št./No 1

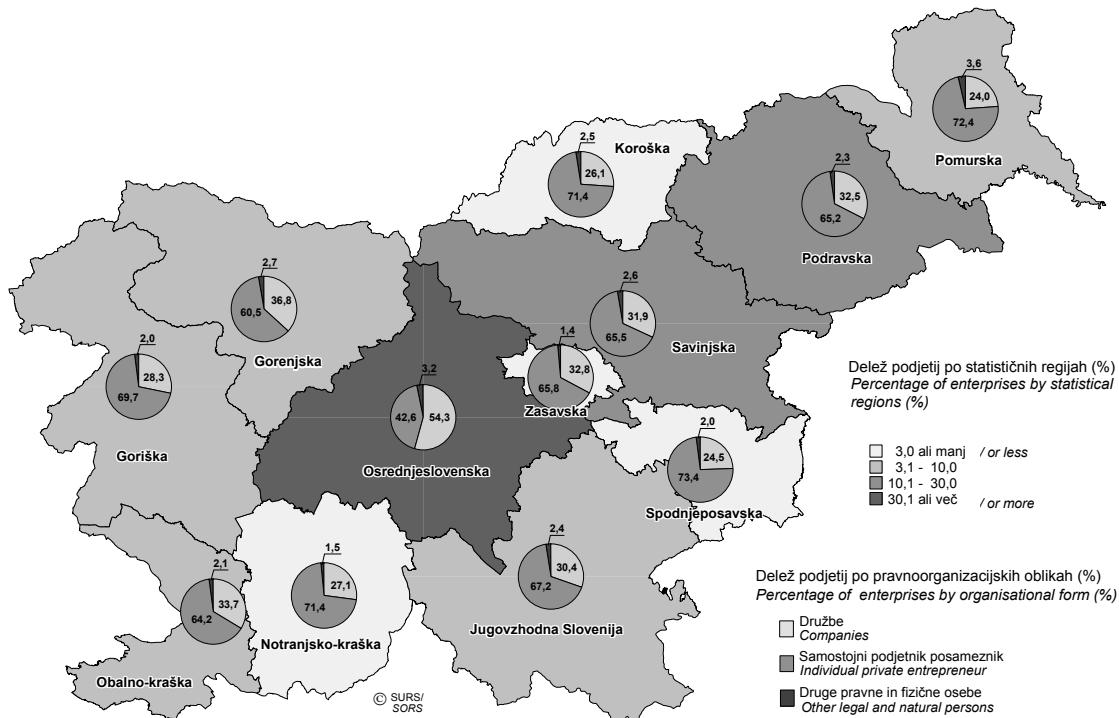

PODJETJA, SLOVENIJA, 2006

ENTERPRISES, SLOVENIA, 2006

- ▶ V letu 2006 je bilo v področjih dejavnosti C-K Standardne klasifikacije dejavnosti (SKD) evidentiranih skupaj 100 569 podjetij, od tega 60,2 % fizičnih in 39,8 % pravnih oseb.
- ▶ Med temi podjetji so prevladovala podjetja, ki po številu zaposlenih spadajo med mikropodjetja (takih podjetij je bilo 92,9 %); podjetja, ki po številu zaposlenih spadajo med velika podjetja, pa so zaposlovala največ oseb, ki delajo (33,9 %), in ustvarila največ prihodka (37,5 %).
- ▶ Skupaj so ustvarila 16 642 212 milijonov SIT prihoda; največji del tega prihodka so ustvarile družbe z omejeno odgovornostjo (55,9 %) in delniške družbe (34,4 %).
- ▶ Od skupno 621 978 oseb, ki delajo v teh podjetjih, jih je bilo največ v predelovalnih dejavnostih (37,9 %); sledile so dejavnosti trgovina in popravila motornih vozil (18,0 %), poslovanje z nepremičninami, najem in poslovne storitve (12,1 %) in gradbeništvo (11,7 %).
- ▶ There were 100,569 enterprises registered in sections of activities C-K of the Standard Classification of Activities (NACE) in 2006; 60.2% of them were natural persons and 39.8% were legal persons.
- ▶ As regards the number of persons employed, micro enterprises prevailed with a 92.9% share, while large enterprises generated most of the turnover (37.5%) and employed the largest number of persons employed (33.9%).
- ▶ Of the total turnover of SIT 16,642,212 million, most was generated by limited liability companies (55.9%) and joint stock companies (34.4%).
- ▶ Of the total of 621,978 persons employed, most were employed in manufacturing (37.9%), wholesale, retail and certain repair (18.0%), real estate, renting and business activities (12.1%) and construction (11.7%).

Slika 1: Delež podjetij (C-K) po statističnih regijah in pravnoorganizacijskih oblikah, Slovenija, 2006

Chart 1: Share of enterprises (C-K) by statistical regions and organisational forms, Slovenia, 2006

V letu 2006 je bilo v področjih dejavnosti C-K (SKD) evidentiranih 100 569 podjetij, od tega 39,8 % pravnih in 60,2 % fizičnih oseb. Med podjetji, organiziranimi kot pravne osebe, so prevladovale družbe z omejeno odgovornostjo (d. o. o.), med podjetji, organiziranimi kot fizične osebe, pa samostojni podjetniki (s. p.). Iz slike 2 je razvidno, da sta bili to najpogostejsi pravnoorganizacijski obliki podjetij, saj je bilo skupaj tako organiziranih kar 93,7 % vseh podjetij.

