### Definicije in pojasnila

**Razporeditev nadmorskih višin in naklonov zemljišč** v Republiki Sloveniji smo povzeli po digitalnem modelu reliefa (DMR - 20); opazovana enota je 0,04 ha.

Kot **zavarovana naravna območja** v Republiki Sloveniji so upoštevani vsi naravni parki, ki zajemajo vse narodne parke, vse krajinske parke in druga zavarovana območja z elementi krajinskih parkov. Razvrščeni in označeni so v skladu s kategorizacijo Mednarodne zveze za varstvo narave (IUCN):

IUCN kategorija II - narodni park

IUCN kategorija III - naravni spomenik

IUCN kategorija V - zavarovana krajina.

**Moč ali intenziteta potresa** je merilo za učinek potresa na določenem mestu. Merimo jo z naslednjimi potresnimi (makroseizmičnimi) lestvicami:

MCS (Mercalli-Cancani-Sieberg),

MSK (Medvedev-Sponheuer-Karnik) in

EMS (Evropska potresna oz. makroseizmična lestvica).

Lestvici EMS in MSK upoštevata tudi statistiko posledic potresa.

**Povprečna mesečna temperatura zraka** je izračunana iz opazovanj ob 7., 14. in 21. uri po krajevnem času po obrazcu $(t_7 + t_{14} + 2 \times t_{21}) : 4$. Povprečne letne vrednosti so izračunane iz povprečnih mesečnih vrednosti.

**Padavine** se merijo vsak dan ob 7. uri zjutraj. **Dan z dežjem** ali **dan s snegom** je dan, ko je na meteorološki postaji padlo vsaj 0,1 mm ustreznih padavin v 24 urah (od 7. ure do 7. ure naslednjega dne). Če je v tem času deževalo ali snežilo hkrati ali izmenoma, se šteje tak dan kot **dan z dežjem in s snegom**. **Dan s snežno odejo** je dan, ko je bilo na meteorološki postaji ob 7. uri najmanj 1 cm snežne odeje.

**Povprečna oblačnost** je računana po opazovanjih ob 7., 14. in 21. uri. Ocenjena je po lestvici od 0 do 10. Kadar je povprečna dnevna oblačnost manjša od 2,0, govorimo o **jasnem dnevu**, kadar pa je povprečna dnevna oblačnost večja od 8,0, gre za **oblačen dan**.

**Število ur sončnega obsevanja** zapisuje heliograf; izraženo je v urah.

*Among **protected natural areas** in the Republic of Slovenia we include all natural parks. They include all national parks, all landscape parks and other protected areas with elements of landscape parks. Categorisation of natural parks is in accordance with the categorisation of IUCN (International Union of the Conservation of Nature).*

*IUCN II denotes national parks*

*IUCN III denotes natural monuments*

## GEOMATIKA

### Statistični GIS pokrovnosti tal Slovenije

#### Viri in metode zbiranja podatkov

Obstoječe stanje Statističnega geografskega informacijskega sistema z leta 1997 smo posodobili na stanje za leto 2001 z uporabo naslednjih posodobljenih podatkovnih slojev:

- satelitskih podatkov Landsat ETM iz leta 2001 z ločljivostjo 15 m x 15 m (vir: Eurimage, Phare project StatCOP98)
- podatkov iz Zajema kmetijske rabe tal (vir. Ministrstvo za kmetijstvo, gozdarstvo in prehrano RS)
- centroidov hiš, stanje 30. 6. 2001 (vir: Register prostorskih enot, Geodetska uprava RS)
- podatkov o državnih cestah, stanje 31. 12. 2001 (vir: Direkcija za ceste RS)
- podatkov o železnicah, stanje 31. 12. 2001 (Geodetska uprava RS)
- podatkov o odlagališčih (vir: MOPE, Agencija za okolje RS)
- podatkov o kamnolomih in peskokopih (vir: Direkcija RS za rudna bogastva).

Uporabljena podatkovni sloj obrisov voda (vir: Agencija za okolje RS) in podatkovni sloj lokalnih cest nista bila posodobljena.

Kot vzorčne in pomožne podatke pri klasifikaciji satelitskih posnetkov smo uporabili naslednje podatke:

- DMR-20, izdelan iz stereo parov scen satelitskih podatkov SPOT (vir: Ministrstvo za obrambo):
- Statistični GIS pokrovnosti tal, stanje 1997;
- digitalni ortofoto DOF, izdelan v obdobju 1997–2001 (Vir:Geodetska uprava RS);
- terenske vzorce, zajete junija 2001;
- Državno topografsko karto, DTK-25.

Za oceno zanesljivosti smo uporabili podatke fotointerpretacije diagonal digitalnih ortofoto posnetkov po sistematični prostorski vzorčni shemi. Metoda bo podrobno objavljena v posebni publikaciji Rezultati raziskovanj (ta se pripravlja).

#### Izdelava GIS-a pokrovnosti tal

Osnovni podatki za posodobitev Statističnega GIS-a pokrovnosti tal Slovenije so bili satelitski podatki Landsat ETM, georeferencirani v državni koordinatni sistem. Z nadzorovano multispektralno klasifikacijo smo izdelali rastrsko tematsko karto pokrovnosti, ki smo jo uporabili za izdelavo sloja gozdnih, obdelovalnih, travnatih in odprtih površin. Iz rastrske karte smo izločili vse površine, manjše od 1 ha.

Kategorije, ki jih z multispektralno klasifikacijo nismo mogli določiti z zadostno zanesljivostjo, smo prevzeli iz drugih virov:

- podatke o trajnih nasadih (vinogradi, sadovnjaki in ostali trajni nasadi ter hmelj) smo prevzeli iz Zajema kmetijske rabe tal 2002
- podatke o močvirjih smo prevzeli iz Zajema kmetijske rabe tal 2002
- podatke o državnih cestah smo prevzeli od Direkcije za ceste RS
- podatke o železnicah smo prevzeli od Geodetske uprave
- podatke o novo pozidanih površinah smo pridobili s pomočjo centroidov hiš, stanje 30. 6. 2001

## *GEOMATICS*

### *Statistical land cover and land use*

#### *Sources and methods of data collection*

*The existing 1997 statistical geographic information system was updated to the situation in 2001 with the following updated data layers:*

- *Landsat ETM satellite data from 2001 with 15m X 15m resolution (source: Eurimage, Phare project StatCOP98)*
- *data on agricultural land use (source: Ministry of Agriculture, Forestry and Food)*
- *centroids of houses as of 30 June 2001 (source: Register of Spatial Units, Surveying and Mapping Authority)*
- *data on national roads as of 31 December 2001 (source: Roads Directorate)*
- *data on railways as of 31 December 2001 (source: Surveying and Mapping Authority)*
- *data on waste deposits (source: Ministry of Environment, Spatial Planning and Energy, Environmental Agency)*
- *data on quarries and gravel pits (source: Directorate for Mineral Resources).*

*The layers of waters (source: Environmental Agency) and local roads were not updated.*

*As sample and auxiliary data for classification of satellite images the following sources were used:*

- *DEM-20 produced from stereo pairs of SPOT satellite data (Source: Ministry of Defence)*
- *statistical land cover GIS 1997*
- *digital orthophoto DOF for 1997-2001 (source: Surveying and Mapping Authority)*
- *terrain samples covered in June 2001*
- *national topographic map DTK-25.*

*For estimating reliability, we used data from the photointerpretation of diagonals of digital orthophotos according to the systematic spatial sampling scheme. The method will be published in detail in a special publication of Results of Surveys, which is being prepared.*

#### *Compilation of land cover GIS*

*The basic data source for updating the statistical land cover GIS for Slovenia were Landsat ETM satellite data georeferenced to the national coordinate system. With supervised multispectral classification we prepared the raster-type thematic map of land cover, which we used for preparing the layer of wooded, agricultural and grassland areas and bare soils. From the raster-type map we eliminated all areas smaller than 1 hectare.*

*Using multispectral classification, the categories that could not be determined with sufficient reliability were taken over from other sources:*

- *data on permanent grassland (vineyards, orchards, other permanent grassland and hops) were taken over from the 2002 agricultural land use data*
- *data on marshes were also taken over from the 2002 agricultural land use data*
- *data on national roads were taken over from the Roads Directorate*
- *data on railway were taken over from the Surveying and Mapping Authority*
- *data on newly built-up areas were obtained from centroids of houses as of 30 June 2001*

- podatke o odlagališčih smo posodobili s pomočjo točkovnih lokacij MOPE, Agencija za okolje RS
- podatke okamnolomih in peskokopih smo posodobili s pomočjo točkovnih lokacij Direkcije RS za rudna bogastva.

Iz tako zbranih podatkov smo izdelali vektorske sloje, ki smo jih združili v statistični GIS pokrovnosti tal Slovenije, stanje 2001.

Kategorije Statističnega GIS-a lahko združimo v kategorije in podatke o njih objavljamo v Statističnem letopisu. V kategorijo **gozdnate površine** so vključene vse gozdnate površine, ruševje, grmičevje in površine v zaraščanju, ki jih je bilo mogoče opredeliti z multispektralno klasifikacijo satelitskih posnetkov. V kategorijo **vse kmetijske površine** so vključene vse kmetijske površine in ostale s travo poraščene površine, ki jih je bilo možno opredeliti z multispektralno klasifikacijo. V kategorijo **odprte površine** so vključene z multispektralno klasifikacijo opredeljene površine skal in melišč, neporaščenih bregov rek ter gradbišč. V to kategorijo so dodani podatki o kamnolomih in deponah, določeni z interpretacijo satelitskih posnetkov na osnovi točkovnih podatkov. Kategorija **vode** zajema površine, ki so bile tako opredeljene že v Statističnem GIS-u pokrovnosti tal Slovenije po stanju 1997. **Pozidanim površinam** iz leta 1997 so dodane nove pozidane površine, določene na osnovi centroidov, po enakem postopku kot leta 1997. **Železnicam** in **cestam** iz leta 1997 so dodane površine novih odsekov po enakem postopku kot leta 1997.

- *data on waste deposits were updated with the help of the locations from the Ministry of Environment, Spatial Planning and Energy, Environmental Agency*
- *data on quarries and gravel pits were updated with the help of the locations from the Directorate for Mineral Resources.*

*From data collected in this way, vector layers were prepared which were joined into the 2001 statistical land cover GIS of Slovenia.*

*Statistical GIS categories can be merged into categories published in the Statistical Yearbook. The category **wooded areas** covers all wooded areas, bushes and areas reverting to natural vegetation that could be determined with multispectral classification of satellite images. The category **all agricultural areas** covers all agricultural areas and other areas overgrown with grass that could be determined with multispectral classification. The category **bare soils** covers areas of rocks and scree determined with multispectral classification as well as nonvegetated river banks and areas under construction. This category also covers waste deposits and quarries determined with interpretation of satellite images on the basis of pixel data. The category **water** covers areas already determined as water with the 1997 statistical land cover GIS for Slovenia. **Built-up areas** from 1997 were added newly built-up areas determined on the basis of centroids of houses according to the same procedure as in 1997. **Railways and roads** form 1997 were added areas of new sections according to the same procedure as in 1997.*

## Definicije

**Centroid** je točka znotraj poligona, običajno v njegovem središču, ki je v geografskem informacijskem sistemu nosilka nanj navezanih informacij - vrednosti atributov (vir: GIS katalog 2, Besednjak s področja geoinformatike, Ljubljana, Ministrstvo za okolje in prostor, Geoinformacijski center, 1997, str. 8).

**Digitalni model reliefa (DMR)** so v digitalni obliki predstavljene nadmorske višine in koordinate točk površine terena, ki si slede na enakih razdaljah v dveh medsebojno pravokotnih smereh, tj. tvorijo kvadratno celično mrežo (vir: prav tam).

**Geografski informacijski sistem (GIS)** je za posamezne naloge enotno načrtovan sistem, ki na osnovi združevanja različnih podatkovnih slojev omogoča uvid v nove informacije. Končni izdelek GIS-a je numerična karta, ki vsebuje informacijo o lokaciji preučevanega pojava (vir: Griffith D. A., The need for spatial statistics, Ch. 1 in Spatial Statistics, practical handbook, Editor-in-chief: Arlinghaus S.L. CRS Press, N. Y.,1996, str.: 21-29).

**Multispektralna klasifikacija** je računalniška tehnika, ki multispektralno satelitsko sliko klasificira na izbrano število kategorij pokrovnosti tal.

**Ocena zanesljivosti** je statistična ocena tematske in položajne natančnosti tematske karte, v našem primeru statističnega GIS-a, ki temelji na neodvisnem vzorcu, pridobljenem iz drugega, natančnejšega vira podatkov. Rezultat ocene zanesljivosti je matrika napak.

**Pokrovnost tal** je opazovan biofizični pokrov na površini zemlje, viden z očmi ali s pomočjo daljinsko zaznavnih tehnik, ki ni opredeljen

## *Definitions*

***Centroid** is a point inside a polygon – usually in its centre – which in the geographic information system carries information on attributes connected with the polygon. (Source: GIS Catalogue 2, Thesaurus from the field of geoinformatics, Ljubljana, Ministry of Environment and Spatial Planning, Geographic Information Centre, 1997, p. 8).*

***Digital elevation model (DEM)** are digitally stored heights above sea level and co-ordinates of terrain which follow one another at equal distance in two perpendicular directions, i.e. they form a square net of cells (Source: ibid).*

***Geographic Information System (GIS)** is a system planned for individual tasks, which on the basis of merging various data layers enables the presentation of new information. The final output of the GIS is a numerical chart that contains information on the location of the studied phenomenon (Source: Griffith D.A., The need for spatial statistics, Ch. 1 in Spatial Statistics, practical handbook, Editor-in-chief: Arlinghaus S.L. ## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Poimenovanja upravnih in prostorskih enot ter njihova prostorska razdelitev so povzeti po zakonih ter njihovih spremembah in popravkih, ki so bili objavljeni v uradnih listih Ljudske republike Slovenije, Socialistične republike Slovenije in Republike Slovenije.

Podatki o stanju 1. 6. 1939 so prevzeti po Splošnem pregledu Dravske banovine iz leta 1939. Del Primorske, priključen po pariškem sporazumu, je upoštevan od 23. 2. 1948, del Koprskega, priključen po londonskem sporazumu, pa od 4. 11. 1954 dalje.

Podatke o prostorskih enotah in njihovih spremembah prevzemamo za statistične potrebe iz Registra prostorskih enot (RPE), ki ga vodi in vzdržuje Geodetska uprava Republike Slovenije (GURS).

### Zajetje

Leta 1959 je bil za potrebe statističnih raziskovanj uveden statistični kataster, katerega osnovna prostorska enota je bil statistični okoliš. Statistični kataster je bil prvič uporabljen za izvedbo popisa prebivalstva, gospodinjstev in stanovanj 1961. Po reviziji je bil tudi osnova za izvedbo popisa prebivalstva, gospodinjstev in stanovanj 1971.

Na podlagi statističnega katastra je Statistični urad Republike Slovenije skupaj z Geodetsko upravo Republike Slovenije in njenimi izpostavami pripravil v obdobju od 1978 do 1981 novo metodologijo za vodenje registra teritorialnih enot (RTE) - tudi njegovega kartografskega dela; ta je postal osnova za izvedbo popisov prebivalstva, gospodinjstev, stanovanj in kmečkih gospodarstev v letih 1981 in 1991 ter drugih statističnih raziskovanj tudi po letu 1981.

V omenjenem registru so bili zajeti podatki o prostorskih enotah, ki so bile definirane z Zakonom o imenovanju in evidentiranju naselij, ulic in stavb (Ur. l. SRS 5/80, 42/86, 8/90) in s podzakonskimi akti. Do leta 1995 ga je vodil in vzdrževal Statistični urad Republike Slovenije, po tem letu pa je postopoma prešel v pristojnost Geodetske uprave Republike Slovenije.

### Definicije in druga pojasnila

**Občine** (po stanju 1. 1. 1995 in dalje) so temeljne lokalne samoupravne skupnosti, ki v okviru ustave in zakonov samostojno urejajo in opravljajo zadeve lokalnega pomena in izvršujejo državne naloge, ki so nanje prenesene z zakoni (Ur. l. RS, št. 72/93 z dopolnitvami).

Površine občin, ki so prevzete iz Registra prostorskih enot Republike Slovenije, so izračunane iz koordinat mejnih točk posameznega prostorskega okoliša in nato seštete na podlagi atributne opredelitve pripadnosti prostorskega okoliša višji prostorski enoti. Seštevek površin občin tako ni enak seštevku površin katastrskih občin; te so namreč povzete iz zemljiškega katastra in se z novimi izmerami vsako leto spreminjajo. Za statistična raziskovanja uporabljamo podatek o površini občin iz Registra prostorskih enot Republike Slovenije.

Območje občine obsega območje naselja ali več naselij, ki so povezana s skupnimi potrebami in interesi prebivalcev (Ur. l. RS 72/93). Območja občin so določena z zakoni (Ur. l. RS, št. 60/94 z dopolnitvami).

**Upravne enote** so organizirane za območje ene ali več lokalnih skupnosti, da se zagotovi racionalno in učinkovito opravljanje z zakonom določenih nalog državne uprave (Ur. l. RS 67/94, 75/94, 78/94, 8/96).

**Katastrske občine** so osnovne upravne prostorske enote za vodenje zemljiškega katastra. Katastrske občine so razdeljene po velikostnih razredih na podlagi Zakona o postopku za ustanovitev, združitev oziroma spremembo območja občine ter o območjih občin (Ur. l. SRS 28/80, 9/82, 27/84, 38/89 in Ur. l. RS 30/90) in popravkov zaradi komasacij ali preimenovanj (po podatkih Geodetske uprave Republike Slovenije). Podatki o površini katastrskih občin se vsako leto popravijo na podlagi najnovejših meritev, in sicer tistih katastrskih občin, kjer so bile meritve opravljene. Zato tudi površina Slovenije, ta je seštevek

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Names of administrative and spatial units and the territorial structure by periods are cited according to laws and their changes and amendments, published in the Official Gazette of the People's Republic of Slovenia, the Official Gazette of the Socialist Republic of Slovenia and the Official Journal of the Republic of Slovenia.*

*Data for the situation as of 1 June 1939 are drawn from the 1939 General Survey of the Drava Banovina (Drava province). The part of Primorska (i.e. the Littoral) incorporated under the terms of the Paris Agreement is taken into account from 23 February 1948 onwards and the part of the Koper region incorporated under the London Agreement is taken into account from 4 November 1954 onwards.*

*Data on spatial units and their changes are taken over from the Register of Spatial Units, which is kept by the Surveying and Mapping Authority of the Republic of Slovenia.*

### *Coverage*

*For the purposes of statistical surveys, a statistical cadastre was introduced in 1959. Its basic spatial unit was the statistical district. The statistical cadastre was first used for the 1961 Census of Population, Households and Housing. After the revision it was the basis for the 1971 Census of Population, Households and Housing.*

*On the basis of the statistical cadastre and in collaboration with the Surveying and Mapping Authority of the Republic of Slovenia and geodetic administrations of communities, the Statistical Office of the Republic of Slovenia created a new record-keeping methodology and a cartographic section for the Register of Territorial Units for the 1978-1981 period. This became the basis for conducting censuses of population, households, housing and agricultural holdings in 1981 and 1991 and for other statistical surveys since 1981.*

*The register covered the data on spatial units defined under the Act on the Naming and Record-keeping of Settlements, Streets and Buildings (Official Gazette of the Socialist Republic of Slovenia, No. 5/80, 42/86, 8/90) and by implementing regulations. Until 1995 it was kept by the Statistical Office of the Republic of Slovenia. Since 1995 it has been kept by the Surveying and Mapping Authority of the Republic of Slovenia.*

### *Definitions and other explanations*

***Municipalities** (as of 1 January 1995 onwards) are fundamental local self-government communities, which on the basis of the constitution and laws have to execute affairs of local importance and affairs which are turned over to them by laws (OJ RS, No. 72/93 with amendments).*

*The total area of municipalities taken over from the Register of Spatial Units of the Republic of Slovenia is calculated from co-ordinates of boundary points of an individual spatial environment and then they are summed up - on the basis of the attributive belonging of the spatial environment - to a higher spatial unit. The total area of municipalities thus does not equal the total area of cadastral communities, which is taken from the land cadastre and changes every year with new measurements. For statistical surveys the area of municipalities from the Register of Spatial Units of the Republic of Slovenia is used.*

*The territory of a municipality comprises the territory of a settlement or several settlements which are linked with common needs and interests of their population (OJ RS, No. 72/93). The territories of the municipalities are determined by laws (OJ RS, No. 60/94 with amendments).*

***Administrative units** are organised for one or more local communities, so as to assure effective administration of state government tasks which are defined by law (OJ RS 67/94, 75/94, 78/94, 8/96).*

***Cadastral communities** are basic administrative spatial units for keeping the land register. In classifying cadastral communities by size we have taken into account the Act on the Procedure for Establishing, Merging and Changing the Territory of a Community and on the Territories of Communities (Official Gazette of the Socialist Republic of Slovenia, No. 28/80, 9/82, 27/84, 38/89; OJ RS, No. 30/90) and amendments due to commassations or changes of names (according to the Surveying and Mapping Authority of the Republic of Slovenia). Data on the areas of cadastral communities are corrected each year*

površin katastrskih občin, ni vsako leto enaka.

*on the basis of new measurements of areas of cadastral communities for which new measurements have been conducted. For this reason the area of Slovenia, which is the aggregate area of all cadastral communities, is not identical in every year.*

**Mesta** se po predpisih o upravni prostorski razdelitvi, veljavni od 30. 6. 1955, ne pojavljajo kot upravne prostorske enote. Na ta datum je bilo na ozemlju Republike Slovenije 130 občin in 50 mest. Število mest je ostalo enako vse do 23. 10. 1964 (Ur. l. SRS št. 30/64), ko je bil med mesta uvrščen še Žalec; s tem se je število mest povečalo na 51. Takšno stanje je ostalo prav do uveljavitve Zakona o postopku za ustanovitev, združitev oziroma spremembo območja občine ter o območjih občin (Ur. l. SRS 28/80, 9/82, 27/84, 38/89 in Ur. l. RS 30/90) ter Zakona o imenovanju in evidentiranju naselij, ulic in stavb (Ur. l. SRS 5/80). Omenjena predpisa sta mestna naselja izenačila z drugimi naselji v Sloveniji.

***Towns**, under the legislative arrangements for the territorial structure which have been in effect since 30 June 1955, do not occur as administrative spatial units. On 30 June 1955, when there were 130 communities on the territory of Slovenia, there were 50 towns. The number of towns remained constant until 23 October 1964 (Official Gazette of the Socialist Republic of Slovenia, No. 30/64), when Žalec was classified as a town, bringing the number to 51. This situation persisted until the introduction of the Act on the Procedure for Establishing, Merging and Changing the Territory of a Community and on the Territories of Communities (Official Gazette of the Socialist Republic of Slovenia, No. 28/80, 9/82, 27/84, 38/89; OJ RS, No. 30/90) and the Act on the Naming and Record-keeping of Settlements, Streets and Buildings (Official Gazette of the Socialist Republic of Slovenia, No. 5/80). These two laws abolished the distinction between towns and other settlements in Slovenia.*

Po Zakonu o spremembah in dopolnitvah zakona o lokalni samoupravi je mesto večje urbano naselje, ki se po velikosti, ekonomski strukturi, prebivalstveni gostoti, naseljenosti in zgodovinskem razvoju razlikuje od drugih naselij (Ur. l. RS 57/94).

*According to the Act Amending the Local Government Act, a town is a bigger urban settlement which differs from other settlements by its size, economic structure, population density and historical development (OJ RS, No. 57/94).*

S sklepom Državnega zbora Republike Slovenije, objavljenem v Uradnem listu RS št. 22/2000, ima v Republiki Sloveniji status mesta, v skladu s predpisi, 51 naselij.

*According to the National Assembly decree, published in the Official Journal of RS No. 22/2000, 51 settlements in the Republic of Slovenia have the status of towns.*

### Mestna naselja

Za potrebe statističnega izkazovanja so mestna naselja v Sloveniji (po revidirani definiciji iz 2003) opredeljena na podlagi štirih meril:

- vsa naselja v Sloveniji z več kot 3000 državljani;
- naselja z 2000 do 3000 državljani in hkrati s presežkom delovnih mest;
- naselja, ki so sedeži občin in imajo najmanj 1400 državljanov ter hkrati presežek delovnih mest;
- nekatera manjša obmestna naselja, ki se z mestom postopoma prostorsko in funkcijsko zraščajo v enovito celoto.

Podrobnejša pojasnila glej v poglavju 37 Pregled po mestnih območjih.

### *Urban settlements*

*For statistical dissemination, urban settlements in Slovenia are (according to the revised definition of 2003) divided on the basis of four criteria:*

- *all settlements with more than 3,000 citizens*
- *settlements with 2,000 to 3,000 citizens and a surplus of jobs*
- *settlements with seats of municipalities, at least 1,400 citizens and a surplus of jobs*
- *some smaller outskirts of cities which are gradually forming a spatial and functional entity with the city*

*For detailed explanations, see Chapter 37 – Review by urban areas.*

**Naselja** so strnjene ali nestrnjene skupine stavb, ki sestavljajo naseljeno zemljepisno enoto (mesto, trg, vas, industrijsko in rudarsko naselje, zdravilišče itd.); imajo skupno ime, lastni sistem oštevilčenja stavb ter določeno območje, ki ga tvori en ali več statističnih okolišev. Ta opredelitev je v skladu z Zakonom o imenovanju in evidentiranju naselij, ulic in stavb (Ur. l. SRS 5/80, 42/86, 8/90).

***Settlements** are compact or non-compact groups of buildings constituting a settled geographical unit (town, market, village, industrial or mining settlement, spa, etc.). A settlement has a single name, its own system of numbering buildings and a determinate area made up of one or more statistical districts. This definition is in accordance with the Act on the Naming and Record-keeping of Settlements, Streets and Buildings (Official Gazette of the Socialist Republic of Slovenia, No. 5/80, 42/86, 8/90).*

**Ulice** so vse javne površine v naselju, kot so ceste, poti, trgi, ploščadi in podobno, ki imajo ime. Območje ulice obsega prometno površino, pripadajoče stavbe in zemljišča.

***Streets** are all areas of public use within a settlement such as roads, paths, squares, platforms, etc., that have a name. The area of the street covers transport surface, associated buildings and land.*

**Hišna številka** je enoznačna oznaka vsake stanovanjske ali poslovne stavbe, ki je sestavljena iz imena ulice in številke, ter lahko tudi črke slovenske abecede. Če naselje nima uličnega sistema, je namesto imena ulice izpisano ime naselja.

***House numbers** are unique labels of every residential or business building. They are composed of the street name and a number, possibly also a Slovene alphabet letter. If a settlement does not have a street system, instead of the street name the settlement name is given.*

**Statistični okoliši** so osnovne prostorske enote. Uvedeni so bili leta 1959. Spreminjajo se skladno s spremembami mej naselij. Statistični okoliš pripada le enemu naselju oziroma se nikoli ne deli med dve naselji.

***Statistical districts** are fundamental spatial units. They were introduced in 1959 and are adjusted only when settlement boundaries are changed. Each statistical district falls within one settlement only. It is never divided between two settlements.*

**Prostorski okoliši** (Popisni okoliš) so osnovne in najmanjše, nedeljene prostorske enote, ki jih ne sekajo meje preostalih prostorskih enot.

***Spatial districts (Census districts)** are fundamental and the smallest undivided spatial units, which are not split between other spatial units.*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Glavni vir podatkov o poslovnih subjektih je **Poslovni register Slovenije** (PRS). Njegovo delovanje ureja Zakon o Poslovnem registru Slovenije (Ur. l. RS št. 13/95): določa vzpostavitev, vodenje in vzdrževanje PRS, definira enote registra in način določitve njihove matične (identifikacijske) številke ter način in merila za določitev njihove glavne dejavnosti po Standardni klasifikaciji dejavnosti (SKD); določa tudi obvezno uporabo SKD.

Do leta 2002 je bil upravljalec PRS Statistični urad Republike Slovenije, julija 2002 pa je na podlagi Zakona o plačilnem prometu vodenje PRS prevzela Agencija Republike Slovenije za javnopravne evidence in storitve - AJPES.

PRS pridobiva podatke iz primarnih registrov, evidenc in razvidov, ki jih vodijo različni registrski organi (okrožna sodišča, upravne enote, ministrstva, zbornice, davčni uradi, organi za notranje zadeve in drugi organi), pooblaščeni za vodenje registrov, evidenc in razvidov o poslovnih subjektih. V PRS so vključeni vsi poslovni subjekti, ki so vpisani v ustrezne registre oz. evidence ali so bili ustanovljeni po zakonu in ki niso prenehali poslovati, ne glede na njihovo sedanjo poslovno aktivnost.

Vir za razvrščanje poslovnih subjektov v velikostne razrede po številu zaposlenih je **Statistični register delovno aktivnega prebivalstva** (SRDAP), ki ga vodi Statistični urad Republike Slovenije in je bil vzpostavljen v letu 1986.

### Zajetje

V podatkih so zajete vse pravnoorganizacijske oblike poslovnih subjektov, evidentirane v PRS, ki jih določajo Zakon o gospodarskih družbah (Ur. l. RS št. 30/93, 29/94, 82/94), Zakon o zadrugah (Ur. l. RS št. 13/92), Zakon o zavodih (Ur. l. RS št. 12/91), Zakon o bankah in hranilnicah (Ur. l. RS št. 1/91, 38/92, 46/93), Zakon o gospodarskih javnih službah (Ur. l. RS 32/93), Zakon o društvih (Ur. l. RS 60/95) in drugi zakoni oziroma veljavne določbe le-teh, ki dajejo posameznim poslovnim subjektom status (lastnost) pravne osebe.

V podatkih, ki se nanašajo na čas pred letom 1991, so zajete tudi druge organizacijske oblike, ki so bile ustanovljene še po Zakonu o združenem delu, Zakonu o podjetjih in drugih starih zakonih iz prejšnje države in se še niso preoblikovale v organizacijske oblike v skladu z Zakonom o gospodarskih družbah in z drugimi zakoni.

Iz SRDAP so zajete vse **zaposlene in samozaposlene osebe,** ki so zaposlene v enotah - poslovnih subjektih, - ki se vodijo v PRS:

- zaposlene osebe, ki so v delovnem razmerju (pokojninsko in invalidsko ter zdravstveno zavarovane) pri poslovnih subjektih pravnih osebah ne glede na njihovo lastnino;
- lastniki poslovnih subjektov pravnih oseb, če te osebno vodijo in če niso zavarovani iz drugega naslova;
- zaposlene osebe, ki so v delovnem razmerju (pokojninsko in invalidsko ter zdravstveno zavarovane) pri samostojnih podjetnikih posameznikih, osebah, ki opravljajo poklicno dejavnost kot edini ali glavni poklic, fizičnih osebah, ki uporabljajo dopolnilno delo drugih oseb, če so le-ti evidentirani pri katerem koli primarnem registrskem organu kot poslovni subjekti in jim je bila dodeljena matična številka poslovnega subjekta;
- samostojni podjetniki posamezniki;
- osebe, ki opravljajo poklicno dejavnost kot edini ali glavni poklic in so evidentirane pri katerem koli primarnem registrskem organu in jim je bila dodeljena matična številka poslovnega subjekta;
- druge fizične osebe, ki so evidentirane pri katerem koli primarnem registrskem organu in jim je bila dodeljena matična številka poslovnega subjekta.

### Definicije in pojasnila

**Poslovni subjekti** so pravne in fizične osebe, ki na podlagi vpisa v ustrezne primarne registre, evidence, razvide ali na podlagi zakona opravljajo registrirane ali s predpisom ali z aktom o ustanovitvi določene dejavnosti v zakonsko določeni pravnoorganizacijski obliki in so vpisane v PRS.

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*The main source of data on business subjects is the **Business Register of Slovenia**. Its operation is regulated by the Business Register of Slovenia Act (OJ RS, No. 13/95), which defines setting up, keeping and maintenance of the register, definition of register units, determination of their identification numbers and their obligatory use as well as determination of their main activities according to the Standard Classification of Activities.*

*Until 2002 the register was kept by the Statistical Office of the Republic of Slovenia. On the basis of the Payment Transactions Act, in July 2002 keeping of the Business Register was transferred to the Agency of the Republic of Slovenia for Public and Legal Records and Services.*

*The Business Register obtains data from primary registers and records kept by different register bodies (regional courts, administrative units, ministries, chambers, tax authorities, bodies of internal affairs and other bodies) authorised for keeping registers and records on business subjects. The register covers all business subjects kept in registers or records or created by law and still operating, irrespective of their present business activity.*

*The source for classifying business subjects into size classes according to the number of persons in paid employment is the **Statistical Register of Employment**, which is kept by the Statistical Office of the Republic of Slovenia and was set up in 1986.*

### *Coverage*

*The data cover all legal organisational forms of business subjects as determined by the Companies Act (OJ RS, No. 30/93, 29/94, 82/94), the Co-operatives Act (OJ RS, No. 30/93), the Institutes Act (OJ RS, No. 12/91), the Banks and Savings Banks Act (OJ RS, No. 1/91, 38/92, 46/93), the Public Utilities Act (OJ RS, No. 32/93), the Societies Act (OJ RS, No. 60/95) and other acts or their provisions conferring on business subjects the status of legal person.*

*The data before 1991 still comprise some organisational forms founded upon the Law on Associated Labour, the Law on Enterprises and other old Yugoslav laws. They will be kept in the register until they are harmonised with the Companies Act and other acts.*

***Persons in paid employment and self-employed persons** registered in the Statistical Register of Employment are:*

**Dejavnost** je osnovna funkcija poslovnega subjekta, s katero ustvarja dobiček ali dosega drug temeljni namen svoje ustanovitve. Dejavnost poslovnega subjekta je opredeljena s Standardno klasifikacijo dejavnosti (Ur. l. št. 34/94, 3/95, 33/95,15/96, 89/98,12/99 in 2/02) kot podlago za razvrščanje poslovnih subjektov po dejavnosti v PRS. V tabelah so poslovni subjekti razvrščeni po glavni dejavnosti.

***Activity*** *is the basic function of a business subject with which it creates profit or realises some other basic purpose of its foundation. Activity of a business subject is defined according to the Standard Classification of Activities (OJ RS, No. 34/94, 3/95, 33/95, 15/96, 89/98, 12/99 and 2/02) as the basis for classifying business subjects by activity into the Business Register of Slovenia. In tables, business subjects are classified by their main activities.*

**Glavna dejavnost** gospodarskega subjekta je tista, s katero ustvari največ dodane vrednosti. Pri zavodih, organih in organizacijah je glavna dejavnost poslovnega subjekta registrirana oziroma s predpisom ali z aktom o ustanovitvi določena dejavnost.

***Main activity*** *of a business subject is the one with which it creates the greatest share of value added. In institutions, bodies and organisations it is the registered activity or activity defined in the foundation regulation or act.*

**Institucionalni sektor** je določen s Standardno klasifikacijo institucionalnih sektorjev (Ur. l. RS 56/98). SKIS opredeljuje identificiranje in sektorsko razvrščanje rezidenčnih institucionalnih enot in se kot metodološka podlaga sektorizacije poslovnih subjektov uporablja v PRS za razvrščanje poslovnih subjektov v institucionalne sektorje (nefinančne in finančne družbe, država, gospodinjstva in neprofitni izvajalci storitev gospodinjstvom) na podlagi njihove glavne dejavnosti in funkcije ter glede na to, kakšni tipi proizvajalcev so (tržni/netržni, profitni/neprofitni). V institucionalne podsektorje in skupine enot pa se razvrščajo glede na karakteristike, relevantne za posamezen sektor (npr. v primeru družb po vrsti nadzora nad njimi).

***Institutional sector*** *is determined according to the national* ***Standard Classification of Institutional Sectors*** *(OJ RS, No. 56/98), which determines identification and sectoral classification of resident institutional units and is used as the methodological basis for the sectorisation of business subjects in the Business Register for classifying business subjects into institutional sectors (non-financial corporations, financial corporations, general government, households and non-profit institutions serving households) on the basis of their main activity and function and by the type of producer they are (market/non-market, profit/non-profit). They are classified into institutional subsectors and groups of units according to the criteria relevant for a particular sector (e.g. in the case of companies by the control over them).*

**Nefinančne družbe** (sektor 11) so po omenjeni uredbi enote, katerih glavna funkcija je proizvodnja tržnega blaga in nefinančnih storitev, in so zato tržni proizvajalci blaga in nefinančnih storitev. Nefinančne družbe se glede na vrsto nadzora nad družbo (javni, domači zasebni, tuji) razporejajo v skupine institucionalnih enot (šifre 11001, 11002, 11003). V nacionalni klasifikaciji je dodana skupina institucionalnih enot s šifro 11009: nefinančne družbe v lastninskem preoblikovanju.

***Non-financial corporations*** *(sector 11) are units whose main function is production of market goods and non-financial services, and are therefore market producers of goods and non-financial services. Non-financial corporations are according to the type of control (public, national private, foreign) further classified into groups of institutional units (codes 11001, 11002, 11003). In the national classification a group of institutional units coded with 11009 is added: non-financial corporations in ownership transformation.*

**Finančne družbe** (sektor 12) so po SKIS vse tiste družbe ki so dejavne v glavnem v finančnem posredništvu (finančni posredniki) in v pomožnih finančnih dejavnostih (družbe, ki se ukvarjajo s pomožnimi finančnimi dejavnostmi). Vse enote, razvrščene v sektor 12, razen tistih, ki spadajo v podsektor 121, skladno s SKIS izpolnjujejo zahtevo, da je njihova glavna dejavnost finančno posredništvo. Finančne družbe se glede na vrsto nadzora nad družbo (javni, domači zasebni,

***Financial corporations*** *(sector 12) according to the national classification cover all corporations which are mainly engaged in financial intermediation (financial intermediators) or in auxiliary financial activities (financial auxiliaries). All units classified into sector 12, except those classified into subsector 121, have to fulfil conditions under which their main activity is treated as financial intermediation. Financial corporations are according to the type of control (public, national*

tuji) razporejajo v skupine institucionalnih enot. V nacionalni klasifikaciji so dodane skupine institucionalnih enot - finančnih družb v lastninskem preoblikovanju.

**Država** (sektor 13) po SKIS zajema enote, ki so drugi netržni proizvajalci, katerih proizvodnja je namenjena individualni in kolektivni porabi in se v glavnem financirajo z obveznimi plačili enot, ki pripadajo drugim sektorjem, in/ali so institucionalne enote, ki so v glavnem dejavne v prerazdelitvi nacionalnega dohodka in bogastva.

**Gospodinjstva** (sektor 14). V sektor poslovnih subjektov PRS se iz okvira gospodinjstev po pravilih SKIS uvrščajo le tista gospodinjstva, katerih glavna funkcija je (poleg morebitne potrošnje) proizvodnja tržne proizvodnje ter proizvodnja blaga in storitev za lastno končno uporabo (gospodinjstva kot podjetniki - zasebni tržni proizvajalci ali zasebni proizvajalci za lastno končno uporabo). V tem sektorju zajema Poslovni register RS enote, ki se ne razvrščajo v druge sektorje, a ustrezajo opredelitvi poslovnega subjekta. Po naši zakonodaji zajema samostojne podjetnike posameznike in druge vrste fizičnih oseb, ki so registrirane pri primarnih registrskih organih (zdravnike, lekarnarje, odvetnike, notarje, samostojne ustvarjalce na področju kulture itd.). PRS ne zajema gospodinjstev, ki so zgolj potrošniki, ter gospodinjstev, ki se ukvarjajo tudi s proizvodnjo blaga in storitev (tudi tržno), a niso registrirane fizične osebe (npr. zasebni kmetovalci).

**Netržni izvajalci storitev gospodinjstvom (NPISG)** (sektor 15) so po omenjeni uredbi neprofitne enote, ki so posebne pravne osebe ali neformalne organizacije (vendar slednje v PRS niso evidentirane), ki oskrbujejo gospodinjstva, in so zasebni drugi netržni proizvajalci. Glavni viri sredstev teh enot so poleg občasnih drugih prihodkov neposredni ali posredni prostovoljni prispevki v denarju ali v naravi s strani gospodinjstev, ki se nasproti tem enotam pojavljajo kot potrošniki, plačila države in dohodki od premoženja. V sektor netržnih izvajalcev storitev gospodinjstvom so vključene naslednje glavne vrste takih enot, ki oskrbujejo gospodinjstva z nekaterim blagom in storitvami:

- sindikati, stanovska in poklicna združenja, združenja potrošnikov, politične stranke, cerkvene in verske skupnosti (vključno s tistimi, ki jih država financira, vendar ne nadzira) ter družabni, kulturni, rekreacijski in športni klubi;
- dobrodelne ustanove in organizacije za pomoč ponesrečenim in drugače potrebnim, ki jih s prostovoljnimi prispevki v denarju ali v naravi financirajo druge institucionalne enote.

**Oblika lastnine** določa lastništvo trajnega kapitala in upravljalskih pravic poslovnih subjektov.

**Poreklo kapitala** opredeljuje poreklo lastnine ustanovitvenega kapitala.

**Ustanovitev** poslovnega subjekta je vpis poslovnega subjekta v primarni register, evidenco ali razvid ali ustanovitev neposredno po zakonu.

**Prenehanje** poslovnega subjekta. Poslovni subjekt lahko preneha obstajati po zakonu ali po volji ustanovitelja ne glede na razloge (stečaj, likvidacija, pripojitev, združitev ipd.).

*private, foreign) further classified into groups of institutional units. The national classification also covers groups of institutional units - financial corporations in ownership transformation.*

***General government*** *(sector 13) according to the national classification covers units which are other non-market producers whose production is intended for individual and collective consumption, and are mainly financed by compulsory payments made by units belonging to other sectors, and/or all institutional units principally engaged in the redistribution of national income and wealth.*

***Households*** *(sector 14) as a sector of business subjects cover only those units whose main function is (besides eventual consumption) production of market output and production of goods and services for own final use (households as entrepreneurs – private market producers or private producers for own final use). This sector covers those units which are not classified in other sectors, but qualify as business subjects. Covered are, according to our legislation, individual private entrepreneurs and other types of natural persons which are registered with primary register bodies (doctors, pharmacists, lawyers, notaries, free-lance cultural workers, etc.). The Business Register does not cover households which are merely consumers and households which are non-market or market producers of goods and services but are not registered natural persons (such as farmers).*

***Non-profit institutions serving households (NPISH)*** *(sector 15) are non-profit units which are special legal persons or informal organisations (however, the latter are not covered by the Business Register) serving households and are therefore private other non-market producers. Their principal resources of these units are, apart from those derived from occasional sales, derived from voluntary contributions in cash or in kind from households in their capacity as consumers, from payments made by general government and from property income. This sector includes the following main kinds of such units that provide goods and services to households:*

- *trade unions, professional societies, associations of consumers, political parties, churches or religious societies (including those financed but not controlled by general government), and social, cultural, recreational and sports clubs;*
- *charities, relief and aid organisations financed by voluntary transfers in cash or in kind from other institutional units.*

***Kind of ownership*** *determines ownership of equity capital and management rights of business subjects.*

***Origin of capital*** *defines origin of ownership of start-up capital.*

***Establishment*** *of a business subject is entry of the business subject into the primary register or record or formation directly according to the law.*

***Cessation*** *of a business subject. A business subject can stop to exist according to the law or the will of the founder irrespective of the reasons (bankruptcy, winding up, joining, merger, etc.).*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Viri podatkov so:

- popisi prebivalstva, gospodinjstev in stanovanj;
- letna statistična raziskovanja o rojstvih, smrtih, priznanjih in ugotovitvah očetovstva ter posvojitvah otrok, sklenitvah zakonskih zvez, razvezah zakonskih zvez, selitvah prebivalstva; izvaja jih Statistični urad Republike Slovenije;
- Centralni register prebivalstva Ministrstva za notranje zadeve;
- Zbirka podatkov o umrlih, Inštitut za varovanje zdravja Republike Slovenije
- evidence o tujcih in o osebah z začasnim zatočiščem v Sloveniji Ministrstva za notranje zadeve.

S popisi prebivalstva zbira Statistični urad Republike Slovenije podatke o številčnem stanju in osnovnih sestavah prebivalstva in gospodinjstev. Po prvi svetovni vojni je bilo v Sloveniji izvedenih devet popisov prebivalstva: 31. 1. 1921, 31. 3. 1931, 15. 3. 1948, 31. 3. 1953, 31. 3. 1961, 31. 3. 1971, 31. 3. 1981, 31. 3. 1991 in 31. 3. 2002. Ob popisih 1971, 1981 in 1991 je bil hkrati opravljen tudi popis stanovanj, ob popisu 1991 še popis gospodinjstev s kmečkim gospodarstvom, ob popisu 2002 pa prvič tudi popis stavb.

Osnovne podatke iz popisov prebivalstva prikazujemo najprej za ozemlje, ki je pripadalo Sloveniji ob popisih, nato pa še za sedanje ozemlje naše države. V popisih 1921 in 1931, ko je bilo ozemlje Slovenskega primorja priključeno k Italiji, so bili prebivalci tega območja popisani v italijanskih popisih prebivalstva. Ker omenjena popisa v Sloveniji in Italiji nista bila izvedena hkrati, so osnovni podatki za ta del ozemlja ocenjeni. V času popisov 1948 in 1953 je bilo zunaj današnjih meja Slovenije Svobodno tržaško ozemlje, ki je bilo razdeljeno v coni A in B. V coni B je bilo 15. 12. 1948 izvedeno delno štetje prebivalstva, sočasno z zbiranjem prijav za preskrbo z živilskimi kartami. Cona B je bila priključena k Sloveniji leta 1954. Prebivalstvo na tem ozemlju je bilo prvič evidentirano 25. 4. 1956.

Podatke o prebivalstvu objavljamo tudi na osnovi:

- bilančnega izračuna števila prebivalstva (od leta 1920 do leta 1953),
- občinskih registrov stalnega prebivalstva (od leta 1954 do leta 1984),
- Centralnega registra prebivalstva (od leta 1985 do leta 1994),
- spremenjene definicije prebivalstva (od leta 1995).

Podatke o vitalni in selitveni statistiki prebivalstva pridobivamo od oddelkov za upravne notranje zadeve, le o razvezah zakonskih zvez nam poročajo okrožna sodišča. Omenjene podatke nam posredujejo na obrazcih ali v elektronski obliki.

- Podatke o rojstvih, smrtih, priznanjih in ugotovitvah očetovstva ter sklenitvah zakonskih zvez zberemo z obrazci, ki jih na osnovi vpisov in zaznamb v matične knjige izpolnjujejo delavci oddelkov za upravne notranje zadeve pri upravnih enotah.
- Podatke o razvezah zakonskih zvez zberemo z obrazci, ki jih izpolnjujejo sodniki okrožnih sodišč na podlagi sodb o razvezah zakonskih zvez.

Statistični urad Republike Slovenije zbira te podatke po kraju dogodka, rezultate statističnih raziskovanj pa objavlja po stalnem prebivališču, in sicer:

- pri rojstvu po stalnem prebivališču matere ob otrokovem rojstvu;
- pri priznanju in ugotovitvi očetovstva po stalnem prebivališču otroka;
- pri smrti po zadnjem stalnem prebivališču umrle osebe;
- pri sklenitvi zakonske zveze po stalnem prebivališču ženina pred sklenitvijo zakonske zveze;
- pri razvezi zakonske zveze po zadnjem skupnem stalnem prebivališču moža in žene pred razvezo zakonske zveze.

