products: above normal, normal, below normal?
- Production expectations over the next 3 months: increase, remain unchanged, decrease?
- Selling prices expectations over the next 3 months: increase, remain unchanged, decrease?
- Firm's total employment expectations over the next 3 months: increase, remain unchanged, decrease?
- Export orders expectations over the next 3 months: increase, remain unchanged, decrease?
- Expected total demand over the next 3 months: increase, remain unchanged, decrease?
- Duration of production assured by current overall order books: for ... months?

ČETRTLETNA VPRAŠANJA

- Omejitveni dejavniki v proizvodnji: ni omejitev, nezadostno domače povpraševanje, nezadostno tuje povpraševanje, konkurenčen uvoz, pomanjkanje delavcev na splošno, pomanjkanje usposobljenih delavcev, pomanjkanje surovin, pomanjkanje polizdelkov, pomanjkanje ustrezne opreme, neplačništvo, finančni problemi, nejasna gospodarska zakonodaja, negotove gospodarske razmere, ostalo?
- Sedanje proizvodne zmogljivosti: prevelike, ustrezne, premajhne?
- Sedanja stopnja izkoriščenosti zmogljivosti: odstotkov?
- Konkurenčni položaj podjetja na domačem trgu v zadnjih 3 mesecih: boljši, nespremenjen, slabši?
- Konkurenčni položaj podjetja na trgih držav članic Evropske Unije v zadnjih 3 mesecih: boljši, nespremenjen, slabši?
- Konkurenčni položaj podjetja na trgih izven Evropske Unije v zadnjih 3 mesecih: boljši, nespremenjen, slabši?
- Obseg novih naročil se je v zadnjih 3 mesecih: povečal, ostal nespremenjen, zmanjšal?

KOMENTAR

Oktober 2005 so direktorji ocenili tendence v predelovalnih dejavnostih enako kot pretekli mesec. Desezonirana vrednost kazalnika zaupanja je bila v primerjavi s preteklim mesecem enaka, v primerjavi z istim mesecem lani je bila nižja za 3 odstotne točke in 2 odstotni točki pod lanskim povprečjem.

PROIZVODNJA in PRIČAKOVANA PROIZVODNJA

Desezonirana vrednost kazalnika proizvodnje je bila v primerjavi s preteklim mesecem višja za 1 odstotno točko. Glede na isti mesec lani je bila enaka in 5 odstotnih točk pod lanskim povprečjem.

Desezonirana vrednost kazalnika proizvodnih pričakovanj za naslednje 3 mesece je bila v primerjavi s preteklim mesecem nižja za 2 odstotni točki. V primerjavi z istim mesecem lani je bila nižja za 9 odstotnih točk in 4 odstotne točke pod lanskim povprečjem.

IZVOZNA NAROČILA in PRIČAKOVANI IZVOZ

Desezonirana vrednost kazalnika ravni izvoznih naročil je bila v primerjavi s preteklim mesecem višja za 4 odstotne točke. Glede na isti mesec lani je bila nižja za 4 odstotne točke in 3 odstotne točke nad lanskim povprečjem.

Desezonirana vrednost kazalnika pričakovanega izvoza za naslednje 3 mesece je bila v primerjavi s preteklim mesecem nižja za 7 odstotnih točk. V primerjavi z istim mesecem lani je bila nižja za 9 odstotnih točk in 2 odstotni točki pod povprečjem lanskega leta.

SKUPNA NAROČILA in PRIČAKOVANO SKUPNO POVPRASEVANJE

Desezonirana vrednost kazalnika ravni skupnih naročil je bila v primerjavi s preteklim mesecem višja za 5 odstotnih točk. Glede na isti mesec lani je bila enaka in 3 odstotne točke nad povprečjem lanskega leta.

Desezonirana vrednost kazalnika pričakovanega skupnega povpraševanja za naslednje 3 mesece je bila v primerjavi s preteklim mesecem višja za 3 odstotne točke. Glede na isti mesec lani je bila nižja za 9 odstotnih točk in enaka povprečju lanskega leta.