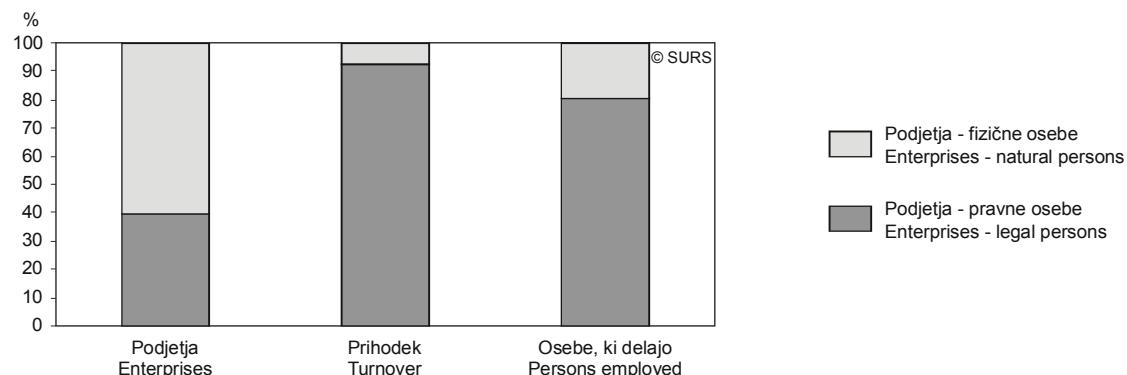

Podjetja, ki so bila organizirana kot pravne osebe, so zaposlovala veliko več oseb, ki delajo, kot podjetja, ki so delovala kot fizične osebe: prihodki je bilo evidentiranih 80,7 % oseb, ki delajo, pri drugih pa le 19,3 %. Z vidika podrobnejše členitve pravnoorganizacijskih oblik podjetij pa so največ oseb, ki delajo, zaposlovale družbe z omejeno odgovornostjo (49,5 %); sledile so delniške družbe (28,5 %) in samostojni podjetniki (18,8 %).

There were 100,569 enterprises registered in sections of activities C-K (NACE) in 2006; 39.8% of them were legal persons and 60.2% were natural persons. The majority of enterprises organised as legal persons were limited liability companies, whereas individual private entrepreneurs prevailed among enterprises organised as natural persons. Chart 2 indicates that those two forms were the most frequent ones; they represented together 93.7% of all enterprises.

Contrary to the number of enterprises - where natural persons predominated - the share of persons employed in enterprises organised as legal persons was much higher than in natural persons. 80.7% of persons employed were registered as working with legal persons and only 19.3% with natural persons. With regard to organisational form, most persons were employed in limited liability companies (49.5%), joint stock companies (28.5%) and as individual private entrepreneurs (18.8%).

Slika 2: Deleži podjetij, njihovega prihodka in oseb, ki delajo, po pravnoorganizacijskih oblikah, Slovenija, 2006

Chart 2: Shares of enterprises, their turnover and persons employed by organisational forms, Slovenia, 2006

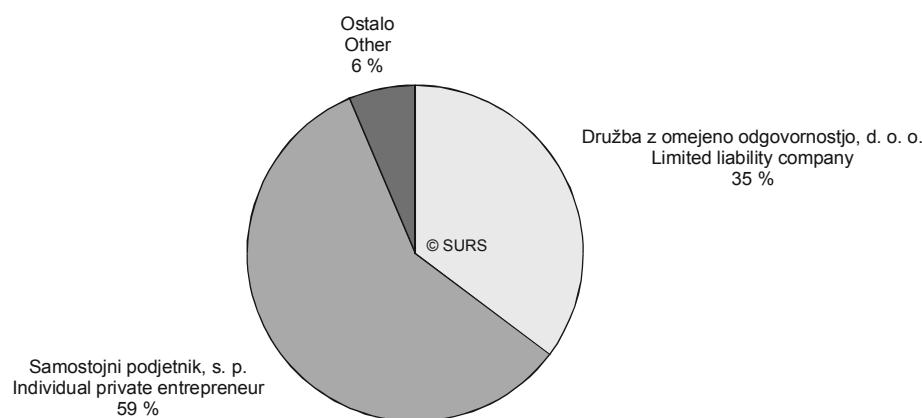

V opazovanem letu so ta podjetja ustvarila skupno 16 642 212 mio. SIT prihodka ali za 11,1 % več kot v preteklem letu. Glede na to, da so podjetja, organizirana kot pravne osebe, zaposlovala štiri petine vseh oseb, ki delajo, je razumljivo, da je bil tudi njihov prispevek k ustvarjenemu prihodku največji (92,7 %). Glavni delež prihodka so tako ustvarile družbe z omejeno odgovornostjo (55,9 %) in delniške družbe (34,4 %), samostojni podjetniki pa so, čeprav so številčno predstavljali več kot polovico vseh podjetij, ustvarili le 7,0 % vsega prihodka.

In the reference year, total turnover of all enterprises amounted to SIT 16,642,212 million, which was 11.1% more than in the previous year. Due to the fact that most persons were employed by enterprises organised as legal persons (80.7%), those enterprises generated 92.7% of total turnover. The greatest share of turnover was generated by limited liability companies (55.9%) and joint stock companies (34.4%), while individual private entrepreneurs generated only 7.0% of total turnover.

Slika 3: Deleži podjetij po pravnoorganizacijskih oblikah, Slovenija, 2006

Chart 3: Shares of enterprises by organisational forms, Slovenia, 2006

Pretežni del podjetij se je ukvarjal z dejavnostmi trgovina in popravilo motornih vozil (23,2 %), poslovanje z nepremičninami, najem in poslovne storitve (23,3 %), predelovalne dejavnosti (18,1 %) ter gradbeništvo (16,7 %). Z dejavnostma rudarstvo in oskrba z elektriko, plinom in vodo se je ukvarjala le peščica podjetij (skupaj 0,5 %).

V letu 2006 je bilo v podjetjih (C-K) evidentiranih skupaj 621.978 oseb, ki delajo; več kot polovica teh oseb (55,8 %) je delala v predelovalnih dejavnostih in v dejavnosti trgovina ter popravila motornih vozil. Ta podjetja so ustvarila dobrski dve tretjini celotnega prihodka (67,3 %).

Dejavnosti gradbeništvo in poslovanje z nepremičninami, najem in poslovne storitve sta zaposlovali približno enako število oseb, ki delajo (okrog 12 %). Delež prihodka, ki so ga ustvarila podjetja, ki so se ukvarjala z dejavnostjo poslovanje z nepremičninami, najem in poslovne storitve, je bil nekoliko višji (8,8 %) od prihodka, ki so ga ustvarila podjetja v dejavnostih gradbeništvo in promet, skladiščenje in zveze (7,8 % in 7,6 %). Najmanj prihodka so ustvarila podjetja v dejavnostih rudarstvo (0,4 %) in gostinstvo (1,8 %).