Individualne podatke o umrlih prevzema Statistični urad Republike Slovenije od 1. 1. 2000 dalje v elektronski obliki od Inštituta za varovanje zdravja Republike Slovenije. Ta jih zbira v Zbirki podatkov o

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Sources of data are:*

- *censuses of the population, households and housing,*
- *annual statistical surveys on births, deaths, acknowledgement and ascertainment of paternity, child adoption, marriages, divorces and migration conducted by the Statistical Office of the Republic of Slovenia,*
- *the Central Population Register kept by the Ministry of the Interior,*
- *Mortality Database, Institute of Public Health of the Republic of Slovenia,*
- *records on foreigners and on persons under temporary protection in Slovenia provided by the Ministry of the Interior.*

*Population censuses are used to compile data on the size and basic structure of the population and households. Nine censuses have been carried out on the territory of Slovenia after the First World War: 31 January 1921, 31 March 1931, 15 March 1948, 31 March 1953, 31 March 1961, 31 March 1971, 31 March 1981, 31 March 1991 and 31 March 2002. During the censuses in 1971, 1981 and 1991 a housing census was also carried out, in 1991 a census of agricultural holdings and in 2002 for the first time a census of buildings.*

*The basic data from the censuses of population are shown first by the territory at the time of the census and then for the present territory of Slovenia. At the time of the censuses in 1921 and 1931 the Slovenian coast belonged to Italy so the population of this region was registered in Italian population censuses. These censuses did not coincide with the censuses in Slovenia, therefore the data for these territories are estimated for both years. At the time of the censuses in 1948 and 1953 the Free Territory of Trieste was outside the current borders of Slovenia and divided into Zone A and Zone B. On 15 December 1948 a partial population count was carried out in Zone B connected with the registration for food coupons. Zone B was incorporated into Slovenia in 1954. The first registration of population on this territory was carried out on 25 April 1956.*

*Data on population are published on the basis of:*

- *balance calculation of the size of the population (from 1920 to 1953),*
- *municipal registers of permanent population (from 1954 to 1984),*
- *Central Population Register (from 1985 to 1994),*
- *modified definition of population (from 1995).*

*The reporting units for vital statistics (births, deaths, fertility, marriage) and migration statistics of the population are the municipal administrative bodies of internal affairs. The courts are the reporting units only in the case of divorce statistics. Data are sent to us on forms or electronic media.*

- *Data on births, deaths, acknowledgement of paternity, ascertainment of paternity and marriages are collected on forms filled in by employees of the departments of administrative internal affairs at administrative units based on entries and records in the register.*
- *Data on divorces are collected on forms filled in by district court judges based on legally effective sentences on divorces.*

*The Statistical Office of the Republic of Slovenia collects these data according to the place of event, and the results are published by permanent residence:*

- *permanent residence of mother at child birth,*
- *permanent residence of child at acknowledgement and ascertainment of paternity,*
- *the last permanent residence of dead person at death,*
- *at marriage permanent residence of groom before marriage,*
- *at divorce the last common permanent residence of husband and wife before divorce.*

*Since 1 January 2000 the data on deaths have been taken over on electronic media from the Institute of Public Health of the Republic of Slovenia. The Institute of Public Health collects these data according*

umrlih, Statistični urad Republike Slovenije, pa jih prikazuje po stalnem ali začasnem prebivališču.

Individualne podatke o selitvah državljanov RS posreduje Statističnemu uradu Republike Slovenije Ministrstvo za notranje zadeve na podlagi podatkov o prijavi, odjavi, spremembi stalnega prebivališča v Sloveniji ter o prijavi začasnega prebivanja v tujini oziroma o vrnitvi iz tujine v elektronski obliki. Isto ministrstvo mu od leta 1995 dalje na podlagi svojih evidenc posreduje tudi podatke o priselitvah tujcev, in sicer v agregirani obliki.

Podatki za časovne vrste selitev niso povsem primerljivi. Do leta 1992 so v njih upoštevane selitve državljanov vseh republik nekdanje Jugoslavije, ki so se priselili v Slovenijo oziroma se iz nje odselili ali so se selili znotraj Slovenije.

Od 1992 do 1994 so upoštevane le selitve državljanov Republike Slovenije. Po slovenskih zakonskih predpisih s področja osebnih stanj so nekdanji državljani nekdanje Jugoslavije postali tujci, če niso sprejeli državljanstva Republike Slovenije ali če niso izpolnjevali pogojev za pridobitev državljanstva Republike Slovenije.

Z letom 1995 in dalje so v podatkih o priselitvah v Slovenijo in odselitvah iz nje upoštevani tudi podatki o selitvah tujcev. Podatki o odselitvah tujcev so ocenjeni na osnovi podatkov o številu in naravnem gibanju tujcev v Sloveniji.

V podatkih o meddržavnih selitvah državljanov RS so od leta 1999 upoštevane tudi prijave začasne odsotnosti zaradi odhoda v tujino (za več kot 3 mesece) oziroma prijave vrnitve iz tujine, kjer so državljani RS začasno prebivali.

**Koeficienti, strukture in druga relativna števila** so izračuni Statističnega urada Republike Slovenije. Nekatere vrednosti kazalnikov, ki jih je v svojih publikacijah do leta 1989 objavljal tudi Zvezni zavod za statistiko, se od izračunov Statističnega urada Republike Slovenije razlikujejo. Zvezni zavod za statistiko pri računanju števila prebivalstva ni upošteval selitvenega prirasta; ta je bil za Slovenijo od leta 1957 stalno pozitiven. Zato imajo izračuni zveznega zavoda višje vrednosti.

Statistični urad Republike Slovenije je pri svojih izračunih upošteval podatke o številu prebivalstva po starosti in spolu po stanju 30. junija, in sicer iz naslednjih virov:

- do leta 1980 ocene Zveznega zavoda za statistiko (za tiste kazalnike, ki jih računamo na podlagi starostne strukture) oziroma podatke Statističnega urada Republike Slovenije (za kazalnike, ki jih računamo le na podlagi skupnega števila prebivalstva);
- od leta 1981 do leta 1985 ocene Statističnega urada Republike Slovenije;
- od leta 1986 do leta 1994 podatke Centralnega registra prebivalstva;
- od leta 1995 podatke Statističnega urada Republike Slovenije po spremenjeni definiciji prebivalstva.

Pri nekaterih izračunih (npr. za pričakovano trajanje življenja ob rojstvu) smo uporabljali tudi podatke iz popisov prebivalstva.

## Pojasnila v zvezi s statističnim opazovanjem prebivalstva

### 1. Popisi prebivalstva

V podatkih popisov prebivalstva pred drugo svetovno vojno je prikazano dejansko (de facto) prebivalstvo, torej prebivalstvo, ki je ob popisu dejansko prebivalo na ozemlju Slovenije.

Pri primerjavi podatkov Popisa prebivalstva, gospodinjstev in stanovanj v letu 2002 (v nadaljevanju Popis 2002) s podatki predhodnih popisov je treba upoštevati, da se je definicija prebivalstva spreminjala. V podatkih popisov po drugi svetovni vojni (1948–1991) je bilo upoštevano prebivalstvo s stalnim prebivališčem v Sloveniji (de jure). Upoštevane so bile osebe, ki so izjavile, da imajo v naselju popisa stalno prebivališče, ne glede na to, ali so bile ob popisu začasno odsotne. Med začasno odsotne so bile štete osebe, ki so bile odsotne krajši čas, in tudi osebe na delu v tujini ter njihovi družinski člani, ki so z njimi živeli v tujini (zdomci), ne glede na trajanje dela oziroma prebivanja v tujini.

V Popisu 2002 smo upoštevali mednarodna priporočila za popise pre-

*to the Mortality Database and the Statistical Office is publishing these data by permanent or temporary residence of the dead person.*

*Data on migration of citizens of the Republic of Slovenia are mediated on electronic media by the Ministry of the Interior to the Statistical Office of the Republic of Slovenia, based on information on registrations, departure notices, and changes of permanent residence in Slovenia and also on registrations of temporarily residing abroad and returning from abroad. Aggregated data on immigration of foreigners since 1995 were supplied on the basis of the records on foreigners in Slovenia.*

*Data for time series are not entirely comparable. Until 1992 data on migration included migration of citizens of all republics of former Yugoslavia who immigrated to Slovenia, emigrated from Slovenia or migrated within Slovenia.*

*Between 1992 and 1994 only the migration of citizens of the Republic of Slovenia is included. According to legal regulations of the Republic of Slovenia concerning personal conditions, the ex-citizens of the SFR Yugoslavia who did not accept or fulfil conditions for acquiring citizenship of the Republic of Slovenia became foreigners.*

*Since 1995 data on immigration and emigration in Slovenia include also the data on migration of foreigners. Data on emigration of foreigners are estimated on the basis of the size and natural changes of foreigners in Slovenia.*

*Since 1999 data on international migration of citizens of the RS also include temporary absence from Slovenia because of departure abroad (for more than 3 months) and arrivals after temporary residing abroad.*

***Coefficients, structures and other relative figures** are calculated by the Statistical Office of the Republic of Slovenia. Some values of indicators, published also by the Federal Statistical Office until 1989, differ from the calculations of the Statistical Office of the Republic of Slovenia. In the calculation of the size of the population the Federal Statistical Office did not take into account population growth through migration which has had a positive effect on the size of the Slovenian population since 1957. Therefore, the figures calculated by the Federal Office are higher.*

*Statistical Office of the Republic of Slovenia took into account the size of the population by age and sex as of 30 June in its calculations:*

- *until 1980 estimations of the Federal Statistical Office (for indicators calculated on the basis of age structure), or data of the Statistical Office of Republic of Slovenia (for indicators calculated on the basis of the total number of population),*
- *from 1981 to 1985 estimations of the Statistical Office of the Republic of Slovenia,*
- *from 1986 to 1994 data of the Central Population Register,*
- *since 1995 data according to the modified definition of the population.*

*For some calculations (e.g. life expectancy at birth) we also used population census data.*

## *Explanations on population*

### *1. Population censuses*

*Census data in the period before the Second World War took into account present (de facto) population, i.e. the population that actually lived on the territory of Slovenia.*

*Comparing the 2002 Census data with the data collected with previous censuses, one needs to take into account that the definition of the population changed. Data after the Second World War (from 1948 to 1991) took into account population with permanent residence in Slovenia (de iure). Taken into account were people who declared that they have permanent residence in the place of enumeration, irrespective of whether they were temporarily absent at the time of the census. Temporarily absent people were those who were absent for a short time and also those who were working abroad and family members who were living with them abroad (migrant workers), irrespective of the duration of their work or stay abroad.*

*At the 2002 Census we took into account international recommenda-*

bivalstva, po katerih se med prebivalstvo države štejejo samo tiste osebe, ki na njenem ozemlju dejansko prebivajo. V Popisu 2002 kot prebivalci Slovenije niso več upoštevane osebe, ki imajo v Sloveniji stalno ali začasno prebivališče, vendar že več kot eno leto prebivajo v tujini. Po tej metodologiji smo preračunali tudi podatke popisa 1991.

Poleg tega smo v Popisu 2002 prvič upoštevali tudi trajanje prebivanja v Sloveniji in tako kot prebivalce Slovenije upoštevali samo tiste priseljene osebe, ki v Sloveniji prebivajo vsaj eno leto, ne glede na to, ali imajo v Sloveniji prijavljeno prebivališče.

### 2. Občinski registri prebivalstva

Podatke o številu prebivalstva Slovenije od leta 1954 do leta 1984 smo izračunali in jih objavljamo po podatkih iz občinskih registrov stalnega prebivalstva. Izračunali smo jih tako, da smo podatkom o številu prebivalstva občin na začetku leta prišteli oziroma odšteli podatke o naravnem in selitvenem gibanju prebivalstva na območju občin ter upoštevali popravke v občinskem registru stalnega prebivalstva, ki so vplivali na njegovo število.

V podatkih o številu prebivalstva Slovenije po registrih stalnega prebivalstva občin so upoštevani prebivalci, ki so imeli prijavljeno stalno prebivališče v Sloveniji, ne glede na to, ali so začasno živeli v tujini.

### 3. Centralni register prebivalstva

Od leta 1985 je vir podatkov o številu prebivalstva oziroma državljanih Slovenije Centralni register prebivalstva. Ta je zbir podatkov o slovenskih državljanih, ki imajo v državi prijavljeno stalno prebivališče.

V številu prebivalstva Slovenije do 25. junija 1991 so upoštevani prebivalci, ki so tedaj imeli v Sloveniji prijavljeno stalno prebivališče. To so bili državljani nekdanje SFR Jugoslavije (državljani takratne SR Slovenije in državljani drugih republik nekdanje SFR Jugoslavije).

Po 25. juniju 1991 so v številu prebivalstva Slovenije upoštevani:

- državljani Republike Slovenije s stalnim prebivališčem v Sloveniji,
- osebe, ki so bile do 25. 6. 1991 državljani nekdanje SFR Jugoslavije in so imele takrat prijavljeno stalno prebivališče v Sloveniji, niso pa pridobile državljanstva Republike Slovenije in tudi ne državljanstva druge države.

Zaradi popravkov v občinskih registrih stalnega prebivalstva oziroma popravkov v Centralnem registru prebivalstva izračuni števila prebivalstva po stanju na začetku leta in podatkov naravnega in selitvenega gibanja prebivalstva za vse leto niso enaki številu prebivalstva po stanju ob koncu leta.

### 4. Spremenjena definicija prebivalstva

Pri pripravi podatkov o prebivalstvu Statistični urad Republike Slovenije od 30. 6. 1995 delno upošteva spremenjeno definicijo prebivalstva Slovenije iz leta 1996 (glej: Razvojna vprašanja statistike, Prebivalstvo Slovenije, Ljubljana 1996). Po definiciji, veljavni do konca leta 1994, smo šteli kot prebivalce Slovenije vse osebe, ki so imele v Sloveniji prijavljeno stalno prebivališče, tudi če so bile iz Slovenije začasno (več kot tri mesece) odsotne.

Sedanja definicija se od definicije prebivalstva, po kateri smo objavljali podatke do konca leta 1994 po podatkih Centralnega registra prebivalstva, razlikuje v naslednjem:

- v številu prebivalstva Slovenije niso več zajeti tisti državljani Republike Slovenije, ki imajo v njej stalno prebivališče, a začasno (več kot tri mesece) prebivajo v tujini;
- v število prebivalstva Slovenije pa so zdaj všteti tudi tujci s prijavljenim stalnim oziroma z začasnim prebivališčem v Sloveniji ter begunci.

Po sedanji statistični definiciji prebivalstva torej štejemo med prebivalce Slovenije:

*tions for population censuses according to which a country's population are only those people who actually live on its territory. At the 2002 Census people who have permanent or temporary residence in Slovenia but have been living abroad for over a year are no longer considered to be the population of Slovenia. We have recalculated the 1991 Census data according to this methodology.*

*In addition, at the 2002 Census we took into account for the first time the duration of stay in Slovenia, so that the population of Slovenia are also those immigrants who have been living in Slovenia for at least a year, irrespective of whether they have a registered residence in Slovenia or not.*

### *2. Municipal registers of population*

*Between 1954 and 1984 data on the population of Slovenia were calculated and published on the basis of data from municipal registers of permanent population. They were calculated in such a way that data on natural changes and migration of the population within the area of the community, together with corrections in the municipal register of permanent residence that might have affected the number of residents, were added or subtracted from the population of the community at the beginning of the month.*

*Data on the population of Slovenia according to municipal registers of permanent population include residents registered as permanent residents of Slovenia irrespective of whether they were temporarily living abroad.*

### *3. The Central Population Register*

*The Central Population Register has been the source for the number of population respectively of the citizens of Slovenia since 1985. It is a collection of data on Slovenian citizens, who have registered permanent residence in the country.*

*Until 25 June 1991 the number of residents had included those who were registered as permanent residents in Slovenia. These were citizens of former Socialist Federal Republic of Yugoslavia (citizens of the Socialist Republic of Slovenia and citizens of other republics of former SFR Yugoslavia).*

*After 25 June 1991 the number of residents includes:*

- *citizens of the Republic of Slovenia with permanent residence in Slovenia,*
- *persons who until 25 June 1991 were citizens of former SFR Yugoslavia and were registered as permanent residents of Slovenia at the time but did not acquire citizenship of the Republic of Slovenia or citizenship of any other country.*

*Due to corrections made in municipal registers of permanent population and those made in the Central Population Register, calculations of the number of population at the beginning of the year and data on natural and migration movements of residents for the whole year are not the same as the number of population calculated at the end of the year.*

### *4. Modified definition of population*

*Preparing population data, since 30 June 1995 the Statistical Office of the Republic of Slovenia partly considers modified definition of the population from 1996 (see: Development Issues of Statistics, Population of Slovenia, Ljubljana 1996). By definition that was valid until the end of 1994, the population of Slovenia were all persons with registered permanent residence in Slovenia, irrespective of the fact that they were temporarily (more than three months) absent from Slovenia.*

*The present definition differs from the definition that was used for the data published until 31 December 1994 according to the Central Population Register in two things:*

### Zbiranje podatkov o narodni pripadnosti in veroizpovedi v Popisu 2002

V tem se je Popis 2002 nekoliko razlikoval od preteklih popisov. Po določilih 10. člena Zakona o popisu prebivalstva, gospodinjstev in stanovanj v Republiki Sloveniji (Uradni list RS št. 66/2000, 26/2001) se je o narodni/etnični pripadnosti in veroizpovedi morala vsaka oseba, stara 14 let ali več, tokrat opredeliti (tj. osebno odgovoriti – ustno ali pisno) **sama.** Za otroke, mlajše od 14 let, so odgovor lahko posredovali starši, posvojitelj oziroma skrbnik.

Vprašanje je bilo namenjeno vsem osebam. Popisovalec je bil dolžan vsaki popisovani osebi prebrati oziroma pokazati ponujene možne odgovore in jo opozoriti, da je odgovarjanje na to vprašanje prostovoljno oz. da se o narodni/etnični pripadnosti in veroizpovedi ni dolžna izreči, če tega ne želi. Odgovor na vprašanje o narodni/etnični pripadnosti in veroizpovedi je moral popisovalec označiti oziroma vpisati natančno tako, kakor ga je povedala popisovana oseba.

Za člane gospodinjstva, ki so na kritični trenutek popisa (31. marec 2002) dopolnili 14 let starosti, vendar so bili v času popisovanja oz. v času obiska popisovalca odsotni ali se v navzočnosti drugih članov gospodinjstva oziroma popisovalca niso želeli opredeliti o narodni/etnični pripadnosti in veroizpovedi, je popisovalec pustil poseben vprašalnik – **Izjavo o narodni/etnični pripadnosti in veroizpovedi (vprašalnik P-3/NV) –** skupaj s kuverto za odgovor. Tako je bilo vsaki osebi omogočeno, da Izjavo o narodni/etnični pripadnosti in veroizpovedi izpolni sama in jo, če to želi, po pošti pošlje na Statistični urad RS. Urad je upošteval samo tiste prispele Izjave o narodni/etnični pripadnosti in veroizpovedi, ki so bile podpisane.

### *Collecting data on ethnic affiliation and religion at the 2002 Census*

*Compared to previous censuses, at the 2002 Census collecting data on ethnic affiliation and religion was slightly changed. According to provisions of Article 10 of the Act Regulating the Census of Population, Households and Housings in the Republic of Slovenia (OJ RS 66/2000, 26/2001), all people aged 14 and over had to declare their ethnic affiliation and religion **themselves**. For children younger than 14 the answer could be given by their parents, adopters or guardians.*

*The question was intended for all persons. The interviewer had to read or show to the respondents the options and warn them that they need not declare their ethnic affiliation and religion. The answer to the question on ethnic affiliation and religion had to be marked or entered exactly as given by the respondent.*

*For household members who on the census reference date (31 March 2002) were at least 14 years old but were absent from the household at the time of the interview or the interviewer's visit or did not want to declare their ethnic affiliation and religion in the presence of other household members or the interviewer, the data on ethnic affiliation and religion were collected with the **Statement on the Nationality/ Ethnicity and Religion (P-3/NV questionnaire)**, which was left by the interviewer together with the envelope in the household. In this way every person could fill in the Statement on the Nationality/Ethnicity and Religion and send it to the Statistical Office of the Republic of Slovenia. Sending of the Statement on the Nationality/Ethnicity and Religion was not obligatory. The office took into account only those Statements on the Nationality/Ethnicity and Religion that were signed.*

### Narodna pripadnost

Vprašanje o narodni pripadnosti je bilo zastavljeno v vseh popisih po II. svetovni vojni. Ob popisih leta 1953 in 1961 so za otroke, mlajše od 10 let, ob popisih 1971, 1981 in 1991 pa za otroke, mlajše od 15 let, odgovor na to vprašanje posredovali starši ali drugi zakoniti zastopniki (skrbniki, posvojitelji). Za osebe, ki so bile med popisovalčevim obiskom odsotne, je v preteklih popisih odgovor na to vprašanje posredoval popisovalcu drug polnoletni član gospodinjstva.

Pri obdelavi podatkov o narodni pripadnosti se je uporabljala ista klasifikacija, le da se je od popisa do popisa dopolnjevala z novimi odgovori o narodni pripadnosti.

Upoštevati je treba predvsem metodološke razlike pri opredeljevanju Muslimanov, Jugoslovanov, Bošnjakov in oseb, ki so se opredeljevale po regionalni pripadnosti: Osebe, ki so se opredelile za Muslimane v smislu etnične, in ne verske pripadnosti, so se lahko prvič narodno opredelile za Muslimane prvič leta 1961. Pred tem so bili opredeljeni kot »Jugoslovan – neopredeljen«. Ob popisu 1961 so tiste osebe, ki se niso podrobneje narodno opredelile, lahko odgovorile »Jugoslovan – narodnostno neopredeljen«. Enak odgovor je veljal tudi za tiste, ki so kot narodno pripadnost navedle pokrajinsko – regionalno pripadnost (npr. Gorenjec, Dalmatinec ipd.). Leta 1971 je bila sprejeta klasifikacija, ki je ustrezala ustavnim določbam o enakopravnosti vseh

### *Ethnic affiliation*

*The question on ethnic affiliation was asked in all censuses after World War II. In 1953 and 1961 censuses for children younger than 10 and in 1971, 1981 and 1991 censuses for children younger than 15 the answers were provided by their parents or other representatives (guardians, adopters). For persons who were absent at the time of the interviewer's visit, in the past censuses the answer on ethnic affiliation could be provided by an adult member of the household.*

*In individual censuses the same classification was used for processing the data on ethnic affiliation, but it was supplemented with new answers on ethnic affiliation.*

*One needs to take into account methodological differences in people declaring themselves as Muslims, Yugoslavs and Bosniacs, and people declaring themselves by regional affiliation: People who regarded themselves as Muslims in the sense of ethnic and not religious affiliation could declare themselves Muslims for the first time in 1961. Before 1961 they were declared as "Yugoslavs – undeclared". At the 1961 Census people who did not give detailed ethnic affiliation could give the answer "Yugoslavs – ethnically undeclared". The same answer was recorded for those who stated regional affiliation (such as Upper Carniolan, Dalmatian, etc.). In 1971 a classification was adopted which suited constitutional provisions on the equality of all*

narodov in narodnosti in o pravici prebivalcev, da se narodno opredelijo, vključno s pravico, da se narodno ne opredelijo, če se ne želijo. Prebivalci so po tej klasifikaciji, ki je veljala tudi ob popisih 1981, 1991 in 2002, po narodni pripadnosti razvrščeni v dve skupini:

- narodno opredeljeni;
- narodno neopredeljeni.

Z nastankom samostojnih držav na ozemlju nekdanje Jugoslavije smo v klasifikacijo narodno opredeljenih prebivalcev vključili odgovor "Bošnjak", ki je bil v Ustavo Federacije Bosne in Hercegovine vpeljan leta 1994. Med narodno opredeljenimi še vedno prikazujemo tudi Muslimane, ki so se tako opredelili v smislu etnične, in ne verske pripadnosti.

Kot narodno neopredeljene prikazujemo tiste, ki so se opredelili kot:

- Jugoslovani;
- Bosanci (v podatkih preteklih popisov so bili prikazani kot regionalno opredeljeni);
- regionalno opredeljeni (npr. Istrijan, Prekmurec, Dalmatinec);
- drugi (osebe, ki so izjavile/označile, da so narodno neopredeljene).

*nations and ethnic groups and the right of people to declare their ethnic affiliation, including the right not to do so. According to the classification valid at 1981, 1991 and 2002 censuses, the population is classified into two groups by ethnic affiliation:*

- *declared;*
- *undeclared.*

*With the creation of independent states in the territory of former Yugoslavia, the classification of ethnically declared population includes Bosniacs. This term was introduced by the Constitution of the Federation of Bosnia and Herzegovina in 1994. Among ethnically declared we still show Muslims, who declared so in the sense of ethnic and not religious affiliation.*

*People shown as ethnically undeclared are:*

- *Yugoslavs;*
- *Bosnians (in the past censuses they were shown as regionally declared);*
- *regionally declared (e.g. Istrians, Dalmatians, etc.);*
- *others (people who preferred to be ethnically undeclared).*

## Veroizpoved

V popisih po II. svetovni vojni se je podatek o veroizpovedi zbiral le v letih 1953, 1991 in 2002. Ob popisu leta 1953 so podatek o veroizpovedi za otroke, mlajše od 14 let, posredovali popisovalcu starši ali drugi zakoniti zastopniki (skrbniki, posvojitelji), ob popisu leta 1991 pa za otroke, mlajše od 15 let. Za osebe, ki so bile med popisovalčevim obiskom odsotne, je v preteklih popisih odgovor o veroizpovedi popisovalcu lahko posredoval polnoletni član gospodinjstva.

Pri izrekanju o veroizpovedi je bil pomemben le odnos do vere, in ne, ali je oseba uradno registrirana kot pripadnik verske skupnosti, prav tako ni bilo pomembno njeno versko prepričanje.

Leta 1991 so bili odgovori o veroizpovedi združeni v 11 glavnih skupin. Odgovori, zbrani s popisom 2002, pa so bili združeni v 14 skupin. V primerjavi z letom 1991 so posebej prikazane osebe, ki so se po veroizpovedi opredelile za evangeličane, druge krščanske veroizpovedi in agnostike.

V popisih 1991 in 2002 so osebe, ki se niso želele opredeliti o veroizpovedi, lahko odgovorile, da:

- ne pripadajo nobeni veroizpovedi, čeprav verujejo;
- ne pripadajo nobeni veroizpovedi, ker ne verujejo (ateisti);
- na vprašanje o veroizpovedi ne želijo odgovoriti.

## *Religion*

*In censuses after World War II the data on religion were collected only in 1953, 1991 and 2002. At the 1953 Census the data on religion were given to the interviewer's by parents or other legal representatives (guardians, adopters) for children younger than 14 and at the 1991 Census for children younger than 15. For persons absent at the time of the interviewer's visit, in the past censuses the answer on religion could be provided by an adult member of the household.*

*For determining religion only the attitude towards religion was important and not whether or not the person is officially registered as a member of a religious community. Religious conviction of a person was also not important.*

*In 1991 the answers on religion were merged into 11 main groups. The answers collected with the 2002 Census are merged into 14 groups. Compared to 1991, new groups were Evangelical, other Christian religions and agnostics.*

*At 1991 and 2002 censuses, people who did not want to declare their religion could:*

- *answer that they do not belong to any religion, although they are believers;*
- *answer that they do not belong to any religion because they are not believers (atheists);*
- *decide not to answer the question on religion.*

## Materni jezik

Z nastankom samostojnih držav na ozemlju nekdanje Jugoslavije so se spremenila tudi imena jezikov. Tako je v Hrvaški v rabi hrvaški jezik, v Zvezni republiki Jugoslaviji srbski jezik, v Bosni in Hercegovini bosanski, hrvaški in srbski jezik. V Črni gori je uradni jezik srbščina ijekavskega tipa, čeprav se v praksi uporablja tudi ime črnogorski jezik.

Vsaka popisana oseba se je lahko svobodno odločila o tem, kateri je njen materni jezik. Zato smo klasifikacijo, veljavno v preteklih popisih, dopolnili z novimi odgovori, med katerimi so tudi črnogorski, bosanski in bošnjaški jezik. Podatke zadnjih dveh prikazujemo združeno kot bosanski jezik. V klasifikaciji za prikazovanje podatkov smo obdržali tudi srbsko-hrvaški jezik, ker je bil med navedenimi odgovori še vedno zelo številčen.

## *Mother tongue*

*With the creation of independent states in the territory of former Yugoslavia, the names of languages changed. In Croatia Croatian is spoken, in Serbia Serbian is spoken, while in Bosnia and Herzegovina Bosnian, Croatian and Serbian are spoken. In Montenegro a version of Serbian is spoken, although the name Montenegrin is also used.*

*Every respondent could decide on his or her mother tongue freely. Therefore, the classification valid at previous censuses was supplemented with new answers, including the Montenegrin, Bosnian and Bosniac languages. The data on the last two languages are shown as the Bosnian language. We kept the Serbo-Croatian language in the classification because this answer was very frequent.*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Vir podatkov o izobrazbeni sestavi prebivalstva, starega 15 let ali več, so popisi prebivalstva gospodinjstev in stanovanj.

Podatke, ki so bili pridobljeni s prejšnjimi popisi prebivalstva, smo preračunali po metodologiji Popisa 2002.

Viri podatkov o vzgoji, izobraževanju in usposabljanju v vrtcih, osnovnih šolah, glasbenih šolah, srednjih šolah, zavodih za otroke in mladostnike s posebnimi potrebami, višjih strokovnih šolah, visokošolskih zavodih, pri izvajalcih nadaljnjega izobraževanja in usposabljanja ter v dijaških in študentskih domovih in o štipendistih,so redna letna statistična raziskovanja.

Podatke o vrtcih zbiramo po stanju 30. 9., le za šolska leta 1997/98 in 1998/99 so bili zbrani po stanju 31. 12.

Podatke o zavodih za otroke in mladostnike s posebnimi potrebami zbiramo po stanju 31. 12. v tekočem šolskem letu.

Podatke o osnovnih, glasbenih in srednjih šolah zbiramo po stanju 31. 8. za konec šolskega leta in po stanju 15. 9. za začetek šolskega leta.

Podatki o vpisu študentov na višje strokovne šole in visokošolske zavode se nanašajo na študijsko leto, podatki o diplomantih pa na koledarsko leto.

Podatki o dijaških in študentskih domovih so prikazani po stanju 31. 3. za tekoče šolsko / študijsko leto.

Podatke o štipendistih srednjih šol in visokošolskih zavodov zbiramo letno, po stanju 31. 12.

Podatki o vpisu v osnovno srednje, višje in visokošolsko izobraževanje se nanašajo na začetek, drugi podatki pa na konec šolskega leta.

Podatke o nadaljnjem poklicnem izobraževanju in usposabljanju zaposlenih v podjetjih in drugih organizacijah zbiramo s statističnim raziskovanjem ŠOL-ZAP, po metodologiji, ki je bila v letu 2000 usklajena z metodološkimi izhodišči strokovnih služb Evropske komisije in držav članic EU. Skupne metodološke osnove pomenijo enoten pristop pri oblikovanju vzorca, enotna izhodišča za različne sistemske rešitve pri zbiranju in obdelavi statističnih podatkov iz različnih okolij ter enotna izhodišča na področju konceptov in definicij.

### Zajetje

Pri rednih letnih statističnih raziskovanjih s področja izobraževanja in usposabljanja je zajetje popolno, le podatke o nadaljnjem poklicnem izobraževanju in usposabljanju zaposlenih zbiramo na podlagi vzorca. V vzorčni okvir so zajeta podjetja in druge organizacije, ki imajo najmanj 10 zaposlenih.

V podatkih o nižjih in srednjih poklicnih programih so zajeti dijaki v 2- in 3-letnih programih nižjega oz. srednjega poklicnega izobraževanja.

V podatkih o srednjih tehniških in strokovnih programih so zajeti dijaki, ki obiskujejo 4-5-letne tehniške in strokovne programe, iztekajoče se nadaljevalne in diferencialne izobraževalne programe, programe po modelu 3+2 in programe poklicno-tehniškega izobraževanja.

V podatkih o gimnazijah so zajeti dijaki v programih splošnih in strokovnih gimnazij ter v programu mednarodne mature.

K učencem osnovnih šol, ki so dokončali šolo, štejemo tiste, ki so uspešno izdelali osmi razred, k dijakom srednjih šol, ki so končali šolo, pa tiste, ki so opravili zaključni izpit ali maturo. Upoštevali smo tudi občane, ki so si znanje pridobili s samoizobraževanjem.

V podatkih o vrtcih so upoštevani tudi otroci s posebnimi potrebami, ki so vključeni v razvojne oddelke vrtcev.

V podatkih o pripravi otrok na osnovno šolo (mala šola) so zajeti otroci, ki obiskujejo malo šolo v osnovnih šolah in vrtcih.

Učenci, ki obiskujejo osnovno šolo s prilagojenima predmetnikom in učnim načrtom, so prikazani ločeno od rednih osnovnih šol. Podatki o prilagojenih programih srednjega izobraževanja pa niso prikazani ločeno, temveč v sklopu srednjih šol.

## Definicije

**Vrtci** so ustanove, ki vzgajajo, varujejo in izobražujejo predšolske otroke in jih vključujejo v življenje v družbeni skupnosti. Pripravljajo jih za vstop v šolo, skrbijo za njihovo prehrano in telesno nego. Namenjeni so otrokom od prvega leta starosti do vstopa v šolo.

**Šola** je vzgojno-izobraževalni zavod ali organizacijska enota v okviru druge ustanove, ki omogoča organizirano in sistematično pridobivanje znanja.

**Oddelek** je organizacijska enota šole. **Čisti oddelek** je oddelek, v katerem so učenci enega razreda oz. letnika. **Kombinirani oddelek** pa sestavljajo učenci dveh ali več razredov oz. letnikov.

**Osnovna šola** daje osnovno vzgojo in splošno osnovno izobrazbo (Ur. l. RS 12/96). Vzgojno-izobraževalni proces organizira kot **samostojna** osnovna šola, **matična** osnovna šola ali **podružnica**; podružnična šola je del matične osnovne šole in se lahko nahaja na različnih lokacijah. Osnovne šole organizirajo tudi **malo šolo** (same ali skupaj z vrtci), to je program priprave na osnovno šolo, ki je v letu pred vstopom vanjo obvezen za vse otroke, vpisane v 1. razred.

Osnovna šola organizira tudi **oddelke podaljšanega bivanja** (za učence od prvega do šestega razreda), kjer se učenci učijo, delajo domače naloge in sodelujejo pri drugih dejavnostih.

**Glasbena šola** je sestavni del vzgojno-izobraževalnega sistema in daje javnoveljavno glasbeno izobrazbo (Ur. l. RS 12/96).

**Zavodi za otroke in mladostnike s posebnimi potrebami** usposabljajo in izobražujejo otroke, mladostnike in mlajše polnoletne osebe, ki zaradi motenj v telesnem in/ali duševnem razvoju potrebujejo posebne oblike vzgoje, izobraževanja in usposabljanja (Ur. l. RS 12/96).

V prikazanih podatkih so zajeti zavodi za vzgojo in oskrbo otrok in mladostnikov z motnjami v duševnem razvoju in z gibalnimi ovirami, zavodi za slepe in slabovidne, zavodi za gluhe in naglušne, zavodi za usposabljanje in izobraževanje vedenjsko in osebnostno motenih otrok in mladostnikov ter zavodi za usposabljanje zmerno, težje in najtežje motenih otrok in mladostnikov.

Kot **osnovne oz. srednje šole za odrasle** obravnavamo osnovne oz. srednje šole z oddelki za osnovnošolsko oz. srednješolsko izobraževanje odraslih in druge ustanove, ki izvajajo osnovnošolsko oz. srednješolsko izobraževanje odraslih.

**Izobraževanje odraslih** je formalno osnovnošolsko oz. srednješolsko izobraževanje odraslih po prekinjenem rednem izobraževanju.

**Splošno, strokovno in poklicno srednješolsko izobraževanje** obsega izobraževanje v splošnih in strokovnih gimnazijah, nižjih poklicnih, srednjih poklicnih, srednjih tehniških in drugih strokovnih srednjih šolah (Ur. l. RS 12/96) .

**Poklicno in strokovno izobraževanje** posreduje znanje, spretnosti in veščine, potrebne za opravljanje poklica. Omogoča izbiro poklica in pripravo nanj. Nižja in srednja poklicna izobrazba se pridobita po končanem izobraževanju z opravljenim **zaključnim izpitom**, srednja strokovna izobrazba pa z opravljeno **poklicno maturo** kot obliko zaključnega izpita.

Srednja strokovna izobrazba se lahko pridobi tudi:

- s končanimi, v šolskem letu 1998/99 iztekajočimi se nadaljevalnimi in diferencialnimi programi in s programi po modelu 3 + 2, v katere se je bilo možno vključiti s končano srednjo poklicno izobrazbo;
- z delovodskimi, poslovodskimi oziroma mojstrskimi izpiti;
- s poklicnimi tečaji s področja posameznih strok.

Diferencialne programe in programe 3 + 2 je nadomestilo 2-letno srednje poklicno tehniško izobraževanje; to so 2-letni programi, v katere se je možno vključiti po pridobljeni srednji poklicni izobrazbi.

**Gimnazija** je splošnoizobraževalna srednja šola, ki dijakom daje znanje, razširja in poglablja njihovo že pridobljeno znanje ter jih usposablja in pripravlja za visokošolski študij. Ločimo **splošne** in

K **pedagoškemu osebju** na visokošolskih zavodih štejemo tako visokošolske učitelje kot tudi sodelavce, ki sodelujejo v pedagoškem procesu.

**Dijaški in študentski domovi** so javna mreža domov, ki so namenjeni učencem, vajencem, dijakom in študentom, ki se šolajo zunaj kraja stalnega bivališča (Ur. l. RS 12/96). Omogočajo jim pogoje za bivanje in učenje.

**Štipendisti** so dijaki srednjih šol in študenti višjih strokovnih šol ter visokošolskih zavodov, ki med šolanjem prejemajo štipendijo kot redni mesečni denarni znesek. Štipendije podeljujejo podjetja, zavodi in druge organizacije, ki imajo štipendiste. Štipendiranje je urejeno s Pravilnikom o štipendiranju (Ur. l. RS 24/91), s Statutom Sklada dr. Franca Munde za štipendiranje študentov v Republiki Sloveniji (Ur. l. RS 15/91) in po Zakonu o zaposlovanju in zavarovanju za primer brezposelnosti (VI. poglavje, členi 55-59, Ur. l. RS 58/91). Štipendije iz Mundovega sklada prejemajo samo študenti od 3. letnika dalje.

**Izvajalci nadaljnjega izobraževanja in usposabljanja** so ljudske univerze, specializirane organizacije za izobraževanje odraslih, enote pri šolah, podjetjih in drugih poslovnih subjektih, ki so registrirane za izobraževanje odraslih, vozniške šole in samostojni podjetniki, ki se ukvarjajo z izobraževanjem odraslih in odraščajočih (Ur. l. RS 12/96). **Javnoveljavne izobraževalne programe izpopolnjevanja, usposabljanja** (USO, USP) in specializacije sprejme minister, pristojen za delo, v sodelovanju s pristojnim strokovnim svetom (Ur. l. RS 12/96). S temi programi se ne pridobi višja raven formalne izobrazbe, pač pa kvalifikacija za zaposlitev. **Izobraževalni programi, ki niso javnoveljavni**, niso zajeti v razvid pri pristojnem ministrstvu, omogočajo pa usposabljanje in izpopolnjevanje za delo in poklic ter splošno izobraževanje (za splošne potrebe in prosti čas).

**Izobraževanje v podjetjih in organizacijah** je izobraževanje, ki ga omogočajo in financirajo podjetja za svoje delavce; urejajo ga pravilniki teh organizacij.

**Področja izobrazbe/izobraževanja** so širše skupine sorodnih študijskih programov, oblikovane po Mednarodni standardni klasifikaciji izobraževanja, ISCED 97 in prilagojene tej klasifikaciji.

Pri Popisu 1971 so med prebivalce brez izobrazbe vključeni tudi tisti, ki imajo zaključene 1-3 razrede osnovne šole.

# 7. RAZISKOVANJE IN RAZVOJ, ZNANOST IN TEHNOLOGIJA

## RAZISKOVANJE IN RAZVOJ (RR)

### METODOLOŠKA POJASNILA

#### Viri podatkov

Podatke o raziskovalno-razvojni dejavnosti (RRD) v Republiki Sloveniji zbiramo vsako leto. Pridobimo jih s statističnim poročilom ustanov, ki so o tem dolžne poročati statistiki. Za ta namen imamo dva tipa obrazcev – R-RD in R-RD-D; na prvem poročajo o svojem delu izvajalci raziskovalno-razvojne dejavnosti, na drugem pa vsa ministrstva in vladni uradi v sestavi Ministrstva za šolstvo, znanost in šport (Urad za šolstvo, Urad za znanost) in Ministrstva za gospodarstvo (Urad za tehnologijo) o vladnih proračunskih sredstvih, ki jih država dodeljuje izvajalcem raziskovalno-razvojne dejavnosti v Republiki Sloveniji.

Poročati so dolžni

1. vsi javni raziskovalni zavodi, gospodarske družbe in gospodarske javne družbe, ki so:
   - registrirani pri Ministrstvu za znanost in tehnologijo (vpisani v razvid, Zakon o raziskovalni dejavnosti, Ur. l. 8/91, čl. 8);
   - samo evidentirani pri Ministrstvu za znanost in tehnologijo;
2. raziskovalne organizacije po zakonu (SAZU, visokošolski javni zavodi in visoke šole, fakultete in umetniške akademije).

#### Zajetje

Javne visokošolske zavode prikazujemo kot raziskovalne organizacije vključno od leta 1978.

V ta popis niso vključene raziskovalne organizacije, ki jih ustanovita Ministrstvo za obrambo in Ministrstvo za notranje zadeve, ter gospodarske družbe in organizacije, ki se ukvarjajo pretežno s poskusno proizvodnjo, kontrolo vpeljane proizvodnje, tržnimi raziskavami itd., če pri tem ne gre za tehnično izboljšavo izdelka ali postopka.

V letu 1996 smo prvič zbrali podatke o državnem financiranju raziskovalno-razvojne dejavnosti, in sicer z vprašalnikom R-RD-D; na njem so poročale o svoji RRD vse vladne ustanove, ki so razpolagale z namenskimi proračunskimi sredstvi za financiranje raziskovalno-razvojne dejavnosti.

#### Definicije in druga pojasnila

**Znanstveno raziskovanje in eksperimentalni razvoj** (RR) obsegata ustvarjalno in sistematično delo, namenjeno povečanju znanja o človeku, kulturi in družbi, ter uporabo tega znanja za razvoj novih aplikacij.

Izraz znanstveno raziskovanje in eksperimentalni razvoj pokriva troje dejavnosti:

- temeljna raziskovanja
- aplikativna raziskovanja
- eksperimentalni razvoj.

**Temeljno raziskovanje** je eksperimentalno in teoretično delo, katerega osnovni cilj je pridobivanje novega znanja o osnovah temeljnih pojavov in opazovanih dejstev.

**Aplikativno (uporabno) raziskovanje** je tudi izvirno raziskovanje, usmerjeno k pridobivanju novega znanja, vendar z določenimi praktičnimi cilji in nameni. Rezultati temeljnega in aplikativnega raziskovanja se v znanosti povezujejo kot sistem znanj o pojavih in zakonitostih v naravi in družbi.

**Eksperimentalni razvoj** je sistematična uporaba znanja, ki je bilo pridobljeno s temeljnim in aplikativnim raziskovanjem oz. s praktičnimi izkušnjami in je usmerjeno v proizvodnjo novih materialov, izdelkov ali naprav ter k uvajanju novih postopkov, sistemov in storitev.

Raziskovalno dejavnost opravljajo raziskovalci v raziskovalnih in drugih organizacijah ter zasebni raziskovalci ob sodelovanju strokovnega, tehničnega in drugega osebja (Zakon o raziskovalni dejavnosti, Ur. l. 8/91).

**Raziskovalec** je oseba, ki izpolnjuje naslednje pogoje:

- ima doktorat znanosti;
- ima objavljena znanstvena dela v zadnjih treh letih;

# *RESEARCH AND DEVELOPMENT, SCIENCE AND TECHNOLOGY*

## *RESEARCH AND DEVELOPMENT (R&D)*

### *METHODOLOGICAL EXPLANATIONS*

#### *Sources of data*

*The data on research and development activity (R&D) in the Republic of Slovenia are collected every year by the statistical reports prepared by reporting units. To this end we have two types of questionnaires - R-RD and R-RD-D: the first one is answered by R&D providers reporting on their activity and the second one by all ministries and government offices within the Ministry of Education, Science and Sport (Office for Education, Office for Science) and the Ministry of the Economy (Office for Technology) reporting on government budget appropriations for R&D activities in the Republic of Slovenia.*

*Reporting units are*

1. *all public research institutions, companies and public services that are:*
   - *registered (entered in the record, Research Activity Act, OJ RS, No. 8/91, Article 8) at the Ministry of Science and Technology,*
   - *only recorded at the Ministry of Science and Technology,*
2. *research organisations according to the law (Slovenian Academy of Sciences and Arts, non-university public institutions, higher schools, faculties and art academies).*

#### *Coverage*

*Since 1978, public higher education institutions are presented as research organisations.*

*Research organisations, founded by the Ministry of Defence and the Ministry of the Interior, companies and organisations which mainly deal with trial production, market research, etc., are not included in this census unless a technical improvement of a product or a process is involved.*

*In 1996 we collected data on government budget appropriations on R&D activities for the first time with the R-RD-D questionnaire, which was answered by all government institutions using budget funds for financing R&D activity.*

#### *Definitions and other explanations*

***Scientific research and experimental development (R&D)** comprise creative and systematic work intended to increase knowledge of human beings, culture and society, and usage of this knowledge for the development of new applications.*

*Scientific research and experimental development cover three activities:*

- *basic research,*
- *applied research,*
- *experimental development.*

***Basic research** is experimental and theoretical work, the main objective of which is to obtain new knowledge on the basis of basic phenomena and observed facts.*

***Applied research** is also original research, aimed at obtaining new knowledge. It is aimed at specific practical aims and purposes. The results of basic and applied research are connected in science as a system of knowledge of phenomena and laws in nature and society.*

***Experimental development** is systematic usage of knowledge obtained with basic and applied research or practical experience, which is aimed at producing new materials, products or devices and creating new processes, systems and services.*

*Research activity is performed by researchers in research and other organisations and private researchers in co-operation with other professional and assistant staff (Research Activity Act, OJ RS, No. 8/91).*

***A researcher** is a person who fulfils the following conditions:*

- *is a doctor of science*
- *has published scientific works in the last three years*

- izkazuje sposobnost za organiziranje in vodenje raziskovalne skupine;
- je praviloma v delovnem razmerju z raziskovalno organizacijo, kjer izvaja projekt, ali je zasebni raziskovalec.

Odgovorni nosilec razvojnega projekta je lahko raziskovalec, ki izpolnjuje prej naštete pogoje, lahko pa tudi strokovnjak, ki ne izpolnjuje prvih dveh pogojev, če ima objavljena raziskovalna ali razvojna dela ali registrirane patente oziroma inovacije.

**Raziskovalna dela** so projekti, ki se uresničujejo v okviru znanstveno-raziskovalnih in raziskovalno-razvojnih organizacij ter raziskovalnih enot in so rezultat odkrivanja in razvijanja obstoječih znanj in izkušenj ter njihove ustvarjalne uporabe.

**Končana raziskovalna dela** so tista, ki so bila končana in recenzirana od 1. 1. do 31. 12. ne glede na to, kdaj so bila začeta.

**Zaposlene osebe** so prikazane po stanju 31. 12.

**Notranji odhodki** so vsi stroški, ki se nanašajo na raziskovalno-razvojno dejavnost znotraj raziskovalne organizacije ali nekega sektorja, ne glede na vir financiranja.

Sem so všteti vsi tekoči in investicijski izdatki.

**Zunanji odhodki** so vsa plačila neki drugi organizaciji za opravljene storitve in usluge s področja raziskovalno-razvojne dejavnosti.

**Sektorji.** Znanstvenoraziskovalne in raziskovalno-razvojne organizacije in raziskovalno-razvojne enote so glede na osnovno dejavnost, cilj, ekonomski in pravni status ter vir financiranja razvrščene v pet institucionalnih sektorjev:

**Poslovni sektor** združuje vse gospodarske družbe in druge organizacije, katerih osnovna dejavnost je tržna proizvodnja blaga in storitev. Ta sektor zajema pretežno raziskovalno-razvojne enote, razvojne sektorje, oddelke in razvojne skupine v gospodarskih družbah.

**Vladni sektor** združuje znanstvenoraziskovalne in raziskovalno-razvojne inštitute in druge organizacije, ki so financirani iz vladnega proračuna.