ZALOGE KONČNIH IZDELKOV

Desezonirana vrednost kazalnika ravni zalog končnih izdelkov je bila v

QUARTERLY QUESTIONS

- Limits to production: none, insufficient domestic demand, insufficient foreign demand, competitive imports, shortage of labour in general, shortage of skilled labour, shortage of raw materials, shortage of semi-finished products, lack of appropriate equipment, problems with unpaid bills, financial problems, unclear economic legislation, uncertain economic conditions, other?
- Assessment of current production capacity: more than sufficient, sufficient, not sufficient?
- Current level of capacity utilisation: in percentage of full capacity?
- Competitive position on the domestic market over the past 3 months: improved, remained unchanged, deteriorated?
- Competitive position on the foreign markets inside the EU over the past 3 months: improved, remained unchanged, deteriorated?
- Competitive position on the markets outside the EU over the past 3 months: improved, remained unchanged, deteriorated?
- New orders over the past 3 months: increased, remain unchanged, decreased?

COMMENT

In October 2005, managers estimated business tendencies in manufacturing as being the same as in the previous month. The seasonally adjusted value of the confidence indicator remained the same as in September 2005. Compared to October 2004 the value of the confidence indicator fell by 3 percentage points and was 2 percentage points below last year's average.

PRODUCTION and PRODUCTION EXPECTATIONS

The seasonally adjusted value of the production indicator was up by 1 percentage point compared to the previous month. Compared to October 2004 it was the same and 5 percentage points below last year's average.

The seasonally adjusted value of the production expectations for the next three months fell by 2 percentage points compared to the previous month. Compared to October 2004 it was down by 9 percentage points and 4 percentage points below last year's average.

EXPORT ORDER-BOOKS and EXPECTED EXPORT ORDER-BOOKS

The seasonally adjusted value of the export order-books indicator was up by 4 percentage points compared to the previous month. Compared to October 2004 it was down by 4 percentage points and compared to last year's average it was up by 3 percentage points.

The seasonally adjusted value of the expected export order-books in the next three months was down by 7 percentage points compared to the previous month. Compared to October 2004 it was down by 9 percentage points and 2 percentage points below last year's average.

OVERALL ORDER-BOOKS and EXPECTED TOTAL DEMAND

The seasonally adjusted value of the overall order-books indicator rose by 5 percentage points compared to the previous month. Compared to October 2004 it was the same and 3 percentage points above last year's average.

The seasonally adjusted value of the expected total demand for the next three months rose by 3 percentage points compared to the previous month. Compared to October 2004 it was down by 9 percentage points and equal to last year's average.

STOCKS OF FINISHED PRODUCTS

The seasonally adjusted value of the stocks of finished products indicator fell

primerjavi s preteklim mesecem nižja za 3 odstotne točke. Glede na isti mesec lani je bila enaka in 1 odstotno točko nad povprečjem lanskega leta.

PRIČAKOVANE CENE

Desezonirana vrednost kazalnika cenovnih pričakovanj za naslednje 3 mesece je bila višja za 4 odstotne točke glede na pretekli mesec. V primerjavi z istim mesecem lani je bila nižja za 5 odstotnih točk in 1 odstotno točko pod povprečjem lanskega leta.

ZAGOTOVLJENA PROIZVODNJA

Ob oktobrskem proizvodnem ritmu imajo podjetja zagotovljeno proizvodnjo v povprečju za 4,2 meseca. To je za 0,1 meseca manj kot lani v tem mesecu in 0,2 meseca pod povprečjem lanskega leta.

Največ podjetij (22,5 %) ima proizvodnjo zagotovljeno v povprečju za 3 mesece. Sledijo podjetja (17,1 %), ki imajo proizvodnjo zagotovljeno v povprečju za 2 mesece, in podjetja (15,9 %), ki imajo proizvodnjo zagotovljeno v povprečju za več kot 10 mesecev. Za pol meseca ima zagotovljeno proizvodnjo v povprečju 7,3 % podjetij, ob oktobrskem proizvodnem ritmu pa nima zagotovljene proizvodnje v povprečju 2,0 % podjetij.

PRIČAKOVANO ZAPOSLOVANJE

Vrednost kazalnika pričakovanj glede zaposlovanja v naslednjih 3 mesecih je bila enaka glede na pretekli mesec. V primerjavi z istim mesecem lani je bila nižja za 6 odstotnih točk in 5 odstotnih točk pod povprečjem lanskega leta.

OMEJITVE V PROIZVODNJI

V oktobru 2005 ni imelo omejitev v proizvodnji 27 % zaposlenih (oziroma 17 % podjetij). Glede na isti mesec lani je bil odstotek višji za 8 odstotnih točk in 8 odstotnih točk nad lanskim povprečjem.

