Some of My Favorite “Lesser Known” Problems

Moshe Rosenfeld

Abstract

Some problems become famous and attract attention while others collect dust on the shelf. Large conferences are a great breeding ground for popularizing both old and new problems. In this note we present some off the shelf problems.

Keywords: Graph coloring, partitions.

Nekaj mojih najljubših “manj znanih” problemov

Povzetek

Nekateri problemi postanejo slavni in privlačijo pozornost, medtem ko se drugi prašijo na polici. Velike konference so dobro gojišče za popularizacijo tako starih kot novih problemov.

Tukaj predstavljamo nekaj problemov s police.

Ključne besede: Barvanje grafov, particije.