**Zasebni nepridobitni sektor** združuje zasebne nepridobitne institucije, ki oskrbujejo zasebnike in gospodinjstva. Financira jih ustanovitelj, del finančnih sredstev pa prispevajo tudi gospodarske družbe in vlada. Po mednarodni konvenciji sodi v ta sektor tudi raziskovalno-razvojno delo državljanov (zasebni raziskovalci).

**Visokošolski sektor** združuje univerze (javne visokošolske zavode) in raziskovalne inštitute, eksperimentalne postaje in klinike, ki delujejo pod neposrednim nadzorom in upravljanjem visokošolskih institucij ali pa v povezavi z njimi. Jedro sektorja tvorijo univerze in fakultete. Univerzitetne bolnice in klinike so vključene vanj zaradi povezave z visokošolskim izobraževanjem.

**Sektor tujina** predstavlja poseben sektor predvsem na področju finančnih prilivov in odlivov v znanstveno-raziskovalni in raziskovalno-razvojni sferi.

- *is able to organise and lead a research team*
- *is employed by a research organisation, where he/she is working on a project, or is an independent researcher.*

*A responsible head of a research project can be a researcher who fulfils the above mentioned conditions. Head of a research project can also be an expert who does not fulfil the first two conditions if he/she has published R&D works, registered patents or innovations.*

***Research works** are projects that are realised within the framework of scientific-research organisations, R&D organisations and research units and are the result of finding new and developing existing knowledge and experience and its creative use.*

***Completed research projects** are projects finished and reviewed from 1 January through 31 December, irrespective of when they were started.*

***Persons in paid employment** are shown as of 31 December.*

***Intramural expenditure** is all expenditure on R&D within the research organisation or a sector, irrespective of the source of financing.*

*Included is all current and investment expenditure.*

***Extramural expenditure** is every payment to another organisation for the performed R&D service.*

***Sectoring** means classifying of scientific-research and R&D organisations and R&D units according to principal activity, objectives, economic and legal status, and sources of funds into five institutional sectors:*

***Business sector** includes all companies and other organisations, the basic activity of which is market production of goods and services. This sector mainly covers R&D units, development sectors, departments and development groups in companies.*

***Government sector** includes scientific-research institutes and other organisations financed from the state budget.*

***Private non-profit sector** includes private non-profit institutions which supply private persons and households. They are financed by the founder, with part of the funds contributed by companies and the government. According to international conventions, this sector includes also R&D work of citizens (private researchers).*

***Higher education sector** includes all universities (public higher education institutions) and research institutes, experimental stations and clinics, which operate under direct supervision and management of higher education institutions or are connected with them. The nucleus of this sector is formed by universities and faculties. University hospitals and clinics are included because of their connection with higher education.*

***Abroad** represents a special sector mostly in the field of financial inflow and outflow in scientific-research sphere and R&D sphere.*

## INOVACIJSKA DEJAVNOST

## METODOLOŠKA POJASNILA

### Viri podatkov

Podatke o inovacijski dejavnosti v Sloveniji smo prvič zbrali za leto 1996, in sicer v skladu z mednarodno OECD-jevo metodologijo (priročnik Oslo). Raziskovanje inovacijske dejavnosti poteka vsako drugo leto.

Tu objavljeni podatki so rezultat statističnega raziskovanja o inovacijski dejavnosti v predelovalni dejavnosti in izbranih storitvenih dejavnostih (obrazec INOV-P-S/2000), ki je usklajeno z mednarodno OECD-jevo metodologijo Oslo in priporočili Statističnega urada Evropske unije (Eurostat) za 3. harmoniziran popis inovacijske dejavnosti v državah EU (CIS 3). Poročevalske enote so podatke posredovale iz svojih evidenc.

### Zajetje

V statistično raziskovanje inovacijske dejavnosti v predelovalni dejavnosti in izbranih storitvenih dejavnostih so vključena podjetja, ki se po Standardni klasifikaciji dejavnosti (SKD) uvrščajo med naslednje predelovalne dejavnosti in izbrane storitvene dejavnosti, in sicer tista izmed njih, ki imajo vsaj 10 zaposlenih.

- Rudarstvo (10-14)
- Predelovalno dejavnost (15-37)
- Oskrbo z elektriko, plinom in vodo (40-41)
- Posredništvo in trgovino na debelo (51)
- Promet, skladiščenje in zveze (60-64)
- Finančno posredništvo (65-67)
- Obdelavo podatkov in podatkovne baze (72)
- Raziskovanje in razvoj (73)
- Projektiranje in tehnično svetovanje (74.2)
- Tehnično preizkušanje in analiziranje (74.3).

### Definicije

**Inovacija** pomeni proces spreminjanja ideje v izdelek, postopek ali storitev oziroma proces preoblikovanja ustvarjalnosti v dobiček. Temelji na rezultatih novega tehnološkega razvoja, novih kombinacijah že obstoječih tehnologij ali uporabi drugega znanja, ki ga je pridobilo podjetje.

**Inovacije** se lahko pojavljajo kot novi izdelki, postopki ali storitve ali kot bistveno izboljšani izdelki, postopki ali storitve. Inovacija je uvedena, ko se pojavi na trgu (inovacija izdelka, storitve) ali uporabi v delovnem procesu (inovacija postopka). Inovacija – izdelka, storitve ali postopka – mora biti novost ali bistvena izboljšava za podjetje, ni pa nujno, da je nova na tržišču. Ni nujno, da je bila inovacija razvita v podjetju.

Inovacije zajemajo vrsto znanstvenih, tehnoloških, organizacijskih, finančnih in gospodarskih aktivnosti. Zgolj organizacijske in vodstvene spremembe ne sodijo med inovacije in niso upoštevane v prikazanih podatkih.

**Inovacija izdelka ali storitve** pomeni pojav izdelka oz. storitve, ki sta novost ali bistveno izboljšana v svojih temeljnih funkcijah, tehničnih specifikacijah, programski opremi ali drugih nematerialnih sestavinah, nameravani uporabi ter lažji uporabi za uporabnika. Zgolj estetske spremembe in prodaja inovacij, ki niso bile razvite v podjetju, niso inovacije.

**Inovacija postopka** pomeni, da so bili razviti in se zdaj uporabljajo novi ali bistveno izboljšani proizvodni postopke in nove ali bistveno izboljšane metode dobav izdelkov in opravljanja storitev. Rezultat inovacije postopka se mora odražati v kakovosti izdelkov ali storitev ter v stroških proizvodnje in distribucije. Inovacija postopka mora biti nova za podjetje, ni pa nujno, da je bilo podjetje prvo, ki je uvedlo to inovacijo. Organizacijske in vodstvene spremembe ne sodijo med inovacije.

**Inovacijske dejavnosti in izdatki zanje:**

- notranja raziskovalno-razvojna dejavnost

- *mining and quarrying (10-14)*
- *manufacturing (15-37)*
- *electricity, gas and water supply (40-41)*
- *wholesale trade (51)*
- *transport and communication (60-64)*

### *Definitions*

***Innovation** is the process of changing an idea into a product, process or service, or the process of transforming creativity into profit. It is based on the results of new technological development, new combinations of the existing technologies or use of other knowledge used by the enterprise.*

***Innovation** covers new products, processes and services, and significantly improved products, processes and services. An innovation is introduced when it appears on the market (product or service innovation) or is used in the process (process innovation). A product, service or process must be new or significantly improved for the enterprise, but not necessarily new on the market. It does not matter whether the innovation was developed by the enterprise or not.*

*Innovations include many scientific, technological, organisational, financial and economic activities. Purely organisational or managerial changes are not included..*

***Product or service innovation** is a good or service which is either new or significantly improved with respect to its fundamental characteristics, technical specifications, incorporated software or other intangible components, intended uses or user friendliness. Changes of a solely aesthetical nature and selling of innovations wholly produced and developed by other enterprises are not included.*

***Process innovation** is new and significantly improved production technology or new and significantly improved method of supplying services and of delivering products. The outcome should be significant with respect to the quality of products (goods/services) or costs of production and distribution. The innovation should be new to the enterprise; the enterprise has not necessarily to be first to introduce this process. Purely organisational or managerial changes are not included.*

***Innovation activities and expenditure:***

- *intramural R&D activity*

- nakup strojev in opreme s proizvodnjo novih ali izboljšanih izdelkov, storitev in postopkov
- nakup zunanjega znanja
- konstruiranje in druga priprava za proizvodnjo/dobavo
- izobraževanje

1) Podatki v tabelah o bruto domačih izdatkih za RRD po finančnih virih in po vrsti stroškov se do leta 1995 razlikujejo. Ta razlika oz. primanjkljaj finančnih sredstev raziskovalne organizacije pokrivajo z lastnimi sredstvi. V letih 1995-1997 je ta razlika vključena med lastna sredstva raziskovalnih organizacij. V tabeli 1 so prikazani prihodki od RR.
*Until 1995 the tables on gross domestic expenditure on R&D by source of funds and type of costs differed. Research organisations cover this difference (deficit) with their own funds. In 1995-1997 this difference was included among own funds of research organisations. Table 1 shows R&D income.*

#### Viri in metode zbiranja podatkov

Večino tu prikazanih podatkov o kulturi zbira Statistični urad Republike Slovenije (SURS) na podlagi statističnih raziskovanj (ta potekajo vsako leto, na tri leta ali občasno). Izjema so podatki o knjižni proizvodnji in serijskih publikacijah; od vključno leta 1991 te podatke zbira in obdeluje Narodna in univerzitetna knjižnica v Ljubljani, računalniške storitve pa opravljata Univerzitetni inštitut informacijskih znanosti v Mariboru ter SURS. Podobno velja tudi za podatke o knjižnicah: do leta 1989 jih je zbiral in obdeloval SURS, od vključno leta 1990 pa to delo opravlja Narodna in univerzitetna knjižnica v Ljubljani, ki kot matična knjižnica za vse knjižnice v Sloveniji zbira in obdeluje podatke o vseh knjižnicah, razen o šolskih; podatke o šolskih knjižnicah še vedno zbira SURS. Izjema so tudi podatki o radijskih in televizijskih zavezancih za plačilo RTV prispevka oziroma številu fizičnih oseb, ki so zavezani za plačilo RTV prispevka. Te podatke nam posreduje Služba za RTV prispevek RTV Slovenije. Podatke o branosti serijskih publikacij, poslušanosti radijskih in gledanosti TV-organizacij ter obiskovalcih kinematografov po starosti in izobrazbi pa so posredovali iz Mediane (Inštitut za raziskovanje medijev).

#### *Sources and methods of data collection*

*The Statistical Office of the Republic of Slovenia collects most data on culture by means of annual, three-yearly and occasional statistical surveys. The exception is the data on book production, and periodicals and newspapers (press); since 1991 these data have been collected and processed by the National and University Library in Ljubljana, while computer services have been performed by the University Institute of Information Sciences in Maribor and the Statistical Office of the Republic of Slovenia. The same is true for the data on libraries. Until 1989 the data had been collected and processed by the Statistical Office of the Republic of Slovenia, while since 1990 this work has been performed by the National and University Library in Ljubljana, which is the central library for the whole Slovenia and collects and processes data on all libraries in the country, except data on school libraries which are collected by the Statistical Office. An exception is also the data of persons obligating to pay the television and radio subscription which are mediated by the subscription service of Radio and Television Slovenia. Data on press by the number of readers, radio programmes by the number of listeners, TV programmes by the number of viewers and data on cinema attendance by age groups and education were given from Mediana (Institute for Media Research).*

#### Zajetje

V letnih poročilih statistike kulture so zajeti podatki o založbah, galerijah in razstaviščih, gledališčih, filharmoniji in poklicnih orkestrih, kinematografih, filmskih proizvajalcih in distributerjih, zavodih za kulturo in kulturnih domovih (vsakoletna raziskovanja), šolskih knjižnicah, muzejih in muzejskih zbirkah, arhivih (triletna raziskovanja) ter kulturno-umetniških društvih (občasno raziskovanje). Podatki o gledališčih, filharmoniji in poklicnih orkestrih, zavodih za kulturo in kulturnih domovih ter kulturnih društvih se nanašajo na gledališke sezone, podatki o drugih kulturnih zavodih pa na koledarska leta.

Zajetje poročevalskih enot za gledališča, filharmonične orkestre in arhive je popolno, za druga področja kulture pa ni popolno, ker nam nekatere poročevalske enote niso posredovale podatkov.

#### *Coverage*

*Annual reports of culture statistics cover publishing houses, galleries and exhibition grounds, theatres, philharmonic society and professional orchestras, cinemas, film producers and distributors, institutions for culture and homes of culture (annual surveys), school libraries, museums and museum collections, archives (three-year surveys), and cultural and arts societies (occasional surveys). The data on theatres, philharmonic society and professional orchestras, institutions for culture and homes of culture as well as cultural and arts societies are collected by theatrical seasons, while the other data are collected by calendar years.*

*Coverage of reporting units for theatres, philharmonic orchestras and archives is complete, while for other fields of culture it is not because some reporting units did not send us their data.*

#### Definicije

**Knjižna proizvodnja**. Knjige (dela ali naslovi) so tiskane ali drugače razmnožene neperiodične publikacije v knjižni obliki. Lahko imajo en zvezek ali več zvezkov (fizičnih enot). Podatki o številu naslovov knjig ali del po vsebini so razvrščeni po načelu univerzalne decimalne klasifikacije (UDK).

**Serijske publikacije** so publikacije v tiskani ali netiskani obliki, ki izhajajo v zaporednih delih (navadno s številčnimi in časovnimi oznakami) nedoločen čas. Sem sodijo časniki, časopisi (revije, magazini, žurnali), almanahi, koledarji, občasni zborniki, letopisi itd.

**Knjižnice** so samostojni zavodi ali enote v sestavi drugih poslovnih subjektov. Njihova glavna dejavnost je knjižničarska dejavnost; ta po Zakonu o knjižničarstvu (Ur. l. c) specialne knjižnice (knjižnice poslovnih subjektov)
d) splošne (prej splošnoizobraževalne knjižnice)
e) šolske knjižnice (knjižnice osnovnih, srednjih in glasbenih šole ter dijaških domov).

## METODOLOŠKA POJASNILA

### Viri podatkov

Podatke o zdravstvu pošilja Statističnemu uradu Republike Slovenije Inštitut za varovanje zdravja Republike Slovenije. Ta jih zbere neposredno na podlagi poročil, ki so jih dolžne pošiljati vse zdravstvene ustanove, in potem obdela ter objavi rezultate.

Podatki o številu zdravstvenih ustanov in njihovem osebju se nanašajo na 31. december.

Podatki o zunajbolnišničnem zdravstvenem varstvu so prikazani po organizacijskem načelu. Zaradi tega so npr. v tabeli 9.1 v skupini "Zdravstveno varstvo predšolskih otrok" prikazani tudi preventivni in kurativni obiski mladih in odraslih, če so bili opravljeni v dejavnosti za zdravstveno varstvo predšolskih otrok.

Vsi prikazani podatki o zdravstvu so bili uporabljeni ali objavljeni v zdravstvenih statističnih letopisih Inštituta za varovanje zdravja Republike Slovenije.

### Definicije

**Zaposleni v zdravstvu** so osebe, zaposlene za nedoločen ali določen čas, tudi tiste z nepolnim (npr. polovičnim) delovnim časom, osebe, ki delajo pogodbeno, in volonterji. Niso pa tu upoštevane osebe, ki ne morejo biti v rednem delovnem razmerju (npr. upokojenci, ki delajo po pogodbah).

**Mesto zaposlitve** pomeni ustanovo, kjer je oseba zaposlena z večino svojega izkazanega delovnega časa. To pomeni, da je lahko oseba redno razporejena na delo tudi pri drugem izvajalcu, vendar je to zanemarjeno.

**Število zdravnikov, izračunano iz delovnih ur,** predstavlja razmerje med sporočenim podatkom o številu opravljenih delovnih ur zdravnikov in normativom 1 430 ur letno na zdravnika.

## *METHODOLOGICAL EXPLANATIONS*

### *Sources of data*

*The data on health care are sent to the Statistical Office of the Republic of Slovenia by the Institute of Public Health of the Republic of Slovenia, which collects them directly from reports sent every month by all health institutions, processes them and publishes the results.*

*Data on the number of health institutions and their staff refer to 31 December.*

*Data on out-patient health care are shown by organisational principle. Therefore, in Table 9.1 "Health care for children aged 0-6 years" includes preventive and curative consultations of youth and adults if they were performed within the activity of health care for children aged 0-6 years.*

*All data on health care were used or published in statistical yearbooks of the Institute of Public Health of the Republic of Slovenia.*

### *Definitions*

***Persons employed in health care** are employees with temporary and fixed-duration employment contracts, including employees working part time, contract workers and volunteers. Persons who cannot enter into regular labour relations (e.g. retired persons performing contract work) are not taken into account.*

***Place of work** is the establishment in which the person is employed for most of the working hours. This means that a person can be sent to work for another establishment but this is not taken into account.*

***Number of physicians, calculated from working hours,** is the ratio between the actual number of hours performed by physicians and the standard of 1,430 hours per physician per year.*

# SOCIAL PROTECTION

## IZDATKI IN VIRI FINANCIRANJA PROGRAMOV SOCIALNE ZAŠČITE

## EXPENDITURE AND RECEIPTS OF SOCIAL PROTECTION SCHEMES

### METODOLOŠKA POJASNILA

### METHODOLOGICAL EXPLANATIONS

#### Viri in metode zbiranja podatkov

Podatki o izdatkih in virih financiranja programov socialne zaščite so rezultat zbiranja podatkov glede na zahteve osnovnega sistema metodologije ESSPROS. Pridobili smo jih od nosilcev uradnih evidenc in iz objavljenih podatkov. Pri denarnih socialnih prejemkih smo večino podatkov pripravili iz individualnih podatkov; ti so bili oblikovani tako, da so zajemali vsa izplačila za posamezno leto. Vrednost sredstev za sofinanciranje delovanja centrov za socialno delo in za predšolsko vzgojo je ocenjena. Podatki o socialnih prejemkih, ki jih financirajo delodajalci, so grobe ocene, izdelane na podlagi rezultatov ankete o stroških dela.

#### *Sources and methods of data collection*

*Data on expenditure and receipts of social protection schemes are the result of data collection regarding the Core system of ESSPROS methodology requests. The data are acquired from official records and from published data. We prepared most data on cash benefits from individual data formed in the way that they covered all payments for a particular year. The value of funds for co-financing centres for social work and funds for pre-school education is estimated. The data on social benefits financed by employers are crude estimates gathered from the Labour Cost Survey.*

#### Zajetje

Statistično zajetje je blizu popolnosti. Pomanjkljivi so podatki, ki se nanašajo na socialne prejemke, ki jih financirajo občine. Tako nismo zajeli dodatka za najemnino (ki se je lahko izplačeval prejemnikom socialnovarstvenih dajatev) in pomoči socialnega varstva, specifičnih za občine.

Pri zajemu podatkov so pomanjkljivi podatki za področje nastanitev. Po definiciji metodologije ESSPROS sodi v to področje poleg že omenjenega dodatka za najemnino tudi razlika med ekonomsko in neprofitno najemnino; osnovno merilo za uvrstitev prejemka v področje nastanitev je preverjanje premoženjskega stanja. Zaradi izrazite neselektivnosti dodeljenih stanovanj z neprofitno najemnino po socialnem merilu tudi teh razlik nismo vključili v opazovanje.

Prav tako nismo zajeli socialnega varstva, ki se financira z zasebnimi sredstvi.

#### *Coverage*

*Statistical coverage is almost complete. The data on social benefits financed by municipalities are incomplete. The data on rent supplements (which could be paid to recipients of social welfare benefits) and social assistance benefits specific for municipalities are not covered.*

*The coverage for the housing function is incomplete. In addition to already mentioned rent supplements, according to ESSPROS this function covers the difference between commercial and non-commercial rents. The basic criterion for classifying a benefit into the housing function is the existence of means test. Because dwellings with non-commercial rents are unselective by social criteria those benefits are not observed.*

*Social assistance benefits financed by the private sector are also not included.*

#### Definicije in pojasnila

**Socialna zaščita** obsega po metodologiji ESSPROS vsa posredovanja javnih in zasebnih institucij, ki gospodinjstvom ali posameznikom olajšajo breme določenih tveganj ali potreb brez sočasne zagotovitve enakovrednega nadomestila ali povračila in niso rezultat individualnih aranžmajev. Tveganja ali potrebe oziroma področja opazovanja so: bolezen in zdravstveno varstvo, invalidnost, starost, smrt hranitelja družine, družina in otroci, brezposelnost, nastanitev in druge oblike socialne izključenosti.

**Enota opazovanja** je program socialne zaščite. Ta je po definiciji sistem pravil, ki ga vzdržuje ena ali več institucionalnih enot, da zagotavljajo in financirajo socialno zaščito. Za program mora biti možno sestaviti podatke o njegovih virih financiranja in izdatkih. Sestavljen naj bi bil tako, da se po njem zagotavlja socialna zaščita zoper eno tveganje ali potrebo določene skupine ljudi. Sistem pravil je lahko določen z zakoni ali na njihovi podlagi, s pogodbami ali glede na upravno prakso. Programe socialne zaščite za Slovenijo smo izbrali tako, da je možno sestaviti ustrezne podatke, da se jih da razvrstiti po merilih metodologije in da predstavljajo zaokroženo vsebinsko celoto.

#### *Definitions and explanation*

***Social protection** by ESSPROS methodology encompasses all intervention from public or private bodies intended to relieve households and individuals of the burden of a defined set of risks or needs, provided that there is neither a simultaneous reciprocal nor an individual arrangement involved. The risk or needs respectively functions are Sickness/Health care, Disability, Old age, Survivors, Family/Children, Unemployment, Housing and Social exclusion not elsewhere classified.*

***Observation units** are social protection schemes. By definition, the social protection scheme is a distinct body of rules, supported by one or more institutional units, governing the provision of social protection benefits and their financing. For the scheme to draw up a separate account of expenditures and receipts should be possible. Preferably they should be chosen in such a way that they provide protection against a single need and cover a single specific group of beneficiaries. The body of rules may be determined by law, by virtue of laws, by contracts or by virtue of administrative practice. The social protection schemes for Slovenia have been chosen in such a way that it is possible to compile appropriate data, that they can be classified according to the methodology and that they represent a rounded unit in terms of contents.*

Glavne kategorije izdatkov programov socialne zaščite so socialni prejemki, upravni stroški, transferi drugim programom in drugi izdatki. Glavne kategorije virov financiranja programov socialne zaščite so socialni prispevki, prispevki države, transferi iz drugih programov in drugi viri.

*The main categories of social protection scheme expenditures are social benefits, administration costs, transfers to other schemes and other expenditure. The main categories of social protection scheme receipts are social contributions, general government contributions, transfers from other schemes and other receipts.*

Najpomembnejša kategorija izdatkov so **socialni prejemki**, ki so po definiciji transferi v denarju ali naravi in so po programih socialne varnosti dodeljeni gospodinjstvom ali posameznikom z namenom, da jim olajšajo breme, ko se pokažejo določena tveganja ali potrebe. Tako so v izrazu socialni prejemki zajete vse vrste denarnih in nedenarnih pravic ter drugih ukrepov. Prejemki se razvrščajo po področjih, po vrsti (v denarju - periodične ali enkratne, v naravi in v obliki preusmerjenih socialnih prispevkov) in po merilu preverjanja premoženjskega stanja.

*The main category of expenditure is **social benefits**, which are by definition transfers in cash or in kind by social protection schemes to households and individuals to relieve them of the burden of a defined set of risks or needs. Social benefits thus cover all monetary and non-monetary rights and other measures. Benefits are classified by functions, by type (cash benefits - periodic and lump sum benefits, benefits in kind and re-routed social contributions) and by the means test.*

Določene kategorije socialnih prejemkov se nanašajo na prejemke osebam pod in nad določeno starostjo. V vseh programih je starostna meja za moške 65, za ženske pa 60 let.

*Certain categories of social benefits refer to assistance to persons under and above a certain age. In all schemes the age limit for men is 65 years and for women 60 years.*

V posamezna področja socialne zaščite so po metodologiji ESSPROS vključeni naslednji prejemki:

*In certain functions of social protection scheme the following social benefits are included:*

- **bolezen in zdravstveno varstvo** - prejemki, povezani s telesno ali z duševno obolelostjo, in zdravstveno varstvo, ki pomeni ohranjanje zdravja, ozdravljenje ali izboljšanje zdravja varovanih oseb, ne glede na izvor zdravstvenih težav (predvsem nadomestila za primer zadržanosti z dela zaradi bolezni, zdravstveno varstvo in zdravila);
- **invalidnost** - *prejemki, povezani z nezmožnostjo sodelovanja v ekonomskih in socialnih aktivnostih telesno ali duševno prizadetih oseb (predvsem invalidske pokojnine osebam pod določeno starostjo in blago ter storitve invalidnim osebam);*
- **starost** - prejemki, povezani s starostjo (predvsem starostne pokojnine, invalidske in družinske pokojnine osebam nad določeno starostjo ter blago in storitve, povezane s starostjo);
- **smrt hranitelja družine** - prejemki, povezani s smrtjo družinskega člana (predvsem družinske pokojnine osebam pod določeno starostjo);
- **družina in otroci** - prejemki, povezani z nosečnostjo, rojstvom otroka, s posvojitvijo, z vzgojo otrok in vzdrževanjem drugih družinskih članov (predvsem nadomestila plač med porodniškim dopustom in otroški dodatki);
- **brezposelnost** - prejemki, povezani z brezposelnostjo (predvsem nadomestila za primer brezposelnosti in poklicno izobraževanje);
- **nastanitev** - prejemki, povezani s stroški nastanitve;
- **druge oblike socialne izključenosti** - prejemki, namenjeni revnim in drugim skupinam socialno izključenih oseb, če jih ne moremo uvrstiti v nobeno drugo področje.

Vrednost vseh izdatkov za posamezni program socialne zaščite je vsota vseh oblik izdatkov za ta program. Vrednost vseh virov financiranja je vsota vseh vrst virov za ta program. Finančne operacije potekajo tudi med programi socialne zaščite. Glavne transakcije so transferi med programi in preusmerjeni socialni prispevki, prikazane kot izdatek enega programa in kot vir financiranja drugega programa. Pri seštevkih izdatkov in virov financiranja vseh programov te operacije niso upoštevane.

- ***sickness / health care*** *- benefits in connection with physical or mental illness and health care intended to maintain, restore or improve the health of the people protected, irrespective of the origin of the disorder (above all compensation in the case of sick leave, health care and pharmaceutical products).*
- ***disability*** *- benefits in connection with the inability of physically or mentally disabled people to engage in economic and social activities (above all disability pensions to persons under a defined age and provisions of goods and services to the disabled).*
- ***old age*** *- benefits in connection with old age (above all old-age pensions, disability and survivors' pensions to persons above a defined age and provisions of goods and services to the elderly).*
- ***survivors*** *- benefits in connection with the death of a family member (above all survivors' pensions to persons under a defined age).*
- ***family / children*** *- benefits in connection with the costs of pregnancy, childbirth and adoption, bringing up children and caring for other family members (above all maternity leave compensation and child allowance).*
- ***unemployment*** *- benefits in connection with unemployment (above all unemployment benefits and vocational training).*
- ***housing*** *- benefits in connection with the costs of housing.*
- ***social exclusion not elsewhere classified*** *- benefits intended to poor people and other socially excluded groups to combat social exclusion where they do not belong to other functions.*

*The value of all expenditure for a certain social protection scheme is the sum of all categories of social protection scheme expenditure, and the value of all receipts is the sum of all receipts of the scheme. Some financial flows refer to operation with other social protection schemes. The main transactions between social protection schemes are transfers between schemes and re-routed social contributions. These are recorded as expenditure of the scheme from which they originate and as receipts of the scheme to which they are paid. In expenditure and receipts totals these flows are not considered.*

## ZDRAVSTVENO, POKOJNINSKO IN INVALIDSKO ZAVAROVANJE

## *HEALTH, PENSION AND DISABILITY INSURANCE*

## METODOLOŠKA POJASNILA

## METHODOLOGICAL EXPLANATIONS

### Viri in metode zbiranja podatkov

Vir podatkov o zdravstvenem, pokojninskem in invalidskem zavarovanju so redna poročila in letopisi o zdravstvenem in socialnem varstvu v Sloveniji, ki jih izdajajo Ministrstvo za zdravstvo, Ministrstvo za delo, družino in socialne zadeve ter Zavod za pokojninsko in invalidsko zavarovanje Slovenije.

Podatke o nesrečah pri delu in podatke o aktivnih zavarovancih zbira Inštitut za varovanje zdravja Republike Slovenije. Povzeti so iz letnih poročil. Podatki o uživalcih pokojnin, invalidnin in odhodkih invalidsko-pokojninskega zavarovanja so povzeti iz letnih poročil Zavoda za pokojninsko in invalidsko zavarovanje Slovenije.

### *Sources and methods of data collection*

*The sources of data on health, pension and disability insurance are the regular reports and yearbooks on health and social security in Slovenia, published by the Ministry of Health, the Ministry of Labour, Family and Social Affairs and the Institute for Pension and Disability Insurance of Slovenia.*

*Data on accidents at work and the active insured are gathered by the Institute of Public Health of the Republic of Slovenia from annual reports. Data on recipients of pensions, disability benefits and disbursements from pension and disability insurance are taken from the annual reports of the Institute for Pension and Disability Insurance of Slovenia.*

### Definicije in pojasnila

Za **aktivne zavarovance** štejemo osebe, ki so zaposlene v podjetjih in drugih organizacijah najmanj polovico polnega delovnega časa, in osebe, ki so z njimi izenačene (zaposleni pri zasebnikih, samozaposleni, osebe, ki sklenejo delovno razmerje v tujini).

V **obvezno pokojninsko in invalidsko zavarovanje** so vključene zaposlene osebe, ki so v delovnem razmerju v družbah, podjetjih in organizacijah ter pri delodajalcih, ki opravljajo samostojno gospodarsko ali poklicno dejavnost, kmetje in člani njihovih gospodarstev. Zavarovanje v Republiki Sloveniji je enotno za vse zavarovance.

### *Definitions and explanations*

***Active insurance*** *covers people who are employed in enterprises and other organisations for at least half of full-time and people equated with them (people employed in independent personal work, the self-employed and people employed abroad).*

*Insured under* ***compulsory pension and disability insurance schemes*** *are people employed in enterprises and organisations and with other employers performing an independent commercial or professional activity, as well as farmers and members of their households. Insurance in the Republic of Slovenia is unified for all insured.*

**Začasna odsotnost z dela** zaradi bolezni, poškodb, poklicnih bolezni, izolacije in spremstva ter nege bolnega družinskega člana pomeni bolniški dopust, izražen v treh kazalnikih (številu primerov, dnevih in povprečnem trajanju v dnevih).

Podatke o začasni odsotnosti z dela zaradi nosečnosti in poroda smo povzeli po podatkih o družbenem varstvu otrok v Sloveniji (Letopis o zdravstvenem in socialnem varstvu).

V letu 1991 je bil sprejet Zakon o invalidskem in pokojninskem zavarovanju v Republiki Sloveniji. Ta naj bi celovito urejal področje, ki so ga dotlej urejali zvezni in republiški zakoni ter statut in drugi akti Zavoda za pokojninsko in invalidsko zavarovanje. Najpomembnejše in najpogostejše pravice iz pokojninskega in invalidskega zavarovanja so starostne, invalidske, družinske in kmečke pokojnine, denarna nadomestila iz invalidskega zavarovanja, denarna nadomestila za telesno okvaro, varstveni dodatek in dodatek za pomoč in postrežbo. V 80. in 90. letih je bila rast števila starostnih upokojencev nadpovprečno visoka. Na tako rast so vplivali predvsem naslednji razlogi:

- uvedba predčasne pokojnine od leta 1983 in skokovita rast predčasnega upokojevanja, ki ga je v letu 1991 pospešila priprava novega zakona o pokojninskem in invalidskem zavarovanju z napovedjo zaostritve pogojev upokojevanja;
- dokup pokojninske dobe za posamezne kategorije zavarovancev (vrhunski športniki, obrtniki), zlasti ugoden dokup dobe za čas opravljanja kmetijske dejavnosti;
- uvedba dokupa delovne dobe za delavce, katerih delo ni več potrebno, in za delavce, ki jim je prenehalo delovno razmerje zaradi stečaja ali likvidacije podjetij oz. organizacij, kar je pospešilo upokojevanje starejših brezposelnih oseb;
- upokojevanje generacije zavarovancev, ki se je zaposlila po drugi svetovni vojni, ko je bila značilna visoka stopnja zaposlovanja;
- priznanje dobe iz starostnega zavarovanja kmetov zakoncem kmetov in prevzemnikom kmetij.

**Invalidski upokojenci.** Na dinamiko rasti števila invalidskih upokojencev vplivajo predvsem velikost in dinamika gibanja populacije zaposlenih oseb ter stopnja organiziranosti in razvitosti zdravstva, varstva pri delu v najširšem smislu ter bolezni in poškodbe zunaj dela. Med vzroki nastanka invalidnosti prevladujejo bolezni in poškodbe zunaj dela. Nesreče pri delu in poklicne bolezni imajo na invalidsko upokojevanje le manjši vpliv. Razmere v gospodarstvu so v letu 1992 vplivale na povečan pritisk invalidskega upokojevanja.

Delovni invalidi s preostalo delovno zmožnostjo imajo pravico do dela z delovnim časom, ki ustreza njihovi zmožnosti, do zaposlitve oziroma razporeditve na drugo ustrezno delo, do poklicne rehabilitacije in do ustreznih denarnih nadomestil.

## Prejemniki drugih denarnih dajatev

Poleg pokojnin in nadomestil delovnim invalidom Zavod za pokojninsko in invalidsko zavarovanje priznava in izplačuje varstvene dodatke, invalidnine za telesne okvare in dodatke za pomoč in postrežbo.

**Varstveni dodatek** prejemajo upokojenci z nepopolno pokojninsko dobo, ki so socialno ogroženi.

Pravico do **denarnega nadomestila za telesno okvaro** si pridobi zavarovanec, če je telesna okvara posledica:- poškodbe pri delu ali poklicne bolezni in če je najmanj 30-odstotna ne glede na pokojninsko dobo in- bolezni ali poškodbe zunaj dela, če je najmanj 50-odstotna in če ima zavarovanec ob nastanku telesne okvare pokojninsko dobo, ki je določena za pridobitev invalidske pokojnine, ne glede na to, ali telesna okvara povzroča invalidnost ali ne.

Telesne okvare so po težavnosti razvrščene v 8 stopenj, ki jim je prilagojena tudi višina denarnega nadomestila, pri čemer se upošteva tudi vzrok nastanka telesne okvare.

**Dodatek za pomoč in postrežbo.** Pravico do tega dodatka imajo uživalci pokojnin (razen kmetov, ki so zavarovani le starostno, ob

***Temporary absence from work*** *for reasons of illness, injury, occupational disease, isolation, accompaniment and attending to a sick family member are treated as sick leave. Sick leave is expressed in terms of three indicators - cases, days and average number of days.*

*Data on temporary absence from work due to pregnancy or maternity leave for the years 1980 to 1989 were taken from the data on child care in Slovenia (Health Care and Social Security Yearbook).*

*The Act on Pension and Disability Insurance in the Republic of Slovenia was adopted in 1991. It is intended to regulate this whole field, which was previously administered according to federal and republic laws, statutes and other acts issued by the Institute for Pension and Disability Insurance. The most important and most frequent rights deriving from pension and disability insurance are old-age, disability, family and farmers' pensions, disability benefits, disability allowances, supplementary benefits and allowances for care and help.In the 1980s and 1990s the growth in the number of old-age pensioners has been above average, influenced particularly by the following factors:*

- *the introduction of early retirement in 1983 and the leap in people taking early retirement, accelerated in 1991 with the preparation of the new Act on Pension and Disability Insurance, which envisaged stricter pension conditions,*
- *the opportunity for independent categories of insured persons (top athletes, tradesmen) to buy up their pension qualification period and the particularly favourable conditions for buying up the pension qualification period for time spent performing agricultural activities,*
- *the introduction of the opportunity to buy up the working period for workers whose work is no longer needed and whose employment has been terminated due to the bankruptcy or liquidation of their enterprise or organisation, which has increased the pressure on the provision of pensions to the older unemployed persons*
- *providing pensions to a generation of insured persons who took up employment after World War II when the level of employment was high,*
- *granting the years earned towards old-age pension of a farmer to the farmer's spouse or the recipient of the farm.*

***Disability pensioners.*** *The major influence on the dynamics of the growth in the number of disability pensioners has come from the size and dynamics of the trends in the employed population and the level of organisation and development of health, safety at work in the widest sense and illnesses and injuries outside work. Illnesses and injuries outside work are the main cause of disability. Accidents at work and occupational diseases have a smaller effect on the number of disability pensioners. The economic circumstances in 1992 led to an increased pressure on disability insurance.*

*Disabled persons who retain some working capacity - the working disabled - have the right to work for the number of hours corresponding to their remaining working capacity, to employment or reallocation to other suitable work, to occupational rehabilitation and to appropriate benefits.*

## *Recipients of other financial assistance*

*In addition to pensions and benefits for the working disabled persons the Institute for Pension and Disability Insurance pays supplementary benefit, disability benefits and allowances for care and help.*

*Pensioners who have not completed the full pension qualification period and who have insufficient income receive* ***care allowances****.*

*People with a disability have the right to a* ***disability allowance*** *if the disability arose as a result of:-an injury at work or an occupational disease and if the disability is at least 30 per cent, irrespective of the pension qualification period and-illness or injury outside work, if the disability is at least 50 per cent and provided that, when the disability was incurred, the insured individual had a pension qualification period sufficient to obtain a disability pension, irrespective of whether or not the disability causes disability.*

*Disability is classified according to degree of severity into eight levels. Each level has a corresponding allowance, whereby the cause of the disability is taken into consideration.*

***Allowance for care and help.*** *Pension recipients (apart from farmers insured for retirement, loss of the ability to work or death) have the*

**Preživninsko varstvo kmetov.** Od začetka veljavnosti Zakona o preživninskem varstvu kmetov je bilo do konca leta 1992 sklenjenih 200 pogodb, na podlagi katerih se za prodano zemljišče in druge nepremičnine pridobi pravica do pokojnine.

Uživalci **vojaških pokojnin** in uživalci **pokojnin, uveljavljenih v drugih republikah nekdanje SFR Jugoslavije.** Po določilih Ustavnega zakona za izvedbo temeljne listine o samostojnosti in neodvisnosti Republike Slovenije je Republika Slovenija z odloki Izvršnega sveta Skupščine Republike Slovenije z dne 31. 10. in 14. 11. 1991 s 1. 11. 1991 prevzela obveznosti izplačevanja vojaških pokojnin in začasno prevzela izplačevanje akontacij pokojnin in drugih dajatev iz pokojninskega in invalidskega zavarovanja osebam s stalnim prebivališčem v Republiki Sloveniji, ki so to pravico uveljavile v drugih republikah nekdanje SFR Jugoslavije.

Po zakonu o zagotavljanju socialne zaščite slovenskim državljanom, ki dobivajo pokojnino iz republik nekdanje SFR Jugoslavije, imajo državljani Republike Slovenije, ki so prejemniki teh pokojnin, pravico do **dodatka k pokojnini.** Dodatek k pokojnini odmeri in izplačuje Zavod za pokojninsko in invalidsko zavarovanje.

*right to an allowance if a disability board establishes that they require the help of another person to perform most or all of their essential needs. Blind and immobile active insured also have the right to this allowance.*

***Protecting the livelihood of farmers.*** *From the time the Act on Protecting the Livelihood of Farmers came into force until the end of 1992, 200 contracts were signed forming the basis for the acquisition of pension rights against the sale of land and other real estate.*

*Recipients of **military pensions** and recipients **of pensions established in other republics of former SFR Yugoslavia.** Pursuant to the Constitutional Act Implementing the Basic Constitutional Charter on the Independence and Sovereignty of the Republic of Slovenia, the Republic of Slovenia assumed on 1 November 1991, by decrees of the Executive Council of the Assembly of the Republic of Slovenia of 31 October and 14 November 1991, the obligation to pay military pensions, and temporarily took over the payment of pensions and other contributions from pension and disability insurance to persons with permanent residence in the Republic of Slovenia who had established that right in other republics of the former SFR Yugoslavia.*

*According to the law guaranteeing social protection to Slovenian citizens who receive pensions from other republics of former SFR Yugoslavia, citizens of the Republic of Slovenia in receipt of such pensions have the right to a **pension supplement.** The pension supplement is calculated and paid by the Institute for Pension and Disability Insurance.*

#### Viri in metode zbiranja podatkov

Prikazani podatki so večinoma rezultat rednih letnih statističnih raziskovanj s področja socialnega varstva, ki jih izvaja statistični urad. Nekatere tu objavljene podatke nam posreduje Ministrstvo za delo, družino in socialne zadeve, in sicer o upravičencih do socialnovarstvenih storitev in **denarne socialne pomoči** in o upravičencih do starševskega varstva in družinskih prejemkov.

#### *Sources and methods of data collection*

*The data are mostly the result of regular annual statistical surveys on social welfare carried out by the Statistical Office. Dodeljena je za obdobje; to pomeni, da je namenjena za ublažitev materialne ogroženosti, ki bo trajala več kot dva meseca.

*can be given in extraordinary circumstances, however, it can also be given when beneficiaries exceed the "census" for obtaining financial social assistance but for of reasons outside of their influence they have financial problems. Zaradi tega smo povprečno število upravičencev za obdobje od 1. 1 do 31. 8. prikazali pri denarnih pomočeh, za obdobje od 1. 9. do 31. 12. 2001 pa pri denarni socialni pomoči. Izplačana sredstva so za celo leto prikazana pri denarni socialni pomoči. Denarne socialne pomoči so za del leta 2001 ter za leto 2002 in nadaljnja leta prikazane v tabeli 10.16.

Amounts paid are shown at financial social assistance for the whole year. Financial social assistance is shown for a part of 2001, for 2002 and on in Table 10.16.*

## STATISTIKA PRAVOSODJA

## *JUSTICE STATISTICS*

### METODOLOŠKA POJASNILA

### *METHODOLOGICAL EXPLANATIONS*

#### Viri in metode zbiranja podatkov

Podatki o storilcih kaznivih dejanj so rezultat rednih statističnih raziskovanj s področja statistike kriminalitete. Objavljamo tudi nekatere podatke Ministrstva za pravosodje, Ustavnega sodišča, Državnega tožilstva in Republiškega senata za prekrške.

#### *Sources and methods of data collection*

*Data on perpetrators of criminal offences are the result of regular statistical surveys in the field of crime statistics. We also publish certain data of the Ministry of Justice, the Constitutional Court, the Public Prosecutor's Office and the Senate for Misdemeanours.*

#### Zajetje

Statistično zajetje kriminalitete kot družbeno negativnega pojava je popolno, saj so v statističnih raziskovanjih upoštevani vsi storilci kaznivih dejanj in tudi kazniva dejanja neznanih storilcev.

Prikazane so vse polnoletne in mladoletne osebe, ki jim je bila v določenih letih izdana pravnomočna odločba na okrožnih državnih tožilstvih in okrajnih oziroma okrožnih sodiščih.

Prav tako so upoštevane vse zadeve, rešene na sodiščih splošne pristojnosti, in vse osebe, obsojene pri občinskih sodnikih za prekrške v določenih letih. Podatki o številu sodišč, državnih tožilstev, organov za sojenje prekrškov, delovnih in socialnih sodišč in številu zaposlenih v teh institucijah so prikazani po stanju dne 31. 12. 2001.

#### *Coverage*

*Statistically, crime as a negative social phenomenon is fully covered since statistical surveys encompass all perpetrators of criminal offences as well as criminal offences committed by unknown perpetrators.*

*Data are presented on all adults and juveniles who in defined years were the subjects of a legally binding order from regional public prosecutors and regional or district courts.*

*All matters solved at general jurisdiction courts and all persons sentenced by misdemeanours judges for crimes committed in defined years are also covered. The data on the number of courts, public prosecutors' offices, misdemeanours judges, labour and social courts, and the number of people employed in these institutions are shown as of 31 December 2001.*

#### Definicije

**Kriminaliteta** z vidika statističnih raziskovanj obsega pojav od vložitve ovadbe za storjeno kaznivo dejanje do pravnomočnega končanja postopka pri pristojnem organu.

**Kaznivo dejanje** je protipravno dejanje, ki ga zakon zaradi njegove nevarnosti določa kot kaznivo dejanje in hkrati določa njegove znake (Kazenski zakonik člen 7).

Do 31. 12. 1994 sta bila v veljavi Kazenski zakon RS (Ur. l. SRS 12/77) in Kazenski zakon SFRJ (Ur. l. SFRJ 44/76), od 1. 1. 1995 pa imamo nov Kazenski zakonik (Ur. l. RS 63/94). Že zaradi novel k starima kazenskima zakonoma je bila kontinuiteta podatkov ponekod oslabljena, zaradi nove kazenske zakonodaje pa se je še poslabšala. Da bi se kontinuiteta čim bolj ohranila tudi v prihodnje, so podatki po skupinah kaznivih dejanj preurejeni v skladu s Kazenskim zakonikom. Kljub temu je primerjanje podatkov za pretekla leta oteženo.

**Enote opazovanja** so storilci kaznivih dejanj. Če stori ena oseba več kaznivih dejanj, spremljamo kot lastnost storilca samo glavno kaznivo dejanje. Kadar je več oseb udeleženih pri storitvi enega kaznivega dejanja, je enota opazovanja vsak udeleženec posebej.

**Polnoletni storilci** kaznivih dejanj so osebe, ki so ob storitvi kaznivega dejanja že dopolnile 18 let, zoper katere sta postopek na podlagi kazenske ovadbe in predhodni postopek (pri državnem tožilstvu) končana, in obtožene osebe, zoper katere je kazenski postopek pravnomočno končan.

Z izrazom **znani storilec** razumemo polnoletnega storilca kaznivega dejanja, proti kateremu je postopek pri državnem tožilstvu končan z izdajo odločbe, s katero:

- je ovadba zavržena,
- je preiskava ustavljena,
- je vložena obtožnica - obtožni predlog,
- se zadeva odstopi tuji državi ali se ovadba reši na drug način.

S pojmom **neznani storilec** razumemo neznano osebo, proti kateri je pri državnem tožilstvu podana kazenska ovadba zaradi storjenega kaznivega dejanja, a ta oseba po preteku enega leta od dne ovadbe še ni odkrita.

S pojmom **obtožena oseba, zoper katero je kazenski postopek pravnomočno končan**, razumemo polnoletno osebo, zoper katero je vložen obtožni akt in proti kateri je kazenski postopek pravnomočno končan z odločitvijo sodišča, s katero je:

- obtožni akt zavržen,

#### Definitions

*Statistical research of **crime** ranges from the filing of the charge for a criminal offence to the conclusion of the legal proceedings at the competent body.*

***Criminal offence** is an unlawful activity determined by the law as such because of its dangerous nature and at the same time the law determines its characteristics (Penal Code, Article 7).*

*Until 31 December 1994 the Penal Code of the RS (Official Gazette of the SRS, 12/77) and the Penal Code of the SFRY (Official Gazette of the SFRY, 44/76) were in force, and since 1 January 1995 the Penal Code (Official Journal of the RS, 63/94) has been in force. Due to the novels to the old penal codes, the continuity of the data had nearly been discontinued and the new penal code made the situation even worse. With the purpose to keep continuity of the data in the future, we have rearranged data by type of crimes of the Penal Code. Nevertheless, the comparison of data for past years is made difficult.*

***Observation units** are perpetrators of criminal offences. If one perpetrator commits several criminal offences, the attribute of the perpetrator is only the main criminal offence. When more than one perpetrator participates in committing one criminal offence, each participant is a separate unit of observation.*

***Adult perpetrators** of criminal offences are people who reached the age of 18 years, who committed an offence, and against whom proceedings based on a criminal charge and committal proceedings (through the public prosecutor) have been concluded, and accused persons against whom criminal proceedings have been legally concluded.*

*The term **known perpetrator** means an adult perpetrator of a criminal offence against whom proceedings through the public prosecutor have been concluded with the issuing of an order by which:*

- *the charge is rejected,*
- *the investigation is terminated,*
- *an indictment (proposed indictment) is filed,*
- *the perpetrator is surrendered to a foreign country or the charge is solved in another way.*

*The term **unknown perpetrator** refers to an unknown person against whom a criminal charge relating to a criminal offence has been filed with the public prosecutor but where such a person remains unknown even after one year from the day the charge was filed.*

*The term **accused person against whom criminal proceedings have been legally concluded**, refers to an adult against whom an indictment was filed and against whom criminal proceedings have been concluded with a court decision, by which:*

- *the indictment is rejected,*

- postopek ustavljen,
- oseba oproščena obtožbe,
- obtožba zavrnjena,
- izrečen varnostni ukrep brez izreka kazni ali
- storilec spoznan za odgovornega.