Sledili so omejitveni dejavniki iz skupine šibko povpraševanje. V tem mesecu se je z njimi srečevalo 26 % zaposlenih (oziroma 29 % podjetij), kar je za 2 odstotni točki manj kot isti mesec lani in enako lanskemu povprečju.

Z dejavniki iz skupine hude omejitve se je v tem mesecu srečalo 24 % zaposlenih (oziroma 26 % podjetij) v predelovalnih dejavnostih. Glede na isti mesec lani je bil odstotek višji za 1 odstotno točko in za 4 odstotne točke pod lanskim povprečjem.

V tem mesecu se je z omejitvenimi dejavniki iz skupine težave s preskrbo spopadalo 23 % zaposlenih (oziroma 28 % podjetij), kar je za 7 odstotnih točk manj kot lani v tem mesecu in 5 odstotnih točk pod povprečjem lanskega leta.

Podrobnejši pregled omejitvenih dejavnikov v proizvodnji pokaže, da je/so oktobra 2005¹:

- 33 % zaposlenih (ali 30 % podjetij) omejevalo nezadostno tuje povpraševanje;
- 28 % zaposlenih (ali 39 % podjetij) omejevalo nezadostno domače povpraševanje;
- 20 % zaposlenih (ali 22 % podjetij) omejeval konkurenčni uvoz;
- 17 % zaposlenih (ali 19 % podjetij) omejevalo pomanjkanje usposobljenih delavcev;
- 14 % zaposlenih (ali 21 % podjetij) omejevale nepravilne obveznosti iz poslovanja;

by 3 percentage points compared to the previous month. Compared to October 2004 it was the same and compared to last year's average it was up by 1 percentage point.

SELLING PRICE EXPECTATIONS

The seasonally adjusted value of selling price expectations for the next three months rose by 4 percentage points compared to the previous month. Compared to October 2004 it was down by 5 percentage points and was 1 percentage point below last year's average.

ASSURED PRODUCTION

With the same production rhythm as in October 2005, production in enterprises is assured on average for the next 4.2 months. This is 0.1 month less than in October 2004 and 0.2 month below last year's average.

In most enterprises (22.5%) production is assured for three months. They are followed by enterprises whose production is assured for two months (17.1%) and those whose production is assured for more than ten months (15.9%). Should the October production rhythm continue, 7.3% of enterprises have production assured for half a month while 2.0% of enterprises have no assured production.

EXPECTED EMPLOYMENT

The value of expected employment for the next three months remained the same as in the previous month. Compared to October 2004 it was down by 6 percentage points and 5 percentage points below last year's average.

LIMITS TO PRODUCTION

In October 2005, 27% of employees (17% of enterprises) faced no limits, which is 8 percentage points more than in October 2004 and 8 percentage points above last year's average.

The second most important limits were demand difficulties. In October 2005, 26% of employees (29% of enterprises) faced these limits, which is 2 percentage points less than in October 2004 and equal to last year's average.

The third most important limits were severe obstacles. In October 2005, 24% of employees (26% of enterprises) faced these limits, which is 1 percentage point more than in October 2004 and 4 percentage points below last year's average.

In October 2005, 23% of employees (28% of enterprises) faced supply difficulties. That is 7 percentage points less than in October 2004 and 5 percentage points below last year's average.

A more detailed overview of limits to production shows that in October 2005¹:

- 33% of employees (or 30% of enterprises) were limited by insufficient foreign demand,
- 28% of employees (or 39% of enterprises) were limited by insufficient domestic demand,
- 20% of employees (or 22% of enterprises) were limited by competitive imports,
- 17% of employees (or 19% of enterprises) were limited by shortage of skilled labour,
- 14% of employees (or 21% of enterprises) were limited by problems with unpaid bills,

¹ Podjetja lahko označijo več dejavnikov, ki omejujejo njihovo proizvodnjo, zato vsota odstotkov ni 100.
Enterprises can select several factors limiting their business, so the total is not 100%.

- 10 % zaposlenih (ali 12 % podjetij) imelo težave zaradi negotovih gospodarskih razmer;
- 9 % zaposlenih (ali 8 % podjetij) omejevalo pomanjkanje ustrezne opreme;
- 8 % zaposlenih (ali 7 % podjetij) omejevali drugi dejavniki, npr. nelojalna konkurenca, tečajna politika, pomanjkanje zmogljivosti, visoki stroški dela;
- 6 % zaposlenih (ali 12 % podjetij) omejevali finančni problemi, kot so neugodni pogoji kreditiranja, težave pri pridobivanju kreditov itd;
- 5 % zaposlenih (ali 7 % podjetij) omejevala nejasna gospodarska zakonodaja;
- 4 % zaposlenih (ali 6 % podjetij) omejevalo pomanjkanje surovin;
- 3 % zaposlenih (ali 6 % podjetij) omejevalo pomanjkanje delavcev na splošno;
- 1 % zaposlenih (ali 1 % podjetij) omejevalo pomanjkanje polizdelkov.