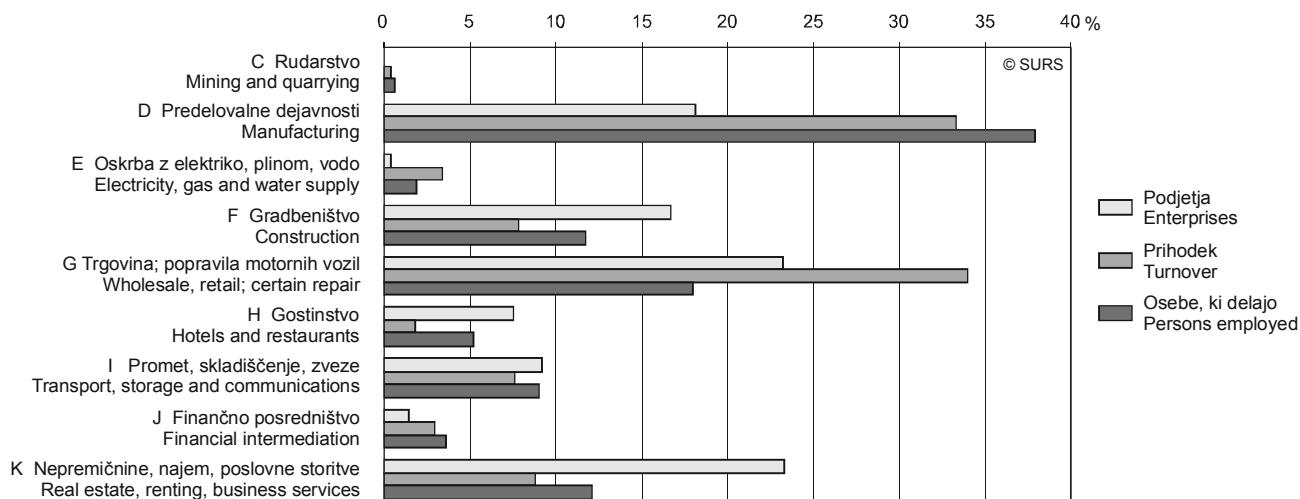

The greatest share of enterprises dealt in wholesale, retail and certain repair (23.2%), real estate, renting and business services (23.3%), manufacturing (18.1%) and construction (16.7%). The smallest shares of enterprises were observed in mining and quarrying (0.1%) and electricity, gas and water supply (0.4%).

More than half (55.8%) of all 621,978 persons employed were registered in manufacturing and wholesale, retail and certain repair. Those enterprises generated more than two thirds (67.3%) of total turnover.

The share of persons employed in construction and real estate, renting and business services was almost the same (around 12%). Enterprises in real estate, renting and business activities generated a slightly higher share of turnover (8.8%) than those in construction (7.8%) and transport, storage and communications (7.6%). The lowest turnover was generated by enterprises in mining and quarrying (0.4%) and hotels and restaurants (1.8%).

Slika 4: Deleži podjetij, njihovega prihodka in oseb, ki delajo, po dejavnostih, Slovenija, 2006

Chart 4: Shares of enterprises, their turnover and persons employed by activities, Slovenia, 2006

Z vidika velikostnih razredov podjetij glede na število v njih zaposlenih oseb, ki delajo, so bila najštevilnejša mikro- (podjetja z največ 9 zaposlenimi) in majhna podjetja (10–49), saj jih je bilo skupaj 98,5 %. Srednje velikih (50–249) in velikih podjetij (podjetja z najmanj 250 zaposlenimi) pa je bilo le 1,5 %, vendar pa so prav ta podjetja skupno zaposlovala dobro polovico vseh oseb, ki delajo, in ustvarila tri petine vsega prihodka.

Največ oseb, ki delajo, so zaposlovala t. i. velika podjetja, in sicer 33,9 %, sledila so mikropodjetja s 27,5 %, srednje velika z 21,1 % in majhna podjetja s 17,5 % zaposlenih.

Več kot polovico (56,9 %) vseh prihodkov so ustvarila podjetja, ki so po svojem prihodku spadala med velika podjetja (torej podjetja z več kot 4000 milijoni SIT prihodka), srednje velika podjetja so prispevala 17,0 % vseh prihodkov, dobro četrtino, 26,1 %, vseh prihodkov pa so ustvarila majhna podjetja (podjetja z manj kot 1000 milijoni SIT prihodka).

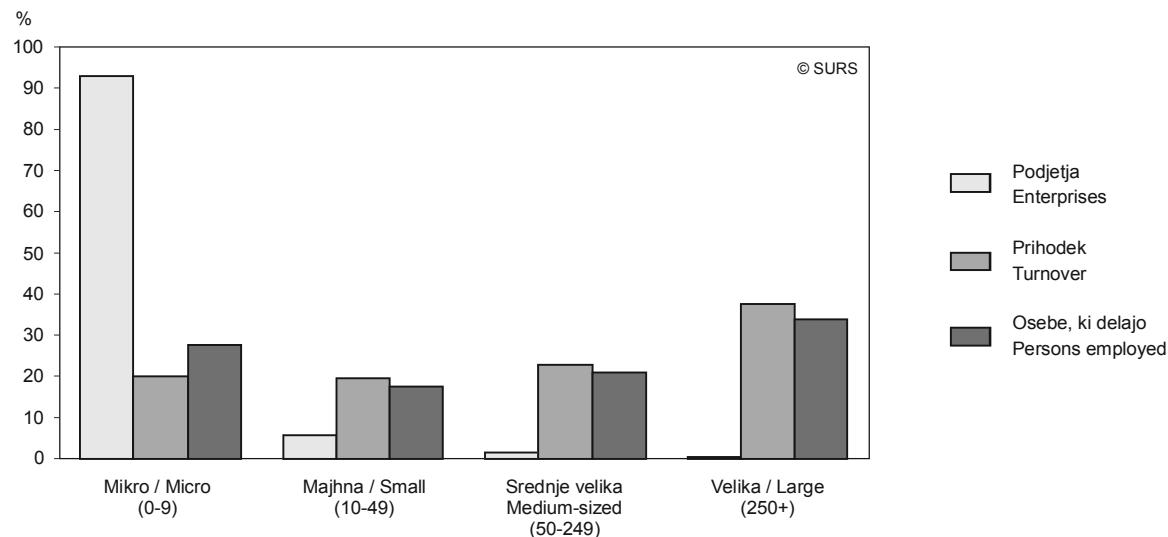

When ranking the size of enterprise in view of the number of persons employed, in Slovenia micro and small enterprises prevailed (98.5%), although the most turnover was generated by medium-sized (23%) and large enterprises (37.5%). More than half (55.0%) of persons employed worked in enterprises with more than 50 employees.