**Obsojena oseba** je polnoletna oseba, ki je spoznana za odgovorno in proti kateri je izrečena ena od kazenskih sankcij (kazen - zaporna ali denarna, pogojna kazen, sodni opomin, varnostni ukrep ali vzgojni ukrep), in tudi oseba, spoznana za krivo in oproščena kazni.

Mladoletni storilci kaznivih dejanj so osebe, ki so ob storitvi kaznivega dejanja že dopolnile 14, ne pa še 18 let, proti katerim je postopek pri državnem tožilstvu ali pred senatom končan.

Z izrazom **mladoletna oseba, zoper katero je kazenski postopek pri državnem tožilstvu končan**, razumemo mladoletnika, proti kateremu je postopek pri državnem tožilstvu končan z izdajo odločbe, s katero:

- postopek po kazenski ovadbi ni uveden - ovadba zavržena,
- je pripravljalni postopek ustavljen,

  je podan predlog za izrek kazni ali vzgojnega ukrepa.

Z izrazom **mladoletna oseba, zoper katero je kazenski postopek pred senatom pravnomočno končan**, razumemo mladoletnika, proti kateremu je podan predlog za izrek kazni ali vzgojnega ukrepa in je:

- postopek pred senatom ustavljen,
- izrečen varnostni ukrep brez izreka kazni,
- izrečen vzgojni ukrep ali izrečena kazen.

Mladoletne storilce delimo na mlajše mladoletnike, ki so ob storitvi kaznivega dejanja dopolnili 14, ne pa še 16 let, ter na starejše mladoletnike, ki so ob storitvi kaznivega dejanja že dopolnili 16, ne pa še 18 let. Mlajši mladoletnik ne more biti kaznovan, izreče se mu lahko le vzgojni ukrep, starejši mladoletnik pa je lahko tudi obsojen na mladoletniški zapor ali denarno kazen.

- *the proceedings are terminated,*
- *the charge is dropped,*
- *the charge is rejected,*
- *a security measure is passed without penal sentence,*
- *the case is recognised as being responsible.*

***A convicted person** is an adult who has been recognised as responsible and against whom one of the following penal measures has been imposed: sentence (imprisonment or fine), suspended sentence, judicial caution, security or educational measure. A convicted person is also a person recognised as guilty but not given a sentence.*

*Juvenile perpetrators of criminal offences are persons who had reached the age of 14 years but not yet 18 years at the time of committing a criminal offence and against whom criminal proceedings throught the public prosecutor or through a senate have been concluded.*

*The term **juvenile perpetrator against whom proceedings through the public prosecutor have been concluded** refers to a juvenile against whom proceedings through the public prosecutor have been concluded with the issuing of an order by which:*

- *criminal proceedings have not been initiated - charge was rejected,*
- *committal proceedings have been terminated,*

  *a proposal for a penal sentence or an educational measure has been filed.*

*The term **juvenile perpetrator against whom criminal proceedings through a senate have been concluded**, refers to a juvenile against whom a proposal for a penal sentence or an educational measure has been filed, where:*

- *proceedings before a senate have been terminated,*
- *a security measure is passed without penal sentence,*
- *an educational measure or sentence has been imposed.*

*Juvenile perpetrators are divided into younger juveniles, aged 14 or 15 at the time of committing the offence, and older juveniles, aged 16 or 17 at the time of committing the offence. Younger juveniles may not be punished, they may only be given educational measures. Older juveniles may be sentenced to juvenile prison or fined.*

## MEDNARODNA ANKETA O ŽRTVAH KRIMINALA

## *INTERNATIONAL CRIME VICTIMISATION SURVEY*

### METODOLOŠKA POJASNILA

### *METHODOLOGICAL EXPLANATIONS*

#### Viri in metode zbiranja podatkov

#### *Sources and methods of data collection*

Prikazani podatki so rezultat mednarodno poenotene ankete o žrtvah kriminala, ki smo jo izvajali tudi v Sloveniji in se nanašajo zlasti na obseg in strukturo oškodovanja oseb in gospodinjstev po nekaterih pojavnih oblikah splošne kriminalitete. Izvajalec ankete za Slovenijo je bil v dveh doslej opravljenih anketah (1992 in 1997) Inštitut za kriminologijo pri Pravni fakulteti v Ljubljani. Z letom 2001 je omenjeno anketo prevzel Statistični urad RS in jo bo odslej izvajal vsaka štiri leta.

*Data are the result of the internationally harmonised Crime Victim Survey, which investigates particularly the scope and structure of personal and household victimisation by several types of conventional crime. In Slovenia the survey was carried out in 1992 and 1997 by the Institute of Criminology at the Faculty of Law in Ljubljana. In 2001 the survey was carried out by the Statistical Office of the Republic of Slovenia. It will be conducted every four years.*

Z anketo želimo dobiti oceno deleža žrtev kriminala v Sloveniji. Beleži se delež žrtev kriminalnih dogodkov v Sloveniji, in to neodvisno od prijave kriminalnih dejanj policiji oziroma drugemu organu, ki zadevo lahko obravnava.

*With the Crime Victim Survey we want to estimate the share of crime victims in Slovenia. We record the share of victims of crime in Slovenia independently from incidents officially recorded by the police or by any other institution.*

Anketa sprašuje anketirane, ali se jim je kateri izmed navedenih dogodkov zgodil v zadnjih petih letih in - če se jim je - kolikokrat v zadnjem letu. V zvezi z nekaterimi najbolj indikativnimi dogodki so

*The respondents are asked whether they experienced any of the stated incidents in the last five years and, if they did, how often in the last year before the survey. In connection with several, most indicative*

vprašani še po dodatnih značilnostih: kje se je dogodek zgodil, kdo je bil storilec, kako resen je bil dogodek zanje oziroma za njihovo gospodinjstvo; ali jim je priskočila na pomoč kaka specializirana agencija za pomoč žrtvam in - če ni - ali bi jim bila njihova pomoč dobrodošla. Pomembna so tudi vprašanja v zvezi s prijavo oziroma z neprijavo dogodka policiji. Anketa sprašuje anketirance tudi o njihovi splošni oceni dela policije, o vidnosti policije v njihovem bivalnem okolju, po kazalnikih strahu pred kriminaliteto, po načinih oziroma sredstvih za varovanje oseb in premoženja in po njihovi kaznovalni naravnanosti.

Zaradi teleskopskega efekta anketa najprej sprašuje o dogodkih, ki so se zgodili v 5-letnem obdobju, in se nato osredotoči na zadnje preteklo leto. S tem dosežemo, da anketirana oseba lažje locira čas dogodka, zmanjša efekt pritegovanja starejših dogodkov in s tem precenjevanja števila dogodkov v zadnjem letu. Zato število dogodkov v petletnem obdobju ni petkratnik števila dogodkov v enem letu in je gotovo ocena za preteklo leto natančnejša in zanesljivejša.

Tipi dogodkov, zajeti v anketi, so podani opisno; to omogoča, da so v različnih kulturah in okoljih enako razumljeni.

*incidents, the survey further explores some additional information: where did it happen, who was the perpetrator, how serious was the incident for them or for their households, and also, had any specialised agency for victim assistance helped them, or, if not, would such help be welcome. The survey also includes important questions about (non-)reporting the incident to the police. All respondents are further asked about general assessments of the police performance, about visibility of the police, about indicators of fear of crime, about means of protection of persons and property/crime prevention and about punitive attitudes.*

*Due to the telescopic effect, the survey first asks about incidents that happened in the five-year period and then focuses on the past year. Thus we enable the interviewed person to more easily locate the time of the incident, to reduce the effect of drawing older incidents closer in time and thus overestimate the number of incidents in the past year. Therefore the number for the five-year period is not five times the number of incidents in one year and the estimate for the past year is thus more accurate and reliable.*

*Types of incidents included in the survey are presented in a descriptive manner, which enables their equal understanding in different cultural environments.*

## Zajetje

Anketa je vzorčna. Enota vzorčenja je gospodinjstvo, saj se gospodinjstvo pri skupini dogodkov pojavlja tudi kot oškodovanec (dogodki, povezani z vozili, vlomi in poskusi vlomov). Na anketna vprašanja pa telefonsko odgovarja eden izmed članov gospodinjstva, starih najmanj 16 let, in sicer tisti, ki je zadnji med njimi imel rojstni dan. Osebna oškodovanja se nanašajo na to osebo. V vzorec smo izbrali 6000 telefonskih naročnikov, od tega 2000 telefonskih naročnikov v Ljubljani. Mesto Ljubljana je bilo prevzorčeno, da bi zagotovili zadovoljivo natančnost in ohranili primerljivost podatkov z leti 1992 in 1997. Vzorec je bil stratificiran, sistematični, slučajni. Stratumi so definirani s statistično regijo (12 regij) in tipom naselja znotraj statističnih regij (6 tipov). V vsakem stratumu smo vzorčili neodvisno. Število enot oziroma telefonskih naročnikov v posameznem stratumu je bilo sorazmerno glede na delež oseb, starih 16 let ali več, ki živijo v območju posamezne statistične regije, in glede na velikost naselja.

Podatki so uteženi glede na velikost gospodinjstva, ker imajo osebe, ki živijo v gospodinjstvih z več člani, manjšo verjetnost izbora. Poleg osnovnega uteževanja uporabimo dodatno uteževanje (kalibracijo), ki prilagodi porazdelitev kontrolnih spremenljivk znani populacijski sestavi. Za prilagoditev smo uporabili naslednje spremenljivke: spol, starost, izobrazbo, velikost gospodinjstva, statistično regijo in tip naselja. Uporabnik ocen (podatkov) iz ankete naj bi pri uporabi podatkov upošteval, da so ocene, objavljene brez omejitev, dovolj natančne, tiste v oklepajih pa manj.

Skupen delež odgovorov je dosegel 66,8 %, stopnja zavračanja pa je bila 17,9-odstotna.

## *Coverage*

*This is a sample survey. The sampling unit is a household, because a household is actually regarded as a potential victim of the group of included criminal incidents (vehicle related incidents, burglaries and attempted burglaries). The telephone survey is answered by a household member (among those being 16 years old or more) who would first have his/her birthday. Personal victimisation relates to this person. The sample covered 6,000 telephone subscribers, of that 2,000 from Ljubljana in order to provide sufficient accuracy and comparability of data with 1992 and 1997 surveys. The sample is stratified, systematic, random sample. Strata are defined with statistical regions (12 regions) and type of settlement within the region (6 types). In each stratum we sampled independently. The number of units (telephone numbers) in each stratum is proportional to the share of people aged 16 years or more living in a certain type of settlement in a certain region.*

*Data are weighted according to the household size because persons living in households with more members are less likely to be selected. Beside the basic weighting, additional weighting (calibration) is used, which adjusts the distribution of control variables to the known population structure. For adjustment we used the following variables: sex, age, level of education, household size, statistical region and size of settlement. The user of survey estimates (data) should take into account that estimates published without limitations are sufficiently precise, while those in parentheses are less precise.*

*The total response rate was 66.8% and the refusal rate was 17.9%.*

## Definicije

**Delež oškodovanih** je delež oseb oziroma njihovih gospodinjstev, ki so bili vsaj enkrat oškodovani zaradi kriminalnega dogodka. (V tabeli so prikazani deleži najmanj enkrat oškodovanih glede na vse dogodke skupaj in glede na posamezno vrsto kriminalnega dogodka.)

**Kriminalni dogodki** so razdeljeni na 11 skupin: rop, osebna tatvina, telesno nasilje oziroma resna grožnja, tatvina motornega vozila, namerno poškodovanje (vandaliziranje) vozila, tatvina iz/z vozila, tatvina motornega vozila, tatvina kolesa, vlom in poskus vloma. O izkušnjah s potrošniško goljufijo in korupcijo anketa sprašuje samo za preteklo leto.

**Rop** je oblika tatvine, pri kateri storilec uporabi silo ali grozi z neposrednim napadom na življenje in telo.

**Osebna tatvina** je dejanje, s katerim nekdo drugemu vzame stvar z namenom, da si jo protipravno prilasti, in pri tem ne uporabi neposredne sile na življenje in telo.

**Spolno nasilje** vključuje posilstvo, poskus posilstva, nedostojen napad in žaljivo vedenje. Vprašanja o spolnem nasilju se postavijo samo ženskam; če pa ga omenijo moški, se ti dogodki štejejo med fizične napade in grožnje.

**Namerno poškodovanje vozil** je dejanje, s katerim nekdo name-

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Podatke o **zaposlenih osebah**, ki delajo v podjetjih, družbah in organizacijah, dobivamo z **mesečnim raziskovanjem** Mesečno poročilo o plačah in zaposlenih osebah v podjetjih, družbah in organizacijah (ZAP/M), podatke o **samozaposlenih osebah** (razen podatkov o kmetih) in o **zaposlenih osebah, ki delajo pri samozaposlenih osebah**, pa - od leta 1997 dalje - iz **Statističnega registra delovno aktivnega prebivalstva** (**SRDAP**). Vir podatkov o **kmetih** je **Anketa o delovni sili (ADS).**

Do leta 1994 (vključno) smo podatke o zaposlenih osebah, ki so delale pri zasebnikih, in o samozaposlenih osebah pridobivali z rednim četrtletnim raziskovanjem Četrtletno poročilo o osebah, ki samostojno opravljajo poklicno dejavnost, in število pri njih zaposlenih oseb (ZAP-ČL) prek Zavoda za zdravstveno zavarovanje Slovenije.

Iz **SRDAP-a** pridobivamo tudi podatke o zaposlenih osebah po **stopnji strokovne izobrazbe in stopnji strokovne usposobljenosti** za opravljanje določenih del in nalog.

Podatke o **registriranih brezposelnih osebah** in o **prostih delovnih mestih** nam posreduje **Zavod RS za zaposlovanje.**

**SRDAP** je bil vzpostavljen na osnovi popisa zaposlenih oseb leta 1986. Dopolnjuje in popravlja oz. osvežuje (ažurira) se s podatki iz obrazcev M, to je Prijava podatkov za uvedbo in vodenje matične evidence pokojninskega in invalidskega zavarovanja in zdravstvenega zavarovanja, evidence o sklenitvi delovnega razmerja (M-1, M-2, M-1A, M-3, M-3a, M-DČ).

**ADS** je bila v Sloveniji uvedena leta 1993. Od leta 1997 jo izvajamo četrtletno.

### Zajetje

V statistično raziskovanje Mesečno poročilo o plačah in zaposlenih osebah v podjetjih, družbah in organizacijah (ZAP/M) so zajete **delovno aktivne osebe s pogodbami o zaposlitvi** (tistih, ki delajo po pogodbah o delu ali avtorskih pogodbah, ne upoštevamo). Zajeta niso zasebna podjetja z enim ali dvema zaposlenima osebama, samostojni podjetniki posamezniki in pri njih zaposlene osebe, delavci, ki opravljajo poklicno dejavnost, in kmetje. Te podatke dobivamo iz SRDAP.

Od leta 1977 zbiramo podatke o zaposlenih osebah **po teritorialnem načelu in načelu čistih dejavnosti**. Od leta 1992 so v raziskovanje vključene oborožene sile in zasebna podjetja razen tistih z eno ali dvema zaposlenima osebama, od leta 1993 pa tudi policija. Upoštevane so **vse zaposlene osebe** ne glede na to, ali delajo za določen ali nedoločen čas, s polnim delovnim časom ali z delovnim časom, krajšem od polnega.

**Anketa o delovni sili** zajema **vzorec** stalnega prebivalstva, to je oseb, ki imajo prebivališče na ozemlju Republike Slovenije, in sicer samo tisti del tega del prebivalstva, ki živi v individualnih gospodinjstvih.. Podatki so bili vzeti iz Centralnega registra prebivalcev (CRP).

### Definicije in pojasnila

Kot **zaposlene osebe v podjetjih, družbah in organizacijah** štejemo (v ZAP/M in SRDAP) osebe v družbah, podjetjih, organizacijah ali pri zasebnikih, ki so sklenile pogodbo o zaposlitvi za določen ali nedoločen čas, ne glede na to ali delajo s polnim delovnim časom ali delovni čas, ki je krajši od polnega. Upoštevani so tudi pripravniki. Od 1. januarja 1999 štejemo med zaposlene osebe tudi osebe, ki opravljajo javna dela; prej so imele te osebe status registrirane brezposelne osebe.

K zaposlenim osebam **ne štejemo** oseb, ki delajo v podjetjih, družbah ali organizacijah po pogodbi o delu ali po avtorski pogodbi, in državljanov Republike Slovenije s stalno zaposlitvijo v slovenskih predstavništvih, na gradbiščih ipd. v tujini.

**Poročevalski datum** za ZAP/M in SRDAP, tj. datum, na katerega se nanašajo podatki v omenjenih virih, je zadnji dan v poročevalskem (referenčnem) mesecu. Povprečje leta je dvanajstina seštevka podatkov vseh dvanajstih mesecev leta.

**Strokovna izobrazba** (formalnopravna izobrazba) zaposlene osebe je stopnja izobrazbe, pridobljene s končano ustrezno šolo, z opravlje-

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Data on **persons in paid employment** in enterprises, companies and organisations are collected with **monthly surveys** of earnings and persons in paid employment in enterprises, companies and organisations (ZAP/M). Since 1997 the source of the data on **self-employed persons** (except farmers) and **persons in paid employment by self-employed persons** is the **Statistical Register of Employment (SRE)**. The data on **farmers** are based on the **Labour Force Survey (LFS)**.*

*Data on persons employed by private entrepreneurs and data on self-employed persons were collected with the ZAP-ČL quarterly surveys until the end of 1994 through the Health Insurance Institute of Slovenia.*

*Data on the level of **professional attainment** and the level of **professional skills required by post** are collected from the SRE.*

*Data on **registered unemployed persons** and **job vacancies** are forwarded by the **Employment Service of Slovenia**.*

*The **SRE** was set up on the basis of the Census of Employees in 1986. It is updated from M-forms, i.e. registration data for introduction and monitoring of records on retirement and disability insurance and health insurance, records on stipulated employment (M-1, M-2, M-1A, M-3, M-3a, M-DČ).*

*The **LFS** was introduced in Slovenia in 1993. Since 1997 we have been carrying it out quarterly.*

### *Coverage*

*The statistical survey of earnings and persons in paid employment in enterprises, companies and organisations (ZAP/M) covers **persons in employment with employment contracts** (contract work is not taken into consideration). Private enterprises with one or two persons in paid employment, individual private entrepreneurs and persons in paid employment by them, own account workers and farmers are excluded. We obtain data on them from the SRE.*

*Since 1977 we have collected data on persons in paid employment according to **the territorial principle and by kind of activity**. Private enterprises with 3 or more persons in paid employment and members of the armed forces were included in 1992, while the police were included in 1993. **All persons in paid employment**, employed for fixed or unspecified period of time, irrespective of whether they work full time or part time, are taken into consideration.*

***LFS** sample covers the resident population according to the Central Population Register, i.e. all persons whose usual place of residence is on the territory of the Republic of Slovenia. The survey covers only the population living in private households.*

### *Definitions and explanations*

***Persons in paid employment in enterprises, companies and organisations** are persons in paid employment in enterprises, companies and organisations or by private employers who have signed an employment contract for a fixed or unspecified period of time, irrespective of whether they work in the enterprise or other organisation full time or less than full time (including trainees). Since 1 January 1999, persons performing public works have been included among persons in employment.*

*The following categories are **not** counted as persons in paid employment: persons performing temporary or occasional contract work and citizens of the Republic of Slovenia employed permanently in Slovenian representations, on construction sites, etc., abroad.*

*The **reference period** for ZAP/M and SRE (i.e. the day to which the data refer) is the last day of the month. The average of the year is one twelfth of the sum of data for all twelve months of the year.*

***Professional attainment** (formal education) of persons in paid employment is the level of education acquired by such a person upon*

nim izpitom ali s priznanjem na osnovi dela. Zaposlena oseba jo lahko izkaže na osnovi splošno formalnopravno priznane dokumentacije: diplome, spričevala, odločbe.

*completing an appropriate school after sitting for exams or receiving recognition based on course work. A person can demonstrate the level acquired with a general legally and formally recognised document: diploma, certificate, decree.*

**Strokovna usposobljenost** za opravljanje določenih del in nalog po sistemizaciji obsega splošna in strokovna znanja, praktično usposobljenost in druge lastnosti, ki jih mora imeti oseba, da lahko uspešno opravlja dela in naloge pri poslovnem subjektu.

***Professional skills*** *for performing certain types of work and certain tasks are represented by the necessary level of professional knowledge and the fulfilment of other conditions (professional qualifications, experiences, etc.), which someone must have to perform works and tasks successfully.*

**Šolska izobrazba** je v tej zvezi vrsta šole, s katero si je zaposlena oseba pridobila najvišjo stopnjo svoje izobrazbe s šolanjem v verificiranih vzgojno-izobraževalnih organizacijah. Dokazuje jo s spričevalom oziroma z diplomo. Tečajev, ki ne dajo spričevala redne šole, ali tečajev, ki jim ni priznana stopnja določene šole, ne upoštevamo. V skupini šol za kvalificirane delavce so zajete tudi šole za drug strokovni kader (v to skupino šol uvrščamo na primer nižje medicinske, stomatološke in farmacevtske šole, nižje administrativno-upravne, finančno-komercialne, umetniške in verske šole).

***School education*** *is the type of school at which persons in paid employment acquired their highest level of education through schooling at a verified educational organisation. A person can demonstrate the level acquired with a certificate or a diploma. Courses not leading to a regular school certificate or courses not recognised as having the equivalent level of a certain type of school are not taken into consideration. The group of schools for skilled workers includes schools for other professional staff. Here we classify lower-level medical, stomatological and pharmaceutical schools, lower-level administrative, financial and commercial, artistic and religious schools.*

**Iskalec zaposlitve** se šteje kot **registrirana brezposelna oseba**, če zanj veljajo naslednje okoliščine:

***Job-seekers*** *are considered as* ***registered unemployed persons****:*

- če nima redne zaposlitve ali samozaposlitve, če ni lastnik ali solastnik poslujočega podjetja ali če ni lastnik ali uporabnik nepremičnin, s katerimi se lahko preživlja,
- *if they do not have a regular job or are not self-employed, if they are not the owner or co-owner of an operating enterprise, and if they are not the owner or user of property which could provide a living,*
- če je sposoben in voljan delati ter je pripravljen sprejeti zaposlitev, primerno njegovi strokovni izobrazbi oziroma z delom pridobljeni delovni zmožnosti, in
- *if they are capable of and willing to work and are prepared to accept a job suitable to their professional attainment or working skills acquired through work,*
- če se zaradi zaposlitve prijavi na pristojni izpostavi Zavoda RS za zaposlovanje.
- *if they have registered as job-seekers with the Employment Service of Slovenia.*

**Novo prijavljene** registrirane brezposelne osebe so osebe, ki so se v tekočem mesecu prijavile na pristojni izpostavi Zavoda RS za zaposlovanje.

***Newly registered*** *unemployed persons are persons who have registered with the Employment Service of Slovenia (ESS) in the current month.*

**Osebe, zaposlene prek Zavoda RS za zaposlovanje** so tiste, ki so bile tam prijavljene in so se v tekočem mesecu zaposlile.

***Persons employed through the ESS*** *are those who were registered with the ESS and who obtained a job in the current month.*

Podatke o **prostih delovnih mestih** sporočajo podjetja in druge organizacije Zavodu RS za zaposlovanje.

*Enterprises and other organisations report data on* ***job vacancies*** *to the ESS.*

Poročevalski (referenčni) datum za podatke o **novo prijavljenih** registriranih brezposelnih osebah, o osebah, **zaposlenih prek Zavoda RS za zaposlovanje,** in o **prostih delovnih mestih** je zadnji dan v mesecu. Letno povprečje je dvanajstina seštevka podatkov vseh dvanajstih mesecev leta.

*The reference date for* ***newly registered*** *unemployed persons,* ***persons employed through the ESS*** *and* ***job vacancies*** *is the last day of the month. The average of the year is one twelfth of the sum of data for all twelve months of the year.*

**Stopnjo brezposelnosti** prikazujemo kot **stopnjo registrirane brezposelnosti** in **stopnjo anketne brezposelnosti**. Vir za prvo so podatki iz **ZAP/M, SRDAP** in **Register brezposelnih oseb** na Zavodu RS za zaposlovanje, za drugo pa **ADS**.

***Unemployment rate*** *is shown as the* ***registered unemployment rate*** *and as the* ***LFS unemployment rate****. The source for the first one are data from ZAP/M, the SRE and the Unemployment Register kept by the ESS, while the source for the second one is the LFS.*

**Delovno aktivno prebivalstvo po SRDAP in ZAP/M** so vse osebe, ki so pokojninsko in zdravstveno zavarovane oziroma so v delovnem razmerju na območju Republike Slovenije. Delovno razmerje je lahko sklenjeno za določen ali nedoločen čas, za polni delovni čas ali delovni čas, krajši od polnega.

***According to the SRE and the ZAP/M, persons in employment*** *are all persons who have pension and health insurance and are employed on the territory of the Republic of Slovenia. They can be employed permanently or temporarily, full time or part time.*

**Delovno aktivno prebivalstvo po ADS** so tisti, ki so v poročevalskem tednu (od ponedeljka do nedelje) pred anketiranjem opravili kakršno koli delo za plačilo (denarno ali nedenarno) ali dobiček, in tisti, ki so sicer zaposleni ali samozaposleni, a so bili v poročevalskem tednu začasno odsotni z dela. Med delovno aktivno prebivalstvo štejemo tudi zaposlene osebe, ki so začasni ali trajni presežki (do prenehanja delovnega razmerja), pomagajoče družinske člane in osebe na porodniškem dopustu.

***In the LFS persons in employment*** *are those who during the reference week (from Monday to Sunday) did any work for payment (in cash or kind) or profit, or were not working but had jobs from which they were temporarily absent. Unpaid family workers, persons on maternity leave and workers on temporary or permanent lay-off are included in persons in employment.*

**Delovno sposobno prebivalstvo** so osebe, stare 15 let ali več.

***Working age population*** *are all persons aged 15 or more.*

**Brezposelne osebe po ADS** pa so osebe, ki v poročevalskem tednu niso bile zaposlene ali samozaposlene in niso opravile nikakršnega dela za plačilo ter:

***In the LFS unemployed persons*** *are those who, during the reference week, had no employment, were not self-employed and did no work for payment, and:*

- so v zadnjih štirih tednih aktivno iskale delo in bi ga bile takoj (v dveh tednih) pripravljene sprejeti, če bi ga našle, ali
- *were in the last four weeks actively looking for a job and were available to start work immediately (within two weeks), or*
- so že našle delo in ga bodo začele opravljati v času po poročevalskem tednu.
- *had found a job to start after the reference week.*

**Aktivno prebivalstvo** je seštevek delovno aktivnega prebivalstva in brezposelnih oseb.

*The* ***labour force*** *is the sum of persons in employment and unemployed persons.*

**Neaktivno prebivalstvo** tvorijo tisti, ki niso razvrščeni niti med delovno aktivno prebivalstvo niti med brezposelne osebe.

(Zadnji dve definiciji se nanašata na prebivalstvo, staro najmanj 15 let).

**Stopnja aktivnosti** je odstotni delež aktivnega prebivalstva v delovno sposobnem prebivalstvu.

**Stopnja delovne aktivnosti** je odstotni delež delovno aktivnega prebivalstva v delovno sposobnem prebivalstvu.

**Stopnja brezposelnosti** je odstotni delež brezposelnih oseb v aktivnem prebivalstvu.

Razlike med podatki iz ZAP/M, SRDAP, Registra brezposelnih oseb in ADS 2002 nastanejo zaradi različnega načina zbiranja podatkov in različnih definicij. Prav te razlike pa obenem osvetljujejo problem z različnih vidikov in tako omogočajo večjo zanesljivost pri ugotavljanju zaposlenosti in reševanju brezposelnosti.

***Inactive persons*** *are those who are not classified as persons in employment or as unemployed persons.*

*(These two definitions relate to the population of working age 15 years or over).*

***Activity rate*** *represents the labour force as a percentage of the working age population.*

***Employment/population ratio*** *represents persons in employment as a percentage of the working age population.*

***Unemployment rate*** *represents unemployed persons as a percentage of the labour force.*

*The differences between data from ZAP/M, the SRE, the Unemployment Register and the LFS originate from different data collection methods and definitions, however, they show the problem from different aspects, which enables greater reliability in ascertaining and solving problems of employment and unemployment.*

# 13. PLAČE IN STROŠKI DELA

# *EARNINGS AND LABOUR COSTS*

## PLAČE

## *EARNINGS*

### METODOLOŠKA POJASNILA

**Podatki o plačah** so rezultat statističnega raziskovanja z naslovom Mesečno poročilo o plačah in zaposlenih osebah v podjetjih, družbah in organizacijah (ZAP/M). **Podatki o strukturi zaposlenih oseb po velikosti bruto plač** so rezultat polletnega statističnega raziskovanja plač in kolektivnih pogodb za marec oziroma september z naslovom Poročilo o zaposlenih osebah po višini bruto plače in kolektivne pogodbe (ZAP/PL**). Podatke o plačah zaposlenih oseb po stopnjah strokovne usposobljenosti** zbiramo vsako leto z vprašalnikom Letno poročilo podjetij, družb in organizacij o izplačanih bruto plačah po stopnjah strokovne usposobljenosti in spolu (ZAP/L), oziroma za vsako tretje leto še **podatke o bruto plačah zaposlenih oseb po stopnjah šolske izobrazbe in delovnem času ter spolu**, ki jih zbiramo z vprašalnikom Poročilo podjetij, družb in organizacij o plačah in delovnem času (ZAP/3L).

### *METHODOLOGICAL EXPLANATIONS*

***Data on earnings*** *are based on the monthly statistical survey of earnings and persons in paid employment in enterprises, companies and organisations (ZAP/M).* ***Data on the structure of persons in paid employment by amount of gross earnings*** *are the result of the regular half-yearly survey on earnings and collective agreements for March/September (ZAP/PL), while the* ***data on earnings of persons in paid employment by level of professional skills*** *have been collected with the annual survey ZAP/L, and* ***data on earnings of persons in paid employment by level of school education and working hours*** *have been collected with the three-annual survey ZAP/3L.*

#### Zajetje

V statistični raziskovanji ZAP/M in ZAP/PL **so zajete** zaposlene osebe, ki delajo v podjetjih, družbah in organizacijah na podlagi **pogodbe o zaposlitvi.** Od leta 1992 so v raziskovanji vključena tudi zasebna podjetja (z več kot dvema zaposlenima osebama) in oborožene sile, od leta 1993 pa je zajeta tudi policija. Raziskovanji ZAP/L in ZAP/3L sta vzorčni. Zajete so vse zaposlene osebe v družbah, podjetjih in organizacijah, ki so delale na podlagi **pogodbe o zaposlitvi** vseh 12 mesecev opazovanega leta in niso imele refundiranih plač. Družb, podjetij in organizacij, ki so med opazovanim letom nastale ali pa prenehale s poslovanjem, ne upoštevamo. V vseh raziskovanjih so upoštevane **vse** zaposlene osebe, ne glede na to, ali delajo **za določen** ali **nedoločen čas**, **polni delovni čas** ali delovni čas, **krajši od polnega**.

#### *Coverage*

*The statistical surveys on earnings and persons in paid employment in enterprises, companies and organisations (ZAP/M) and the regular half-yearly survey on earnings and collective agreements (ZAP/PL) cover* ***persons in paid employment with employment contracts*** *in enterprises, companies and organisations. Private enterprises with 3 or more persons in paid employment and members of the armed forces were included in 1992, while the police were included in 1993. The ZAP/L and ZAP/3L surveys are sample surveys. Both surveys cover all persons in paid employment in enterprises, companies and organisations from the sample, who worked* ***with employment contracts*** *for all 12 months of the observed year and did not have refunded earnings. Enterprises, companies and organisations that were established or died in the observed year are not taken into account. In all surveys* ***all*** *persons in paid employment, employed for* ***fixed*** *or* ***unspecified period of time****, irrespective of whether they work* ***full time*** *or* ***part time****, are taken into account.*

Na osnovi podatkov o izplačanih bruto plačah, ki jih s polletnim raziskovanjem ZAP/PL zbiramo za **marec in september,** razvrščamo **po velikosti bruto plače** vse zaposlene osebe v družbah, podjetjih ali organizacijah, ki so imele plačanih **najmanj 159** in **največ 200 ur** v mesecu opazovanja.

*The categorisation of persons in paid employment in enterprises, companies and organisations* ***by amount of gross earnings*** *is made for* ***March and September*** *by the regular half-yearly survey on earnings and collective agreements (ZAP/PL). We only categorise persons in paid employment who had a* ***minimum of 159 and a maximum of 200 paid hours*** *of full working time or overtime in the observed month.*

**Zajeti niso** zasebna podjetja z enim ali dvema zaposlenima osebama, samostojni podjetniki posamezniki in pri njih zaposlene osebe, delavci, ki opravljajo poklicno dejavnost, in kmetje. Oseb, ki delajo po pogodbah o delu ali avtorskih pogodbah, ne upoštevamo.

*Private enterprises with one or two persons in paid employment, individual private entrepreneurs and persons in paid employment by them, own account workers and farmers are* ***excluded*** *as well as persons in paid employment with contract work.*

Podatke zbiramo **po teritorialnem načelu** in **čistih dejavnostih** (in sicer od leta 1977).

*Since 1977 we have been collecting data according to* ***the territorial principle and by kind of activity****.*

## STROŠKI DELA

## *LABOUR COSTS*

### METODOLOŠKA POJASNILA

**Podatke o stroških dela** zbiramo z Anketo o stroških dela vsake štiri leta (za leta 2000, 2004, itd.). Za vmesna leta izračunamo ocene na podlagi podatkov iz obstoječih virov (redne raziskave Statističnega urada Republike Slovenije, registri in drugi administrativni viri).

### *METHODOLOGICAL EXPLANATIONS*

***Data on labour costs*** *are collected every four years with the Labour Cost Survey (for 2000, 2004, etc.). For the years between two surveys we calculate estimates on the basis of data from the existing sources (regular surveys of the Statistical Office of the Republic of Slovenia, registers and other administrative sources).*

### Enote opazovanja

Za leto 2000 so bile enote opazovanja vsa podjetja, družbe in organizacije oziroma njihove enote v sestavi, ki so registrirane za opravljanje dejavnosti na ozemlju Republike Slovenije in imajo najmanj 10 zaposlenih, izbrane pa so bile s pomočjo vzorca.

### *Observation units*

*For the year 2000 observation units were enterprises, companies and organisations or their establishments registered for performing activities on the territory of the Republic of Slovenia and having at least 10 persons in paid employment. They were selected with a sample.*

### Opis vzorca

V vzorčni okvir za raziskovanje o stroških dela za leto 2000 je bilo vključenih 9 555 podjetij, družb in organizacij oziroma njihovih poslovnih enot z najmanj 10 zaposlenih oseb: med temi je bilo 7 060 malih (do 50 zaposlenih), 2 158 srednjih (med 51 in 250 zaposlenih) in 377 velikih (251 in več zaposlenih) podjetij.

Velikost vzorca je bila določena glede na zahtevano natančnost ključnih spremenljivk, in sicer n=3 021. Vzorčni načrt:

- stratifikacija je potekala glede na področje dejavnosti in velikost podjetja, pri čemer smo uporabili enake definicije malih, srednjih in velikih podjetij, družb in organizacij kot zgoraj;
- velika podjetja, družbe in organizacije so bile izbrane z gotovostjo (n=369);
- mala in srednja podjetja, družbe in organizacije oziroma njihove poslovne enote so bile v vzorec izbrane z verjetnostjo, ki je bila sorazmerna njihovi velikosti, pri čemer je bila velikost definirana kot število zaposlenih oseb v poslovni enoti oz. podjetju, družbi ali organizaciji.

### *Sample description*

*The sampling frame for the Labour Cost Survey 2000 covered 9,555 enterprises, companies and organisations or their establishments having at least 10 persons in paid employment, of that 7,060 small (50 or less employees), 2,158 medium-sized (between 51 and 250 employees) and 337 large (251 and more employees) ones.*

*The sample size of n=3,021 was determined regarding the required accuracy of final variables. The sampling plan was as follows:*

- *Stratification was done with regard to the field of activity and enterprise size. We used the above mentioned definitions of small, medium-sized and large enterprises, companies and organisations.*
- *All large enterprises, companies and organisations (n=369) were selected.*

## ANKETA O PORABI V GOSPODINJSTVIH

### METODOLOŠKA POJASNILA

### METHODOLOGICAL EXPLANATIONS

#### Viri in metode zbiranja podatkov

Podatke za to statistično področje zbiramo z vprašalnikom Anketa o porabi v gospodinjstvih. Ta se od uvedbe leta 1983 do leta 1997 ni spreminjala; anketiranje je ves ta čas potekalo po enotni metodologiji in na vsebinsko enakih obrazcih.

Leta 1997 pa je bila ta anketa vsebinsko in po načinu izvedbe prenovljena: prilagodili smo jo priporočilom Eurostata in postala je kontinuirana, kar pomeni, da zbiranje podatkov (anketiranje) poteka neprekinjeno. Anketne podatke, zbrane v več letih, združujemo in tako dobimo natančnejše ocene. Podatke iz obdobja treh let preračunamo na srednje leto in to upoštevamo pri interpretaciji rezultatov kot referenčno leto. Od leta 1997 tudi ne uporabljamo več bilančnega pristopa, ampak koncept potrošnih izdatkov (izdatkov za življenjske potrebščine), ki so klasificirani po COICOP-HBS (Classification of Individual Consumption by Purpose - Klasifikacija osebne porabe po namenu). Nekatera vprašanja so bila izločena (npr. o zmanjšanju prihrankov, vračanju potrošniških in investicijskih posojilih ipd.), zato je primerjava rezultatov s prejšnjimi leti zdaj možna samo na ravni tekočega dohodka in potrošnih izdatkov in zato tudi ne prikazujemo več bilance med razpoložljivimi in porabljenimi sredstvi.

Gre za vzorčno anketo. Stratifikacija vzorca je izdelana glede na 12 statističnih regij in 6 tipov naselij. V večjih naseljih (z več kot 10.000 prebivalci) je uporabljeno enostavno slučajno vzorčenje, v manjših pa vzorčenje v skupinah po 4 osebe, ki določajo gospodinjstvo. Najprej so izbrani popisni okoliši (glede na velikost) za celo leto vnaprej, nato pa za vsako četrtletje po 4 osebe v vsakem okolišu. V večjih naseljih so s slučajnim enostavnim vzorčenjem za vsako četrtletje izbrane le osebe. Vzorec je enakomerno porazdeljen skozi vse leto. Metode substitucije (izbiranje nadomestnih gospodinjstev, ki bi zamenjala tista, ki niso sodelovala) ne uporabljamo; namesto tega ustrezno povečamo vzorec glede na delež odgovorov iz prejšnjih let.

Podatke o razpoložljivih in porabljenih sredstvih v gospodinjstvu oziroma podatke o osnovnih elementih osebne porabe dajejo člani gospodinjstva neposredno anketarju, ki ga za to delo pooblasti Statistični urad Republike Slovenije. V anketi uporabljamo metodo osebnega intervjuja, ki temelji na vprašalniku, ter dnevnike, v katere člani gospodinjstva 14 dni sami zapisujejo dnevne izdatke in kupljene količine življenjskih potrebščin. Gospodinjstva so enakomerno porazdeljena skozi vse leto, vsako izbrano gospodinjstvo pa sodeluje v anketi 14 dni.

#### *Sources and methods of data collection*

*Data are collected with the Household Budget Survey, which was between 1983 and 1997 conducted according to the unified methodology and with the same questionnaires as regards the contents.*

*In 1997 there were some changes in survey contents and implementation. It was harmonised with Eurostat's recommendations and became a continuous one. By combining data of three consecutive years we obtain more accurate estimates. Data from three years are calculated to the middle year which is used as the reference year for interpretation of results. We no longer use the balance approach but the concept of expenditure classified by the COICOP-HBS (Classification of Individual Consumption by Purpose). Comparison of results with previous years is only possible at the level of current income and consumption expenditure, since certain questions are no longer part of the survey (e.g. on decrease of savings, paying back consumer credits and investment loans, etc.). Therefore, there is no balance between available assets and allocated assets.*

*This is a sample survey. The sample stratification was made with regard to 12 statistical regions and six types of settlements. In bigger settlements (with over 10,000 inhabitants) we used simple random sampling and in smaller settlements sampling of clusters with four persons which define the household. First, enumeration areas were selected (taking into account their size) for the whole year and then for each quarter four persons in each enumeration area were selected. In bigger settlements only persons were selected with simple random sampling for each quarter. The sample was equally distributed throughout the year. We do not use the method of substitution, i.e. selecting of substitute households which would replace the ones that did not co-operate; instead we enlarge the sample according to the response rate from previous years.*

*Data on available and allocated assets of households were given by the household members directly to the interviewers authorised by the Statistical Office of the Republic of Slovenia. We used the method of personal interviewing on the basis of the questionnaire and diaries, which household members filled in with daily expenditure and bought quantities. Households are equally distributed throughout the year and each household co-operates in the survey for 14 days.*

#### Zajetje

V anketni vzorec za obdobje treh let (2000-2002) je bilo izbranih 4 986 gospodinjstev, odgovarjalo pa je 3 816 gospodinjstev izmed izbranih. Podatki iz obdobja treh let so preračunani na leto 2001 kot referenčno leto. Ocenili smo, da je povprečno gospodinjstvo v Sloveniji v tem obdobju štelo 2,9 člana.

V anketi ne upoštevamo skupinskih gospodinjstev, kot so internati, domovi za varstvo in nego otrok in starejših občanov, bolnišnice, dijaški in študentski domovi ipd.

#### *Coverage*

*The 2000-2002 period survey sample covered 4,986 households, of those 3,816 households responded. Data from these three years are calculated to the middle year (2001) which is used as the reference year. In 2001 the estimated average number of household members was 2,9.*

*The survey does not cover collective households such as boarding schools, nursing homes for children, old people's homes, hospitals, homes for pupils, student hostels, etc.*

## ANKETA O PORABI ČASA

## *TIME USE SURVEY*

### METODOLOŠKA POJASNILA

### METHODOLOGICAL EXPLANATIONS

#### Viri in metode zbiranja podatkov

Anketo o porabi časa smo izvajali nepretrgano od 1. aprila 2000 do 31. marca 2001. Anketa o porabi časa v Sloveniji je usklajena s priporočili Eurostata; izvajala naj bi se na 7–10 let.

Podatki so bili zbrani z vprašalniki za gospodinjstvo in vprašalniki za osebo ter z dnevniki porabe časa, kamor so osebe beležile svoje aktivnosti. Dnevnik porabe časa pokriva 24 ur in je razdeljen na 10-minutne intervale. Vsaka oseba, stara 10 let ali več, je izpolnjevala časovni dnevnik dva naključno vnaprej določena dneva: en delovni dan (od ponedeljka do petka) in en dan ob koncu tedna (sobota ali nedelja). Če je bila katera od anketiranih oseb iz gospodinjstva odsotna, se je izpolnjevanje dnevnikov preložilo za sedem oz. štirinajst dni, vsekakor pa je prvotno določeni dan v tednu ostal isti (če je bil na primer prvotno določen ponedeljek, se je dnevnik tudi ob morebitni preložitvi datuma izpolnjeval na ponedeljek. Vsi člani gospodinjstva so dnevnike vodili na isti datum.

#### Sources and methods of data collection

*The Survey on Time Use was carried out continuously from 1 April 2000 to 31 March 2001. The survey for Slovenia is harmonised with Eurostat's recommendations and is to be carried out every 7-10 years.*

*The data were collected with household questionnaires, personal questionnaires and the time use diaries where the respondents recorded their activities. Time use diaries cover 24-hours periods and are divided into 10-minutes intervals. Every person, aged 10 or more, filled in the two diaries for two days defined in advance: one weekday (from Monday to Friday) and the other weekend day (Saturday or Sunday). If the person was not present, we postponed the filling of the diaries for seven or fourteen days. In any case the day remained the same. For example, if the originally designated day was Monday, in the case of postponement the diary was also filled on Monday. All household members filled in the diaries on the same date.*

#### Zajetje

V vzorec ankete je bilo vključenih 4 500 gospodinjstev v Sloveniji, v vsakem četrtletju od 1 122 do 1 128 gospodinjstev. Vzorec je bil enakomerno porazdeljen skozi celotno obdobje anketiranja, od 1. aprila 2000 do 31. marca 2001. Poleg gospodinjstev so bili naključno izbrani tudi dnevi, ko naj bi anketiranci vodili časovne dnevnike.

Vzorčni okvir za anketo je bil Centralni register prebivalstva – register oseb, zato smo izbirali gospodinjstva z različno verjetnostjo glede na njihovo velikost in to upoštevali pri uteževanju.

Vzorčni načrt je bil dvostopenjski, stratificiran. Stratifikacija je potekala glede na velikost naselja in delež kmečkega prebivalstva v njem. Enote prve stopnje so bile vzorčne enote (skupine popisnih okolišev), enote druge stopnje pa gospodinjstva. Skupaj smo izbrali 750

#### *Coverage*

*The sample included 4,500 households in Slovenia, each quarter 1,122 to 1,128 households. The sample was evenly distributed throughout the survey period, form 1 April 2000 until 31 March 2001. In addition to households, the diary days were also randomly selected.*

*The sampling frame for the survey was the Central Register of Population. Thus households were selected with different probability according to their size, which we had to consider in the weighting procedure.*

*The sample design was stratified two-stage. The sample was stratified according to size of the settlement and percentage of rural population in the settlement. Primary sampling units were clusters of enumeration areas and secondary sampling units were persons. Altogether*

vzorčnih enot prve stopnje, v vsaki vzorčni enoti smo izbrali 6 gospodinjstev.

Podatke smo utežili zaradi neenake verjetnosti izbora gospodinjstev in manjkajočih odgovorov ter jih prilagodili znanim populacijskim vrednostim s pomočjo kalibracije. Ta je potekala glede na statistično regijo, starostne skupine, velikost gospodinjstva in spol anketirancev.

Delež odgovorov je obsegal 54,3 % (ob upoštevanju le tistih gospodinjstev, katerih člani so vodili vsaj en dnevnik), delež zavračanja pa 22,6 %.

Enota opazovanja so bili posamezniki, ki pretežno živijo v izbranem gospodinjstvu. Gospodinjstvo je vsaka družinska ali druga skupnost oseb, ki skupaj stanujejo in skupaj porabljajo svoje prejemke za zadovoljevanje osnovnih življenjskih potreb (stanovanje, hrana in drugo), ali samske osebe, ki živijo same ter porabljajo sredstva in se hranijo samostojno. V anketi niso bili upoštevani posamezniki, ki so bili v času anketiranja odsotni za več kot 3 mesece, npr. zaporniki, osebe v bolnišnici, delavci na začasnem delu v tujini ipd. V anketi so bili kot člani gospodinjstva upoštevani tudi vojaki, vendar pa niso odgovarjali na anketni vprašalnik. Kot člane gospodinjstva smo upoštevali tudi vse osebe, ki so bile v času anketiranja odsotne (do tri mesece), vendar na anketo niso odgovarjale, če so bile odsotne dalj kot 14 dni. Pri anketi smo kot člane gospodinjstva upoštevali tudi otroke, stare manj kot 10 let, vendar ti niso odgovarjali na anketo in izpolnjevali dnevnikov.