Največja omejitev v proizvodnji je nezadostno tuje povpraševanje, sledijo nezadostno domače povpraševanje, konkurenčni uvoz in pomanjkanje usposobljenih delavcev.

IZKORIŠČENOST ZMOGLJIVOSTI

Oktohorska povprečna izkoriščenost zmogljivosti je bila 82,8-odstotna oziroma najvišja v celotnem opazovanem obdobju. V primerjavi z julijem 2005 je bila višja za 1,0 odstotno točko, v primerjavi z istim mesecem lani je bila nižja za 1,3 odstotne točke.

USTREZNOST PROIZVODNIH ZMOGLJIVOSTI

Ustreznost proizvodnih zmogljivosti je bila glede na pričakovano povpraševanje v naslednjih dvanajstih mesecih za 6 odstotnih točk nižja kot v juliju 2005. V primerjavi z istim mesecem lani je bila nižja za 1 odstotno točko in 2 odstotni točki pod povprečjem lanskega leta.

KONKURENČNI POLOŽAJ

Desezonirana vrednost konkurenčnega položaja podjetij na domačem trgu je bila enaka kot julija 2005. Glede na isti mesec lani je bila nižja za 2 odstotni točki in 2 odstotni točki pod lanskim povprečjem.

Desezonirana vrednost konkurenčnega položaja podjetij na trgih držav članic EU je bila v primerjavi z julijem 2005 višja za 2 odstotni točki. Glede na isti mesec lani je bila višja za 3 odstotne točke in 2 odstotni točki nad lanskim povprečjem.

Desezonirana vrednost konkurenčnega položaja podjetij na trgih zunaj EU je bila v primerjavi z julijem 2005 nižja za 1 odstotno točko. Glede na isti mesec lani je bila višja za 5 odstotnih točk in za 3 odstotne točke nad lanskim povprečjem.

- 10% of employees (or 12% of enterprises) were limited by uncertain economic conditions,
- 9% of employees (or 8% of enterprises) were limited by lack of appropriate equipment,
- 8% of employees (or 7% of enterprises) were limited by other factors such as unfair competition, exchange-rate policy, lack of capacity, high labour costs,
- 6% of employees (or 12% of enterprises) were limited by financial problems such as unfavourable credit terms, difficulties in obtaining credits, etc.,
- 5% of employees (or 7% of enterprises) were limited by unclear economic legislation,
- 4% of employees (or 6% of enterprises) were limited by shortage of raw materials,
- 3% of employees (or 6% of enterprises) were limited by shortage of labour in general,
- 1% of employees (or 1% of enterprises) was limited by shortage of semi-finished products.

The most important factor limiting production is insufficient foreign demand, followed by insufficient domestic demand, competitive imports and lack of appropriate equipment.

CAPACITY UTILISATION

In October 2005 the average capacity utilisation was 82.8%, which is 1.0 percentage point higher than in July 2005 and the best result since we started conducting the survey. Compared to October 2004 and last year's average it was up by 1.3 percentage point.

CURRENT PRODUCTION CAPACITY

The assessment of current production capacity in comparison with expected demand in the next 12 months was lower by 6 percentage points compared to July 2005. Compared to October 2004 it was down by 1 percentage point and 2 percentage points below last year's average.

COMPETITIVE POSITION

The seasonally adjusted assessment of competitive position on the domestic market was the same as in July 2005. Compared to October 2004 and last year's average it was down by 2 percentage points.

Compared to July 2005, the seasonally adjusted assessment of enterprise's competitive position on markets of the EU Member States was up by 2 percentage points. It was up by 3 percentage points compared to October 2004 and 2 percentage points above last year's average.

Compared to July 2005, the seasonally adjusted assessment of enterprise's competitive position on the markets outside EU was down by 1 percentage point. Compared to October 2004 it was up by 5 percentage points and 3 percentage points above last year's average.

The business survey is co-financed by the European Commission. However, the European Commission accepts no responsibility or liability whatsoever with regard to the material published in this publication.