Most persons were employed in large enterprises with more than 250 employees (33.9%), followed by micro enterprises (27.5%) and medium-sized enterprises (21.1%). The fewest persons were employed in small enterprises (17.5%).

More than half of turnover (56.9%) was generated by large enterprises which had more than SIT 4,000 million of turnover; the share of medium-sized enterprises was 17.0%. One quarter (26.1%) of total turnover was generated by small enterprises which had less than SIT 1,000 million of turnover.

Slika 5: Deleži podjetij, njihovega prihodka in oseb, ki delajo v podjetjih, po velikostnih razredih podjetij glede na število oseb, ki delajo v njih, Slovenija, 2006

Chart 5: Shares of enterprises, their turnover and persons employed in enterprises by number of persons employed, Slovenia, 2006

Tretjina vseh opazovanih podjetij v Sloveniji se je v 2006 nahajala v osrednjeslovenski statistični regiji. Precej manj podjetij je bilo v podravski (13,8 %) in savinjski regiji (11 %). Najmanj teh podjetij pa je bilo v zasavski regiji (manj kot 2 % vseh podjetij v državi).

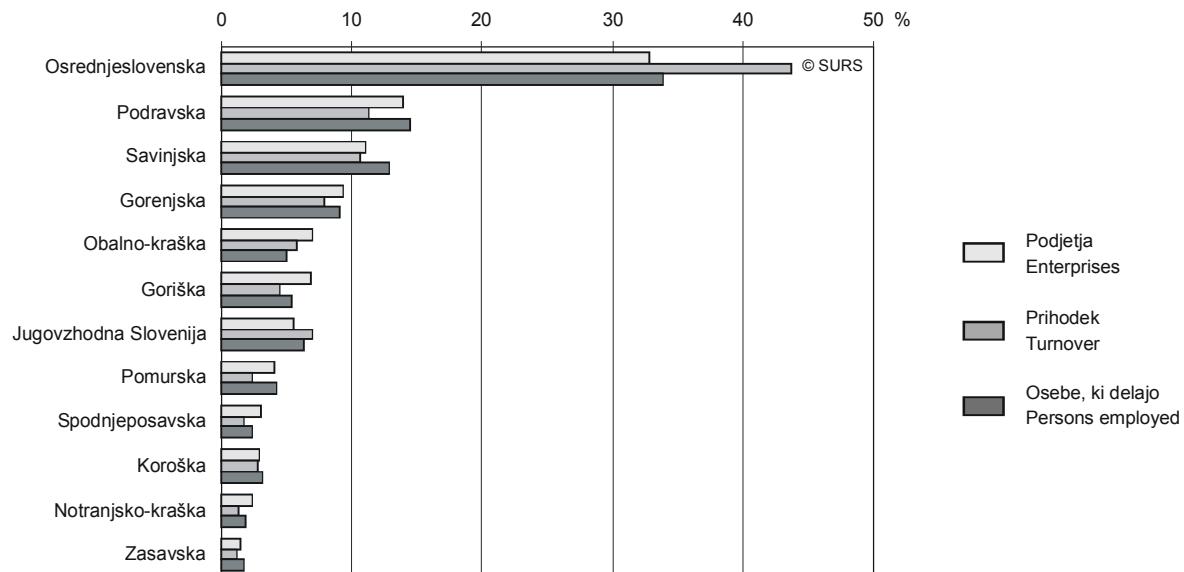

Največ oseb, ki delajo, je bilo – razumljivo – zaposlenih v podjetjih v osrednjeslovenski regiji (34,6 %) in te so ustvarile dobi dve petini vsega prihodka. Po številnosti zaposlenih oseb so sledila podjetja v podravski, savinjski in gorenjski regiji. Čeprav je bilo v obalno-kraški in goriški regiji evidentiranih več podjetij kot v jugovzhodni Sloveniji, pa so podjetja v slednji zaposlovala več oseb in ustvarila tudi več prihodka. Manj kot 2 % oseb, ki delajo, so zaposlovala podjetja zasavske in notranjsko-kraške regije.

In Slovenia, one third of all enterprises were registered in Osrednjeslovenska region. Much fewer enterprises were registered in Podravska region (13.8%) and Savinjska region (11%), while fewer than 2% of all enterprises in the country were registered in Zasavska region.

Most persons were employed in Osrednjeslovenska region (34.6%), where more than two fifths of all turnover was generated; followed by Podravska region, Savinjska region and Gorenjska region. Although there were more enterprises registered in Obalno-kraška and Goriška regions than in Jugovzhodna Slovenia, more persons employed and more turnover was generated in Jugovzhodna Slovenia. The fewest persons were registered in Zasavska region (1.6%) and in Notranjsko-kraška region (1.9%).

Slika 6: Deleži podjetij, njihovega prihodka in oseb, ki delajo, po statističnih regijah, Slovenija, 2006