*750 primary sampling units were selected, and within them six persons per unit were selected.*

*The data were weighted for unequal probability of selection adjusted for unit non-response and calibrated to the known population values according to region, age, household size and sex of respondent.*

*The response rate was 54.3% and the refusal rate was 22.6%. In the calculation of the response rate only households with at least one diary were considered.*

*Observation units were all individuals usually living in the selected households. A household is a single person or a group of persons who live together and share expenses related to common living and eating. Temporarily absent persons, who were not present at the time of survey for more than 3 months, were excluded from the survey, i.e. persons in prisons, persons in hospitals, workers temporarily working in other countries, etc. Persons in armed forces were counted as household members, but they did not answer the survey questionnaire. All persons who were absent (up to 3 months) at the time of the survey were counted as household members, but they did not answer the questionnaire if absent for more than 14 days from designated date. Children under 10 years of age were also counted as household members, but they did not answer the questions or fill in the diaries.*

## Definicije in pojasnila

**Povprečna poraba časa** (za posamezno aktivnost) **pri vseh osebah** je izračunana na podlagi vseh časovnih dnevnikov. **Povprečna poraba časa pri udeleženih** je povprečen čas, porabljen na dan za posamezno aktivnost, izračunan na podlagi tistih dnevnikov, v katerih se je ta aktivnost pojavila. V tabelah je naveden tudi delež dnevnikov, v katerih se je določena aktivnost pojavila. **Delež dnevnikov** ni enak deležu oseb, ker je vsaka oseba vodila dnevnik dva dni in se je lahko posamezna aktivnost pojavila samo v enem ali v obeh dnevnikih.

**Glavna aktivnost** je aktivnost, ki jo je oseba navedla v časovni dnevnik kot glavno, ki jo je opravljala v določenem času.

**Vzporedna aktivnost** je aktivnost, ki jo je oseba opravljala sočasno poleg glavne aktivnosti.

**Vse aktivnosti** so glavne in vzporedne aktivnosti skupaj.

**Skrb za gospodinjstvo in pomoč drugim gospodinjstvom** vključuje aktivnosti, ki so povezane s pripravo hrane, z vzdrževanjem gospodinjstva, izdelavo oblačil in s skrbjo zanja, vrtnarjenje, gradnjo in popravila, nakupovanje in storitve ter vodenje gospodinjstva in pomoč drugim gospodinjstvom.

**Skrb za družino** vključuje aktivnosti, ki so povezane s skrbjo za otroke, in pomoč odraslemu družinskemu članu.

**K poti oz. potovanju** prištevamo vso pot oz. vse potovanje, izvzeta je le pot, katere osnovni namen je šport (sprehodi, kolesarjenje ipd.).

**Prosti čas** je v raziskovanju porabe časa tisti čas, ki nam še ostane, potem ko od 24 ur odštejemo čas za spanje, prehranjevanje, zaposlitev, gospodinjska opravila ter skrb za otroke in čas za šolanje.

V anketi udeležene osebe so z vidika **delovne aktivnosti** (zaposleni, študenti, upokojene osebe ipd.) opredeljene na podlagi njihove delovne aktivnosti v tednu pred anketiranjem (od ponedeljka do nedelje).

## DOHODEK IN REVŠČINA

### METODOLOŠKA POJASNILA

#### Viri in metode zbiranja podatkov

Za izračun kazalnikov uporabljamo podatke Ankete o porabi v gospodinjstvih. Dovolj velik vzorec za analizo revščine dobimo z združevanjem anketnih podatkov treh zaporednih let in njihovim preračunom na srednje leto.

#### Definicije in pojasnila

**Seznam kazalnikov socialne povezanosti,** sprejet decembra 2001 na Evropskem svetu v Laekenu, obsega 18 kazalnikov. Ti zajemajo več področij: dohodek in revščino, trg dela, izobrazbo. V tem poglavju je zajeto področje dohodka in revščine. Podatkov o s*topnji dolgotrajnega tveganja revščine glede na spol (60 % in 50 % mediane)* ne objavljamo, ker jih za Slovenijo ni možno izračunati. APG ni panelna anketa, zato omogoča samo presečne izračune, longitudinalnih pa ne. Prav tako ne objavljamo *samoocene zdravja glede na dohodek*, ker definicija tega kazalnika še ni dokončna.

Kazalniki so izračunani za dve definiciji dohodka. Po prvi gre za denarni dohodek po definiciji Evropskega panela gospodinjstev (ECHP). V drugem primeru je denarnemu dohodku prištet še dohodek v naravi, to je lastna proizvodnja in druge nedenarne oblike dohodka.

Uporabljen je bil koncept objektivne, relativne revščine. Objektivne zato, ker vsebuje podatke o dejanskih dohodkih gospodinjstva, ki so merilo za uvrstitev članov gospodinjstva med revne, relativne pa zato, ker je prag tveganja revščine določen na podlagi distribucije dohodka in se z njo tudi spreminja.

**Prag tveganja revščine** je opredeljen s 60 % mediane ekvivalentnega neto dohodka vseh gospodinjstev ob upoštevanju OECD-jeve prilagojene ekvivalenčne lestvice. V evre je bil preračunan po tečaju Eurostata; ta se nekoliko razlikuje od tečaja Banke Slovenije.

Da bi lahko primerjali življenjsko raven gospodinjstev med seboj, moramo upoštevati njihovo velikost in sestavo. Vsi člani gospodinjstva nimajo enakih potreb, zato uporabljamo **ekvivalenčne lestvice**, ki upoštevajo ekonomije obsega v gospodinjstvih. Uporabili smo OECD-jevo prilagojeno ekvivalenčno lestvico in izračunali dohodek na ekvivalentnega člana. Lestvica daje prvemu odraslemu članu utež 1, drugim članom, starim 14 let ali več, utež 0,5, otrokom, mlajšim od 14 let, pa utež 0,3.

**Stopnja tveganja revščine** je izražena kot odstotek oseb, ki živijo v gospodinjstvih z neto ekvivalentnim dohodkom pod pragom tveganja revščine.

**Stopnja tveganja revščine glede na najpogostejši status aktivnosti in spol** je izračunana glede na trenutni status aktivnosti.

**Stopnja tveganja revščine pred socialnimi transferji** je izračunana glede na isti prag tveganja revščine kot stopnja tveganja revščine, le da od dohodka odštejemo socialne transferje. Izračunana je na dva načina, odvisno od tega, ali pokojnine štejemo med socialne transferje ali ne. Tako od celotnega dohodka enkrat odštejemo samo »druge socialne transferje«, drugič pa »socialne transferje vključno s pokojninami«.

**Neenakost porazdelitve dohodka** prikazujemo z razmerjem kvintilnih razredov (80/20) in z Ginijevim količnikom. **Razmerje kvintilnih razredov** (80/20) je razmerje med povprečnim ekvivalentnim dohodkom gospodinjstev v zgornjem in spodnjem kvintilnem razredu. **Ginijev količnik** je mera koncentracije dohodka. Njegova vrednost je med 0 in 1. Kolikor višji je, toliko večja je dohodkovna neenakost.

**Relativna vrzel tveganja revščine** je razlika med pragom tveganja revščine in mediano ekvivalentnega dohodka oseb pod pragom tveganja revščine, izražena kot odstotek od praga tveganja revščine.

**Stopnja tveganja revščine v določeni časovni točki** je izračunana glede na prag tveganja revščine iz leta 1996, ki je bil z indeksom cen življenjskih potrebščin preračunan na leto 2000.

## *INCOME AND POVERTY*

### *METHODOLOGICAL EXPLANATIONS*

#### *Sources and methods of data collection*

*For the calculation of indicators the Household Budget Survey data are used. A sample large enough for poverty analysis is obtained by combining the survey data of three consecutive years and their calculation to the middle year.*

#### *Definitions and explanations*

***The Laeken list of social cohesion indicators** was adopted at the Laeken European Council in December 2001. It contains 18 indicators covering different areas: income and poverty, labour market, education. In this issue, the area of income and poverty is included. We are not publishing indicator At persistent risk of poverty rate by gender (60% and 50% median) because it is not possible to calculate it for Slovenia. Household Budget Surevey is not a panel survey, therefore it only enables cross-sectional calculations while longitudinal are not possible. We are also not publishing the indicator Self defined health status by income level because the definition of the indicator is not clear yet.*

*Indicators were calculated for two definitions of income. The first involves income in cash according to the definition of the European Community Household Panel (ECHP). In the second case income in cash is supplemented by income in kind; this is one's own production and other non-monetary forms of income.*

*The concept of objective, relative poverty was used. Objective because data on actual income are used, which is the measure of classifying household members as poor; and relative because the at risk of poverty threshold is determined on the basis of distribution of income and varies with it.*

***At risk of poverty threshold** is defined as 60% of median equivalised net income of all households using the OECD modified equivalence scale. It was calculated into euros by Eurostat exchange rate, which differs slightly from an exchange rate of the Bank of Slovenia.*

*In order to be able to compare the level of living for different households we have to take into account their size and structure. For this reason we use **equivalence scales,** which take into consideration the economy of scale. We have used the OECD modified scale and calculated the income per adult equivalent member. The scale gives to the first adult in the household weight 1, to every other person 14 or more years old weight 0.5 and to children under 14 weight 0.3.*

***At risk of poverty rate** is the percentage of persons living in households where the equivalised total net household income is below the threshold.*

*For the indicator **at risk of poverty rate with breakdown by most frequent activity status and gender** the current activity status was used.*

***At risk of poverty rate before social transfers** is based on the same at risk of poverty threshold as the at risk of poverty rate, only social transfers are subtracted from total income. It is calculated using two definitions of income, depending on whether pensions are considered as social transfers or not: only »other social transfers« or »social transfers including pensions« are subtracted from total income.*

***Inequality of income distribution** is measured by S80/S20 quintile share ratio and Gini coefficient. S80/S20 **quintile share ratio** is the ratio between the average equivalised household income of the top 20% of the income distribution to the bottom 20%. **Gini coefficient** is the measure of income concentration. Its value is between 0 and 1. The higher it is, the greater is the income inequality.*

***Relative at risk of poverty gap** is the difference between the at risk of poverty threshold and median equivalised income of persons below the at risk of poverty threshold, expressed as a percentage of the at risk of poverty threshold.*

***At risk of poverty rate anchored at a moment in time** is based on 1996 at risk of poverty threshold, calculated to 2000 using the consumer price index.*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Podatke o **drobnoprodajnih cenah reprezentativnih izdelkov in storitev** zberejo vsak mesec v natančno določenem obdobju opazovalci cen, in sicer neposredno na okoli 900 izbranih prodajnih mestih (kot so trgovine, tržnice, obrtne delavnice, storitvene in druge organizacije) v Kopru, Ljubljani, Mariboru in Novem mestu. Nekatere cene pa zbira urad tudi po telefonu in prek interneta.

**Proizvajalčeve cene določenih industrijskih proizvodov** zbiramo mesečno z vprašalniki pri izbranih industrijskih in drugih podjetjih.

### Zajetje

**Lista izdelkov in storitev,** katerih cene so osnova za izračun indeksa cen življenjskih potrebščin, harmoniziranega indeksa cen življenjskih potrebščin in indeksa cen na drobno, je v letu 2002 vsebovala 607 predmetov (reprezentantov). Ti so glede na svoje lastnosti in opise razvrščeni v več skupin: na kmetijske pridelke, industrijske živilske in neživilske izdelke, gostinske storitve ter ostale storitve. Za opazovanje so bili izbrani tisti izdelki oz. storitve, katerih deleži v skupni potrošnji so največji in katerih cene lahko najbolje odražajo gibanje cen sorodnih artiklov oz. splošno gibanje cen. Mesečno se tako zbere skupno okrog 11 000 drobnoprodajnih cen.

**Proizvajalčeve cene industrijskih proizvodov** spremljamo za približno 1 600 industrijskih proizvodov v okoli 300 izbranih podjetjih. Te cene so osnova za izračun indeksa cen industrijskih proizvodov pri proizvajalcih.

### Definicije in pojasnila

**Drobnoprodajna cena** je končna prodajna cena, ki jo plačajo potrošniki za nakup izdelkov ali storitev široke porabe. Vsebuje torej tudi predpisan davek in preostale dajatve.

**Indeksi cen** so izračunani po (modificirani) Laspeyresovi formuli na osnovi povprečnih nacionalnih cen izbranih izdelkov in storitev ter njihovih uteži (ponderjev).

**Uteži** predstavljajo relativne deleže izdelkov in storitev v skupni vrednosti vseh opazovanih izdelkov in storitev in tako določajo relativno pomembnost (težo) spremembe cene posameznega izmed njih glede na skupno spremembo cen. Uteži spreminjamo po novem vsako leto, le pri indeksu cen na drobno je ta presledek za zdaj daljši.

**Indeks cen življenjskih potrebščin** meri spremembe drobnoprodajnih cen izdelkov in storitev glede na sestavo izdatkov, ki jih domače prebivalstvo namenja za nakupe predmetov končne porabe doma in v tujini (nacionalni princip potrošnje). **Ponderiranje (uteževanje)** temelji od leta 2002 na podatkih o sestavi in vrsti izdatkov za življenjske potrebščine iz anket o porabi v gospodinjstvih za leta 1998, 1999 in 2000. Nove uteži so preračunane na cene iz decembra 2001. December 2001 je tudi referenčno cenovno obdobje.

**Harmonizirani indeks cen življenjskih potrebščin** meri spremembe v ravni drobnoprodajnih cen izdelkov in storitev glede na sestavo izdatkov, ki jih potrošniki (domači in tuji) namenjajo za nakupe predmetov končne porabe na ozemlju Slovenije (domače načelo porabe). Uteži v letu 2002 temeljijo na podatkih o sestavi izdatkov za leto 2000, katerih osnova so podatki iz nacionalnih računov. Nove uteži so preračunane na cene iz decembra 2001; to je tudi referenčno cenovno obdobje. Harmonizirani indeks cen življenjskih potrebščin je primerljiv indeks cen življenjskih potrebščin, ki ga računajo države članice Evropske unije in se uporablja za primerjanje inflacijskih stopenj med temi državami. Računamo ga od leta 2001.

Razlika med indeksom cen življenjskih potrebščin in harmoniziranim indeksom cen življenjskih potrebščin je torej za zdaj le v ponderacijski shemi.

Za potrebe računanja in objavljanja indeksov cen življenjskih potrebščin in harmoniziranih indeksov cen življenjskih potrebščin so izdelki in storitve razvrščeni po **klasifikaciji individualne porabe sredstev (COICOP/HICP)** v:

01 oddelke (npr. Hrana in brezalkoholne pijače)

011 skupine (npr. Hrana)

0111 razrede (npr. Kruh in izdelki iz žit).

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Data on **retail prices for representative goods and services** are collected each month in exactly defined period of time by price collectors in about 900 selected outlets (e.g. shops, marketplaces, at craftsmen and other organisations) in Koper, Ljubljana, Maribor and Novo mesto. Some of the prices are also collected centrally and through the Internet.*

***Producer prices of certain manufactured goods** are collected monthly via questionnaires at selected industrial and other enterprises.*

### *Coverage*

***The list of goods and services**, the prices of which are used for calculating the consumer price index, the harmonised index of consumer prices and the retail price index, is in 2002 composed of 607 representative items. Items are according to their characteristics and descriptions divided into several groups, e.g. agricultural products, manufactured foodstuff, manufactured non-foodstuff, catering services and other services. Selected are items with the highest shares in total consumption and whose prices best reflect the changes of prices of similar articles and the general change of prices. On average 11,000 prices are collected per month.*

***Producer prices of manufactured goods** are monitored for about 1,600 industrial products in about 300 selected enterprises. These prices are the basis for calculating the producer price index of manufactured goods.*

### *Definitions and explanations*

***Retail price** is the final selling price which customers pay to purchase a product or a service. It includes the prescribed tax as well as all other duties.*

***The price indices** are calculated by using the (modified) Laspeyres formula on the basis of average national prices of selected goods and services and their weights.*

***Weights** represent relative shares of goods and services in the common value of all monitored goods and services. In this way they determine the relative importance or impact of the change in price of any product or service on the total change. By rule, weights are now changed every year, except in case of the retail price index, where this period is longer.*

***Consumer prices index** measures changes in the level of retail prices of goods and services from the point of view of the expenditure structure, which the resident population intends for final consumption at home and abroad (national concept). Since 2002 **weighting** has been based on data on the structure of expenditure for consumer goods from the 1998, 1999 and 2000 Family Budget Surveys. New weights are recalculated to December 2001 prices, which is also the price base period.*

***Harmonised index of consumer prices** measures changes in the level of retail prices of goods and services from the point of view of the expenditure structure, which consumers (domestic and foreign) intend for final consumption in the territory of Slovenia (domestic concept). Since 2002 weighting has been based on the data on the structure of expenditure for 2000 from national accounts. New weights are recalculated to December 2001 prices, which is also the price base period. Harmonised index of consumer prices is a comparable index of consumer prices produced by Member States and it is used for measuring inflation on comparable basis. Slovenia has been calculating it since 2001.*

*The difference between the consumer price index and the harmonised index of consumer prices is in the weighting scheme.*

*For the purpose of calculating and publishing consumer price indices and harmonised indices of consumer prices, items are classified by the Classification of Individual Consumption by Purpose (COICOP/HICP) into:*

*01 divisions (e.g. Food and non-alcoholic beverages)*

*011 groups (e.g. Food)*

*0111classes (e.g. Bread and cereals).*

Indeksi so praviloma objavljeni do ravni razreda, razen kadar je njihova utež manjša od 0,1 % ali je razred zastopan le z enim proizvodom. Nova klasifikacija se uporablja od leta 1997, od leta 2000 pa se v skladu s to novo klasifikacijo računajo še indeksi za posebne skupine, kot so blago, blago dnevne rabe, poltrajno blago, trajno blago, storitve, goriva in maziva, sezonski proizvodi.

*As a rule, indices are published at the level of class, except in cases when the weight of the class is below 0.1% or in cases when the class is represented by one item only. The new classification has been used since 1997, while since January 2000 we have been calculating in accordance with this new classification also indices for special groups such as goods, non-durable goods, semi-durable goods, durable goods, services, fuels and energy, seasonal products.*

**Blago dnevne rabe** so proizvodi, katerih rok trajanja je zelo kratek, običajno do eno leto (npr. hrana, pijače).

***Non-durable goods*** *are products with very short durability, usually up to one year (e.g. food).*

**Poltrajno blago** so proizvodi, katerih predvidena življenjska doba je okoli eno leto in katerih vrednost ni prav velika (npr. obleka in obutev).

***Semi-durable goods*** *are products with durability of about one year. They must not be very valuable (e.g. clothing and footwear).*

**Trajno blago** so proizvodi z daljšo življenjsko dobo, obenem pa je tudi njihova vrednost precej velika (npr. pohištvo, prometna sredstva).

***Durable goods*** *are products with long durability. At the same time they can be quite valuable (e.g. furniture, means of transport).*

**Sezonski proizvodi** so proizvodi, katerih obseg ponudbe na trgu in s tem tudi njihova cena sta zelo odvisna od letnega časa oz. drugih dejavnikov. V našem primeru so med sezonske proizvode uvrščeni sadje, zelenjava in ribe.

***Seasonal goods*** *are products whose market supply and price depend very much on the season and other factors. In our case seasonal products are fruit, vegetables and fishes.*

**Goriva in energija** je ena od posebnih skupin, ki jo sestavljajo proizvodi za ogrevanje in razsvetljavo stanovanj (045 Goriva in energija) ter pogonska goriva (0722 Goriva in maziva).

*Fuels and energy is one of the special groups, which is composite from items for heating and lightning (045 Electricity, gas and other fuels) and fuels (0711 Fuels and lubricants).*

**Indeks cen na drobno** je indeks, ki kaže spremembe drobnoprodajnih cen izdelkov in storitev z vidika strukture prodaje le-teh na domačem trgu ne glede na namen njihove nadaljnje uporabe in ne glede na vrsto potrošnika. **Oteževanje (ponderiranje)** temelji na podatkih o sestavi vrednosti prodaje pridelkov, izdelkov in storitev v prodaji na drobno. Nazadnje je bilo spremenjeno v letu 1997 na podlagi podatkov iz leta 1994. Uteži se v vmesnem obdobju letno popravljajo z rastjo cen; obenem pa se takrat upoštevajo tudi manjše spremembe v listi izdelkov in storitev.

***Retail price index*** *is the index which indicates the changes of retail prices of goods and services from the point of view of the sales structure of these on the domestic market, irrespective of both the purpose of their further use and the type of consumer.* ***Weighting*** *is based on data on the value structure of sale of products and services in retail sale. Its last revision was made in 1997 on the basis of 1994 data. Weights are annually corrected with price growth and at the same time minor changes in the list of goods and services are made.*

Najpomembnejša razlika med indeksom cen na drobno in indeksom cen življenjskih potrebščin je ponderacijska shema. Manjše razlike med njima so pri zajemu izdelkov in storitev. Tako npr. v izračun indeksa cen življenjskih potrebščin niso zajeti izdelki, ki niso namenjeni za končno porabo (npr. določeni predstavniki, ki so namenjeni za reprodukcijske namene), v indeksu cen na drobno pa so ti izdelki upoštevani. Hkrati pa so v izračun indeksa življenjskih potrebščin upoštevane nekatere storitve, ki niso vključene v izračun indeksa cen na drobno (npr. hrana in pijača v gostinstvu).

*The most important difference between the retail price index and the consumer price index is the weighting scheme. There are some minor differences in view of coverage of goods and services as well. For instance, the consumer price index does not cover the goods which are not intended for final consumption (e.g. certain representatives for breeding purposes in agriculture), but these are included in the monitoring of retail prices. On the other hand, some services that are not covered in the monitoring of the retail price index (e.g. food and drinks in catering) are also included.*

Kot glavni kazalec splošne ravni cen oz. inflacije se je do konca leta 1997 uporabljal indeks cen na drobno, od leta 1998 pa to nalogo opravlja indeks cen življenjskih potrebščin.

*Until the end of 1997 as the main indicator of price movements or the inflation measure the retail price index was used, while since 1998 this role has been taken over by the consumer price index.*

**Indeks cen industrijskih proizvodov pri proizvajalcih** je indeks, ki meri spremembe cen industrijskih proizvodov, ki jih proizvajalci v Sloveniji prodajo na domačem trgu. **Cena industrijskega proizvoda pri proizvajalcu** je tista, po kateri podjetje proda na domačem trgu (franko tovarna) največje količine svojega proizvoda V njej niso upoštevani davek na dodano vrednost, rabati in trgovski popusti. **Ponderacijska shema** temelji na podatkih o sestavi vrednosti prodaje industrijskih proizvodov na domačem trgu iz leta 1999. Osnovni vir podatkov za uteži (ponderje) je letno poročilo industrije - IND-L. Uteži za ravni oddelkov so bile oblikovane s korekcijo podatkov o vrednosti prodaje, dobljenih na podlagi IND- L, in sicer tako, da so bili ti podatki povečani za ocenjeno vrednost prodaje nezajetih enot in zmanjšani za izvoz. Uteži pri indeksu cen industrijskih proizvodov spreminjamo po novem vsako leto.

***Producer price index of manufactured goods*** *is the index which measures changes in prices of manufactured goods which are produced and sold in Slovenia.* ***Producer prices of manufactured goods*** *are prices at which factories sell their products in largest quantities on the domestic market - ex works. Prices do not include VAT (value added tax), rebates and discounts.* ***Weighting*** *is based on data of the 1999 structure of sales value of manufactured goods on the domestic market. The basic source of data is IND-L annual industry report. In designing the weights at the class level, IND-L sales value data are corrected by being enlarged by the estimated sales value of uncovered units and reduced by exports. Weights for the producer price index are now changed every year.*

1) Do leta 1998 se je kot merilo inflacije uporabljal indeks cen na drobno, od leta 1998 dalje pa ima to funkcijo indeks cen življenjskih potrebščin.
*Until 1998 the retail price index was used as the measure of inflation, while since 1998 this function has been performed by the consumer price index.*

# 16. KMETIJSTVO IN RIBIŠTVO

# *AGRICULTURE AND FISHING*

## METODOLOŠKA POJASNILA

Metodologije statističnih raziskovanj smo postopoma prilagajali mednarodnim standardom in jih uskladili z njimi po priporočilih Statističnega urada Evropskih skupnosti. Temu ustrezno smo revidirali že objavljene podatke o celotni rastlinski pridelavi in živinoreji in tako so ti podatki za obdobje 1991–2002 primerljivi. Zato pa se omenjeni podatki, objavljeni v tej izdaji statističnega letopisa, večinoma ne ujemajo s podatki za ista leta v predhodni izdaji.

## *METHODOLOGICAL EXPLANATIONS*

*The methodology of statistical surveys was being gradually harmonised with international standards according to recommendations of the Statistical Office of the European Communities. We have revised the already published data on crop and livestock production for 1991-2002 so that they are comparable. In this issue of Statistical Yearbook these data are mostly different from data published in previous issues of Statistical Yearbook.*

#### Posebna pojasnila

Z naštetimi viri so bili zbrani vsi osnovni podatki. Nekateri podatki za posamezna leta pa so bili tudi revidirani.

Podatki o družinskih kmetijah za leto 1997 so bili zbrani z vzorčnim raziskovanjem in hkrati z oceno kmetijskih svetovalcev. Pri pomembnejših poljščinah in trajnih travnikih in pašnikih smo podatke o površinah in pridelkih zadnjih petih let, kjer so bile razlike zaradi različno dobljenih podatkov velike, ustrezno popravili. Popravljeni podatki so upoštevani tudi pri izračunu povprečja 1991-1995. Podatke o površini smo tako popravili za pšenico, krompir, koruzo za zrnje, silažno koruzo, trave in detelje na njivah, trajne travnike in pašnike. Pri letu 1997 smo upoštevali podatek vzorčnega popisa, podatke za pretekla leta pa smo popravili tako, da smo jih pomnožili z indeksi letnih sprememb, izračunanimi iz ocen cenilcev. Ustrezno smo popravili tudi podatke o površini skupin njivskih posevkov, o njivah in vrtovih, obdelovalnih in kmetijskih zemljiščih. Pri pšenici, krompirju, koruzi za zrnje, silažni koruzi, travah in deteljah na njivah, trajnih travnikih in pašnikih smo popravili tudi podatek o skupnem pridelku, in sicer tako, da smo popravljene podatke o površini za posamezna leta pomnožili s hektarskimi pridelki, ki so jih za ta leta ocenili kmetijski svetovalci.

V letu 1998 nismo izvedli posebnega raziskovanja za pridobitev podatkov o površinah (zaradi pomanjkanja finančnih sredstev); podatke za leto 1998 smo zato ocenili na podlagi podatkov, pridobljenih v letu 1997.

Podatki o rastlinski pridelavi za leto 1999 so bili zbrani tako kot za leto 1997.

V popis kmetijskih gospodarstev v letu 2000 so bile vključene vse družinske kmetije, ki so po svojih lastnostih ustrezale zahtevam

#### *Special explanations*

*With the mentioned sources all basic data were collected. Some data for individual years were also revised.*

*Data on family farms for 1997 were collected with the Sample Farm Structure Survey and at the same time with agricultural experts' estimates. In major crops and permanent grassland, where differences between the two methods used were considerable, we adequately corrected the data on areas and crops for the last five years. The corrected data are considered also in calculating the average for 1991-1995. Data on areas were thus corrected for wheat, potato, maize, silage maize, grasses and clover, and permanent grassland. For 1997 we took into account the Sample Farm Structure Survey data and for previous years we corrected the data by multiplying them with indices of annual change, which were calculated from experts' estimates. Data on area under arable crops were also adequately corrected as were data on arable land and kitchen gardens, utilised and agricultural land. In wheat, maize, silage maize, grasses and clover, permanent meadows and pastures we corrected also the data on total yield, which was done by multiplying corrected data on area for individual years by yield in hectares estimated by experts.*

*Since, due to lack of financial resources, in 1998 we did not carry out a special survey with which we could obtain the data on area, we estimated the data for 1998 on the basis of data collected in 1997.*

*Data on crop production in 1999 were collected as for 1997.*

*The 2000 Census of Agriculture covered all family farms which according to their characteristics meet the EU criteria of European size class*

Evropske unije (definiciji t. i. evropsko primerljive kmetije), v popis vrtnarstva pa so bili zajeti tržni pridelovalci zelenjadnic, zelišč, gojenih gob in jagod ter cvetja in okrasnih rastlin.

Podatki o senu s trajnih travnikov in pašnikov vsebujejo tudi podatke o površini skupnih pašnikov in pridelku sena na njih. Podatke o površinah skupnih pašnikov smo pridobili od Ministrstva za kmetijstvo, gozdarstvo in prehrano. Podatke za izračun skupnega pridelka na teh pašnikih smo pridobili s pomočjo ocene o povprečnih pridelkih na trajnih travnikih in pašnikih z enkratno rabo; to oceno so pripravili kmetijski svetovalci Kmetijsko gozdarske zbornice RS.

## Živinoreja

Viri prikazanih podatkov :

- redna statistična raziskovanja s področja kmetijstva
- popis kmetijstva (1969)
- popis prebivalstva, gospodinjstev in stanovanj (1981, 1991)
- vzorčno raziskovanje osnovnih zmogljivosti kmetij (1997)
- vzorčno raziskovanje posejanih površin in števila živine (1999, 2001, 2002)
- letno poročilo o številu živine in posejanih površinah (2002)
- popis kmetijskih gospodarstev (2000)

### Posebna pojasnila

Z letom 1997 smo začeli podatke o številu živine zbirati večkrat na leto: v letih 1997–1999 smo podatke o številu prašičev zbirali trikrat letno, o govedu dvakrat letno in o drobnici enkrat letno, in sicer ločeno po vrstah živine. V letu 1997 je bila pomembna metodološka novost tudi sprememba v datumu opazovanja števila živali na koncu leta: zaradi uskladitve s standardi EU namreč odtlej zbiramo te podatke po stanju na 1. 12., in ne več na 31. 12.

Od leta 2000 dalje pa smo podatke o številu prašičev in goveda zbirali dvakrat letno, podatke o številu drobnice in perutnine pa enkrat v okviru rednih statističnih raziskovanj o posejanih površinah in številu živine. Podatke o številu konj zbiramo samo ob raziskovanjih strukture kmetijskih gospodarstev (1997, 2000). Popisani so bili vsa kmetijska podjetja in zadruge, od družinskih kmetij pa so bile popisane samo tiste, ki so bile izbrane v vzorec. V letu 2002 smo podatek o številu živine na 1. december prvič pridobili s terenskim raziskovanjem, in ne s poštno anketo.

Celoten zakol goveda in prašičev je ocenjen, in sicer s pomočjo bilance števila, ker zanesljivih podatkov o zakolu na družinskih kmetijah ni. Pri oceni podatkov so sodelovali tudi strokovnjaki s Kmetijskega inštituta Slovenije in z Oddelka za zootehniko Biotehniške fakultete v Ljubljani.

Podatke o zakolu živine v klavnicah pridobimo z rednimi mesečnimi poročili iz vseh klavnic, registriranih v Sloveniji.

Podatke o zakolu živine na družinskih kmetijah izračunamo iz razlike med podatkom o vseh zaklanih živalih in podatkom o živalih, zaklanih v klavnicah. Podatke o sestavi živine glede na kategorije in o povprečni masi za posamezne kategorije ter o deležih klavnosti ocenimo na podlagi podatkov iz klavnic, prav tako podatke o deležih klavnosti uvožene klavne živine.

## Mineralna gnojila in sredstva za varstvo rastlin

Poročila o porabi mineralnih gnojil v kmetijskih podjetjih in zadrugah dobimo od podjetij in zadrug, in sicer enkrat na leto. Do leta 1991 so nam poročali tudi o prodaji mineralnih gnojil kmetom in tako zbrane podatke smo prikazali kot porabo mineralnih gnojil v kmetijskih podjetjih in zadrugah in na družinskih kmetijah. Od leta 1992 pa podatke o porabi mineralnih gnojil na družinskih kmetijah ocenimo iz podatkov o uvozu, izvozu in proizvodnji mineralnih gnojil, iz podatkov o zalogah in iz podatkov o mineralnih gnojilih, porabljenih v kmetijskih podjetjih in zadrugah v Sloveniji.

Podatke o prodaji sredstev za varstvo rastlin na debelo na domačem trgu smo prevzeli od Uprave Republike Slovenije za varstvo rastlin in semenarstvo. Izraženi so v količinah aktivnih snovi v sredstvih za varstvo rastlin. V objavljenih podatkih so upoštevane količine sredstev

### *Special explanations*

*In 1997 we started collecting data on the number of livestock several times a year. In the 1997-1999 period data on the number of pigs were collected three times a year, data on the number of cattle twice a year and data on the number of sheep and goats once a year. In 1997 there was an important methodological change in the reference date at the end of the year. Due to harmonisation with EU standards, the reference date is 1 December and not 31 December as in previous years.*

*Since 2000 data on the number of pigs and cattle have been collected twice a year, and data on the number of sheep and goats and poultry once a year in the framework of regular statistical surveys on areas sown and the number of livestock. Data on the number of horses are collected only at farm structure surveys (1997, 2000). All agricultural enterprises and co-operatives are covered, but only those family farms which are chosen in the sample. In 2002 we collected data on the number of animals as of 1 December by fieldwork and not by a postal survey.*

*Total slaughter of cattle and pigs is estimated from the number balance sheets due to unreliable data on slaughter on family farms. Estimates were prepared in co-operation with experts of the Agriculture Institute of Slovenia and the Zootechnical Department at the Biotechnical Faculty in Ljubljana.*

*Data on livestock slaughtered in slaughterhouses are collected by regular monthly reports from all slaughterhouses in Slovenia.*

*Slaughter on family farms is calculated from the difference of all slaughtered animals and animals slaughtered in slaughterhouses. The structure of the number by livestock categories, average weight for individual categories and conversion coefficients into carcass weight are estimated on the basis of data obtained from slaughterhouses. Imported livestock was converted using conversion coefficients into carcass weight taken from slaughterhouses.*

## *Mineral fertilizers and pesticides*

*We obtain reports on consumption of mineral fertilisers from agricultural enterprises and co-operatives once a year. Until 1991 they reported also on supplying and selling of mineral fertilisers to farmers and the data had been presented as consumption of mineral fertilisers in agricultural enterprises and co-operatives and on family farms. Since 1992 the data on consumption of mineral fertilisers on agricultural holdings have been estimated from data on import, export and production of mineral fertilisers, data on stocks and data on consumption of mineral fertilisers in agricultural enterprises and co-operatives in Slovenia.*

*Data on wholesale of pesticides in Slovenia were taken over from the Plant Protection and Seeds Administration. Data are expressed in quantities of active substances in pesticides. They cover quantities available to farmers as well as quantities available to users outside*

za varstvo rastlin, ki so bila na voljo kmetijskim pridelovalcem, in tudi vse tiste, ki so bile na razpolago porabnikom zunaj kmetijstva (vzdrževanje železniških in cestnih koridorjev, športnih in komunalnih površin, za zaščito živil v skladiščih, poraba za pridelavo pridelkov zunaj kmetijskih gospodarstev), in sicer vse razpoložljive količine (količine, ki so bile v prometu); ni pa nujno, da so bile te dejansko tudi porabljene.

## Ribištvo

Podatke o morskem ribištvu zberemo z mesečnimi poročili podjetij in zasebnih ribičev, ki jim je ribolov glavna ali dopolnilna dejavnost. Podatkov o športnem ribolovu v morju ne zbiramo. Podatke o sladkovodnem ribištvu pridobimo z letnimi poročili ribiških družin, ki delujejo v sestavi Ribiške zveze Slovenije, in sicer o dejavnostih športnega ribolova v kopenskih vodah. O vzreji sladkovodnih rib pa nam poročajo ribiške družine, gospodarske družbe, samostojni podjetniki in kmetje, ki se ukvarjajo z ribogojstvom kot glavno ali dopolnilno dejavnostjo in/ali s trženjem športnega ribolova.

## Definicije in pojasnila

Kmetijska podjetja so podjetja in zadruge, ki po podatkih registra podjetij opravljajo kmetijsko dejavnost.

**Družinske kmetije imenujemo tudi evropsko primerljive kmetije (EPK)**. Mednje sodijo kmetije, ki imajo:

a) najmanj 1 ha kmetijskih zemljišč v uporabi, ali

b) kmetije, ki imajo sicer manj kot 1 ha kmetijskih zemljišč v uporabi, vendar imajo poleg tega še najmanj

- 10 a kmetijskih zemljišč in 90 a gozda, ali
- najmanj 30 a vinogradov in/ali sadovnjakov in oljčnikov, ali
- 2 ali več GVŽ (glav velike živine), ali
- 15 do 30 a vinogradov in 1 do 2 GVŽ, ali
- več kot 50 panjev čebel ali
- pridelujejo zelenjadnice, zelišča, jagode in gojene gobe ter cvetje in okrasne rastline za prodajo.

Gospodinjstvo s **kmečkim gospodarstvom** po popisu 1991 je gospodinjstvo, ki uporablja:

a) najmanj 10 arov obdelovalnih zemljišč;

b) manj kot 10 arov obdelovalnih zemljišč, vendar ima poleg tega še najmanj:

- kravo in tele ali kravo in mlado govedo, ali
- kravo in dve odrasli drobnici, ali
- pet odraslih ovac, ali
- tri odrasle prašiče, ali
- štiri odrasle ovce in prašiče skupaj, ali
- 50 vratov odrasle perutnine, ali
- 20 čebeljih panjev.

**Kmetijska zemljišča v uporabi** so vsa zemljišča, ki jih kmetijska podjetja in družinske kmetije uporabljajo za kmetijsko pridelavo v določenem letu. To so njive in vrtovi, trajni nasadi in trajni travniki in pašniki.

**Trajni nasadi** so intenzivni in ekstenzivni sadovnjaki, oljčniki, vinogradi, trsnice in matičnjaki ter drevesnice.

**Intenzivni sadovnjak**: V popis intenzivnih sadovnjakov 1997 so bili vključeni vsi pridelovalci sadja, ki uporabljajo najmanj 10 arov intenzivnih sadovnjakov oz. oljčnikov in/ali najmanj 5 arov jagodičja (razen jagod). V letu 2002 so bili v popis vključeni tudi stari oljčni nasadi, na katerih je raslo vsaj 20 dreves. Pri izračunu pridelka je bila upoštevana bruto površina.

**Trajni travniki in pašniki** so trajni travniki in pašniki z enkratno, dvakratno in večkratno rabo ter skupni pašniki in travniki.

**Pridelovalna površina** je površina, uporabljena v opazovanem letu (enkrat ali večkrat) za določeno vrsto kulture.

Med **sadna drevesa in oljke** štejemo vsa drevesa, rodna in nerodna (mlada), bodisi da rastejo v strnjenem nasadu ali posamezno zunaj sadovnjakov oz. oljčnikov.

## *Fishing*

*Data on marine fishing are collected with monthly reports from enterprises and fishermen whose main or supplementary activity is fishing. We do not collect data on marine sport fishing. Data on freshwater fishing are taken from annual reports of angling clubs operating within the Fishing Association of Slovenia. They report on activity of sport fishing in fresh waters. Reports on breeding of freshwater fish come from angling clubs, companies, individual private entrepreneurs and farmers engaged in fish farming as the principal or supplementary activity and/or marketing of sport fishing.*

## *Definitions and explanations*

***Utilised agricultural area** is land which agricultural enterprises and family farms use for crop production in a year. This is arable land, permanent crops and permanent grassland.*

***Permanent crops** are orchard plantations, extensive orchards, olive groves, vineyards and nurseries.*

***Orchard plantations**: The 1997 Census of Orchard Plantations covered all fruit producers using at least 0.1 hectare of orchard plantations or olive groves and/or at least 0.05 hectare of berries (except strawberries). In 2002 the census covered also plantations of old olive trees with 20 trees or more. Calculation of produce took into account the gross area.*

***Permanent grassland** are meadows and pastures to be used once, twice or several times, and common meadows and pastures.*

***Production area** is area used once or several times for producing certain plants in the observed period.*

***Fruit trees** are all trees, fertile and non-fertile (young), irrespective of whether growing in orchards or individually outside them.*

***Meat production from slaughtered animals** is meat of all animals slaughtered in Slovenia - indigenous and imported (meat production from slaughtered animals = meat from slaughter in slaughterhouses + slaughter on family farms).*

**Domača prireja mesa** je meso živali, vzrejenih na območju Slovenije (domača prireja mesa = vse pridobljeno meso - v meso preračunana masa živih uvoženih živali + v meso preračunana masa živih izvoženih živali).

***Gross indigenous production** is meat from animals reared in Slovenia (gross indigenous production = meat production from slaughtered animals - meat equivalent of all animals imported alive + meat equivalent of all animals exported alive).*

**Prirast v živi masi** je izračunan iz žive mase zaklanih živali, razlike v masi izvoženih in uvoženih živali in razlike v masi živali na začetku in koncu leta (prirast v živi masi = domača prireja mesa, izražena v živi masi + razlika v zalogah, izražena v živi masi).

***Total indigenous production** is calculated from the live weight of slaughtered animals, the difference between the weight of exported and imported live animals and the difference in weight of animals at the beginning and the end of the year (total indigenous production = gross indigenous production expressed in live weight + change in stocks expressed in live weight).*

## Socioekonomski tipi družinskih kmetij

## *Socio-economic types of family farms*

Podatki **o socioekonomskih tipih družinskih kmetij** so izpeljani iz odgovorov o aktivnostih posameznih članov gospodinjstva in dejavnosti, ki jo opravljajo. Podatke o članih gospodinjstva smo zbrali z Vzorčnim popisom osnovnih zmogljivosti družinskih kmetij 1997.

*Data on **socio-economic types of family farms** are derived from answers on activity of individual household members and activities they perform. Data on household members were collected with the 1997 Sample Farm Structure Survey.*

**Čista kmetija** je kmetija, katere vsi aktivni člani gospodinjstva (stari od 15 do 64 let) delajo na kmetiji: gospodar ali gospodinja, naslednik in njihovi otroci (nihče od njih torej ni zaposlen zunaj kmetije). Polnovredna delovna moč (PDM) za gospodinjstvo pa obsega najmanj 1,2.

***Full-time farms** are farms on which all active household members (aged 15 to 64) work on the farm and are not employed outside the farm, i.e. the farmer, his wife, the heir and their children. The annual work unit (AWU) value must be at least 1.2.*

**Mešana kmetija** je kmetija, katere člani gospodinjstva so aktivni na družinski kmetiji in zunaj nje, ali pa kmetija, na kateri delajo samo člani gospodinjstva, ki so sicer zaposleni drugje, ter upokojenci in vzdrževani člani gospodinjstva in ki obsega najmanj 1,2 PDM.

***Part-time farms** are farms on which members are active on the family farm or outside it, or the farm on which only household members employed elsewhere, retired persons and dependants work. The AWU value must be at least 1.2.*

**Dopolnilna kmetija** je kmetija, na kateri noben član gospodinjstva v aktivni dobi ne dela samo na kmetiji. Na kmetiji delajo le člani gospodinjstva, ki so zaposleni drugje, upokojenci in vzdrževani člani gospodinjstva in obsega manj kot 1,2 PDM.

***Supplementary farms** are farms on which none of the household members (aged 15 to 64) work only on the farm. Only household members employed elsewhere, retired persons and dependants work on the farm. The AWU value must be at least 1.2.*

**Ostarela kmetija** je kmetija, na kateri živijo samo člani gospodinjstva, starejši od 64 let.

***Aged farms** are farms on which only household members over 64 years of age live.*

**Polnovredna delovna moč** (PDM) je bila v letu 1997 opredeljena kot količina dela, ki ga opravi samo na kmetiji stalno in polno zaposleni član gospodinjstva.

***Annual work unit (AWU)** is the amount of work performed only on the farm by a permanently and fully employed household member.*

Podatki o količini polnovredne delovne moči so izpeljani iz podatkov o aktivnosti, starosti in dejavnosti posameznih članov gospodinjstva.

*Data on AWU are derived from data on activity, age and activities of individual household members.*

S popisom kmetijskih gospodarstev v letu 2000 smo uvedli nov izračun PDM. PDM temelji na razmerju med številom ur, letno porabljenih za delo na kmetijskem gospodarstvu, in enoletnim obsegom dela polno zaposlene osebe (1800 ur). Tak izračun uporablja nacionalna statistika delovne sile. V njem je upoštevan celotni letni vložek dela na kmetijskem gospodarstvu. Vanj je poleg dela gospodarja, drugih družinskih članov in zaposlenih oseb na kmetijskem gospodarstvu, vključeno tudi najeto delo (bodisi v obliki strojnih storitev bodisi v obliki sezonskega in priložnostnega dela).

*The 2000 Census of Agriculture introduced a new method of calculating AWU. AWU is based on the relationship between the number of hours worked on an agricultural holding in a year and the extent of work done by one fully employed person in one year (1,800 hours), which is being used by national labour force statistics. The calculation of AWU takes into account the total annual labour input on agricultural holdings. In addition to work done by the holder, other family members and people regularly employed on the agricultural holding, hired labour (either in the form of services performed with machinery or in the form of seasonal and occasional work) is also covered.*

V podatkih o **kmetijskih strojih in prevoznih sredstvih** so prikazani najpomembnejši in za delo uporabni kmetijski stroji in traktorski priključki.

*Data on **agricultural machinery and transport equipment** show the most important agricultural machinery and tractor accessories used for work.*

Zbrani so tudi podatki o zmogljivosti lastnih in v najem vzetih **kmetijskih stavb in drugih objektov**, ki jih je gospodinjstvo uporabljalo za uhlevljenje živine, shranjevanje kmetijskih strojev in kmetijskih pridelkov.

*Data on the capacity of owned and rented **agricultural buildings and other facilities** used by a household for stables, for storing agricultural machinery and agricultural products were also collected.*

# 17. GOZDARSTVO IN LOV

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Podatke o gozdnem fondu (površinah, lesni zalogi, prirastku) za leta 1953, 1956 in 1958 so statističnemu uradu sporočali gozdarski organi pri okrajih, za leto 1961 gozdarski organi pri občinskih skupščinah, za nadaljnja leta pa smo podatke prevzeli iz popisov za gozdnogospodarske načrte.

Podatke o gojitvenih delih, poseku in gozdnih sortimentih, gozdni mehanizaciji in gozdnih cestah smo do leta 1990 zbirali z letnimi poročili; pošiljale so nam jih organizacije, ki so gospodarile z gozdovi. Od leta 1991 nam te podatke sporoča Zavod za gozdove Slovenije, le podatke o gozdni mehanizaciji še vedno dobimo na podlagi letnih statističnih poročil poslovnih subjektov, registriranih za izvajanje gozdarskih del.

Uvoz in izvoz gozdnih sortimentov sta iz ton (t) preračunana v kubične metre ($m^3$). Vir teh podatkov je statistika zunanje trgovine.

Podatke o poškodovanosti gozda je prispeval Gozdarski inštitut Slovenije.

Poročila o lovu so do leta 2000 pošiljale lovske družine in organizacije, ki se ukvarjajo z lovnim gospodarstvom. Od leta 2000 pridobivamo podatke o lovu od Zavoda za gozdove Slovenije.

### Definicije in pojasnila

**Gozd**. V letih 1953, 1956 in 1958 so kot gozd prikazovali površine, porasle z gozdnim drevjem, in vse manjše gozdne površine (gozdni osredki). Od leta 1961 prikazujemo kot gozd z gozdnim drevjem obraslo površino, ki obsega najmanj 0,05 ha, ne glede na višino dreves in zarast. Drevoredov, parkov v naseljih, gozdnih drevesnic in skupin dreves na površini, ki meri manj kot 0,05 ha, ne obravnavamo kot gozd.

**Varovalni gozd** je gozd, v katerem je poudarjena katera koli ekološka funkcija in je zato določen poseben režim gospodarjenja z njim.

**Varstvo gozdov** obsega dela za preprečitev in zatrtje rastlinskih bolezni, prerazmnoženih populacij žuželk, zaščito pred škodo, ki jo povzroča divjad, zaščito pred požari in naravnimi ujmami.