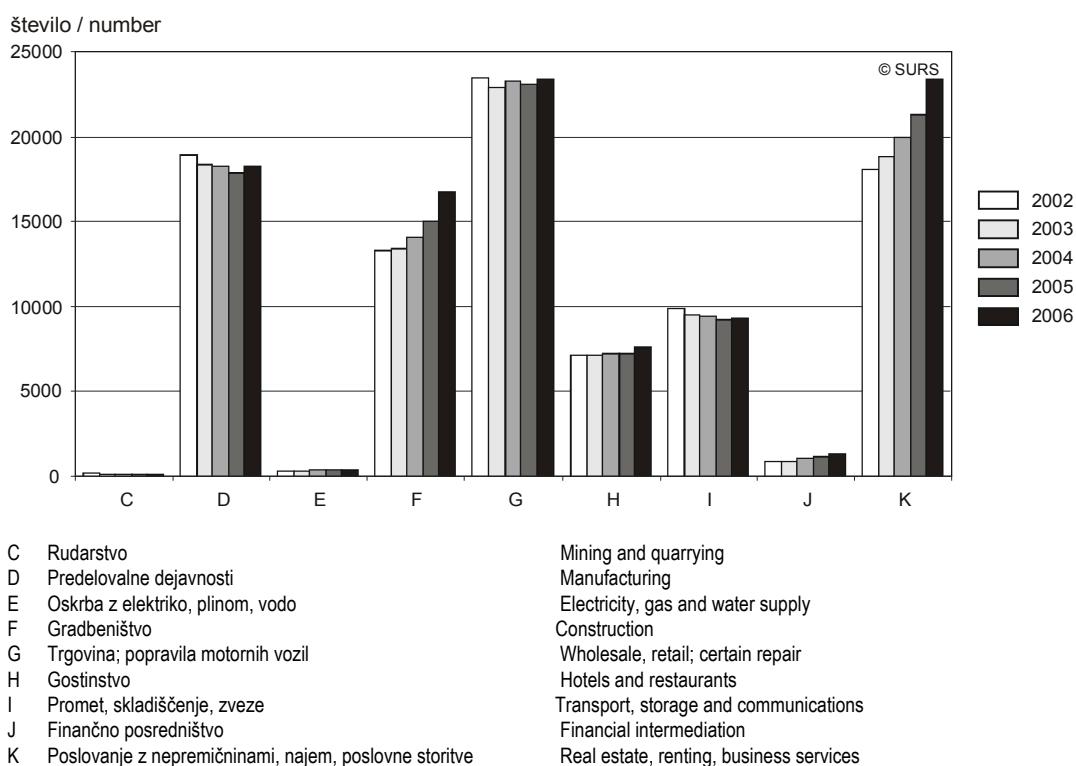

Chart 6: Shares of enterprises, their turnover and persons employed by statistical regions, Slovenia, 2006

Iz slike 7 je razviden trend gibanja števila podjetij v posameznih dejavnostih v obdobju 2002–2006. Vidimo, da je število podjetij v tem obdobju naraščalo v dejavnostih gradbeništvo, finančno posredništvo ter poslovanje z nepremičninami, najem in poslovne storitve. Število podjetij pa je upadal v predelovalnih dejavnostih in v dejavnosti promet, skladiščenje in zvez. Približno na enaki ravni je v opazovanih letih ostalo število podjetij v dejavnostih rudarstvo in oskrba z elektriko, plinom in vodo. Število podjetij v dejavnosti trgovina in popravila motornih vozil je v obdobju 2002–2003 upadal, v obdobju 2004–2006 pa se je izmenično povečevalo in upadal.

Slika 7: Število podjetij po dejavnostih, Slovenija, 2002–2006

Chart 7: Number of enterprises by activities, Slovenia, 2002–2006

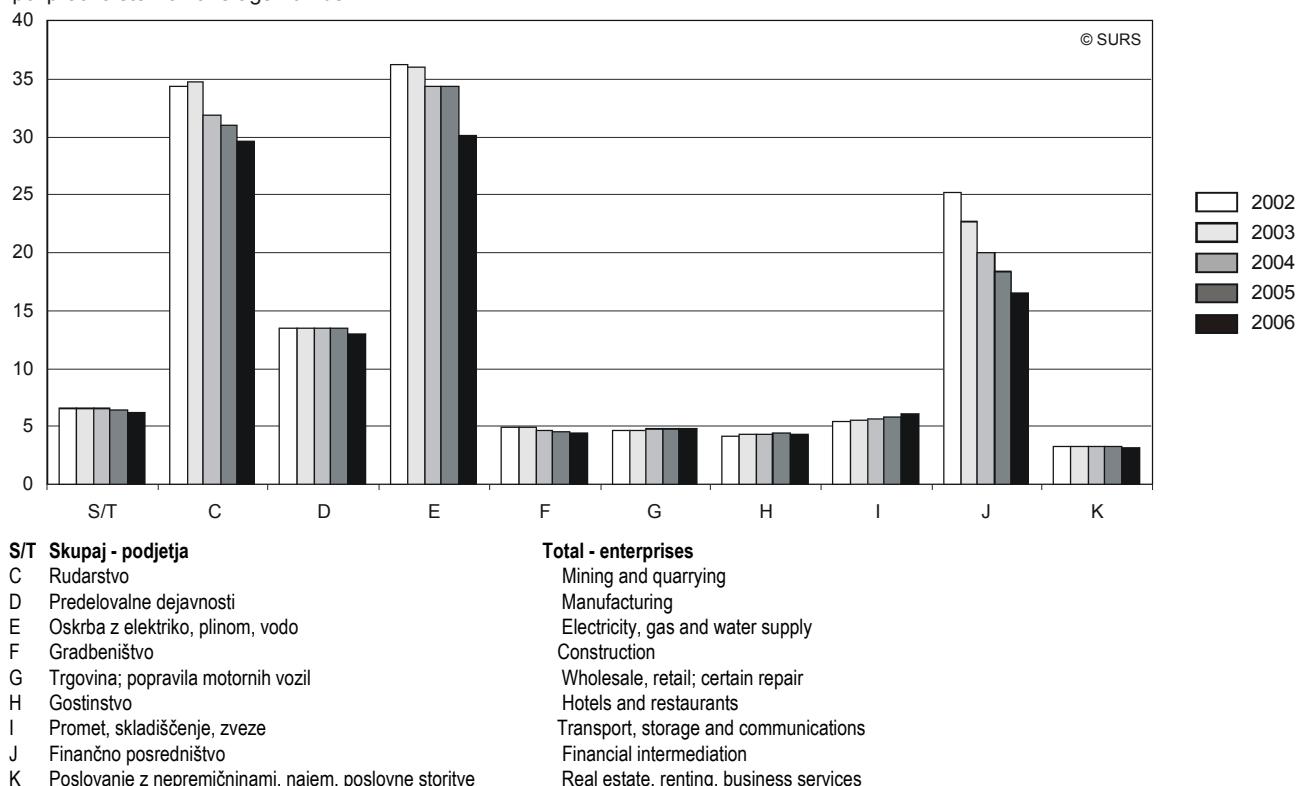

V zadnjih nekaj letih je v posameznih dejavnostih prišlo do zmanjšanja velikosti podjetij glede na število oseb, ki delajo v njih. Najbolj je opazen padec v dejavnosti finančno posredništvo, sledita dejavnosti oskrba z elektriko, plinom in vodo ter rudarstvo. V podjetjih, ki so bila organizirana kot pravne osebe, je zaznati opazno zmanjšanje velikosti podjetij v dejavnostih oskrba z elektriko, plinom in vodo ter rudarstvo. Največja podjetja so vseskozi prisotna v delniških družbah, najmanjša pa v družbah z neomejeno odgovornostjo, pri drugih fizičnih osebah in samostojnih podjetnikih.

Chart 7 presents the trend of enterprises in each activity from 2002 to 2006. In this period the number of enterprises increased in construction, financial intermediation, and real estate, renting and business activities. The downward tendency was perceived in manufacturing and in transport, storage and communications. The number of enterprises was at the same level in mining and quarrying and in electricity, gas and water supply. In wholesale, retail and certain repair a decline in the number of enterprises was perceived in the 2002–2003 period; whereas in the 2004–2006 period the number of enterprises alternately increased and decreased.

In some activities the number of persons working in enterprises has fallen significantly in recent years. The most notable fall was recorded in financial intermediation, followed by electricity, gas and water supply and by mining and quarrying. In enterprises organised as legal persons a large fall in enterprise size was recorded in electricity, gas and water supply and in mining and quarrying. The largest enterprises have always been joint stock companies and the smallest general partnerships, other natural persons and individual private entrepreneurs.

Slika 8: Povprečno letno število oseb, ki delajo, na podjetje po dejavnostih, Slovenija, 2002-2006
 Chart 8: Average yearly number of persons employed per enterprise by activities, Slovenia, 2002-2006

povprečno število / average number

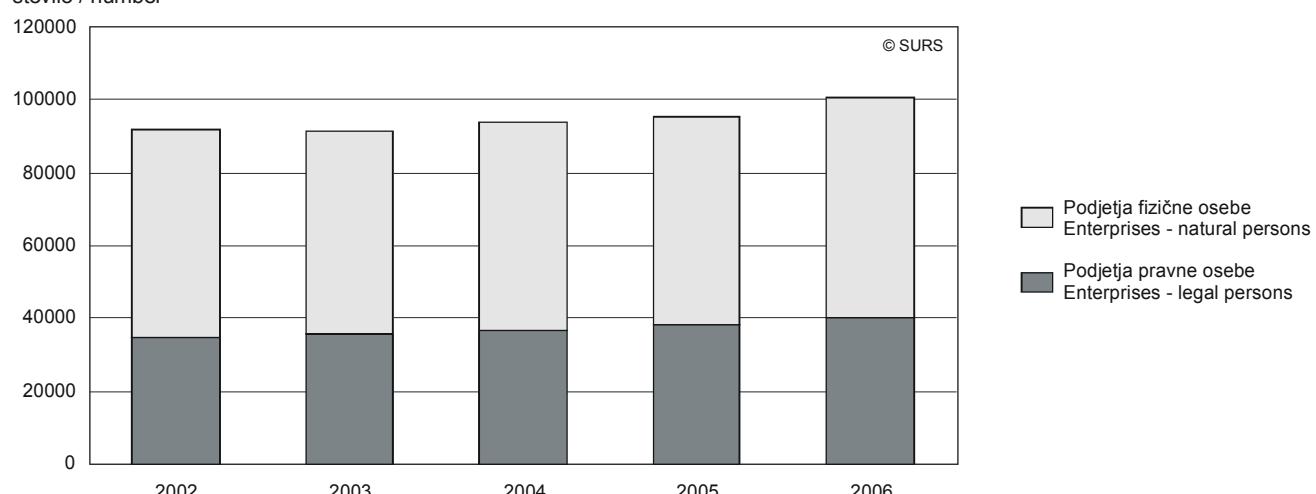

Slika 9 prikazuje gibanje števila podjetij glede na njihovo pravnoorganizacijsko obliko. V obdobju 2002–2006 so po številu prevladovala podjetja, organizirana kot fizične osebe, pred podjetji, ki so bila organizirana kot pravne osebe. Število podjetij obeh organizacijskih oblik je v opazovanem obdobju postopno in približno enako intenzivno naraščalo.

Chart 8 shows the trend of enterprises by organisational forms. In the period from 2002 to 2006, enterprises organised as natural persons prevailed. The number of such enterprises as well as those organised as legal persons was gradually increasing.

Slika 9: Število podjetij po pravnoorganizacijskih oblikah, Slovenija, 2002–2006

METODOLOŠKA POJASNILA

Viri in metode zbiranja podatkov

Vir podatkov o podjetjih na območju Republike Slovenije je Statistični poslovni register (SPR), ki ga Statistični urad RS vodi in vzdržuje na podlagi 33. člena Zakona o državni statistiki in Uredbe Sveta (EGS), št. 2186/93 o koordinaciji Skupnosti pri vzpostavljanju poslovnih registrov v statistične namene.

Osnovni vir podatkov za SPR je Poslovni register Slovenije (PRS), ki ga na podlagi 71. člena Zakona o plačilnem prometu (Uradni list RS, št. 30/02) od 15. 7. 2002 vodi Agencija Republike Slovenije za javnopravne evidence in storitve (AJPES). Poleg podatkov iz PRS so vir podatkov za SPR tudi podatki iz drugih administrativnih zbirk ter podatki, zbrani na podlagi programa statističnih raziskovanj. Nekateri manjkajoči podatki o posameznih spremenljivkah so v SPR pripisani (v skladu z ustrezeno statistično metodologijo).

Vir zajetja enot za referenčno leto je stanje podatkov o enotah v PRS 31. 12., vključno z enotami, ki so bile v tem letu ukinjene in katerih ukinitev je zabeležena v PRS.