**Sanitarna sečnja** je posek okuženega, z insekti napadenega, močno poškodovanega ali podrtega drevja.

**Osutost** je osnovni kazalnik za oceno zdravstvenega stanja oziroma vitalnosti drevesa; ta kazalnik izraža na oko (okularno) ocenjen delež (v odstotkih) manjkajočih asimilacijskih organov (listov, iglic) v primerjavi z namišljenim normalnim drevesom istega socialnega položaja, iste drevesne vrste in z enakega rastišča. Ocenjuje se na 5 % natančno. Za poškodovano štejemo tisto drevo, katerega stopnja osutosti je višja od 25 %. Eden izmed dejavnikov, ki vplivajo na osutost, je tudi onesnažen zrak. Onesnažen zrak lahko zavira nastajanje novih listov/iglic, ustavlja rast listja in povzroča predčasno odpadanje. Odpadanje listja/iglic je lahko tudi naravni mehanizem, s katerim se tudi popolnoma zdravo drevo odzove na razne strese. Tako lahko na primer v sušnem obdobju prepreči prevelike izgube vode ali pa se tako znebi odvečnih snovi, ki so se nakopičile v listu/iglici. Ker na drevo vpliva več dejavnikov hkrati, njihovih vplivov ni vedno mogoče ločiti med seboj, tudi osutosti ne moremo pripisati le določenemu vzroku. To je mogoče le, če je posamezni dejavnik zelo močno poudarjen (npr. izredno močna onesnaženost, dolgotrajna suša).

# *FORESTRY AND HUNTING*

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Data on forestry reserves (area, growing stock and annual gross increment) for 1953, 1956 and 1958 were supplied by the district forestry authorities, whereas for 1961 they were supplied by the forestry authorities of municipal assemblies. Since then the data were drawn from the inventories for the forestry management plans.*

*Data on removals, cultivation works and raw wood categories, mechanisation and roads were gathered from the annual reports submitted by forest management organisations until 1990. Since 1991 reporting has been entirely the responsibility of the Slovenian Forestry Service, except for data on forest mechanisation, which are still gathered with annual statistical reports from forestry enterprises and organisations.*

*Import and export of raw wood categories has been recalculated from tons (t) into cubic metres ($m^3$), with the source being external trade statistics.*

*Data on forest damages have been supplied by the Forestry Institute of Slovenia.*

*By 2000, the data on hunting had been supplied by hunting societies and organisations involved in the management of hunting. Since 2000 the data on hunting have been supplied by the Slovenian Forestry Service.*

### *Definitions and explanations*

***Forest.*** *In 1953, 1956 and 1958, all areas grown over with forest trees as well as smaller incorporated forest areas were shown as forest. Since 1961 the term forest covers areas larger than 0.05 ha that are covered with forest trees, irrespective of their height and growth. Trees lining paths, parks in inhabited areas, forest nurseries and groups of trees on areas smaller than 0.05 ha are not considered as forest.*

***Protective forest*** *is forest with outstanding ecological function, where special management is required.*

***Protection of forest*** *includes forestry works on preventing and exterminating tree diseases, too large populations of insects, damages caused by game, and protection from fire and natural disasters.*

***Sanitation removals*** *are removals of trees attacked by insects or disease, as well as severely damaged or fallen trees.*

***Defoliation*** *is the basic parameter for the assessment of the tree vitality. It is defined as the assessed share (in %) of needle/leave loss as compared to a reference (normal) tree of the same social class, the same tree species and from the same site conditions. Defoliation is assessed in 5% steps. As damaged are considered trees with defoliation higher than 25%. One of the factors that influence the defoliation rate is atmospheric pollution. Polluted air can influence the development, growth or fall of leaves/needles. This is also a mechanism with which a tree responds to different stresses. In this way a tree can prevent from loss of water in the drought or get rid of redundant substances which accumulated in the leave/needle. Since a tree is influenced by more factors at the same time, it is not easy to distinguish, which one caused a certain share of the total defoliation rate. It is only possible in the case when one factor is being strongly predominant (e.g. air pollution, long lasting drought).*

# 18. RUDARSTVO IN PREDELOVALNE DEJAVNOSTI *MINING AND MANUFACTURING*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Podatke o dejavnostih, ki po SKD sodijo v področja Rudarstvo, Predelovalne dejavnosti in Oskrba z elektriko, plinom in vodo[1)], zbira Statistični urad Republike Slovenije s statističnima raziskovanjema **Mesečno poročilo industrije** in **Letno poročilo industrije.**

### *Zajetje*

V statistično raziskovanje Mesečno poročilo industrije so vključena industrijska podjetja in enote v sestavi, ki zaposlujejo vsaj deset oseb in opravljajo eno ali več dejavnosti iz področij Rudarstvo (C), Predelovalne dejavnosti (D) in Oskrba z elektriko, plinom in vodo (E)[1)] po Standardni klasifikaciji dejavnosti. Do leta 1997 so bila v to statistično raziskovanje vključena industrijska podjetja in enote v sestavi, ki so opravljala eno ali več dejavnosti iz področja Industrija in rudarstvo po Enotni klasifikaciji dejavnosti.

V statistično raziskovanje Letno poročilo industrije so vključena industrijska podjetja in enote v sestavi, ki zaposlujejo vsaj pet oseb in opravljajo eno ali več dejavnosti iz področij Rudarstvo (C), Predelovalne dejavnosti (D) in Oskrba z elektriko, plinom in vodo (E)[1)] po Standardni klasifikaciji dejavnosti.

Rezultati Mesečnega poročila industrije so vir podatkov za tabele 18.1 (del), 18.2, 18.3 (del), 18.4 in 18.5, rezultati Letnega poročila industrije pa so vir podatkov za tabelo 18.3 (del) in 18.6.

### Definicije in pojasnila

**Industrijski proizvodi** so opredeljeni z Nomenklaturo industrijskih proizvodov. Podjetja in enote v sestavi prikazujejo podatke o celotni proizvodnji vsakega proizvoda, ne glede na to, ali je ta namenjen prodaji ali pa se uporabi pri nadaljnji proizvodnji v istem ali drugem podjetju.

Osnova za računanje **indeksov industrijske proizvodnje** so podatki o proizvodnji v fizičnih merskih enotah, zbrani po Nomenklaturi industrijskih proizvodov. Indeksi obsega industrijske proizvodnje za proizvode in različne ravni Standardne klasifikacije dejavnosti se računajo v dveh stopnjah: najprej se s pomočjo *ponderacijskih koeficientov* izračunajo indeksi proizvodnje za posamezne proizvode, temu sledi izračun indeksov industrijske proizvodnje na višjih ravneh Standardne klasifikacije dejavnosti, v katerem je tudi posameznim višjim ravnem s pomočjo ponderacijskih faktorjev dejavnosti določena njihova relativna pomembnost, hkrati pa je s tem izravnana različna stopnja zajetja med njimi. Ponderacijski koeficienti pomenijo oceno dodane vrednosti za proizvode, ponderacijski faktorji pa deleže dodane vrednosti posameznih dejavnosti za vse ravni Standardne klasifikacije dejavnosti.

Podobno se z indeksi razredov in s ponderacijskimi faktorji dejavnosti po namenu porabe proizvodov izračunajo indeksi dejavnosti po namenu porabe proizvodov.

Ponderacijski sistem za obračun indeksov industrijske proizvodnje vsako leto sistematično popravimo glede na spremembe, ki nastanejo v strukturi dodane vrednosti med predpredhodnim in predhodnim letom, vsakih pet let pa ponderje izračunamo na novo.

Osnova za računanje **indeksov zaposlenih oseb po dejavnosti proizvodnje - načelo čistih dejavnosti -** so podatki o zaposlenih osebah v področjih Rudarstvo, Predelovalne dejavnosti in Oskrba z elektriko, plinom in vodo[1)], ki delajo neposredno v proizvodnji, kot tudi tistih, ki so servis tem dejavnostim, npr. zaposleni v upravi, strokovnih službah itd. Če se podjetje ukvarja z različnimi proizvodnimi dejavnostmi naštetih področij, so tudi zaposlene osebe razporejene sorazmerno po teh dejavnostih.

**Indeksi produktivnosti** so opredeljeni kot razmerje med indeksi ravni industrijske proizvodnje in indeksi ravni zaposlenih oseb po dejavnosti proizvodnje.

V podatkih o **porabi električne energije in goriv ter goriv za proizvodnjo električne energije** je do leta 1996 upoštevana poraba električne energije in goriv za pogonske namene, notranji prevoz, ogrevanje delovnih in pisarniških prostorov ter za pogonske in tehnološke namene v proizvodnji, od leta 1997 naprej pa tudi poraba goriv za proizvodnjo električne energije.

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Data on activities which according to the Standard Classification of Activities belong into mining and quarrying, manufacturing, and electricity, gas and water supply[1)] are collected by the Statistical Office of the Republic of Slovenia with the statistical surveys **Monthly Industry Report** and **Annual Industry Report**.*

### *Coverage*

*The statistical survey Monthly Industry Report covers industrial enterprises and their units with at lest 10 persons in paid employment performing one or more activities from the field of Mining and quarrying (C), Manufacturing (D) and Electricity, gas and water supply (E)[1)] of the Standard Classification of Activities. Until 1997 this survey covered industrial enterprises and their units performing one or more activities from the field of manufacturing, mining and electricity supply of the National Classification of Activities.*

*The statistical survey Annual Industry Report covers industrial enterprises and their units with at lest 5 persons in paid employment performing one or more activities from the field of Mining and quarrying (C), Manufacturing (D) and Electricity, gas and water supply (E)[1)] of the Standard Classification of Activities.*

*The source for tables 18.1 (part), 18.2, 18.3 (part), 18.4 and 18.5 is the Monthly Industry Report and for table 18.3 (part) and 18.6 the Annual Industry Report.*

### *Definitions and explanations*

***Industrial products** are defined by the National Nomenclature of Industrial Products. Enterprises and their units report on total production of each product, irrespective of whether the product is intended for sale or to be used in further production in the same or another enterprise.*

*The basis for calculating **industrial production indices** are data on production in units of measure collected according to the National Nomenclature of Industrial Products. Industrial production volume indices for products and different levels of the Standard Classification of Activities are calculated in two steps: first, production indices of individual products are calculated with the help of weighting coefficients. This is followed by the calculation of industrial production indices of higher levels of the Standard Classification of Activities by defining relative importance of individual levels (with weighting factors of activities) and levelling different degrees of coverage among them. Weighting coefficients represent the estimation of value added for products and weighting factors represent the shares of value added of individual activities for all levels of the Standard Classification of Activities.*

*Similarly, indices of activity by end-use of products are calculated from indices of classes and appropriate weights of activities.*

*The weighting system for calculating industrial production volume indices is systematically updated every year considering the changes in the structure of value added between the preceding year and the year before that. Every five years new weights are calculated.*

*The basis of calculating **indices of persons in paid employment by activity - kind of activity principle -** are data on persons in paid employment in the fields of Mining and quarrying, Manufacturing, and Electricity, gas and water supply[1)], both those working directly in production and those who are the support for these activities, like management, expert personnel, etc. If an enterprise is engaged in several production activities from the mentioned fields, persons in paid employment are classified proportionally by these activities.*

*The **productivity index** is the ratio between the industrial production volume index and the index of persons in paid employment by kind of activity.*

*Until 1996, data on **consumption of electricity and fuels and consumption of fuels for producing electricity** cover consumption of electricity and fuels for driving purposes, internal transport, heating in enterprises, and consumption for driving and technological purposes in production. Since 1997 the data also cover consumption of fuels for producing electricity.*

**Vrednost prodaje industrijskih proizvodov in storitev** je opredeljena kot fakturirana vrednost franko tovarna, v katero so vključeni tudi stroški pakiranja, čeprav so na računu prikazani posebej, ter kompenzacije in subvencije, ki se nanašajo na proizvedene ali prodane količine oz. vrednosti proizvodov in storitev. Prodajna vrednost pa vključuje tudi vrednosti proizvodov, porabljenih za lastno končno porabo, in vrednosti proizvodov, danih zaposlenim v naravi. Vrednost prodaje pa ne vključuje davka na dodano vrednost in podobnih davkov in taks, posebej zaračunanih prevoznih stroškov in popustov, danih kupcem.

**Podatek o vrednosti prodaje po dejavnosti proizvoda** pove, da se podatki o prodaji združujejo v dejavnosti, v kateri je proizvod nastal.

**Podatek o vrednosti prodaje po dejavnosti podjetja** pa pove, da se podatki o prodaji združujejo v dejavnosti, v kateri je podjetje registrirano.

***Value of sale of industrial products and services*** *is defined as invoiced value of the ex-works selling price which includes also packaging costs even if they are charged separately, compensation and subsidies which refer to produced and sold quantities or values of products and services. The value of sale also includes the values of products consumed for own final consumption and the values of products given to the employees in kind. However, the selling value does not include the value added tax, similar deductible taxes and duties, separately charged transport costs or customer discounts granted to customers.*

***Value of sale by activity of the product*** *means that the data on sale are shown by activities into which the products belongs.*

***Value of sale by activity of the enterprise*** *means that the data on sale are shown by activities for which the enterprise is registered.*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Podatke, ki osvetljujejo **razvoj obrti,** smo pridobili s polletnimi in letnimi poročili različnih statističnih raziskovanj; ta so navedena v opombah pod prvo tabelo.

Podatke o **obrti kot načinu opravljanja dejavnosti** in podatke o številu obratov z obrtno ali obrti podobno dejavnostjo ter z domačo ali umetno obrtjo smo prevzeli iz Obrtnega registra Slovenije. Obrtni register je javna knjiga. Vodi ga Obrtna zbornica Slovenije. Vodenje tega registra je opredeljeno v Pravilniku o postopku izdaje obrtnega dovoljenja in o obrtnem registru (Ur. l. RS št. 10/95, 56/2001).

### Zajetje

V obdobju, ki je zajeto v pregledu razvoja obrti v prvi tabeli, je bila obrt različno definirana. Glede na lastnino sta bili ločeni družbena in zasebna obrt.

V **družbeno obrt** so spadale do vključno leta 1976 samostojne obrtne organizacije proizvajalnih, gradbenih in storitvenih dejavnosti, dalje obrtne delavnice državnih organov in ustanov, družbenih organizacij, kmetijskih zadrug in delavnice, ustanovljene po 27. členu Splošnega zakona o obrtnih delavnicah samostojnih obrtnikov (Ur. l. SFRJ št. 14/63). S sprejetjem Odloka o Enotni klasifikaciji dejavnosti (Ur. l. SFRJ št. 34/76, 52/76, 62/77, 72/80, 77/82, 71/83, 68/84, 76/85, 28/86, 72/86, 78/87, 63/88, 6/89, 29/90, 47/90) je bilo področje družbene obrti (področje Obrt in osebne storitve) zmanjšano za proizvajalne dejavnosti, ki so bile razvrščene v področje Industrija in rudarstvo. S sprejetjem Uredbe o uvedbi in uporabi Standardne klasifikacije dejavnosti (Ur. l. RS št. 34/94, 3/95, 33/95, 15/96, 89/98, 12/99, 2/2002) in z njeno uveljavitvijo pa se področje Obrt in osebne storitve ne pojavlja več kot dejavnost.

**Zasebna obrt** je bila urejena z obrtnimi zakoni, ki so bili večkrat na novo izdani in spreminjani. Z njimi se je postopoma širil obseg zasebne obrti. Obrtni zakon, objavljen v Ur. l. SRS št. 26/73, je določal, da lahko občani z osebnim delom in s svojimi sredstvi samostojno opravljajo obrtno, gostinsko, avtoprevozniško in brodarsko dejavnost ter prodajo na drobno, če izpolnjujejo zahteve, ki jih je določal zakon. Vključene so bile tudi obrtne storitve kot postranski poklic. Obrtne dejavnosti zasebne obrti so bile nato z letom 1977 definirane v Enotni klasifikaciji dejavnosti s področjem dejavnosti Obrt in osebne storitve in z dejavnostjo stavbne in gradbene obrti. Po določilih Obrtnega zakona, objavljenega v Ur. l. SRS št. 1/79, 6/83, 37/85, so zasebno obrt do leta 1985 sestavljale obrtna, gostinska, avtoprevozniška in brodarska dejavnost ter prodaja na drobno, od leta 1986 pa še turistična dejavnost ter druge gospodarske in negospodarske dejavnosti; pri tem so bile dejavnosti, ki jih ni bilo dovoljeno opravljati kot obrt, posebej naštete. S sprejetjem novega Obrtnega zakona (objavljenega v Ur. l. - Zakon o gospodarskih družbah (Ur. l. RS št. 30/93, 29/94, 82/94, 20/98, 84/98, 6/99, 45/2001)

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Data throwing light upon **craft development** were collected with semi-annual and annual reports of various statistical surveys stated in the notes to the first table.*

*Data on **craft as a way of performing the activity** and data on the number of craft establishments performing craft activity or activity similar to craft and home or art manufacture were taken from the Craft Register of Slovenia. The Craft Register is a public register kept by the Chamber of Craft. The keeping of this register is defined in the Regulation on Issuing Trade Licences and on the Craft Register (OJ RS, No. 10/95, 56/2001).*

### *Coverage*

*In the period presented in Table 1 the field of craft was defined in different ways. As regards the ownership we distinguish between social and private crafts.*

*Until 1976 **social crafts** included independent craft organisations of industrial, construction and service activities, craft establishments of government bodies and institutions, and social organisations, agricultural co-operatives, and workshops established according to Article 27 of the General Law on Craft Establishments of Independent Craftsmen (Official Gazette of SFRY, No. 14/63). With the adoption of the Decree on National Classification of Activities (Official Gazette of SFRY, No. 34/76, 52/76, 61/77, 72/80, 77/82, 71/83, 68/84, 76/85, 28/86, 72/86, 78/87, 63/88, 6/89, 29/90, 47/90) the field of social crafts (Craft and personal service activities) was reduced by production activities classified into the field Manufacturing, mining and electricity supply. With the adoption of the Decree on Introduction and Use of the Standard Classification of Activities (OJ RS, No. 34/94, 3/95, 33/95, 15/96, 89/98, 12/99, 2/2002) and its enforcement, the field of Craft and personal service activities no longer exists as activity.*

***Private crafts** were regulated by craft legislation, which changed during the years and expanded the field of private crafts. The Law on Crafts (Official Gazette of SRS, No. 26/73) defined that citizens can with personal work and their own funds independently perform craft, catering and transport activities, and retail sale under conditions defined by law. Included were also craft services as a side job. Private craft activities were in 1977 defined with the field of activity Craft and personal service activities of the National Classification of Activities and with the activity of construction crafts. According to the Law on Crafts (Official Gazette of SRS, No. 1/79, 6/83, 37/85) until 1985 private crafts were craft, catering and transport activities, and retail sale, and since 1986 also tourist activity and other economic and non-economic activities. Activities which could not be performed as crafts were listed. With the adoption of the new Law on Crafts (Official Gazette of SRS, No. 35/88, 24/89) private crafts covered craft, catering, tourist, transport, agriculture, forestry and fishing activities, retail trade, intellectual services of economic character and other activities of economic character whose performing was not forbidden by law.*

*With the adoption of the present Small Business Act, **crafts** are defined as a **way of performing the activity.** Legal acts regulating this field are:*

- *Companies Act (OJ RS, No. 30/93, 29/94, 82/94, 20/98, 84/98, 6/99, 42/2001)*

## Definicije in pojasnila

**Obrtna** oziroma **obrti podobna dejavnost** je po Obrtnem zakonu pridobitna dejavnost, določena z Uredbo o listi (A) obrtnih dejavnosti in listi (B) obrti podobnih dejavnosti.

Za obe vrsti dejavnosti je značilno**:**

- da gre za **proizvodno ali storitveno dejavnost,** navadno na podlagi **individualnih naročil,**
- da se **proizvodnja** opravlja **le v majhnih serijah,**
- da **serijska proizvodnja ne obsega pretežnega dela dejavnosti**,
- da se **uporabljajo stroji, orodja in tehnične naprave,** ki so primerni za opravljanje obrtne in obrti podobne dejavnosti in nimajo **značilnosti tekočih trakov ali avtomatiziranega delovnega procesa.**

**Pri določenih storitvenih dejavnostih** se osebam, za katere se opravi storitev, lahko zaradi zaokrožitve oziroma dopolnitve celovitosti dejavnosti **določeno blago,** ki ga obrtnik uporablja pri opravljanju teh storitev, **proda na drobno.** Prodaja teh izdelkov mora biti vpisana v obrtno dovoljenje.

**Gostinska dejavnost** se lahko opravlja kot **obrti podobna dejavnost** le, če jo opravlja gostinec kot samostojni podjetnik posameznik v gostinskem obratu: penzionu, restavraciji, gostilni, slaščičarni, kavarni, okrepčevalnici. Upoštevati pa mora Zakon o gostinstvu in na njegovi podlagi sprejete podzakonske akte.

**Prevozniška dejavnost v cestnem prometu** se šteje kot **obrti podobna dejavnost** le, če jo opravlja prevoznik kot fizična oseba na podlagi pridobljene licence kot samostojni podjetnik posameznik. Upoštevati pa mora Zakon o prevozih v cestnem prometu in nanj vezane podzakonske akte.

Za **dejavnost domače in umetne obrti** je značilen **enostaven način dela** s **pretežnim ročnim delom ter umetniško in oblikovalsko ustvarjanje.**

Mnenje o tem, ali je izdelek predmet domače ali umetne obrti, daje Obrtna zbornica Slovenije po mnenju strokovne komisije, sestavljene iz etnografov, likovnih umetnikov in zgodovinarjev, ki pregleda in oceni posamični predmet.

Do uveljavitve predpisov, ki bodo urejali **dopolnilne dejavnosti na kmetijah**, lahko kmetje in člani njihovega gospodinjstva opravljajo dejavnosti po Obrtnem zakonu **na podlagi priglasitve Obrtni zbornici Slovenije**. Ni jim treba izpolnjevati zahtev za opravljanje dejavnosti.

Pravica do opravljanja obrtne dejavnosti, obrti podobne dejavnosti ter dejavnosti domače in umetne obrti se pridobi na podlagi obrtnega dovoljenja in vpisa v obrtni register. Po Pravilniku o postopku izdaje obrtnega dovoljenja in o obrtnem registru lahko pridobijo obrtno dovoljenje: fizična oseba, tuja fizična ali pravna oseba, samostojni podjetnik posameznik, družba z neomejeno odgovornostjo, komanditna družba, družba z omejeno odgovornostjo in delniška družba.

**Ugotovitvena odločba** je osnova za izdajo obrtnega dovoljenja**.** Izda jo upravna enota, ko na osnovi strankine vloge preveri, ali so izpolnjene zahteve za opravljanje pridobitne dejavnosti na obrtni način. Poleg dokazil je potrebno v vlogi natančno opredeliti, katere dejavnosti bo stranka opravljala in na kakšen način. Pooblaščena oseba v

# 21. GRADBENIŠTVO

# *CONSTRUCTION*

## STANOVANJA IN STAVBE OB POPISIH

## *DWELLINGS AND BUILDINGS BY CENSUSES*

### METODOLOŠKA POJASNILA

### *METHODOLOGICAL EXPLANATIONS*

#### Viri in metode zbiranja podatkov

Viri podatkov v tabelah od 21.1 do 21.6 so popisi prebivalstva. Od leta 1971 je zbiranje podatkov o stanovanjih v Republiki Sloveniji redno vključeno v popise prebivalstva.

V popisu 2002 smo upoštevali mednarodna priporočila za popise, po katerih se stanovanja delijo na naseljena, nenaseljena in stanovanja za občasno rabo. V preteklih popisih so se v skupno število stanovanj, o katerih so bili objavljeni podrobnejši rezultati (stanovanjski sklad), štela samo naseljena in nenaseljena stanovanja (podatki o stanovanjih za počitek in rekreacijo so bili prikazani posebej). To je treba upoštevati pri primerjavi podatkov zadnjega popisa s preteklimi popisi. Zaradi lažje primerjave s popisom 2002 smo nekatere podatke iz popisa 1991 preračunali, tako da smo pri številu stanovanj upoštevali enak koncept kot za leto 2002.

Podatki o stanovanjskem skladu iz Popisa 2002 se od podatkov o stanovanjskem skladu, ki ga pripravlja statistika gradbeništva, razlikujejo zaradi uporabe različnih definicij stanovanjskega sklada (statistika gradbeništva namreč v stanovanjskem skladu še ni upoštevala stanovanj za občasno uporabo) in različnega vira podatkov (administrativni viri in popis).

#### *Sources and methods of data collection*

*The data source for Tables 21.1-21.6. is censuses of population. Since 1971 the housing census has regularly been a part of the population census.*

*In the 2002 census we followed international recommendations for censuses according to which conventional dwellings cover occupied and unoccupied dwellings and dwellings for occasional use. In previous censuses the number of dwellings for which detailed results were published (dwelling stock) comprised only occupied and unoccupied dwellings (data on dwellings for leisure and recreation were shown separately). For comparison with the 2002 Census, we have recalculated some data from the 1991 Census in the way that we considered the same concept for the number of dwellings as used in the 2002 Census.*

*Data on dwelling stock from the 2002 census differ from data on dwellings stock prepared within construction statistics because of a different definition of dwelling stock (in construction statistics dwelling stock does not include dwellings for occasioanl use ) and different source (administrative sources versus the Census).*

#### Zajetje

S Popisom 2002 so bila zajeta vsa stanovanja na ozemlju Republike Slovenije (naseljena, nenaseljena, za občasno uporabo) ter drugi naseljeni prostori, ki so se v času popisa uporabljali za prebivanje (naseljeni poslovni prostori, zasilno naseljeni prostori). V Popis 2002 je Statistični urad prvič vključil tudi stavbo kot samostojno popisno enoto. Popisane so bile vse stavbe s stanovanji in drugimi naseljenimi prostori, ki so se v času popisa uporabljali za prebivanje.

Zajeta niso bila stanovanja v lasti tujih držav in stanovanja, namenjena izključno za oddajanje turistom.

#### *Coverage*

*2002 Census covered all dwellings in the teritory of Slovenia (occupied, unoccupied, for occasional use) and other occupied premises that were used as dwellings at the time of the Census. At the 2002 Census the Statistical Office for the first time included buildings as an enumeration unit. Enumerated were all buildings with dwellings and other inhabited premises that were used as dwellings.*

*Dwellings owned by foreign countries and dwellings for turism were not covered.*

#### Definicije in pojasnila

**Stavba** je vsak gradbeni objekt, ki ima štiri samostojne zidove in enega ali več vhodov in je zgrajen zato, da se v njem prebiva, opravlja katero koli dejavnost ali hrani materialne dobrine.

**Stanovanje** je vsaka gradbeno povezana celota, namenjena za stanovanje. Ima eno sobo ali več z ustreznimi pomožnimi prostori (kuhinjo, kopalnico, stranišcem, predsobo, shrambo itd.) ali pa je brez pomožnih prostorov in ima vsaj en posebni vhod.

**Naseljeno stanovanje** je stanovanje, v katerem prebivajo člani gospodinjstva ali pa so v njem začasno navzoče osebe, ki v naselju popisa prebivajo samo začasno (zaradi dela ali šolanja). Sem sodi tudi drugo stanovanje, ki ga gospodinjstvo uporablja na istem naslovu (tako stanovanje v Popisu 1991 ni bilo upoštevano kot naseljeno).

**Nenaseljena stanovanja** so začasno nenaseljena stanovanja in zapuščena stanovanja.

**Začasno nenaseljeno stanovanje** je stanovanje, ki je novo in v katero se stanovalci še niso vselili, ki je izpraznjeno zaradi preselitve, adaptacije, popravil, ali stanovanje, katerega lastnik živi v drugem stanovanju, tega stanovanja pa ne uporablja in ga ne daje v najem drugim osebam.

**Nenaseljeno (zapuščeno) stanovanje** je stanovanje, ki je že dlje časa opuščeno, ker se je lastnik izselil iz stanovanja, stanovanja pa ni dal v najem, ali ker je lastnik umrl, njegovi dediči pa stanovanja niso dali v najem oziroma ga ne uporabljajo za počitek in rekreacijo.

**Stanovanja za občasno rabo** so stanovanja, namenjena za počitek in rekreacijo, ter stanovanja, namenjena za čas sezonskih del v kmetijstvu.

**Stanovanje za počitek in rekreacijo** je po definiciji stanovanje, ki se občasno ali več mesecev v letu uporablja za počitek in rekreacijo.

#### Zajetje

Z vprašalnikom Letno poročilo o gradbenem objektu so v statistično opazovanje zajeti objekti **visoke (stavbe) in nizke gradnje (gradbeni inženirski objekti)**, na katerih so gradbena podjetja in organizacije opravljali gradbena dela, in sicer pri novogradnjah, povečavah, rekonstrukcijah - prenovah, velikih popravilih, rednem vzdrževanju in izboljšavah teh objektov. Z vprašalniki Poročilo o dovoljenju za gradnjo stavbe in Poročilo o uporabnem dovoljenju stavbe, ki jih izpolnjuje in nam jih pošilja pristojni upravni organ na podlagi izdanih gradbenih dovoljenj, so v opazovanje zajeti objekti visoke gradnje.

Razvrščanje gradbenih objektov na visoko in nizko gradnjo in v okviru teh na vrste objektov opredeljuje Klasifikacija gradbenih objektov (CC), ki jo je Statistični urad RS izdal kot metodološko gradivo. S to klasifikacijo smo od leta 1998 nadomestili Nomenklaturo gradbenih objektov in del. Podatki v tabelah s časovnimi vrstami so vsebinsko usklajeni s Klasifikacijo gradbenih objektov (CC).

Podatke o **stanovanjski gradnji** zberemo z vprašalniki Letno poročilo o gradbenem objektu, Poročilo o dovoljenju za gradnjo stavbe in Poročilo o uporabnem dovoljenju stavbe, in sicer o vsaki stavbi, v kateri je stanovanje in na kateri so bila v tekočem letu izvedena gradbena, obrtniška in/ali inštalacijska dela. Upoštevana so vsa stanovanja v novih stavbah (stanovanjskih in nestanovanjskih), v prizidkih k starim stavbam (povečava) in stanovanja, pridobljena z rekonstrukcijo - prenovo drugih prostorov. V številu stanovanj so zajeta stanovanja za stalno bivanje, stanovanja za občasno bivanje (npr. počitniška stanovanja) in stanovanja v skupinskih stanovanjskih stavbah (npr. domovi za ostarele, študente, delavce itd.).

V tabelah 21.12, 21.13, 21.14, 21.15, 21.23, 34.24, 35.13, 35.14 in 35.15 so zajeta samo stanovanja za stalno bivanje.

Z vprašalnikom Letno poročilo o **porabi gradbenega in pogonskega materiala** so v opazovanje zajete gradbene in nekatere druge delovne organizacije, ki proizvajajo in porabljajo gradbeni material.

Podatke o **gradbeni dejavnosti v tujini** nam sporočajo podjetja in druge organizacije, ki opravljajo gradbena, obrtniška, inštalacijska in

#### *Coverage*

*The Annual Report on Building or Civil Engineering Work covers **buildings and civil engineering works** at which construction enterprises and organisations have carried out construction, finishing and/or installation works. With the the Report on Building Permits and the Report on Safety Permits - which are sent to us by the authorised administrative body on the basis of issued building and safety permits - we cover buildings.*

*Classification of constructions into buildings and civil engineering works is determined by the **Classification of Type of Construction (CC)**, which was published in 1998 by the Statistical Office of the Republic of Slovenia as a methodological material. This classification replaced the Nomenclature of Constructions and Works. The data in tables with time series are adjusted to the CC.*

*Data on **construction of dwellings** are collected with the Annual Report on Building or Civil Engineering Work, the Report on Building Permits and the Report on Safety Permits. We collect data on every building containing dwellings where, during the current year, construction, finishing and/or installation works have been carried out. We cover all dwellings in new buildings (residential and non-residential), in extensions to old buildings and dwellings created through the renovation or conversion of other premises. The number of dwellings covers permanent residence dwellings, temporary residence dwellings (e.g. holiday homes), dwellings in collective accommodation buildings (e.g. old people's homes, student accommodation facilities, etc.).*

*Tables 21.12, 21.13, 21.14, 21.15, 21.23, 34.24, 35.13, 35.14 in 35.15 cover only permanent residence dwellings.*

*The Annual Report on the **Consumption of Construction and Propulsion Materials** covers consumption within construction and other organisations.*

*Data on **construction activity abroad are** received from enterprises and other organisations and groups carrying out construction, finish-*

montažna dela ter projektantske, inženiring in svetovalne storitve za tujini.

Polletno poročilo o cenah novih stanovanj zajema **cene dokončanih stanovanj**, ki so jih gradila gradbena podjetja in druge organizacije.

Poročilo o rušitvah in drugih spremembah stanovanjskega sklada zajema vsako podrto stavbo, v kateri je bilo vsaj eno stanovanje. Niso upoštevane stavbe brez stanovanj, stavbe, ki so se uporabljale samo med sezonskimi deli, stavbe za skupinska stanovanja (internati, domovi, samski hoteli, barake ipd.) in zasilno naseljeni prostori (lope, garaže ipd.).

Podatek o skupnem **stanovanjskem skladu** obsega podatke o stanovanjih (glej definicijo), zbrane ob popisu prebivalstva, gospodinjstev, stanovanj in kmečkih gospodarstev 31. 3. 1991. Ker so k tem prišteta tudi po popisu 1991 zgrajena stanovanja, so tako zajeta vsa stanovanja na območju Republike Slovenije, namenjena za stalno bivanje, ne glede na to, ali so bila ob omenjenem popisu naseljena ali ne. V stanovanjskem skladu niso upoštevana stanovanja, ki se uporabljajo samo občasno za počitek ali rekreacijo ali med sezonskimi deli v kmetijstvu. Prav tako niso upoštevani zasilno naseljeni prostori (poslovni prostori, barake, kleti, podstrešja itd.) ter skupinska stanovanja (domovi, internati itd.). Praviloma so upoštevana samo dokončana stanovanja, v katerih so bila opravljena vsa gradbena, inštalacijska in obrtniška dela. Izjemoma so bila ob omenjenem popisu zajeta tudi nedokončana stanovanja, če jih je gospodinjstvo že uporabljalo za stalno bivanje, vendar le tisti del objekta, ki se je uporabljal za stanovanje, ne glede na to, do katere stopnje je bil zgrajen.

Podatki o stanovanjskem skladu za mestna naselja so posebej prikazani. Seznam mestnih naselij je bil izdelan za potrebe statistike v sodelovanju Republiške geodetske uprave, Urada za makroekonomske analize in razvoj, Urbanističnega inštituta, Geodetskega inštituta in Statističnega urada Republike Slovenije.

Seštevki v tabelah 21.8, 21.9, 21.19, 21.20.1, 21.20.2 in 21.21 se zaradi zaokroževanja ne ujemajo.

*ing and/or installation works and designing, engineering and consulting services for foreign partners.*

*The Half-yearly Report on **Prices of New Dwellings** covers only the prices of new dwellings built by construction enterprises and other organisations.*

*The report on demolitions and other changes in the dwelling stock covers every demolished building with at least one dwelling. It does not cover buildings without dwellings, buildings which were used only during seasonal labour periods, buildings in multiple occupation where the occupants do not form a single household (boarding homes, homes, dormitory hostels, huts, etc.) and temporary accommodation premises (garages, hangars, etc.).*

*The total **dwelling stock** is made up of data on dwellings (see Definitions) gathered during the Census of Population, Households, Housings and Agricultural Holdings on 31 March 1991. Since dwellings built after the Census are also counted, we include all dwellings on the territory of the Republic of Slovenia intended for permanent residence, irrespective of whether they were occupied at the time of the Census or not. The dwelling stock does not include dwellings used temporarily for rest or recreation or during seasonal farming labour periods. Living quarters other than conventional dwellings (business premises, huts, cellars, attics, etc.) and residences in multiple occupation (homes, boarding homes, etc.) are also excluded. As a rule only dwellings where all construction, finishing and installation works have been completed are included. Conventional dwellings under construction are only included in exceptional cases where they have already been used as permanent residence by a household. Only the part used for residence is recorded, irrespective of its state of completion.*

*Data for urban settlements are given separately. The list of urban settlements was created for statistical purposes in collaboration with the Surveying and Mapping Authority, the Institute of Macroeconomic Analysis and Development, the Urban Planning Institute, the Geodetic Institute and the Statistical Office of the Republic of Slovenia.*

*In tables 21.8, 21.9, 21.19, 21.20.1, 21.20.2 and 21.21 the totals do not match because of rounding.*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Podatke o železniškem transportu nam posredujejo Slovenske železnice (SŽ), in sicer od 17. 7. 1992, pred tem pa nam jih je sporočalo Železniško gospodarstvo (ŽG) Ljubljana (ustanovljeno 1973).

Podatke o cestnem omrežju nam je posredovalo Ministrstvo za promet, Direkcija Republike Slovenije za ceste, podatke o registriranih motornih vozilih in prometnih nesrečah pa Ministrstvo za notranje zadeve.

Druge podatke smo zbrali z rednimi statističnimi raziskovanji s področja statistike transporta in komunikacij.

### Zajetje

V podatkih nekdanjega ŽG Ljubljana do leta 1991 niso bile upoštevane vse proge na ozemlju Slovenije, npr. proga pri Lendavi, zajete pa so bile nekatere proge na območju Hrvaške: Šapjane-Reka (brez reške postaje), Buzet-Pulj in Lupoglav-Raša. Podatki o železniškem transportu za ŽG Ljubljana so se zato razlikovali od podatkov o železniškem transportu za Slovenijo. Podatki o številu železniških postaj in dolžini proge so bili do omenjenega leta prikazani za obe območji, vsi drugi podatki pa so se nanašali na ŽG Ljubljana. Od leta 1992 se vsi podatki o železniškem transportu nanašajo na ozemlje Slovenije.

Podatki o pristaniškem prometu se nanašajo na pristanišča Koper/Capodistria, Izolo/Isola in Piran/Pirano. Pri prometu ladij štejemo ladje, namenjene za prevoz potnikov ali blaga.

Podatki o prometu na letališčih se nanašajo na letališča Ljubljana, Maribor in Portorož.

Pomorski transport in promet na letališčih sta v prikazanih podatkih zajeta v celoti (upoštevali smo vse poslovne subjekte, ki se ukvarjajo z navedenima dejavnostma). V podatkih o zračnem transportu pa je prikazan le največji slovenski prevoznik.

O cestnem potniškem prevozu v javnem prevozu nam poročajo poslovni subjekti, registrirani za to dejavnost. Izbor poročevalskih enot pripravimo v januarju tekočega leta, tako da določimo spodnji prag na osnovi doseženega prihodka v določenem preteklem obdobju in števila zaposlenih oseb (najmanj pet). Prevoza potnikov, ki ga opravljajo samostojni podjetniki, in prevoza potnikov s taksiji in osebnimi avtomobili nismo upoštevali. Upoštevan tudi ni prevoz za lastne potrebe.

O cestnem blagovnem prevozu (javnem in za lastne potrebe) nam od leta 2001 redno poročajo poslovni subjekti (pravne in fizične osebe), ki imajo v lasti, najemu ali upravljanju registrirana tovorna motorna vozila z vsaj eno tono nosilnosti. Osnova za izdelavo četrtletnega vzorca je Register motornih vozil, ki ga vodi Ministrstvo za notranje zadeve. Dobljene podatke primerjamo s podatki iz Poslovnega registra Slovenije in jim dodelimo šifro dejavnosti (SKD) ter jih vzorčimo glede na tip lastnine (pravne in fizične osebe) in glede na nosilnost (4 razredi za tovorne avtomobile in specialna tovorna vozila ter ločeno vlačilci - skupaj 5 razredov). Opazovana enota je registrirano tovorno motorno vozilo z vsaj eno tono nosilnosti v določenem tednu opazovanja.

Letni podatki o cestnem blagovnem prevozu za leta 1995–2000 so ocenjeni na podlagi prejšnjega raziskovanja tega prevoza, poskusnih projektov, izvedenih v letih 1999 in 2000, tekočega raziskovanja cestnega blagovnega prevoza, podatkov o mejnih prehodih tovornih vozil, rezultatov štetja prometa in podatkov o poslovnih subjektih, ki se ukvarjajo s cestnim blagovnim prevozom.

Pri mejnih prehodih v železniškem, pomorskem in zračnem prometu upoštevamo vse mejne prehode, v cestnem prometu pa mednarodne, meddržavne in obmejne prehode (od teh le tiste, prek katerih je mogoč prehod s cestnimi vozili). Planinskih mejnih prehodov in prehodov po posebnem sporazumu ne upoštevamo.

Pri registriranih motornih vozilih in prikolicah upoštevamo vsa motorna vozila in prikolice iz registra motornih vozil in prikolic Ministrstva za notranje zadeve razen motornih vozil in prikolic pod postavko TUJINA (motorna in priklopna vozila, katerih lastniki nimajo stalnega prebivališča ali sedeža oziroma začasnega prebivališča v Sloveniji).

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Data on railway transport are supplied by the Slovenian Railways. Before 17 July 1992 the data were supplied by the Ljubljana Railway Authority (established in 1973).*

*Data on the road network were supplied by the Ministry of Transport, Directorate of the Republic of Slovenia for Roads. Data on registered motor vehicles and road accidents were supplied by the Ministry of the Interior.*

*Other data are compiled from regular statistical surveys in the area of transport and communications.*

### *Coverage*

*Until 1991 the territory of the Ljubljana Railway Authority did not cover all routes on the territory of Slovenia. Thus, the route in the vicinity of Lendava was not included, while the following routes on the territory of Croatia were covered: Šapjane - Rijeka (excluding Rijeka station), Buzet - Pula and Lupoglav - Raša. Data on railway transport for the Ljubljana Railway Authority and for Slovenia were therefore not identical. Data on the number of railway stations and the length of routes were published for both territories, while all other information related to the Ljubljana Railway Authority. As of 1992, all data on railway transport relate to the territory of Slovenia.*

*Data on harbour traffic relate to the ports of Koper/Capodistria, Izola/Isola and Piran/Pirano. Under shipping we include vessels intended for carrying passengers or goods.*

*Data on activities at airports refer to airports Ljubljana, Maribor and Portorož.*

*Coverage of maritime transport and of activities at airports is complete (all business subjects conducting such activities are covered). In air transport only the biggest Slovenian carrier is covered.*

*Under road passenger transport for hire and reward we cover selected business subjects whose registered activity is road carriage of passengers. The selection of units is made in January and the lower threshold is defined on the basis of the turnover achieved in a certain past period and the number of employees (at least five). Transport of passengers by buses by individual entrepreneurs and transport of passengers by taxis and passenger cars are not included. Own account transport is also not included.*

*Since 2001 under road goods transport we cover selected business subjects (legal and natural persons) which are owners, leaseholders or managers of registered goods motor vehicle with at least one tonne of load capacity for hire or reward and own account. The basis of the quarterly sample is the Register of Motor Vehicles at the Ministry of the Interior. We match the data with the Business Register of Slovenia, allocate the activity code (by the Standard Classification of Activities) and sample the data in view of type of ownership (legal and natural persons) and load capacity (4 classes for goods vehicles and special goods vehicles and separately for road tractors - 5 classes in total). The observation unit is the registered goods motor vehicle with at least one tonne of load capacity in the defined week of observation.*

*Yearly data on road goods transport for 1995–2000 are estimated on the basis of the previous survey on road goods transport, pilot projects preformed in 1999 and 2000, the current survey on transport of goods by road, data on cross-border traffic of goods vehicles, results of the road census and data on business subjects performing road goods transport.*

*Under border crossings we take into account all border crossings in railway, maritime and air transport and of international, interstate and local border crossings in road transport. We consider those border crossings which may be crossed by road vehicles. Mountain border crossings and crossings under special agreement are not included.*

*Data on registered motor vehicles and trailers refer to all motor vehicles and trailers from the register of motor vehicles and trailers of the Ministry of the Interior, except diplomatic vehicles, mopeds under 50 ccm and motor vehicles and trailers under item TUJINA - FOREIGN (motor vehicles and trailers of owners who don't have permanent residence or headquarters or temporary residence in Slovenia).*

V prikazu podatkov o prekladalni dejavnosti v pristaniščih so upoštevani vsi poslovni subjekti, ki se ukvarjajos to dejavnostjo (zajetje je popolno), v podatkih o drugih prekladalnih mestih pa je zajetih le devet največjih poslovnih subjektov, ki opravljajo to dejavnost. Izbrani so bili glede na prihodek v prejšnjem letu.

*Coverage of transshipment in harbours is comprehensive. Under transshipment at other places, nine business subjects which perform transshipment activities are included. They were selected according to their income in the previous year.*

Podatki o mestnem potniškem prevozu se nanašajo na prevoz v Ljubljani in Mariboru. V skladu z zakonom o prevozih v cestnem prometu (Uradni list RS št. 59/01) je nekoliko spremenjena metodologija mestnega potniškega prevoza (definicije primestnega prevoza npr. ni več), zato so podatki za leto 2001 za Maribor neprimerljivi s podatki za pretekla leta.

*Data on urban passenger transport relate to transport in Ljubljana and Maribor. The change of methodology of urban passenger transport (for example: definition of suburban passenger transport is gone) is consistent with the Road Transport Act (OJ RS, No. 59/01), so the data for Maribor are not comparable with the data before 2001.*

V podatkih o žičniškem prometu so zajete vse stalne žičnice; prenosne vlečnice niso upoštevane.

*Cableway traffic covers all stationary cableways, while transportable ski lifts are excluded.*

Pri vseh vrstah transporta se notranji in mednarodni prevoz vključno do leta 1991 nanašata na ozemlje nekdanje Jugoslavije, od leta 1992 dalje pa na ozemlje Slovenije.

*National and international transport in all modes of transport refer until (including) 1991 to the territory of former Yugoslavia. After that they refer to the territory of Slovenia.*

## Definicije in pojasnila

## *Definitions and explanations*

**Transport** je gospodarska dejavnost, ki se ukvarja s prevozom materialnih dobrin in ljudi.

***Transport** is an economic activity of carrying goods and people.*

**Prevoz** je prevažanje potnikov ali blaga na določeni razdalji, torej od vstopa oz. nakladanja do izstopa oz. razkladanja. Prikazan je kot število prepeljanih potnikov oziroma količina prepeljanega blaga.

***Carriage** is the conveying of passengers or goods over a given distance, i.e. from boarding/loading to alighting/unloading. It is shown as the number of passengers carried or the quantity of goods carried.*

**Promet** je gibanje, premikanje vozil, potnikov in blaga. Prikazan je kot število prispelih ali odpotovalih potnikov oziroma kot količina prispelega ali odpravljenega blaga - na postajališča oziroma s postajališč (na železniške, avtobusne postaje, v pristanišča, na letališča, v skladišča ali od tam).

***Transport** in the narrow sense is movement of vehicles, passengers and goods. It is shown as the number of passengers who have arrived or departed, or as the quantity of goods arrived or dispatched at stations (railway stations, bus stations, ports, airports, depots, etc.).*

**Potniški kilometri (pkm)** so seštevki zmnožkov števila potnikov in razdalj, na katerih so se ti potniki peljali.

***Passenger-kilometres (pkm)** are the aggregate product of the number of passengers multiplied by the distances they have travelled.*

**Tonski kilometri (tkm)** so seštevki zmnožkov količine blaga in razdalj, na katerih je bilo to blago prepeljano.

***Tonne-kilometres (tkm)** are the aggregate product of the quantity of goods multiplied by the distances over which they have been conveyed.*

## Železniški transport

## *Railway transport*

**Mešane postaje** so postaje za potnike in blago. Dejanska dolžina proge določenega odseka proge je dolžina od sredine postajnega poslopja začetne postaje do sredine postajnega poslopja končne postaje.

***Mixed stations** are stations for passengers and goods. The actual length of line for a given section of railway is the length between the mid-point of the building of the departure station to the mid-point of the building of the terminal station.*

**Vlakovni kilometri** so razdalje (v km), ki jih prevozijo vlaki.

# *COMMUNICATIONS*

## INFORMACIJSKA DRUŽBA

## *INFORMATION SOCIETY*

### METODOLOŠKA POJASNILA

### *METHODOLOGICAL EXPLANATIONS*

#### Viri in metode zbiranja podatkov

Podatke o uporabi interneta v gospodinjstvih, podjetjih in šolah zbira Fakulteta za družbene vede, Center za metodologijo in informatiko, in sicer v okviru projekta Raba interneta v Sloveniji (RIS).

Podatki o uporabi informacijsko-komunikacijskih tehnologij v gospodinjstvih se zbirajo v okviru projekta Slovensko javno mnenje (SJM) v Centru za preučevanje javnega mnenja, in sicer z anketo dvakrat do trikrat na leto. V tej anketi sodeluje približno 2000 poročevalskih enot.