Glavni vir podatkov o osebah, ki delajo, je Statistični register delovno aktivnega prebivalstva (SRDAP), ki ga vodi SURS. Podatki v SRDAP-u se osvežujejo na podlagi obrazcev M, to je prijava podatkov za uvedbo in vodenje matične evidence pokojninskega in invalidskega zavarovanja, zdravstvenega zavarovanja ter evidence o sklenitvi delovnega razmerja (M-1, M-2, M-1A, M-3, M-3a, M-DČ). V SRDAP-u so upoštevane vse osebe, ki delajo, ne glede na to, ali delajo za nedoločen ali določen čas, s polnim ali skrajšanim delovnim časom. Če podjetje izkazuje prihodek, nima pa podatka o osebah, ki delajo, se mu ta podatek pripše v skladu z ustrezeno statistično metodologijo.

Vir podatkov o prihodu podjetij so Zaključni računi, Napoved za odmero davka od dohodka iz dejavnosti ter Poročila zavarovalnih organizacij. Podjetjem, ki imajo podatek o osebah, ki delajo, ne izkazujejo pa prihodkov, se podatki o prihodu pripšejo v skladu z ustrezeno statistično metodologijo. V podatku o prihodu podjetij niso zajete banke in hranilnice.

Zajetje

V tabelah so prikazane vse pravnoorganizacijske oblike podjetij, ki kot svojo glavno dejavnost opravljajo eno izmed naslednjih dejavnosti iz področij C-K Standardne klasifikacije dejavnosti (SKD): rudarstvo, predelovalne dejavnosti, oskrba z elektriko, plinom in vodo, gradbeništvo, trgovina in popravila motornih vozil, gostinstvo, promet, skladiščenje in zveze, finančno posredništvo, poslovanje z nepremičninami, najem in poslovne storitve.

Podatke o statistični enoti podjetje je mogoče izkazovati poenoteno za podjetja, ki po svoji glavni dejavnosti spadajo v eno izmed področij dejavnosti C-K, in sicer v skladu z evropskima uredbama (CR 2186/93 o koordinaciji Skupnosti pri vzpostavljanju poslovnih registrov v statistične

METHODOLOGICAL EXPLANATIONS

Sources and methods of data collections

The source of data on enterprises in Slovenia is the Statistical Business Register (SBR), which is kept and maintained by the Statistical Office of the Republic of Slovenia (SORS) on the basis of Article 33 of the National Statistics Act and CR 2186/93 on Community coordination in drawing up business registers for statistical purposes.

The basic source for the SBR is the Administrative Business Register (ABR), which has been kept on the basis of Article 71 of the Payment Transactions Act (OJ RS No. 30/02) since 15 July 2002 by the Agency for Public Legal Records and Related Services. In addition to data in the ABR, the sources for the SBR are also data from other administrative records and data collected in accordance with the national program of statistical surveys. In the SBR some missing data are imputed according to the appropriate statistical methodology.

The main source for units of the reference year is the ABR as of 31 December with the inclusion of units that died during the reference year.

The main source for data on employment is the Statistical Register of Employment (SRDAP) kept by SORS. SRDAP is updated with data from M forms, i.e. Registration of Data for the Introduction and Keeping of the Central Record of Pension and Disability Insurance, Health Care and Employment (M-1, M-2, M-1A, M-3, M-3a, M-DČ). In SRDAP, all persons in paid employment are taken into consideration, irrespective of whether they are employed for fixed or unspecified period of time and whether they work full time or part time. In cases where the enterprise had some turnover without persons employed, the data on persons employed are imputed according to the appropriate statistical methodology.

Main sources for data on turnover for enterprises are Annual Accounts, Turnover Tax Declaration and statistical inquiries for insurance companies. For enterprises that had no turnover but had some persons employed, turnover is imputed according to the appropriate statistical methodology. Data on turnover do not comprise banks and savings banks.

Coverage

In tables all legal forms of enterprises that perform one of the activities in sections C-K of the Standard Classification of Activities (NACE) as their main activity are covered: mining and quarrying, manufacturing, electricity, gas and water supply, construction, wholesale, retail, certain repair, hotels and restaurants, transport, storage and communication, financial intermediation, real estate and renting business activities.

For enterprises in the sections of activities C-K, the EU harmonized data could be presented on the basis of CR 2186/93 on Community coordination in drawing up business registers for statistical purposes and CR 686/93 on the statistical units for the observation and analysis of the

namene in CR 686/93 o statističnih enotah za opazovanje in analizo proizvodnega sistema v Skupnosti). Podatkov o podjetjih iz področij dejavnosti A, B, L, M, N in O v tabelah še ne izkazujemo, ker za to še niso izdelana poenotena evropska metodološka priporočila.

Definicije in pojasnila

Obdobje opazovanja

Obdobje opazovanja je referenčno leto. Referenčno leto zajema vse enote, ki so bile do 31. 12. opazovanega leta vpisane v PRS, vključno z enotami, ki so bile v tem letu ukinjene in katerih ukinitev je v tem registru zabeležena.

Enota opazovanja

Enota opazovanja je podjetje, ki po svoji glavni dejavnosti spada v eno izmed področij dejavnosti C-K (SKD). Podjetje je registrirana pravna ali fizična oseba, ki je med letom opazovanja izkazala prihodek, ali zaposlene osebe oziroma osebe, ki delajo.

Podjetje je najmanjša kombinacija pravnih enot, ki ima kot organizacijska enota za izdelavo proizvodov ali ponudbo storitev pri svojem odločanju določeno stopnjo samostojnosti, predvsem za razporejanje svojih tekočih poslovnih sredstev. Podjetje lahko opravlja eno dejavnost ali več, in to na enem ali več mestih. Za oblikovanje podjetja kot statistične enote se uporablja pravna enota, ki – v celoti ali delno – opravlja pridobitno dejavnost. Pravne enote¹⁾ so vse registrirane pravne in fizične osebe. Podatki o podjetjih so v tabelah prikazani po glavni dejavnosti podjetja.

Podjetja pravne osebe so registrirane pravne osebe, ki po svoji glavni dejavnosti spadajo v eno izmed področij dejavnosti C-K.

Podjetja družbe so pravne osebe, ki po svoji glavni dejavnosti spadajo v eno izmed področij dejavnosti C-K in so v skladu z Zakonom o gospodarskih družbah (ZGD) organizirane v eno izmed naslednjih oblik družbe: družba z omejeno odgovornostjo (d. o. o.), družba z neomejeno odgovornostjo (d. n. o.), delniška družba (d. d.), komanditna delniška družba (k. d. d.) in komanditna družba (k. d.).