Javne točke za dostop do interneta se spremljajo v okviru projekta Ministrstva za informacijsko družbo (spletna stran: e-točke.gov.si).

Podatki o investicijah v osnovna sredstva se zbirajo s statističnim raziskovanjem Letno poročilo o investicijah v osnovna sredstva; izvaja ga Statistični urad Republike Slovenije.

#### *Sources and methods of data collection*

*The data on Internet usage in households, companies and schools are collected by the Faculty of Social Sciences, Center for Methodology and Informatics within the project RIS - Research on Internet in Slovenia.*

*The data on information and communication technology usage in households are collected two or three times per year by means of statistical surveys within the project of "Slovenian Public Opinion" carried out by the Public Opinion Research Centre. There are about 2,000 reporting units.*

*Public Internet points are monitored through the project of the Ministry of Information Society (web site: e-tocke.gov.si).*

*Data on gross fixed capital formation are collected by the Annual Report on Gross Fixed Capital Formation, which is carried out by the Statistical Office of the Republic of Slovenia.*

#### Zajetje

Na osnovi letnih statističnih poročil omenjenih institucij o rabi interneta in drugih informacijsko-komunikacijskih tehnologij prikazujemo podatke o splošni rabi interneta ter opremljenosti z računalniško in telekomunikacijsko tehnologijo.

V vzročni okvir ankete, ki se izvaja v podjetjih, so bila izbrana vsa podjetja s prometom na računu, ki so oddala zaključni račun. V vzorec niso bili vključeni samostojni podjetniki ter organizacije javnega oziroma neprofitnega sektorja s področja šolstva, socialnega varstva, zdravstva in javne uprave.

V anketo, ki je bila namenjena šolskim zavodom, so bili vključeni vsi šolski zavodi (osnovne in srednje šole, dijaški domovi, vrtci, glasbene šole in posebni zavodi).

#### *Coverage*

*Yearly statistical reports on the use of Internet and other IC technologies cover data on standard Internet usage and data on the level of ICT and PC technology coverage.*

*The sampling frame of the survey in companies covered all companies with financial transactions and financial statements. Individual private entrepreneurs and public or non-profit organisations from the field of education, social work, health and public administration were not included in the sample.*

*The survey in schools covered all schools (elementary and upper-secondary schools, secondary school boarding homes, kindergartens, music schools and institutions for children with special education needs).*

#### Definicije in pojasnila

**Internet** je svetovno omrežje povezanih računalnikov, ki se povezujejo po standardiziranem protokolu in omogočajo, da si uporabniki na različnih krajih prikazujejo nadbesedilo in grafiko ter predvajajo zvok in video, vključno z elektronsko pošto.

**Internetni strežnik (angl. host)** je naprava – največkrat je to računalnik -, ki v omrežju tipa odjemalec/strežnik po protokolu interneta omogoča shranjevanje in dostop do datotek odjemnih računalnikov v omrežju.

**Uporabnik interneta** je tisti, ki je že kdaj uporabil internet. Samo približno polovica le-teh je rednih (mesečnih) uporabnikov.

**Spletna stran** je dokument z nadbesedilom, kot ga prikazuje spletni pregledovalnik. Na spletni strani so lahko besedilo, nadpovezave, podobe, videofilmčki in zvočni posnetki.

**Domača stran** je vrsta spletne strani, ki je vhodna stran oziroma glavni dokument podjetja, ustanove ali posameznika v svetovnem spletu, prek katere imamo dostop do drugih njegovih spletnih strani.

**ISDN** (Integrated Services Digital Network - digitalno omrežje z integriranimi storitvami) je digitalno omrežje, ki omogoča neposredne storitve za vse vrste priključkov.

**Faks** je naprava, ki po analognem ali digitalnem telefonskem priključku omogoča prenos digitalizirane slike.

**Mobilni telefon** je prenosni telefonski aparat, ki ga uporabljamo v celičnem omrežju za mobilno telefonijo NMT ali GSM.

**WAP** (Wireless Application Protocol – protokol za brezžične aplikacije) je ime za skupino okleščenih protokolov, ki so namenjeni mobilnim napravam (telefonom, ročnim računalnikom, pozivnikom).

**Videorekorder** je naprava za snemanje in predvajanje televizijskih posnetkov z magnetnega traku.

**Računalniška izmenjava podatkov** (RIP) je izmenjava poslovnih podatkov, kot so listine, pisma, naročila in podobno, po omrežju med računalniki pri elektronskem poslovanju (vključno z izmenjavo med poslovalnicami). Vključuje tudi aplikacijo plačilnega prometa APP.

### *METHODOLOGICAL EXPLANATIONS*

#### Viri in metode zbiranja podatkov

Podatke o PTT-prometu nam je vključno do leta 1994 posredovalo sestavljeno PTT-podjetje Slovenije, od leta 1995 pa nam te podatke sporočata dve podjetji - Pošta Slovenije (o poštnih storitvah) in Telekom Slovenije (o fiksni telefoniji). Podatke o mobilni telefoniji pa nam posredujejo operaterji in ponudnik storitev mobilne telefonije.

#### *Sources and methods of data collection*

*The data on postal and telecommunication services were supplied by PTT Slovenia until 1994 inclusive. Since 1995 they have been supplied by the Post of Slovenia (data regarding postal services) and Telekom Slovenije (data regarding fixed telephony). Data on mobile telephony were supplied by operators and one service provider (reseller) of mobile telephony.*

#### Zajetje

Podatki o poštnih in telekomunikacijskih storitvah se nanašajo na celotno ozemlje države.

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Vir podatkov za statistiko zunanje trgovine so carinske deklaracije. Te so bile za različne vrste carinskih postopkov do leta 1996 različne. Z začetkom leta 1996 je bila uvedena enotna carinska listina (ECL), ki se uporablja v EU in drugih državah. Podatke iz carinskih deklaracij nam mesečno sporoča Carinska uprava Republike Slovenije v elektronski obliki. Nanašajo se na zadnje kumulativno obdobje in vsebujejo tako nove deklaracije za zadnji mesec poročanja kot tudi vse deklaracije za predhodne mesece, vključno z vsemi spremembami, ki so nastale po zadnjem poročanju. Statistični urad ne prejema vseh podatkov iz enotne carinske listine, ampak samo nekatere, v skladu z dogovorom in v vnaprej določeni obliki zapisa.

Statistika dopolni podatke iz carinskih deklaracij z dodatnimi podatki in klasifikacijami, ki so potrebni za statistično raziskovanje. Pri tem upoštevamo priporočila Statističnega urada OZN - tako v obsegu zajetja transakcij kot tudi glede drugih metodoloških elementov, ki določajo način prikaza zunanjetrgovinskih podatkov, tako da so mednarodno čimbolj primerljivi.

### Zajetje

Statistika zunanje trgovine obsega **le blagovno menjavo s tujino.**

V Sloveniji spremljamo zunanjetrgovinsko statistiko **po razširjeni definiciji specialne trgovine;** ta obsega poleg rednih izvoznih in uvoznih transakcij tudi aktivne in pasivne posle oplemenitenja kot tudi posle oplemenitenja, ki se izvajajo v prostih carinskih conah. Pri sistemu specialne trgovine zajema statistično območje le določen del ekonomskega območja države.

**Izvoz** zajema:

- blago, izvoženo iz Slovenije, ki izvira iz proizvodnje v naši državi oziroma iz notranjega blagovnega prometa;
- izvoz pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem odloga);
- izvoz pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem povračila);
- blago, začasno izvoženo zaradi oplemenitenja.

**Uvoz** zajema:

- blago, uvoženo v Slovenijo, ki je bilo sproščeno v prosti promet in deklarirano za domačo porabo;
- blago, uvoženo zaradi proizvodnje za izvoz (sistem odloga);
- blago, uvoženo zaradi proizvodnje za izvoz (sistem povračila);
- blago, uvoženo po oplemenitenju.

Statistika določa zajetje transakcij v zunanjetrgovinsko statistiko glede na vrsto carinskega postopka. Pri zajetju se v določeni meri upošteva tudi vrsta posla (njegove komercialne značilnosti). Carinski postopki so bili v letu 1996 v okviru nove carinske zakonodaje večinoma usklajeni s carinskimi postopki v EU. Zaradi nadaljnjega usklajevanja carinskih postopkov s carinskimi postopki v EU se od leta 2000 dalje ne spremlja več ločeno izvoz pridobljenih proizvodov po začasnem uvozu zaradi oplemenitenja; ta izvoz se zdaj spremlja skupaj z drugimi transakcijami v okviru izvoza pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem odloga). Podobno je tudi pri uvozu: blago, začasno uvoženo zaradi oplemenitenja, se od leta 2000 dalje ne spremlja več ločeno, temveč skupaj z drugimi transakcijami blaga, uvoženega zaradi proizvodnje za izvoz (sistem odloga).

Izvoz in uvoz na osnovi oplemenitenja in izvoz in uvoz z državami na ozemlju nekdanje Jugoslavije sta vključena v zunanjetrgovinske podatke Slovenije od leta 1992 dalje.

V statistiki zunanje trgovine ne upoštevamo začasnega uvoza in izvoza blaga, ki se bo v določenem času vrnilo v nespremenjenem stanju, storitev, popravil, denarja kot plačilnega sredstva, denarnega zlata, oskrbe tujih vozil z gorivom v naši državi in naših vozil v tujini, uvoza blaga za tuja veleposlaništva v Sloveniji, osebne prtljage potnikov, komercialnih vzorcev in poštnih pošiljk manjše vrednosti.

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*The source of data for external trade statistics are customs declarations. Until 1996 for different customs procedures different customs declarations were used. In the beginning of 1996 the Single Administrative Document (SAD), used in EU and other countries, was introduced. Data from customs declarations are reported to the Statistical Office by the Customs Administration of the Republic of Slovenia monthly on electronic media. Data refer to the last cumulative period and contain both new declarations for the last reporting month and all declarations for previous months, including changes since the last reporting. The Statistical Office receives only selected (not all) data from the Single Administrative Document in the predefined record format.*

*Statistical Office completes the data from the customs declarations with additional data and classifications required for trade statistics. At this process the recommendations of the Statistical Office of the United Nations are taken into consideration, from the aspect of data coverage as well as other methodological elements which determine the manner of presentation of external trade statistics with the aim of achieving maximum international comparability.*

### *Coverage*

*External trade statistics covers only **trade in goods** with foreign countries.*

*In Slovenia we monitor external trade statistics according to **the relaxed definition of the special trade system**; this means that besides regular export and import transactions also inward and outward processing as well as processing carried out in customs free zones are included. Under the special trade system the statistical territory comprises only a particular part of the economic territory of a country.*

***Exports** cover:*

- *all goods exported from Slovenia, originating from the production in Slovenia or from free circulation in internal market;*
- *export of compensating products after import for export production (suspension system);*
- *export of compensating products after import for export production (drawback system);*
- *temporary export for outward processing.*

***Imports** cover:*

- *all goods imported into Slovenia and released into free circulation and consumption;*
- *import for export production (suspension system);*
- *import for export production (drawback system);*
- *import after outward processing.*

*Statistics defines the coverage of external trade statistics by kinds of customs procedures. Commercial characteristics of transactions are also taken into consideration to a certain extent. In 1996 customs procedures were mostly harmonised with the EU customs procedures within the framework of the new customs legislation. Due to further harmonisation of customs procedures with the customs procedures in EU, from 2000 on export of compensating products after temporary import for inward processing is no longer monitored separately, but together with other transactions in the frame of export of compensating products after import for export production (suspension system). The situation is similar at imports: from 2000 on goods temporarily imported for inward processing are no longer monitored separately, but together with other transactions of goods imported for export production (suspension system).*

*Exports and imports on the basis of processing and exports and imports with the countries on the territory of former Yugoslavia have been included in external trade statistics of Slovenia since 1992.*

*External trade statistics does not cover: temporary imports and temporary exports of goods which will return after a certain period in unchanged condition, services, repairs, money in circulation, monetary gold, fuel supply of foreign cars in Slovenia and Slovenian cars abroad, imports of goods for foreign embassies in Slovenia, personal baggage of travellers, commercial samples and postal packages of minor value.*

## Definicije in pojasnila

**Statistična vrednost blaga** temelji na carinski vrednosti, tj. na transakcijski vrednosti blaga. Fakturna vrednost se preračuna na pariteto franko slovenska meja, tako da se fakturni vrednosti v celoti ali delno prištevajo ali se od nje odštevajo stroški prevoza, natovarjanja in zavarovanja glede na prikazano pariteto dobave v pogodbi. Statistična vrednost izvoženega blaga je prikazana po pariteti tipa FOB, statistična vrednost uvoženega blaga pa po pariteti tipa CIF. Tako definirane izvozne in uvozne vrednosti se preračunajo po tekočih tečajih, ki veljajo na dan predložitve carinske deklaracije oziroma na drug datum, ki je posebej določen za izvajanje carinskih predpisov. Vrednostni podatki o izvoženem in uvoženem blagu se objavljajo v nacionalni valuti (tolarjih) in v evrih.

Kot trgovinska partnerica **je pri izvozu** prikazana **namembna država, pri uvozu** pa **država porekla**. Kadar ta ni znana, je pri uvozu prikazana država, od koder je blago prispelo, pri izvozu pa država, kamor je blago naslovljeno, in sicer vedno zadnja še znana država.

**Namembna država** je tista, v kateri je blago dano v notranji promet za uporabo ali nadaljnjo predelavo.

**Država porekla** je tista, v kateri je bilo blago proizvedeno. Za blago, ki je bilo predelano ali obdelano drugje, kot je bilo proizvedeno, je kot država porekla prikazana država, v kateri je bila opravljena predelava.

Podatki o izvozu in uvozu blaga **po področjih, podpodročjih in oddelkih Standardne klasifikacije dejavnosti (SKD),** ki temelji na klasifikaciji dejavnosti EU (NACE Rev. 1), so bili prvič objavljeni v Statističnem letopisu 1998**.** Podatki v tabelah 24.3.1 in 24.3.2 so **prikazani po pripadnosti proizvodov v dejavnost,** in ne po dejavnosti podjetja oziroma organizacije, ki je te proizvode izvozila ali uvozila.

Blago je klasificirano po **Standardni mednarodni trgovinski klasifikaciji** Združenih narodov (SMTK). Podatke obdelujemo po omenjeni klasifikaciji že od leta 1953. Od 1. 1. 1988 se uporablja SMTK, 3. revizija.

Podatki **o namenu porabe izvoženih in uvoženih proizvodov** so prikazani **po nacionalni statistični klasifikaciji**, ki ni usklajena s klasifikacijo Združenih narodov o končni porabi proizvodov. Namen porabe se določa za vsak proizvod statistične klasifikacije po načelu pretežnosti.

Podatki **o stopnji predelave izvoznih in uvoznih proizvodov** so prikazani glede na to, ali so proizvodi pridobljeni neposredno iz narave, ali so samo pripravljeni za nadaljnjo predelavo, ali pa gre za proizvode z visoko stopnjo predelave, predvsem take za investicije in za široko porabo.

**Dopolnitve in popravke podatkov** vključujemo v mesec opazovanja po datumu prejema deklaracije. Letne podatke objavljamo dvakrat: prvič kot začasne v rednem časovnem presledku, drugič kot končne (v juliju za prejšnje leto). V letopisu so prikazani le končni letni podatki.

**Vrednosti izvoza in uvoza objavljamo v dveh različicah, v tolarjih in evrih.** Zunanjetrgovinske podatke smo začeli objavljati v evrih z letom 2002. Razlog za to spremembo je predvsem valutna struktura slovenskega izvoza in uvoza, saj velika večina transakcij poteka v evrih. V Letopisu je serija podatkov v evrih (ekujih) prikazana od leta 1999 dalje, razen tabele 24.1. Izjemoma v tabeli 24.1 ohranjamo dolgoletno serijo podatkov v dolarjih, ker bi bili podatki v nacionalni valuti zaradi sprememb v metodologiji preračunavanja zneskov iz tujih valut v nacionalno valuto zelo slabo primerljivi. Dolarski podatki v tej seriji so do leta 1986 prikazani po letni (statistični) tečajni listi, od leta 1987 dalje pa po tekočih tečajih. Od leta 1992 dalje je dodana še časovna serija v evrih (ekujih). Podatki za leta 1992–1995 v tej seriji so preračunani v ekuje prek povprečnih letnih tečajev na ravni skupnega izvoza in uvoza. Podatki od leta 1996 dalje pa so preračunani v evre (ekuje) po tekočih tečajih na ravni transakcij.

Seštevki se zaradi zaokroževanja ponekod ne ujemajo.

## *Definitions and explanations*

***The statistical value of goods*** *is based on the customs value, i.e. on the transaction value of goods. Invoice value is recalculated on the value at Slovenian border by adding or subtracting on whole or in part costs of transport, loading, unloading and insurance, depending on terms of delivery set down in the contract. The statistical value of exported goods is thus FOB-type valuation and the statistical value of imported goods is CIF-type valuation. Thus defined statistical values of exported and imported goods are recalculated to the current exchange rates valid on the day of submission of the customs declaration, or, if this date is not used for implementing customs regulations, on the date which is specially stated for this purpose. Value of exported and imported goods is published in the national currency (tolars) and in euros.*

*As a trading partner country* ***in exports the country of destination*** *is shown, and* ***in imports the country of origin****. In cases where the country of origin or destination is unknown, for imports we show the country from where the goods arrived, and for exports the country to which the goods were dispatched, always the most distant known country.*

***The country of destination*** *is the country in which the goods are released into free circulation for consumption or further processing.*

***The country of origin*** *is the country in which goods were produced. For goods that were not processed in the country where they were produced, the country where the processing took place is shown.*

*Data on exports and imports* ***by sections, subsections and divisions of the Standard Classification of Activities (SCA)****, which is based on the EU classification of activities NACE Rev. 1, were for the first time published in the 1998 Statistical Yearbook. Data in Tables 24.3.1 and 24.3.2 are* ***shown according to the activity to which the products belong*** *and not according to the activity of the enterprise or organisation which exported or imported the products.*

*Goods are classified according to the* ***Standard International Trade Classification (SITC)*** *of the United Nations. We have been processing data according to this classification since 1953. Since 1 January 1988 SITC - Rev. 3 has been used.*

***Exports and imports by end-use*** *are presented according* ***to the national statistical classification,*** *which is not harmonised with the Classification by Broad Economic Categories of the United Nations. The end-use of each product in the national statistical classification is determined according to the principle of predominance.*

***The stage of processing of export and import products*** *is shown according to whether the products were obtained directly "from nature" or simply prepared for further processing, or whether the products concerned have a high level of processing, which includes mainly capital goods and consumption goods.*

***Supplements and data corrections*** *are included in the month of observation according to the date of submission of the customs declaration. Annual data are published twice: the first time as provisional data with the regular delay and the second time as final data (in July for the previous year). In the Yearbook only final annual data are shown.*

***The values of exports and imports are published in two variants: in tolars and in euros.*** *We started publishing external trade figures in euros in 2002. The main reason for this change is the currency structure of Slovenian exports and imports; the great majority of transactions is carried out in euros. In the Yearbook the series of data in euros (ecus) are shown from 1999 on with the exception of table 24.1. In Table 24.1 we have exceptionally retained long time series in US dollars, since data in the national currency would be poorly comparable because of the changes in the methodology of recalculating the values in the foreign currencies into the values in the national currency. Until 1986 dollar data in this series are shown according to the annual (statistical) exchange rate list and since 1987 according to the current exchange rates. The time series in euros (ecus) is added from 1992 on. In this series data for 1992-1995 are recalculated to ecus according to the annual average exchange rates at the total exports and imports level. Since 1996, data are recalculated to euros (ecus) according to the current exchange rates at the transaction level.*

*In some cases the totals do not agree with data due to rounding.*

## INDEKSI POVPREČNIH VREDNOSTI ZUNANJE TRGOVINE

### METODOLOŠKA POJASNILA

#### Viri in metode zbiranja podatkov

Vir podatkov za indekse povprečnih vrednosti zunanje trgovine so osnovni statistični podatki zunanje trgovine.

#### Zajetje

V izračun indeksov povprečnih vrednosti zunanje trgovine je vključeno vse blago, določeno z devetmestno šifro nomenklature carinske tarife, ki je v statistiko zunanje trgovine zajeto po specialnem sistemu, razen izvoza in uvoza blaga, ki po Standardni mednarodni trgovinski klasifikaciji sodi v sektor 9 Drugo blago in transakcije. Ta sektor je izločen zato, ker vsebuje zelo raznorodne skupine blaga, njihov vrednostni delež pa ne presega enega odstotka skupne vrednosti izvoza ali uvoza blaga v določenem obdobju. Do vključno leta 1999 so bili iz izračuna izključeni tudi posli oplemenitenja.

V nadaljnjem postopku računanja indeksov povprečnih vrednosti zunanje trgovine so izločeni še posamezni dokumenti, razvrščeni v isto šifro nomenklature carinske tarife, pri katerih ni podatka o količini ali vrednosti oz. je vrednost neznatna, dokumenti, katerih povprečna vrednost je zunaj intervala "povprečna vrednost za blago v opazovanem obdobju +/-2 standardna odklona", nekateri proizvodi, ki niso primerni za izračun indeksov, in tiste šifre nomenklature carinske tarife, pri katerih razmerje med povprečno vrednostjo blaga v baznem letu in povprečno vrednostjo blaga v tekočem letu ni v dovoljenih mejah.

Meje, v katerih naj bi bila izračunana razmerja med povprečno vrednostjo blaga v baznem letu in povprečno vrednostjo blaga v tekočem letu še sprejemljiva, se določajo izkustveno in so v skladu z mednarodno prakso.

Končna vrednost proizvodov, ki so zajeti v izračunu indeksov povprečnih vrednosti zunanje trgovine, znaša v posameznih obdobjih približno 90 odstotkov izvoza in uvoza.

#### Definicije in pojasnila

**Indeksi povprečnih vrednosti zunanje trgovine so izračunani iz vrednosti v tolarjih in evrih po tekočih tečajih**, ki veljajo na dan carinjenja izvoza oz. uvoza blaga.

Indeksi povprečnih vrednosti zunanje trgovine, izračunani iz podatkov v tolarjih, izražajo tudi spremembe vrednosti tolarja v primerjavi z drugimi valutami, indeksi povprečnih vrednosti, izračunani iz podatkov v evrih, pa spremembe medvalutnih razmerij.

**Povprečna vrednost blaga** je skupna vrednost vsega blaga (ne cena določenega blaga), ki je uvrščeno v isto devetmestno šifro nomenklature carinske tarife, izračunana na količinsko mersko enoto (kilogram). Kadar v eno šifro nomenklature carinske tarife ni uvrščen en sam homogen proizvod, temveč več proizvodov različnih vrst ali različnih kakovosti, lahko relativna sprememba povprečne vrednosti izraža tako spremembo cene kot spremembo sestave ali kakovosti blaga. Ne glede na to so agregirani indeksi povprečnih vrednosti zunanje trgovine, izračunani za širše skupine blaga, primerni za statistično spremljanje gibanja cen v zunanji trgovini in kot deflatorji.

Indeksi povprečnih vrednosti zunanje trgovine so izračunani kot **verižni indeksi** po **Laspeyresovem (uteži so količine iz baznega leta), Paaschejevem (uteži so količine iz tekočega leta) in Fisherjevem** obrazcu (geometrično povprečje obeh). Objavljamo jih kot **Fisherjev indeks**.

## *EXTERNAL TRADE UNIT VALUE INDICES*

### *METHODOLOGICAL EXPLANATIONS*

#### *Sources and methods of data collection*

*The source of data for external trade unit value indices are the basic statistical data on external trade.*

#### *Coverage*

*The calculation of external trade unit value indices includes all goods - determined with a nine-digit code of the customs tariff nomenclature - covered by external trade statistics according to the special trade system, with the exception of exports and imports of goods classified into section 9 of the Standard International Trade Classification (Commodities and transactions n.e.c.). This section, whose share of value is less than 1% of the total value of exports or imports in a certain period, is excluded because it contains very heterogeneous groups of goods not suitable for index calculation. Prior to 2000 also processing was excluded from index calculation.*

*In further procedure of calculating the unit value indices some individual documents are eliminated, i.e. those - classified in the same code number of the customs tariff nomenclature - which are lacking data on quantity or value or the value is very small, those whose unit value exceeds the interval "unit value for the commodity in the reference period +/- 2 standard deviations", some products not suitable for index calculation and those codes of the customs tariff nomenclature whose price relatives fall outside the allowed limits.*

*The range limits of the still acceptable price relatives are set on the basis of experience and agree with international praxis.*

*The final value of products covered in the calculation of the unit value indices, in individual periods, amounts to about 90 percent of exports and imports.*

#### *Definitions and explanations*

***External trade unit value indices are calculated from values in tolars and euros at current exchange rates** valid on the day of customs clearance of export or import of goods.*

*External trade unit value indices calculated from values in tolars reflect also changes in the value of tolar in comparison with other currencies, while unit value indices calculated from values in euros reflect changes in the intercurrency relations.*

*The **unit value** is the average value (not the price of a determined product) per quantity unit (kg) of all products classified under the same nine-digit code of the customs tariff nomenclature. In cases when not only one product but more products of various kinds or various quality are classified into one code of the customs tariff nomenclature, the relative change of the unit value can reflect the change of price as well as the change of composition or quality of goods. Irrespective of this, the aggregated external trade unit value indices, calculated for larger groups of goods, can be used as approximate estimates of price development in external trade and as deflators.*

*The unit value indices are calculated as **chain indices** by the **Laspeyres (the weights are quantities from the base period), Paasche (the weights are quantities from the current period) and Fisher** formulas (the geometrical average of both)**.** They are published as the **Fisher index.***

# 25. TRGOVINA

# DISTRIBUTIVE TRADE

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Podatke o podjetjih in drugih organizacijah, ki opravljajo trgovinsko dejavnost, ter o prodajalnah in poslovanju v dejavnosti trgovine na drobno in trgovine na debelo zberemo četrtletno z rednimi statističnimi poročili (vrednost prodaje, število zaposlenih in število prodajaln). Opazovana enota je vsak poslovni subjekt ali le njegov del (podjetje, družba, podjetnik posameznik), ki se ukvarja s trgovinsko dejavnostjo. Poročajo podjetja, katerih dejavnost je trgovina, in podjetja, ki se sicer ukvarjajo z drugimi dejavnostmi, vendar se podatki vedno nanašajo na tisti del njihove dejavnosti, ki se lahko uvršča v trgovino. Vir podatkov je računovodska in kadrovska evidenca podjetij, izjemoma tudi njihova ocena.

### Zajetje

Trgovinska dejavnost obsega od 1996 področje G iz Standardne klasifikacije dejavnosti razen skupin Popravila izdelkov široke porabe, Vzdrževanje in popravila motornih vozil, Posredništvo ter razreda Trgovina na drobno na tržnicah in stojnicah. Tudi storitve (posredništvo in dajanje predmetov v najem in zakup), opravljene v blagovnem prometu, niso zajete. Tako opredeljeno področje opazovane dejavnosti je primerljivo s stanjem pred 1996.

Do leta 1992 je bilo zajetje poročevalskih enot praviloma popolno. Od 1993 do 1996 smo v raziskovanje zajeli le podjetja[1)] z najmanj dvema zaposlenima. Vključno od leta 1997 se podatki zbirajo s pomočjo vzorca, nato pa jih z uteževanjem povečamo na celotno opazovano dejavnost. Ker smo v letu 2000 spremenili metodologijo uteževanja, smo zaradi primerljivosti serije popravili podatke za leta 1997-1999.

Podatke za leto 2002 smo pridobili iz vzorca vprašanih podjetij in jih povečali na vso opazovano populacijo, tako da smo jih utežili glede na neenako verjetnost izbora in manjkajoče odgovore. Uteževanje je potekalo po stratumih, ki so bili definirani s trimestno šifro klasifikacije dejavnosti in z velikostnim razredom podjetja. Prikazani rezultati tako predstavljajo vso opazovano populacijo.

Vzorčna podjetja smo izbrali iz okvira 11 690 podjetij, med katerimi je bilo 457 t. i. velikih podjetij. Stratume smo določili na podlagi dejavnosti in velikostnega razreda podjetja. V vzorec so bila vključena vsa velika podjetja, med preostalimi pa je bila stratumska porazdelitev določena optimalno glede na varianco prihodka, ki so ga podjetja ustvarila v letu 2001. V letu 2002 smo vzorec rotirali in osvežili z novimi podjetji, ki so bila registrirana v letu 2001. V končni vzorec za leto 2002 je bilo tako vključenih 3 799 podjetij.

### Definicije in pojasnila

**Trgovina na debelo** je nakupovanje blaga za nadaljnjo prodajo in nadaljnja prodaja tega blaga trgovcem, predelovalcem ali velikim porabnikom doma ali v tujini. Blago se lahko prodaja nespremenjeno ali po obdelavi, pakiranju, prepakiranju (kar je značilno za trgovino na debelo).

**Trgovina na drobno** je nakupovanje blaga ter nadaljnja prodaja tega blaga končnim porabnikom (za osebno porabo in potrebe gospodinjstev) ali drugim, ki nabavljeno blago uporabljajo za opravljanje dejavnosti pod določenimi pogoji.

**Vrednost prodaje (prodaja)** je prihodek in davek na promet blaga in storitev oziroma davek na dodano vrednost (DDV), ki je bil uveden v drugi polovici leta 1999. Prodaja je prikazana po tekočih cenah.

**Prihodek od prodaje blaga in materiala - kupcem zaračunana prodaja -** je skupni znesek, ki ga podjetje obračuna za prodajo blaga in materiala, ki sta bila v opazovanem obdobju prodana kupcem in za katera je bila izdana faktura. Vsebuje vse stroške in obremenitve, vezane na kupca, ne zajema pa prometnega davka (do konca prve polovice 1999), davka na dodano vrednost (od druge polovice 1999 naprej), prihodka od morebitne prodaje osnovnih sredstev ali drugih izrednih prihodkov. Prodaja na posojilo se šteje v mesec fakturiranja. Notranjih tokov v sestavljenih podjetjih ne spremljamo.

**Davek na dodano vrednost (DDV)** je vrednost izstopnega davka, prikazanega na izdanih računih in vračunanega v prodajno vrednost blaga, ki ga plača kupec. Pri prodaji do vključno prvega polletja 1999 pa je prikazan prometni davek, zaračunan kupcu, pri trgovini na debelo je vštet tudi davek na storitve.

1) Izraz 'podjetje' je v tem primeru splošno statistično poimenovanje za različne oblike poslovanja: družbo, podjetnika posameznika, zadrugo ...

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Data on enterprises and other organisations performing trading activities, sales outlets, retail trade and wholesale trade turnover are compiled quarterly with regular statistical reports (turnover, persons in paid employment, sales outlets). Observation units are business subjects or their parts (enterprise, company, individual private entrepreneur) which are engaged in trading. Reporting units are enterprises whose activity is trade and enterprises engaged in other activities, but data always refer to that part of their activity which can be classified as trading. Data sources are accounting and personnel records of enterprises and only exceptionally their estimates.*

### *Coverage*

*Since 1996 trade covers section G of the Standard Classification of Activities, except the following groups: Repair of personal and household goods, Maintenance and repair of motor vehicles and Wholesale on a fee or contract basis, the class Retail sale via stalls and markets, and services performed in transport of goods (intermediation, leasing). This way the observed activity is comparable with the situation before 1996.*

*Until 1992 we used full coverage of reporting units. Between 1993 and 1996 we covered only enterprises[1)] with at least two persons in paid employment. Since 1997 the data are collected on the sample basis and by weighting grossed to the total phenomenon. Due to the changed weighting methodology in 2000 and comparability of series the data for 1997-1999 are revised.*

*We obtained the data for 2002 from the sample of enterprises and grossed them to the total observed population. We weighted them due to unequal probability of selection and non-response. Weighting was performed by strata, which were defined with a three-digit code of the activity classification and enterprise size. The shown data thus represent the total observed population.*

*Enterprises included in the sample are selected from the sampling frame of 11,690 enterprises, of those 457 large ones. Strata were defined on the basis of activity and size of the enterprise. The sample covered all large enterprises, while for other enterprises stratum allocation depended on the variance of turnover created by enterprises in 2001. In 2002 we updated the sample with new enterprises registered in 2001. The final sample for 2002 covered 3,799 enterprises.*

### *Definitions and explanations*

***Wholesale** is purchase of goods for further sale to merchants, processors or big customers in Slovenia or abroad. Goods can be sold unchanged or after processing, packing or re-packing characteristic for wholesale.*

***Retail trade** is purchase of goods for further sale to final users (for personal and household use) or to others who use purchased goods for performing activity under certain conditions.*

***Value of sale** is in our case turnover and turnover tax or value added tax (implemented in the second half of 1999) on goods and services. Sale is shown at current prices.*

***Turnover from sale of goods and material - sale charged to buyers -** is value of goods which were sold in the observed period to buyers and for which invoices (or some other accounting documents) were issued. It includes all costs and charges linked to the buyer and excludes the turnover tax or the value added tax, eventual sale of fixed assets and other extra income. The sale on loan is registered in the month of invoicing. Internal sale in composite enterprises is not taken into account.*

***Value added tax (VAT)** represents the value of VAT from the invoices issued to buyers. The value of sale before the second half of 1999 includes the turnover tax, charged to buyers, while in wholesale the service tax is included in the turnover tax.*

1) *Enterprise in this case is a general statistical term for various forms of operation: company, individual private entrepreneur, co-operative, etc.*

**Pri neposrednem izvozu je prikazan prihodek od prodaje blaga in materiala**, ki ju je podjetje v svojem imenu in za svoj račun (brez posredovanja drugih) prodalo v tujino.

**V številu oseb**, ki so ob koncu četrtletja delale v trgovini na drobno in v trgovini na debelo, so upoštevane osebe, ki so izključno ali pretežno opravljale trgovinsko dejavnost, tudi upravni in administrativni delavci, sezonski delavci ter vajenci, s pogodbo o zaposlitvi ali brez nje.

**V številu prodajaln na koncu četrtletja** upoštevamo klasične in samopostrežne prodajalne, blagovne hiše, diskontne trgovine, bencinske črpalke, kioske in lekarne. Avtomatov, premičnih prodajaln, odprtih stojnic na živilskih trgih ali ulicah, raznih skladiščnih prostorov za razkladanje ipd. ter prodajaln v tujini ne štejemo. **Površina prodajnega prostora** je površina, na kateri se prodaja blago, vključno s površino izložb.

Pri podatkih o **prodajnem prostoru** in o priročnih skladiščih niso upoštevane enote, registrirane za opravljanje dejavnosti trgovina na drobno zunaj prodajaln in enote za popravilo izdelkov široke porabe. Pri računanju izvedenih podatkov so upoštevane le osebe, ki so delale v prodajalnah.

**Priročno skladišče** je prostor za shranjevanje zalog blaga, s katerimi se sproti nadomešča blago, ki je pošlo v prodajalni. Priročno skladišče je v prodajalni ali njeni neposredni bližini.

Od leta 1996 uporabljamo za prikaz rezultatov Standardno klasifikacijo dejavnosti (Ur. l. RS 34/94), ki je nadomestila Enotno klasifikacijo dejavnosti (Ur. l. SFRJ 6/76).

Podatki po 'glavni dejavnosti' so združeni v skupine glede na dejavnost enote, ki poroča o trgovski dejavnosti. Ker gre za področja, to je višje ravni združevanja, je primerljivost podatkov po obeh prej omenjenih klasifikacijah zadovoljiva.

Podatki po 'trgovinski dejavnosti' so združeni v skupine glede na dejavnost enote, na katero se podatki nanašajo. Če se poročani podatki nanašajo na več enot (npr. več prodajaln) z različnimi dejavnostmi, se dejavnost določi po pretežnosti ustvarjenega prihodka. Podatki po trgovinski dejavnosti so razčlenjeni do ravni razreda. Ti niso primerljivi s podatki pred letom 1996, zato je statistična vrsta podatkov pretrgana.

***Direct export** is income from goods and material which an enterprise sold abroad on its own behalf and account (without external intervention).*

***Number of persons** working in wholesale and retail trade at the end of the quarter includes persons exclusively or predominantly performing trade activity, including administrative service, seasonal workers, apprentices with or without employment contracts.*

***Number of stores at the end of the quarter** includes classical stores, self-service stores, department stores, discount stores, petrol stations, kiosks and pharmacies. Vending machines, mobile stores, open stalls on market places or streets, various warehouses for unloading etc. and stores abroad are not taken into account. **Sales area** is area on which goods are sold, including area of shop-windows.*

*The data on **sales premises** and on convenient storage areas do not include outlets registered for performing retail trade outside sales outlets and repair services of personal and household goods. In calculating related figures we take into consideration only persons employed in sales outlets.*

***Depository store** is a place for storing and supplementing goods sold in the shop. It is usually located in the shop or nearby.*

*Since 1996 we use the Standard Classification of Activities (OJ RS, No. 34/94) for showing distributive trade results. This classification replaced the old National Classification of Activities (Official Gazette of the Socialist Federal Republic of Yugoslavia, No. 6/76).*

*Data by the "basic activity" are grouped in view of the activity of the unit reporting on trade. Since sections, i.e. higher levels of grouping, are involved, data comparability by the aforementioned classifications is satisfactory.*

*Data by the "trading activity" are grouped in view of the activity of the unit to which they refer. In case they refer to several units (e.g. several sales outlets) with different activities, the activity is defined by the predominance of created income. Data by the trading activity are broken down to the level of class and are not comparable with data before 1996. The statistical data series is thus broken.*

## Omejitve

Ker so bili podatki od leta 1997 naprej zbrani z vzorcem, so vsi rezultati za omenjena obdobja le ocenjeni. Ocena je reprezantativna predvsem za višje ravni dejavnosti (agregate), to je za skupine dejavnosti, kot npr. trgovina na drobno z neživili, in za Slovenijo kot celoto. Na najnižji ravni posameznih dejavnosti pa lahko zaradi vsakoletne rotacije (zamenjave) vzorca pride do odstopanj in tako primerljivost rezultatov med posameznimi obdobji ni več zagotovljena.

## *Limitations*

*Since the data from 1997 on were obtained from the sample basis and grossed to the whole population, the results for these periods are estimated. Estimations are representative for higher activity levels (aggregates), e. g. retail trade with non-food and for the total Slovenia. Due to the yearly rotation of the sample the comparability of the results between the different periods of time on the lowest activity levels is poor.*

# 26. ODKUP

## METODOLOŠKA POJASNILA

### Metode zbiranja podatkov

Podatke o odkupu kmetijskih pridelkov pridobimo iz mesečnih poročil podjetij, zadrug in drugih organizacij, ki odkupujejo pridelke neposredno od zasebnih pridelovalcev, in tistih, ki prodajajo pridelke iz lastne pridelave.

### Zajetje

O **odkupu kmetijskih pridelkov** poročajo podjetja, zadruge, gozdna gospodarstva in druge organizacije, ki odkupujejo kmetijske pridelke od zasebnih pridelovalcev. V tem podatku niso zajete tiste količine kmetijskih pridelkov, ki jih zasebni pridelovalci prodajo neposredno večjim potrošnikom ali na prostem trgu (prodaja na domu, sejmih ali na živilskih trgih).

O **prodaji kmetijskih pridelkov** poročajo vse organizacije, ki prodane pridelke tudi same pridelajo (vsa kmetijska podjetja in druge organizacije, šole, zavodi itd.).

O **odkupu lesa iz zasebnih gozdov** poročajo zadruge in gozdnogospodarske organizacije.

O **dovozu kmetijskih pridelkov zasebnih pridelovalcev** na živilske trge poročajo podjetja in organizacije, ki o prodaji vodijo ustrezno evidenco. Po tej evidenci so v podatke za leto 2002 zajeti živilski trgi v Celju, Kopru, Kranju, Ljubljani, Mariboru, Murski Soboti, Novi Gorici, Novem mestu, Piranu, Tržiču in Velenju.

### Definicije in pojasnila

**Odkup skupaj** zajema odkup kmetijskih pridelkov in lesa od zasebnih pridelovalcev in prodajo kmetijskih pridelkov iz lastne pridelave podjetij, zadrug in drugih organizacij.

**Odkup od zasebnih pridelovalcev** je odkup kmetijskih pridelkov neposredno od zasebnih pridelovalcev prek pooblaščenih organizacij, ki pridelke odkupijo in prodajo naprej, lahko jih prej tudi predelajo. Kot odkup upoštevamo tudi vse količine pridelkov, ki jih dobijo organizacije od svojih kooperantov ali iz združene pridelave.

**Prodaja** zajema podatke o prodaji kmetijskih pridelkov iz lastne pridelave. K prodaji pa ne štejemo pridelkov, ki so bili kot surovine dani lastnim enotam za predelavo mleka ali grozdja, žganjarnam, sušilnicam sadja, pitališčem živine in perutnine. V tem primeru upoštevamo v podatkih o prodaji izdelke teh enot (mlečne izdelke, alkoholne pijače, suho sadje, pitano govedo itd.), ki so bili prodani.

V podatke o prodaji kmetijskih pridelkov ni od leta 1981 več vključena vrednost prodanega lesa (po metodoloških navodilih).

V vrednosti odkupa od zasebnih pridelovalcev kakor tudi v vrednosti prodaje je vštet davek, ki ga plača pridelovalec. V cenah oziroma vrednostih pridelkov niso upoštevani DDV in dodatki (subvencije in podpore), ki jih pridelovalci dobijo za določene pridelke.

# *PURCHASE*

## *METHODOLOGICAL EXPLANATIONS*

### *Methods of data collection*

*We collect data on the purchase of agricultural products with monthly reports. These are filled in by all enterprises, co-operatives and other organisations that sell products from their own production or purchase products directly from private producers.*

### *Coverage*

*Reports **on the purchase of agricultural products** are submitted by enterprises, co-operatives, forestry and other organisations that purchase agricultural products from private producers. These reports do not include the quantities of agricultural products sold directly to major consumers or on the free market (on the farm, on fairs and on food markets).*

*Reports on **the sale of agricultural products** are submitted by all organisations that sell agricultural products from their own production (all agricultural enterprises and other organisations, schools, institutes, etc.).*

*Reports **on the purchase of wood from private forests** are submitted by co-operatives and forest management organisations.*

*Reports on **the supply of the products of private producers** to food markets are submitted by enterprises and organisations that keep the relevant records of sales. In 2002 these records covered the food markets in Celje, Koper, Kranj, Ljubljana, Maribor, Murska Sobota, Nova Gorica, Novo mesto, Piran, Tržič and Velenje.*

### *Definitions and explanations*

***Total purchase includes:** purchase of agricultural products and wood from private producers and sale of agricultural products from own production of enterprises, co-operatives and other organisations.*

***Purchase from private producers** is the purchase of agricultural products directly from private producers through authorised organisations, which sell them further (they can process them first). All quantities of products obtained by organisations from their co-operators or from joint production are also considered as purchases.*

***Sale** covers data on the sale of agricultural products from own production. Not considered as sale is the giving of raw materials to own distilleries, fruit drying operations, plants for the fattening of livestock and poultry, and units for the processing of milk or grapes. In this case only the products of these units (e.g. dairy products, alcoholic drinks, dried fruit, fattened cattle, etc.) are considered as sale.*

*In accordance with the methodological explanations, since 1981 sales no longer include the value of sold wood.*

*The tax paid by the producer is included in the value of purchases from private producers as well as in the sale. Prices and value do not include VAT (subsidies and supports), which producers obtain for certain products.*

# 27. GOSTINSTVO IN TURIZEM

# *HOTELS AND RESTAURANTS, TOURISM*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Osnovne podatke **o poslovanju v gostinstvu** pridobivamo od podjetij, družb in organizacij (pravnih oseb) in tudi od podjetnikov posameznikov (fizičnih oseb). V teh podatkih niso upoštevani občani, ki oddajajo sobe.

Podjetja, družbe in organizacije (pravne osebe) so nam do leta 1998 svoje podatke sporočali četrtletno, podjetniki posamezniki (fizične osebe) pa letno. Od leta 1999 vsi poročajo mesečno.

Podatki za leta 1999, 2000, 2001 in 2002 (tabeli 27. 2 in 27.3) so tako rezultat mesečnega statističnega spremljanja prihodka v gostinstvu in števila oseb, ki delajo v tej dejavnosti. Opazovana enota je praviloma podjetje, ki je po glavni dejavnosti uvrščeno v gostinstvo.

Podatke **o zmogljivostih nastanitvenih objektov** (število sob in ležišč) **ter o prihodih in prenočitvah turistov** nam mesečno sporočajo podjetja, družbe in druge organizacije, ki turistom nudijo nastanitev ali jim to storitev samo posredujejo, in tudi občani, ki oddajajo zasebne turistične sobe. Poročila o prihodih in prenočitvah najpogosteje sestavljajo recepcijske službe po svojih evidencah.

### Zajetje

Do leta 1992 so bila vsa raziskovanja **o poslovanju v gostinstvu** (tabela 27.1) zasnovana na popolnem zajetju. V praksi pa to ni bilo povsem izvedljivo in so nekateri obrati (zlasti zasebni) ostajali zunaj raziskave.

Z letom 1993 smo - zaradi težav pri zajemanju podatkov čedalje številčnejših enot - v letnem raziskovanju obratovalnic (vprašalnik GO-11a) (podatki za leto 1992) prešli na enostavni naključni izbor poročevalskih enot. Pri podatkih za leta od 1992 do 1996 in za 1998 je ta izbor zajel 10 % enot. V podatke za leto 1997 so bili v raziskovanje zajeti vsi registrirani gostinski obrati podjetnikov posameznikov (brez občanov, ki oddajajo sobe). Odgovorilo je 64,2 % vprašanih enot. Rezultati odgovorov so prikazani v tabelah. Podatki za leto 1998 so ocenjeni.

Rezultati torej zaradi nepopolnega zajetja ne prikazujejo celotne mreže obratovalnic niti celotnega obsega gostinskih storitev. Tudi zajem podjetij, družb in organizacij (pravnih oseb) ni popoln, saj zasebna podjetja niso poročala redno. Ocenjujemo, da je v rezultate zajeta le četrtina manjših zasebnih podjetij. Za pravilno razumevanje objavljenih rezultatov je zato treba upoštevati tudi ta pojasnila.

Podatke za leta 1999, 2000, 2001 in 2002 (tabeli 27.2 in 27.3) smo pridobili iz vzorca vprašanih podjetij. V raziskovanje zajeta vzorčna podjetja (za leto 1999 950 podjetij, za leto 2000 955 podjetij, za leto 2001 1 176 podjetij in za leto 2002 1 198 podjetij) so bila izbrana izmed 5 290, 5 271, 5 294 oziroma 5 267 potencialnih opazovanih enot, ki predstavljajo celotno populacijo. Vzorec je razdeljen na stratume po dejavnosti in po velikostnem razredu podjetij.

Podatki **o zmogljivostih nastanitvenih objektov** (število sob in ležišč), **o prihodih in prenočitvah turistov** temeljijo na popolnem zajetju.

### Definicije in pojasnila

**Gostinski obrat** je gostinsko podjetje, družba ali organizacija oziroma vsaka gostinska enota podjetja, družbe ali organizacije, ki v poslovnem, gradbenem in funkcionalnem pogledu sestavlja celoto; prav tako je gostinski obrat tudi taka enota podjetnika posameznika. Po vrsti gostinskih storitev, ki jih nudijo, po tehnični opremljenosti in po načinu strežbe se gostinske enote delijo v posamezne vrste obratov (hotele, motele, restavracije ...), kot jih opredeljuje Zakon o gostinstvu.

Med **zaposlene osebe v gostinski dejavnosti** štejemo tiste, ki so sklenile delovno razmerje za nedoločen ali določen čas (tudi v upravi); ne štejemo pa učencev v gospodarstvu in tistih zaposlenih, ki so s polnim delovnim časom zaposleni drugje in za katere je delo v gostinstvu le njihova dopolnilna zaposlitev; prav tako ne upoštevamo samostojnih gostincev in pomagajočih družinskih članov, ki nimajo statusa zaposlene osebe.