Druga podjetja pravne osebe so vse ostale pravne osebe, ki niso družbe in po svoji glavni dejavnosti spadajo v eno izmed področij dejavnosti C-K.

Podjetja fizične osebe so samostojni podjetniki in druge registrirane fizične osebe, ki po svoji glavni dejavnosti spadajo v eno izmed področij dejavnosti C-K.

Zaposlene osebe so osebe, ki delajo pri delodajalcu (pri pravnih osebah, samostojnih podjetnikih ali drugih registriranih fizičnih osebah) in prejemajo plačo ter so na podlagi pogodb o zaposlitvi obvezno socialno zavarovane. Pogodba o zaposlitvi je lahko sklenjena za nedoločen ali določen čas, ne glede na to, ali gre za zaposlitev s polnim delovnim časom ali z delovnim časom, krajsim od polnega. Med zaposlene osebe se štejejo tudi pripravniki in osebe, udeležene pri javnih delih, ter družbeniki zasebnih družb in zavodov v RS, ki so poslovodne osebe (če niso obvezno zavarovani na drugi podlagi). V število zaposlenih oseb niso zajeti študenti in dijaki, ki občasno delajo za delodajalca in prejemajo plačilo.

Samozaposlene osebe so samostojni podjetniki in druge registrirane fizične osebe (npr. samostojni raziskovalci, zdravniki, odvetniki, veterinarji, kulturni ustvarjalci, vrhunski športniki ipd.).

Osebe, ki delajo, so vse zaposlene in samozaposlene osebe skupaj. Med osebe, ki delajo, niso zajeti pomagajoči družinski člani in osebe, ki delajo na podlagi podjemnih pogodb (pogodb o delu) ali avtorskih pogodb (delovršnih pogodb), in kmetje.

production system in the Community. European harmonized methodological recommendations for enterprises in sections of activities A, B, L, M, N and O are being developed, which is the reason why the data for those enterprises are not presented in tables.

Definitions and explanations

Observation period

The period of observation is the reference year. The reference year includes all units that were registered in the ABR until 31 December of the reference year, including units that died during the reference year.

Observation unit

The observation unit is an enterprise in sections of activities C-K. Enterprise is the registered legal or natural person which had either turnover or employment during the reference year.

An enterprise is an organizational unit producing goods or services which benefits from a certain degree of autonomy in decision making, especially in the allocation of its current resources. An enterprise carries out one or more activities at one or more locations. A legal unit that performs a profit or partly profit activity is the principal legal basis for an enterprise. Legal units¹⁾ are all registered legal or natural persons. Data in tables are for enterprises presented according to the main activity of the enterprise.

Enterprises – legal persons are registered legal persons that perform main activities in sections of activities C-K.

Enterprises – companies are legal persons in sections of activities C-K that are according to the Companies Act organised as one of the following forms of companies: limited liability company, general partnership, joint stock company, limited partnership with share capital or limited partnership.

Other enterprises – legal units are all other legal units that are not companies in sections of activities C-K.

Enterprises – natural persons are individual private entrepreneurs and other registered natural persons that perform activities in sections C-K.

Employees are persons who work for an employer (for legal persons or for individual private entrepreneurs and other registered natural persons), receive payment in the form of salaries and are socially insured on the basis of the employment contract. The employment contract can be made for fixed or unspecified period of time, for full-time or part-time work. The number of employees includes also trainees, persons performing public works and partners in private companies and institutions in the Republic of Slovenia who are managers (if they do not have compulsory insurance on some other basis). The number of employees excludes students and pupils who work for an employer occasionally and receive payment.

Self-employed persons are individual private entrepreneurs and other registered natural persons (e.g. independent researchers, doctors, lawyers, veterinaries, cultural workers, top athletes, etc.)

Persons employed are employees and self-employed persons. The number of persons employed excludes unpaid family workers, persons working on the basis of contracts for work/service or copyright agreement and farmers.

1) Pravne enote predstavljajo vsi poslovni subjekti, registrirani v PRS, za katere podatke četrtletno izkazuje AJPES na svojih spletnih straneh.

1) Legal units are legal entities in the ABR for which data are quarterly disseminated on the website of AJPES, i.e. the Agency for Public Legal Records and Related Services.

Prihodek so prodajne vrednosti kupcem zaračunanih prodanih proizvodov oziroma trgovskega blaga in materiala ter opravljenih storitev. Meri se na podlagi prodajnih cen, navedenih v računih in drugih listinah, zmanjšanih za vse popuste, ki so bili dani ob prodaji ali pozneje, pa tudi za vrednosti vrnjenih količin. V prihodek so zajeti so vsi stroški in obremenitve, vezane na kupca, ne zajema pa davka na dodano vrednost (DDV), morebitne prodaje osnovnih sredstev, prihodkov od financiranja, subvencij in drugih izrednih prihodkov. Zaradi zaokroževanja agregiranih podatkov s 1000 SIT na milijon SIT se nekateri zbirni podatki v tabelah ne ujemajo z delnimi seštevkami.

Turnover is the total amount that the enterprise generated with sale of goods, material and performed services in the reference year. It is measured on the basis of selling prices stated on invoices and other documents less discounts at sale or later on and the value of returned quantities. It includes all costs and charges linked to the buyer and excludes value added tax, possible sale of fixed assets, financial income, subsidies and other extra income. Due to the rounded aggregated data on turnover from 1000 SIT to million SIT, some totals are not matching with the sum of subtotals.

Podrobnejši podatki in časovne serije so dostopni na podatkovnem portalu SI-STAT, ki vam omogoča enostaven način pregledovanja in izpisovanja podatkov v različne formate. Registrirani uporabniki imajo možnost shranjevanja tabel za kasnejši pregled in možnost naročanja na samodejno obveščanje o posodobitvah podatkov.

More detailed data and time series are available at the SI-STAT data portal, which enables simple browsing and exporting of data into various formats. Registered users have the possibility to store tables for later browsing and to sign up to be informed when data are updated.