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*Basic data on **business results in hotels and restaurants** are collected from enterprises, companies and organisations (legal persons) and from independent operators (natural persons). Letting of rooms is not included in the published data.*

*Until 1998 enterprises, companies and organisations (legal persons) reported quarterly, while independent operators (natural persons) reported annually. From 1999 on they all report monthly.*

*Data on 1999, 2000, 2001 and 2002 (tables 27.2 and 27.3) are the result of monthly statistical observation of turnover and persons working in hotels and restaurants. Observation units are, as a rule, enterprises whose principal activity is classified in the activity of hotels and restaurants.*

*Data on **capacity of accommodation establishments** (number of rooms and beds) **and data on tourist arrivals and overnight stays** are obtained monthly from enterprises, companies and organisations offering accommodation to tourists or providing such service as an agency, as well as from individuals who let private rooms. The reports are usually compiled from the reception records.*

### *Coverage*

*Until 1992 the coverage in the surveys on **business results in hotels and restaurants** (table 27.1) was complete, although for practical reasons a certain number of private hotels and restaurants (independent operators) were omitted.*

*Due to difficulties with collecting data of ever more units, the coverage of the Annual Survey of Private Units (GO-11a) in 1993 (data for 1992) was based on a simple random selection of reporting units. In the data for 1992 to 1996 and for 1998 that selection covered only 10% of the units. For 1997 the survey again included all registered hotels and restaurants owned by independent operators (excluding individuals who let private rooms). The response rate was 64.2%. Results of respondents are shown in tables. Data for 1998 are estimated.*

*Due to incomplete coverage, the results do not show the existing network of hotels and restaurants, neither do they show the overall extent of their services. The coverage of enterprises, companies and organisations (legal persons) is also not complete since private enterprises do not report regularly. We estimate that the results cover only a quarter of small private enterprises. Therefore, for correct understanding of published results, these explanations should be taken into account.*

*Data for 1999, 2000, 2001 and 2002 (tables 27.2 and 27.3) were obtained from the sample of enterprises. The surveyed enterprises (950 enterprises for 1999, 955 enterprises for 2000, 1,176 enterprises for 2001 and 1,198 enterprises for 2002) were selected among 5,290, 5,271, 5,294 or 5,267 potential observation units, which represents the whole population. The sample is divided into strata by activities and size of enterprises.*

*Data on **capacity of accommodation establishments** (number of rooms and beds) and data on **tourist arrivals and overnight stays** are based on full coverage.*

### *Definitions and explanations*

***Hotels and restaurants** are enterprises, companies and organisations providing services of hotels and restaurants or units of enterprises, companies and organisations providing services of hotels and restaurants and forming a whole in the business, construction and functional sense, as well as private hotels and restaurants. According to the type of service offered and technical facilities, hotels and restaurants are divided into individual types of units (hotel, motel, restaurant, etc.) according to the Catering Act.*

*Included among **persons in paid employment in hotels and restaurants** are persons who have signed an employment contract for an unlimited or a fixed period (including persons employed in administration); not included among those persons are apprentices and employed persons who work full time elsewhere and who are additionally employed in the hotel or restaurant. Also excluded are independent hoteliers and restaurant owners and their family members who help out but who do not have the status of employed persons.*

V številu **sedežev** upoštevamo sedeže v objektu in zunaj njega.

*Data on **seats** include seats inside and outside a building.*

**Promet** (v tabeli 27.1) in **prihodek** (v tabelah 27.2 in 27.3) je skupni znesek, ki ga celotno podjetje obračuna za opravljene storitve (za prodajo blaga) v enem mesecu. Ne zajema davka na dodano vrednost, morebitne prodaje osnovnih sredstev in drugih izrednih dohodkov.

***Turnover** (tables 27.1, 27.2 and 27.3) is the total amount that the enterprises settled for performed services (sale of goods) in the month. It excludes the value added tax, eventual sale of fixed assets and other extra income.*

**Velikostni razred** podjetij določamo glede na število zaposlenih v njih: podjetja, v katerih dela do 50 oseb, obravnavamo kot mala, podjetja, v katerih dela od 51 do 250 oseb, kot srednje velika, podjetja z več kot 250 zaposlenimi pa kot velika.

***Size of the enterprise** is defined in view of the number of persons in paid employment. Enterprises with up to 50 employees are small, enterprises with 51 to 250 employees are medium-sized and enterprises with over 250 employees are large.*

**Število oseb, ki delajo** v podjetju. V ta podatek so zajeti vsi, ki dejansko delajo v opazovani enoti. Mednje štejemo poleg zaposlenih oseb tudi osebe, ki stalno ali občasno pomagajo v obratu npr.; lastniki, družabniki, pomagajoči družinski člani, honorarno zaposleni. Upoštevamo tudi osebe, ki delajo zunaj prostorov matičnega podjetja (osebje za dostavo blaga ...), osebe, ki so bile opazovane dni odsotne (bolniški, porodniški, plačani ali drugi dopusti), osebe, ki stavkajo, osebe, ki so zaposlene krajši čas od polnega, osebe, ki so na plačilnem seznamu, pa delajo doma, osebe, ki delajo sezonsko, pa tudi vajence in pripravnike. Ne štejemo pa oseb, ki sicer delajo v opazovanem podjetju, vendar jih je tja poslalo drugo podjetje (vzdrževalci, izvajalci popravil), in oseb na obveznem služenju vojaškega roka.

***Number of persons working in the enterprise** covers all persons who actually work in the observed unit. In addition to persons in paid employment, owners, co-owners and unpaid family members working in the enterprise are also included. Included are also all persons working outside the business premises of the enterprise (delivery personnel, etc.), persons on short-term absence during the observed week (sick leave, maternity leave, paid or other leave), persons on strike, persons working less than full time, persons on payroll working at home, seasonal workers, apprentices and trainees. Excluded are persons who work in the observed enterprise but who were sent there by another enterprise (maintenance workers, repairers) and persons on compulsory military service.*

**Stalna ležišča** so tista, ki so redno pripravljena za oddajanje turistom.

***Permanent beds** are those that are always prepared for letting to tourists.*

**Pomožna ležišča** so ležišča, ki naj bi gostom le povečala udobje (kavči, divani), in rezervna ležišča, s katerimi obrati v sezoni dopolnjujejo zmogljivosti. Skupna ležišča v planinskih domovih in kočah štejemo za pomožna ležišča.

***Temporary beds** are those that are intended only for greater comfort of tourists (couches, sofas, etc.) and reserve beds that are used for supplementing the capacity during the season. Collective beds in mountain huts are considered to be temporary beds.*

**Povprečno letno zasedenost ležišč** izračunamo po številu ležišč, ki so bila na voljo turistom v posameznih mesecih, povprečno zasedenost v avgustu pa po številu ležišč, ki so bila na voljo avgusta. Odstotek zasedenosti vseh ležišč (stalnih in pomožnih) izračunamo po naslednji formuli:

***Average yearly bed occupancy** is calculated according to the number of beds available to tourists in each month.The average bed occupancy in August is calculated according to the number of beds available to tourists in August. The percentage occupancy of beds is calculated for all beds (permanent and temporary) using the formula:*

$$\frac{\text{število prenočitev}}{\text{število ležišč x št. dni}} \times 100$$

$$\frac{\textit{No. of overnight stays}}{\textit{No. of beds x No. of days}} \times 100$$

**Turizem** je dejavnost oseb, ki potujejo v kraje zunaj svojega običajnega okolja in tam tudi ostanejo, vendar manj kot eno leto brez prekinitve, zaradi preživljanja prostega časa, sprostitve, poslov ali iz drugih razlogov.

***Tourism** are activities of persons travelling to and staying in places outside their usual environment for not more than one consecutive year for leisure, business and other purposes.*

**Turist** je oseba, ki v kraju zunaj svojega običajnega okolja prenoči vsaj eno noč (vendar manj kot eno leto) v gostinskem ali drugem nastanitvenem objektu zaradi preživljanja prostega časa, sprostitve, poslov ali drugih razlogov, če ti niso opravljanje dejavnosti, za katero prejme plačilo v obiskanem kraju. Turist je ob prihodu registriran v vsakem nastanitvenem objektu, v katerem se nastani, zato se lahko zgodi, da je med svojim bivanjem v nekem kraju/neki državi registriran tudi večkrat. V tej publikaciji so prikazani podatki o številu prihodov turistov.

***Tourists** are persons travelling to a place other than that of their usual environment, staying in a collective or private accommodation in the place/country visited at least one night but less than one year and whose main purpose of trip is other than the exercise of an activity remunerated from within the place visited. Tourists are registered on their arrival to any tourist accommodation where they spend the night, therefore it can happen that their registration in a place/country is multiplied. In this publication the data on tourist arrivals are presented.*

**Domači turist** je oseba s stalnim bivališčem v Sloveniji, ki začasno prebiva v kakem drugem kraju v Sloveniji ter tam prenoči vsaj eno noč v gostinskem ali kakem drugem nastanitvenem objektu zaradi preživljanja prostega časa, sprostitve, poslov ali iz drugih razlogov. Pred letom 1992 so bili k domačim turistom šteti tudi turisti iz vseh drugih republik nekdanje Jugoslavije.

***Domestic tourists** are persons with permanent residence in Slovenia who temporarily stay in some other place in Slovenia and in that place spend at least one night in a collective or private accommodation for leisure, business and other purposes. Data prior to 1992 included among domestic tourists all tourists from other countries of former Yugoslavia.*

**Tuji turist** je oseba, ki pride iz tujine in se začasno nastani v nekem kraju v Sloveniji ter tam prenoči vsaj eno noč v gostinskem ali kakem drugem nastanitvenem objektu zaradi preživljanja prostega časa, sprostitve, poslov ali iz drugih razlogov. Tujim turistom določamo pripadnost po potnem listu. Turisti iz nekdanje Jugoslavije so med tuje turiste šteti od leta 1992.

***Foreign tourists** are persons who come to Slovenia from abroad and temporarily stay in a certain place in this country where they spend at least one night in a collective or private accommodation for leisure, business and other purposes. We record the nationality of foreign tourists according to their passports. Since 1992 tourists from other countries of former Yugoslavia have been included among foreign tourists.*

**Prihodi turistov** v nastanitveni objekt so opredeljeni s številom oseb, ki prispejo v nastanitveni objekt in se tam prijavijo. Štejejo se vse osebe ne glede na starost, torej tudi otroci in tudi če so njihove prenočitve brezplačne.

***Tourist arrivals** are defined as a number of persons who arrive at a tourist accommodation and check in. No age limit is applied: children are counted as well as adults, even in the case when the overnight stays of children might be free of charge.*

**Prenočitev** je vsaka noč, ki jo turist dejansko preživi v nastanitvenem objektu (prespi ali se tam le zadržuje) ali ko je tam le prijavljen (njegova fizična navzočnost ni nujna). Število prenočitev se izračuna po

***An overnight stay** is every night that a tourist actually spends (sleeps or stays) or is registered (his/her physical presence there being unnecessary) in a collective accommodation establishment or in pri-*

državni pripadnosti turista glede na njegov potni list in po mesecu, v katerem je turist prenočil oz. prenočeval v turističnem objektu. Običajno se datum prihoda razlikuje od dneva odhoda. Oseba ne sme biti hkrati prijavljena v dveh nastanitvenih objektih.

**Turistični kraj.** Do avgusta 1998, ko je bil izdan Zakon o pospeševanju turizma (Ur. l. RS 57/98), v Sloveniji ni bilo splošnih predpisov o pogojih, ki bi jih kraji morali izpolnjevati, da bi dobili naziv turističnega kraja. Zato smo uporabili statistične definicije pojma turističnega kraja in merila za razvrstitev krajev v določene vrste.

Kot turistični kraj obravnavamo kraj, ki nudi:

- privlačne možnosti za bivanje (naravne lepote, zdravilni vrelci, kulturnozgodovinski spomeniki, kulturne, zabavne in športne prireditve itd.);
- komunikacijske možnosti (možnost dostopa, prometne zveze itd.);
- receptivne možnosti (namestitveni objekti s spremljajočimi trgovskimi, obrtniškimi, poštnimi in drugimi storitvenimi objekti, pa tudi parki, sprehajališča, kopališča ipd.).

Kraje, ki po omenjenih merilih sodijo med turistične, pa nadalje delimo v naslednje skupine:

- glavno mesto Slovenije - Ljubljana (Ta pritegne obiskovalce predvsem kot administrativno-politično središče države, nato pa s svojimi zgodovinskimi, etničnimi, gospodarskimi, urbanistično-arhitektonskimi in drugimi značilnostmi.)
- zdraviliški kraji (To so kraji, za katere je znanstveno, medicinsko ali izkustveno ugotovljen zdravilni učinek termalnih ali mineralnih voda ali drugih geološko-mineraloških sestavin. Sem spadajo klimatska, mineralna in termalna zdravilišča, ki imajo praviloma tudi ustrezne objekte za zdravljenje in rehabilitacijo obiskovalcev.)
- obmorski kraji (To so kraji vzdolž morske obale.)
- gorski kraji (Praviloma so to kraji, ki ležijo v nadmorski višini nad 500 metrov ali v teritorialnem območju gore.)
- drugi turistični kraji (To so kraji, ki so privlačni zaradi podnebnih razmer, kulturnozgodovinskih spomenikov ipd., kraji ob rekah in jezerih in drugi kraji, ki jih ne moremo uvrstiti med prej navedene.)
- drugi kraji (vsi drugi kraji, ki jih ne moremo uvrstiti v nobeno od prej navedenih skupin).

Od 1970 se podatki o številu gostinskih objektov in sedežev nanašajo na stanje 31. avgusta, podatki o zaposlenih osebah pa na stanje 30. septembra.

Podatki o številu zaposlenih oseb v tabeli 27.1 niso popolnoma usklajeni z ustreznimi podatki v drugih tabelah, ker so bili zajeti z drugim raziskovanjem.

V letih 1990 in 1991 so zasebna podjetja priključena k zasebni lastnini, od leta 1992 pa so kot zasebna lastnina obravnavani le podatki o obratovalnicah podjetnikov posameznikov (fizičnih osebah) v gostinstvu.

Podatki o prihodku za leta 1999, 2000, 2001 in 2002 (tabeli 27.2 in 27.3) so objavljeni v obliki indeksov, in sicer ločeno kot indeksi nominalnih in indeksi realnih vrednosti. Pri slednjih je izločena sprememba cen, tako da so nominalni indeksi deflacionirani z ustreznimi skupinami indeksov cen gostinskih storitev. Prikazani so po velikostnih razredih podjetij in glede na njihovo glavno dejavnost (na ravni sestavljenih skupin dejavnosti, za katere so podatki še reprezentančni).

*vate tourism accommodation. Overnight stays are calculated by country according to the passport of tourist and by month. Normally the date of arrival is different from the date of departure. A person should not be registered in two tourist accommodations at the same time.*

***Tourist resorts.** Until August 1998 - when the Promotion of Tourism Act was adopted (OJ RS, No. 57/98) - there were no general conditions that a place in Slovenia would have to meet in order to receive the title "tourist resort". Therefore, we used a statistical definition of the term tourist resort and of the criteria for classification of locations into different types.*

*Any place meeting the following specifications is considered to be a tourist resort:*

- *is attractive (natural beauty, health spas, cultural and historical monuments, cultural, entertainment and sporting events, etc.);*
- *has communications (ease of access, transport connections, etc.);*
- *has reception facilities (accommodation facilities and accompanying facilities providing trade, crafts and postal services as well as parks, promenades and bathing facilities, etc.).*

*According to these criteria, places are classified into the following types:*

- *The Slovenian capital - Ljubljana - attracts visitors mainly as an administrative and political centre, and also for its historical, ethnic, economic, town-planning, architectural and other features.*
- *Health resorts are places where the healing effect of thermal or mineral waters or other geological mineral components is medically or empirically proven. These include climatic, mineral water and thermal water health resorts which, as a rule, offer suitable facilities for healing and rehabilitation of visitors.*
- *Seaside resorts are places located along the sea coast.*
- *Mountain resorts are, as a rule, places lying more than 500 metres above sea level or in the territorial area of a mountain.*
- *Other tourist resorts are places with particularly attractive elements (e.g. climate conditions, cultural or historical monuments, etc.), riverside and lakeside areas and other places that cannot be classified among any of the places mentioned.*
- *Other places are all those places not falling within any of the above groups.*

*Since 1970 data on the number of hotels and restaurants and seats refer to 31 August, and data on the number of persons in paid employment to 30 September.*

*The data on the number of persons in paid employment in Table 27.1 do not fully conform with the relevant data in other tables since they were gathered by a different survey.*

*In 1990 and 1991 private enterprises were included within private property. Since 1992, however, only data on private units or individuals (natural persons) working in hotels and restaurants were treated as private property.*

*Results on turnover in 1999, 2000, 2001 and 2002 (tables 27.2 and 27.3) are published as two types of indices: as value indices and volume indices. In volume indices we eliminate the change of prices by deflating the value indices with corresponding groups of hotels and restaurants price indices. Indices are shown for large, medium-sized and small enterprises. Regarding the principal activity of the enterprise, data are published on the level of activity aggregates for which the data are still representative.*

2) Zaradi različnega zajetja obeh pravnoorganizacijskih oblik so nekateri podatki (zaposlene osebe, sedeži in promet) prikazani ločeno. Podatki o obratovalnicah se do 1996 in za 1998 nanašajo le na 10 %, v letu 1997 pa na 64,2 % registriranih obratovalnic (glede na skupno število). Podatek o ležiščih se nanaša na vsa ležišča (stalna in pomožna) po stanju na 31.8.
*Because of the different coverage of both legal organisational forms, some data (persons in paid employment, seats and turnover) are shown separately. Data of independent operators represent until 1996 and for 1998 only 10%, while for 1997 the coverage is 64.2% of all registered units (with regard to the total number). Data on beds refer to all beds (permanent and temporary) as of 31 August.*

## METODOLOŠKA POJASNILA

### Viri in metode zbiranja podatkov

Glavni viri podatkov so letni zaključni računi in bilance gospodarskih družb ter organizacij, letni podatki davčnih služb o poslovanju fizičnih oseb, statistična raziskovanja, davčne evidence, finančna statistika, plačilna bilanca Banke Slovenije in še nekateri drugi.

### Zajetje

V obračun so zajete vse dejavnosti v skladu s konceptom proizvodnje po Sistemu nacionalnih računov iz leta 1993 (SNR 93) in Evropskega sistema računov iz leta 1995 (ESR 95).

### Prikaz podatkov

Do leta 1992 so podatki o dodani vrednosti in bruto domačem proizvodu (BDP) prikazani po Standardni klasifikaciji dejavnosti na podlagi prevajalnika iz Enotne klasifikacije dejavnosti, od leta 1993 pa na podlagi podatkov o dejavnostih poslovnih subjektov, zajetih v Poslovnem registru Slovenije.

Osnovni agregati obračuna BDP po proizvodni metodi v tekočih cenah in o zaposlenosti so prikazani za obdobje 1980-2002.

BDP za obdobje 1990-2002 je prikazan po proizvodni in izdatkovni metodi v tekočih cenah. BDP za obdobje 1995-2000 je prikazan po proizvodni in izdatkovni metodi v stalnih cenah 1995, BDP za obdobje 2000-2002 pa v stalnih cenah 2000.

**Račun proizvodnje in račun oblikovanja dohodkov** po dejavnostih in institucionalnih sektorjih je prikazan za leta 2000, 2001 in 2002.

**Temeljni agregati nacionalnih računov** za obdobje 1990-2002 so prikazani v tekočih cenah, za obdobje 1995-2000 v stalnih cenah 1995 in za obdobje 2000-2002 v stalnih cenah 2000.

**Račun odnosov s tujino** (zunanje tekoče in kapitalne transakcije) je prikazan za obdobje 1990-2002.

Temeljni agregati in kategorije so vsebinsko in pojmovno usklajeni s SNA 93 in ESA 95.

### Primerljivost podatkov

Vsi podatki o BDP niso primerljivi. Primerljivi so podatki o BDP, ki se nanašajo na obdobje 1980-1999. Podatki tega obdobja pa **niso primerljivi** s podatki **za obdobje 2000-2002,** ker so bili ti **revidirani - v skladu z ESR 95 in SNR 93.** Metodološke spremembe so razložene v **poglavju Revizijia podatkov o BDP 2000.** Zaradi metodoloških uskladitev ocene dodane vrednosti po dejavnostih s SNR 93 in z ESR 95 so podatki o dodani vrednosti in zaposlenosti po področjih dejavnostih med letoma 1993 in 1994 slabše primerljivi. Metodološke uskladitve niso vplivale na raven ocene skupne dodane vrednosti in bruto domačega proizvoda.

Podatki o računu odnosov s tujino so s plačilno bilanco Banke Slovenije primerljivi od leta 1994 dalje - po uvedbi metodoloških dopolnitev in izboljšav Banke Slovenije v plačilni bilanci na podlagi 5. izdaje Priročnika plačilne bilance Mednarodnega denarnega sklada. Primerljivost podatkov za leti 1992 in 1993 je slabša. Podatki računa odnosov s tujino in plačilne bilance za leti 1990 in 1991 niso primerljivi, saj so v račun odnosov s tujino vključene tudi transakcije z državami na območju nekdanje Jugoslavije (z ostalo Jugoslavijo v letu 1990).

### Definicije in pojasnila

**Proizvodnja** je enaka vrednosti dokončanih proizvodov in opravljenih storitev od začetka do konca leta. Z letom 1994 je proizvodnja po panogah dejavnosti vrednotena v osnovnih cenah. V osnovnih cenah so iz vrednosti proizvodnje izločeni vsi davki na proizvode in storitve, vključene pa vse subvencije po proizvodih in storitvah. Proizvodnjo sestavljajo proizvodnja za trg, proizvodnja za lastno končno porabo in druga netržna proizvodnja (proizvodnja individualnih storitev države in

## *METHODOLOGICAL EXPLANATIONS*

### *Sources and methods of data collection*

*The main sources of data are annual final accounts and balance sheets of economic companies and organisations, annual data of tax authorities on operation of unincorporated enterprises and self-employed persons, basic statistical surveys, tax records, financial statistics, balance of payments of the Bank of Slovenia and other sources.*

### *Coverage*

*The calculation covers all activities following the concept of production by the 1993 System of National Accounts (SNA 93) and the 1995 European System of Accounts (ESA 95).*

### *Data presentation*

*Until 1992, the data on value added and gross domestic product (GDP) at the level of individual activities are shown by the Standard Classification of Activities (NACE Rev. 1) on the basis of conversion tables from the National Classification of Activities, and since 1994 on the basis of data from the Business Register of Slovenia.*

*For the 1980-2002 period, the main aggregates of the calculation of GDP by production approach at current prices and employment data are shown.*

*For the 1995-2002 period, GDP is shown by the expenditure and production approach at current prices. At constant 1995 prices GDP by production and expenditure approach is shown for the 1995-2000 period and for the 2000-2002 period at constant 2000 prices.*

***The production and generation of income account** by activities and for institutional sectors is given for 2000, 2001 and 2002.*

***The main aggregates of the system of national accounts** for the 1990-2002 period are shown at current prices, for the 1990-1995 period at constant 1992 prices, for the period 1995-2000 at 1995 prices and for the 2000-2002 period at constant 2000 prices.*

***Rest of the world account** (external current and capital transactions) is shown for the 1990-2002 period.*

*The main aggregates and categories are, as regards the contents and terminology, harmonised with SNA 93 and ESA 95.*

### *Data comparability*

*The data on GDP are comparable for the 1980-1999 period.* **For the 2000-2002 period revised data according to ESA 95 and SNA 93 standards are published. Data for these two periods are not comparable**. Methodological changes are explained in **GDP Revision 2000.** *Due to methodological harmonisation of the estimation of value added by activities with SNA 93 and ESA 95, the comparability of value added and employment by fields of activities between 1993 and 1994 is less favourable. Methodological harmonisation had no effect on the level of the estimation of total value added and gross domestic product.*

*Data of the rest of the world account are comparable with the balance of payments data of the Bank of Slovenia from 1994 on after methodological improvements and supplements of the balance of payments by the Bank of Slovenia on the basis of the International Monetary Fund's recommendations (Balance of Payments Manual, the fourth and fifth editions). For 1992 and 1993 the comparability of the rest of the world account with the balance of payments data is not as favourable. For 1990 and 1991, data of the rest of the world account and the balance of payments are not comparable as the rest of the world account includes also transactions with the countries of former Yugoslavia (rest of Yugoslavia in 1990).*

### *Definitions and explanations*

***Output** equals the value of finished products and performed services from the beginning to the end of the year. Since 1994 the output by fields of activities has been evaluated at basic prices, from which all taxes on products and services are excluded, but all subsidies on products and services are included. Output includes market output, output for own final use and other non-market output (output of individual non-market services produced by government and non-profit*

neprofitnih institucij storitev gospodinjstvom in proizvodnja kolektivnih storitev države).

**Vmesna poraba** je vrednotena v cenah kupcev kot vrednost proizvodov in storitev, ki jih posamezni proizvajalec nabavi zato, da proizvede druge proizvode in storitve. Vključeni so vsi proizvodi z življenjsko dobo, krajšo od enega leta, in proizvodi, ki so vredni do 300 ekujev in imajo daljšo življenjsko dobo, ter storitve tekočih popravil in vzdrževanja, ki ne povečujejo osnovne vrednosti in življenjske dobe osnovnih sredstev.

**Dodana vrednost v osnovnih cenah** je enaka proizvodnji v osnovnih cenah, zmanjšani za vmesno porabo v cenah kupcev. Dodana vrednost v osnovnih cenah je tudi enaka vsoti sredstev za zaposlene, plačanim drugim davkom na proizvodnjo, zmanjšanim za prejete druge subvencije za proizvodnjo, ter vsoti bruto poslovnega presežka in bruto raznovrstnega dohodka.

**Med davke na proizvode in storitve** so vključene vse carine in uvozne dajatve, prometni davki po proizvodih in storitvah, posebne dajatve na naftne derivate, cigarete, alkohol, igre na srečo in igralne avtomate ter davki na transakcije nepremičnin.

**Drugi davki na proizvodnjo** so davki, ki jih podjetja plačujejo za uporabo določenih osnovnih sredstev, in davki na delovno silo kot dejavnik proizvodnje.

**Subvencije po proizvodih in storitvah** so nepreklicna plačila državnih institucij tržnim proizvajalcem. Iz te kategorije so z letom 1994 izločene **druge subvencije,** s katerimi država subvencionira zaposlovanje.

**Bruto domači proizvod** je enak dodani vrednosti v osnovnih cenah, povečani za davke na proizvode in storitve in zmanjšani za subvencije po proizvodih in storitvah. Bruto domači proizvod je tako enak vsoti dodane vrednosti v osnovnih cenah vseh domačih (rezidenčnih) proizvodnih enot in neto davkov na proizvode in storitve (davki na proizvode in storitve, zmanjšani za subvencije po proizvodih in storitvah).

**Poraba fiksnega kapitala** je vključena v oceno BDP po podatkih zaključnih računov in bilanc podjetij in organizacij. V stanovanjski dejavnosti in v dejavnostih samozaposlenih oseb in nekorporativnih podjetij je poraba stalnega kapitala posebej ocenjena.

**Sredstva za zaposlene** so bruto plače, bruto nadomestila plač (boleznine do enega meseca in nadomestila plač med letnim dopustom, prazniki ipd.) in prejemki zaposlenih ter obvezni prispevek delodajalcev za socialno varnost zaposlenih. Osebne prejemke sestavljajo denarna nadomestila zaposlenim za hrano, prevoz na delo in z dela, regresi za letni dopust, vsa bruto plačila delodajalcev za pogodbene, začasne in enkratne zaposlitve. V obrambnih storitvah so vsi izdatki za prehrano vojakov sestavni del sredstev za zaposlene.

**Poslovni presežek** je rezidualna kategorija dodane vrednosti v finančnih in nefinančnih gospodarskih družbah ter v stanovanjski dejavnosti v okviru gospodinjstev. Kategorija je lahko prikazana kot neto ali bruto vrednost skupaj s porabo stalnega kapitala. V netržnih dejavnostih je bruto poslovni presežek enak obračunani porabi stalnega kapitala.

**Raznovrstni dohodek** je rezidualna kategorija v obračunu dodane vrednosti samozaposlenih oseb in nekorporativnih podjetij. Kategorija je lahko prikazana kot neto ali bruto vrednost skupaj s porabo stalnega kapitala.

**Zaposlenost** zajema vse stalno zaposlene osebe po domačem konceptu ter samozaposlene osebe v kmetijstvu in v drugih dejavnostih gospodinjstev.

**Izdatke končne potrošnje** sestavljata agregata **individualni izdatki za potrošnjo** in **kolektivni izdatki države za potrošnjo. Individualno potrošnjo** sestavljajo **izdatki za končno potrošnjo gospodinjstev, izdatki institucij neprofitnih storitev gospodinjstvom (NPISG) in individualni izdatki države**. Individualne izdatke države sestavljajo izdatki za netržne storitve države (izobraževanje, zdravstvo in socialno skrbstvo, kulturo, šport itd.) in izdatki za tržne proizvode in storitve (zdravila, ortopedski pripomočki, koncesijske pravice zasebnemu sektorju, storitve zdravilišč ipd.). **Kolektivni izdatki države** so izdatki za upravne, administrativne, obrambne, ekonomske, razvojno-raziskovalne in druge skupne netržne storitve države. Državni izdatki za netržne storitve in izdatki NPISG za končno

*institutions serving households and output of collective services produced by government).*

***Intermediate consumption** is given at purchaser's prices as the value of goods and services which are purchased by an individual producer in order to produce other goods and services. These comprise all products with the life time up to one year and value up to ECU 300 if life time is over one year, and services of current repair and maintenance which do not increase the value and life time of fixed assets.*

***Value added at basic prices** equals the output at basic prices, reduced by intermediate consumption at purchaser's prices. Value added at basic prices also equals the sum of compensation of employees, other taxes on production, less other subsidies on production, and the sum of gross operating surplus and gross mixed income.*

***Taxes on products** are all taxes and import duties, turnover taxes by goods and services, special duties on petrol, cigarettes, alcohol, gambling and slot machines, and taxes on real estate transactions.*

***Other taxes on production** are taxes which are paid by enterprises for the use of certain fixed assets, and taxes on labour force as production input.*

***Subsidies on products** are irrevocable payments to market producers, made by government institutions. Since 1994, **other subsidies on production** with which the government subsidises employment have been eliminated from this category.*

***Gross domestic product** equals value added at basic prices, increased by taxes on products, and reduced by subsidies on products. Gross domestic product thus equals the sum of value added at basic prices of all domestic (resident) production units and net taxes on products (taxes less subsidies on products).*

***Consumption of fixed capital** is in the estimation of gross domestic product taken from the data in final accounts and balance sheets of enterprises and organisations. In housing activity and in activities of self-employed persons and unincorporated individual enterprises of households, the consumption of fixed capital is estimated separately.*

***Compensation of employees** are gross wages, gross wage compensations (sick benefits up to one month and compensation of wages during annual vacation, holidays, etc.), personal allowances, and employers' social contributions. Personal allowances comprise expenses for food, transport to and from work, reimbursement for annual vacation, all gross payments of employers for contract, temporary or part-time employment. In defense services all expenditure on soldiers' food is part of compensation of employees.*

***Operating surplus** is the residual category of value added in financial and non-financial corporations and in housing activities of households. The category can be shown either as net or gross, together with consumption of fixed capital. In non-market activities, gross operating surplus equals the consumption of fixed capital.*

***Mixed income** is the residual category in the calculation of value added of self-employed persons and unincorporated enterprises of households. The category can be shown either as net or gross, together with consumption of fixed capital.*

***Employment** covers all permanently employed persons according to the domestic concept, and self-employed persons in agriculture and other household activities.*

***Final consumption expenditure** is composed of the aggregates **individual consumption expenditure** and **collective consumption expenditure. Individual consumption** is composed of **expenditure of households, non-profit institutions serving households (NPISHs) and individual government expenditure**. Individual government expenditure comprises payments for non-market government services (education, health, social care, culture, sport, etc.) and market goods and services (pharmaceutical and therapeutical products, concessions to private sector, health resort services, etc.). **Collective government expenditure** consists of expenditure on administrative, defence, economic, R&D and other non-market government services. Government and NPISHs final consumption expenditures are calcu-*

potrošnjo so enaki razliki med vrednostjo proizvodnje po stroškovni metodi in vrednostjo prodaj.

**Bruto investicije** so sestavljene iz **bruto investicij v osnovna sredstva**, **sprememb v zalogah ter neto nabav vrednostnih predmetov in umetnin.** Bruto investicije v osnovna sredstva so sestavljene iz investicij v nova osnovna sredstva, stroškov transakcij rabljenih osnovnih sredstev, iz nabav nematerialnih osnovnih sredstev in povečanja vrednosti neproizvedenih nefinančnih sredstev.

**Spremembe v zalogah** so obračunane za nedokončano proizvodnjo in dokončane proizvode pri proizvajalcih, zaloge trgovskega blaga v trgovini in zaloge surovin, materiala, rezervnih delov ipd. pri vseh tržnih proizvajalcih. Pri netržnih proizvajalcih so stroški proizvodov enaki sprotnim nabavam. V analizi izdatkovne strukture BDP je v agregat sprememb v zalogah vključena statistična napaka kot razlika med oceno BDP po proizvodni metodi in po izdatkovni metodi.

Kategoriji **izvoz in uvoz** proizvodov zajemata izvoz in uvoz proizvodov v zvezi z oplemenitenjem po bruto načelu. Izvozna vrednost proizvodov je obračunana po pariteti FOB, uvozna vrednost je po podatkih Banke Slovenije iz paritete CIF, zmanjšana na pariteto FOB. Od vključno leta 1994 dalje so po podatkih plačilne bilance Banke Slovenije v izvoz in uvoz proizvodov vključene statistično nezajete transakcije proizvodov s tujino. Podatki o izvozu in uvozu storitev so povzeti iz plačilne bilance po podatkih in metodologiji Banke Slovenije razen vrednosti investicijskih del v tujini, ki je do leta 1994 ocenjena iz podatkov statistike gradbeništva, ter neposrednih nakupov nerezidentov v Sloveniji in rezidentov v tujini, ki so statistične ocene. Metodološke spremembe, dopolnitve in izboljšave v plačilni bilanci Banke Slovenije, ki so bile objavljene po letu 1996 (s podatki od leta 1994 dalje), so v podatkih upoštevane.

*lated as the difference between the output value by the cost method and sales.*

***Gross capital formation** is composed of **gross fixed capital formation, increase in stocks and acquisitions less disposals of valuables.** Gross fixed capital formation consists of investments into new fixed assets, costs of transactions of existing fixed assets and of additions to the value of non-produced assets.*

***Increase in stocks** is calculated for work-in-progress and finished goods at producers, stocks of trade goods in stores, and stocks of raw material, spare parts, etc., at all market producers. At non-market producers costs of goods equal current purchase. In the analysis of expenditure structure of gross domestic product the aggregate increase in stocks contains a statistical error as a difference between the estimation of gross domestic product by the production method and by the expenditure method.*

***Exports and imports** of goods cover exports and imports of goods in connection with processing by gross principle. The export value of goods is calculated by FOB and the import value of goods has been reduced from CIF to FOB according to the data supplied by the Bank of Slovenia. From 1994 on statistically uncovered transactions of exports and imports of goods with the rest of the world have been included according to balance of payment data. Exports and imports of services are taken from the balance of payments according to the data and methodology of the Bank of Slovenia, except the value of investment work abroad, which was until 1994 estimated from the data of construction statistics, and direct purchase of non-residents in Slovenia and residents abroad, which are statistical estimates. Recent methodological changes and completion of the balance of payments, which have been published from 1996 on (with data from 1994 on), were taken into consideration in this Yearbook.*

## Osnovni agregati nacionalnih računov v tekočih cenah

**Bruto nacionalni dohodek** je enak bruto domačemu proizvodu in saldu primarnih dohodkov (od dela in kapitala) s tujino.

**Bruto nacionalni razpoložljivi dohodek** je enak bruto nacionalnemu dohodku in saldu tekočih transfernih dohodkov s tujino.

**Bruto varčevanje** je enako bruto nacionalnemu razpoložljivemu dohodku, ki so mu odšteti izdatki za končno potrošnjo (izdatki za individualno in kolektivno končno potrošnjo).

**Neto varčevanje** je enako bruto varčevanju, zmanjšanemu za porabo stalnega kapitala.

**Saldo tekočih transakcij s tujino** je enak bruto varčevanju, zmanjšanemu za bruto investicije.

**Neto naložbe (+) v tujino, neto posojila (-) iz tujine** so enaki saldu tekočih transakcij s tujino, povečanemu za **saldo transferjev kapitala s tujino** in zmanjšanemu za **neto nabave neproizvedenih nefinančnih sredstev v tujini.**

## *Main aggregates of national accounts at current prices*

***Gross national income** equals the sum of gross domestic product and balance of primary incomes (from labour and capital) with the rest of the world.*

***Gross national disposable income** equals the sum of gross national income and the balance of current transfers with the rest of the world.*

***Gross saving** equals gross national disposable income less final consumption expenditures (individual and collective final consumption).*

***Net saving** equals gross saving less consumption of fixed capital.*

***Balance of current external transactions** equals gross saving less gross capital formation.*

***Net lending (+), net borrowing (-) with the rest of the world** equals the balance of current external transactions plus the **balance of current capital transfers with the rest of the world** less **net acquisitions of non-produced non-financial assets with the rest of the world.***

## Osnovni agregati nacionalnih računov v stalnih cenah

Osnovni agregati nacionalnih računov v stalnih cenah so **realni bruto domači dohodek, realni bruto nacionalni dohodek, realni bruto nacionalni razpoložljivi dohodek, realno bruto varčevanje in realno neto varčevanje**. Izračun teh agregatov temelji na oceni **presežkov in izgub v trgovini zaradi sprememb v pogojih menjave (T);** dobimo ga po standardni enačbi**:**

$$T = \frac{X-M}{P} - \left(\frac{X}{P_x} - \frac{M}{P_m}\right)$$

pri čemer so T = sprememba v pogojih menjave
X = izvoz po tekočih cenah
M = uvoz po tekočih cenah
Px = indeks izvoznih cen
Pm = indeks uvoznih cen
P = (Px + Pm)/2.

## *Main aggregates of national accounts at constant prices*

***Real gross domestic income, real gross national income, real gross national disposable income, real gross saving and real net saving** are main aggregates of national accounts at constant prices. The estimation of these aggregates at constant prices is based on valuation of **trading gains or losses due to change in the terms of trade (T)** using the standard formula:*

$$T = \frac{X-M}{P} - \left(\frac{X}{P_x} - \frac{M}{P_m}\right)$$

*where T = change in the terms of trade*
*X = exports at current prices*
*M = imports at current prices*
*Px = the price index for exports*
*Pm = the price index for imports*
*P = (Px + Pm)/2.*

Realni neto primarni dohodki in realni neto tekoči transferji s tujino so ocenjeni z implicitnim deflatorjem za agregat končne domače potrošnje, poraba stalnega kapitala pa z implicitnim deflatorjem za agregat bruto investicij v osnovna sredstva.

### Račun odnosov s tujino

Račun odnosov s tujino prikazuje položaj tujine v tekočih transakcijah s Slovenijo. Posamezne transakcije so v računu prikazane drugače kot v plačilni bilanci. Tako so na računu odnosov s tujino zavarovalne storitve na računu transakcij proizvodov in storitev s tujino prikazane v skladu z obračunom proizvodnje v zavarovalnih dejavnostih; v uvoz storitev so vključena plačila storitev organizatorjev potovanj in turističnih agencij za potovanja v tujino. V plačilni bilanci so omenjene transakcije prikazane v postavki "potovanja" oziroma "izdatki rezidenčnih gospodinjstev v tujini".

### Revizija podatkov o BDP 2000

Podatke za obdobje 2000-2002 smo revidirali in tako tu objavljamo revidirane podatke o bruto domačem proizvodu (BDP) po proizvodni, dohodkovni in izdatkovni metodi ter novo oceno zaposlenosti za omenjeno obdobje. Glavni namen revizije je bila nadaljnja metodološka uskladitev postopkov in metod ocene BDP z Evropskim sistemom nacionalnih in regionalnih računov iz leta 1995 (ESR 1995). Poleg metodoloških izboljšav in prilagoditev ESR 1995 sta v oceni BDP izboljšana tudi zajetje dejavnosti in obračun posamičnih kategorij, kot zahteva merilo polnega zajetja dejavnosti v skladu z direktivo 89/130 o harmonizaciji postopkov ocenjevanja bruto nacionalnega proizvoda v tržnih cenah (89/130/EEC, Euratom). Revizija ocene BDP temelji na našem sodelovanju s Statističnim uradom Evropskih skupnosti v obdobju 1998 do 2002 in je usklajena s priporočili tega urada, ki so nam bila posredovana v okviru posameznih delavnic in pilotnega projekta o polnem zajetju aktivnosti (Vir: Statistične informacije, Nacionalni računi št .78, 27.marec 2003).

### *Rest of the world account*

*The account shows the position of the rest of the world in current transactions with Slovenia. Some transactions are in this account shown differently than in the balance of payments, which is in addition to external trade statistics the basic data source for the rest of the world account compilation. Insurance services are in the rest of the world account shown in line with output calculation of insurance services. Payments of transport and other services abroad via tour operators and tourist agencies are covered in imports of services and not in imports of "travel" as in the balance of payments which shows them as expenditures abroad of resident households.*

### *GDP Revision 2000*

*This issue of the Statistical Yearbook includes revised data of Gross Domestic Product (GDP) for the 2000-2002 period by output, income and expenditure method and new estimation on employment. The main purpose of the GDP revision is further harmonization of current GDP estimates with the European System of Accounts 1995 (ESA 95). Besides methodology improvements and adjustments with ESA 1995, the main purpose of the revision is improvement on exhaustiveness of the GDP estimates in line with Council Directive 89/130 on harmonization of gross national product at market prices compilation (89/130/EEC, EURATOM). GDP revision is based on co-operation and support by Eurostat in the 1998-2002 period and includes recommendations and conclusions of task forces and the pilot project on exhaustiveness of the GDP estimates, which were organised by Eurostat (Source: Rapid reports, National accounts No. 78, 27 March 2003).*

# 29. INVESTICIJE V OSNOVNA SREDSTVA

# *GROSS FIXED CAPITAL FORMATION (GROSS INVESTMENT)*

## METODOLOŠKA POJASNILA

## *METHODOLOGICAL EXPLANATIONS*

### Viri in metode zbiranja podatkov

Prikazane podatke o investicijah v osnovna sredstva pridobimo:

- s statističnim raziskovanjem Letno poročilo o investicijah v osnovna sredstva (vprašalnik INV-01) (izvaja ga Statistični urad RS), ki zajema pravne osebe (podjetja, družbe in organizacije) s sedežem na območju Slovenije, in
- iz ocen investicij samostojnih podjetnikov posameznikov in drugih fizičnih oseb (sektor gospodinjstva po Standardni klasifikaciji institucionalnih sektorjev - SKIS), ki temeljijo na rezultatih rednih statističnih raziskovanj Statističnega urada RS.

### *Sources and methods of data collection*

*Data on gross fixed capital formation are the result of:*

- *the Annual Report on Gross Fixed Capital Formation (INV-01) (carried out by the Statistical Office of the Republic of Slovenia) for legal persons (enterprises, companies and organisations) with headquarters on the territory of Slovenia, and*
- *the estimates of gross fixed capital formation in the private sector (natural persons - according to the Standard Classification of Institutional Sectors - SCIS) based on the results of regular statistical surveys carried out by the Statistical Office.*

### Zajetje

Statistični urad zbira podatke o investicijah v osnovna sredstva neposredno pri investitorjih že od leta 1966. Do leta 1992 smo zbirali podatke z vprašalnikom INV-01 (z letom 2001 se je preimenoval v INV-1) samo pri podjetjih in organizacijah v družbeni, mešani in zadružni lasti. Z letom 1992 smo uvedli še dodatno raziskovanje Letno poročilo o investicijah v osnovna sredstva zasebnih podjetij (vprašalnik INV-03). Zavoljo sprememb v sistemu lastništva podjetij pa smo z letom 1995 obe nadomestili z enotnim raziskovanjem Letno poročilo o investicijah v osnovna sredstva (INV-01). S tem vprašalnikom smo zbirali podatke o investicijah pri vseh enotah, ki so pravne osebe (podjetja, družbe in organizacije), ne glede na število zaposlenih, le pri organizacijski obliki d. o. o. so zajete le pravne osebe s tremi ali več zaposlenimi. Stopnja odzivnosti pravnih oseb se v letih od 1996 do 1999 giblje med 82 % in 89 %. Pokritost investicij je bila okoli 90-odstotna, pri čemer so bili pridobljeni podatki o investicijah vseh večjih in pomembnih pravnih oseb z 10 ali več zaposlenimi.

Pri zbiranju podatkov o investicijah za leti 2000 in 2001 pa smo vključili vse tiste poročevalske enote, ki so imele več kot 10 zaposlenih. Njihova odzivnost je bila 88-odstotna, za neodgovore pa smo izvedli preračun na celotno populacijo z razmernostno cenilko (pri tem smo uporabili amortizacijo osnovnih sredstev iz zaključnih računov oz. število zaposlenih v dejavnosti L Javna uprava).

Ocene investicij v osnovna sredstva enot sektorja gospodinjstev temeljijo predvsem na posameznih statističnih raziskovanjih naslednjih področij: gradbeništva, kmetijstva, trgovine in prometa. V sektorju gospodinjstev so upoštevani samostojni podjetniki posamezniki in druge fizične osebe, ki so registrirane pri primarnih registrskih organih (zdravniki, lekarnarji, odvetniki, notarji, samostojni ustvarjalci na področju kulture ipd.) Med gradbenimi deli je upoštevana tudi stanovanjska gradnja občanov.

V tabeli 29.1 so prikazane investicije v osnovna sredstva pravnih oseb v družbeni in zasebni lasti (vključno od leta 1992 dalje) in v sektorju - gospodinjstev. V izračunu investicij v osnovna sredstva za leta od 1993 do 2001 niso upoštevane - v skladu z metodologijo ESA 95 - investicije v rabljena osnovna sredstva, razen uvoženih.

V drugih tabelah prikazujemo podatke o investicijah v osnovna sredstva v podjetjih, družbah in organizacijah, ki so rezultat raziskovanja INV-01 (zajema le pravne osebe, ki so bile pred lastninskimi spremembami v družbeni, zadružni ali mešani lasti). V podatke za leta od 1997 do 2001 so vključena tudi zasebna podjetja.

Osnovna sredstva se vrednotijo po nabavni vrednosti, ta pa sestoji iz nakupne cene, povečane za morebitne davke, stroške prevzema in druge neposredne stroške. Nabavna vrednost osnovnega sredstva je torej seštevek vseh stroškov, ki so potrebni, da je osnovno sredstvo usposobljeno za uporabo.

Podatke od leta 1998 smo obdelali tako, da prikazujemo v tabelah 29.3 in 29.4 le investicije v nova osnovna sredstva; s tem smo se prilagodili evropskim standardom - ESA 95. V tabeli 29.2 pa poleg novih, vključujemo še rabljena, da bi lahko povezali serijo podatkov iz prejšnjih let.

Podatki so prikazani po dveh načelih:

- po organizacijskem načelu (podatki so razvrščeni po pretežni dejavnosti investitorja - ta je določena z vpisom v enotni register, ki ga vodi Statistični urad Republike Slovenije - in teritorialno, po sedežu investitorja) in

### *Coverage*

*The Statistical Office of the Republic of Slovenia has been collecting data on gross fixed capital formation since 1966 directly from investors. Until 1992 we had been collecting data on gross fixed capital formation only for enterprises and organisations in social, mixed and co-operative ownership (INV-01). In 1992 we introduced another survey, i.e. Annual Report on Gross Fixed Capital Formation for Privately Owned Enterprises (INV-03). Due to ownership transformation of enterprises, in 1995 we combined both reports into one unified Annual Report on Gross Fixed Capital Formation (INV-01). With this report we collect data on gross fixed capital formation for all legal persons (enterprises, companies and organisations), irrespective of the number of persons in paid employment, except for limited liability companies where only legal persons with three or more persons in paid employment are covered. The response rate of legal persons varies between 82% and 89%. Coverage of capital formation was about 90%. Data on capital formation were collected at all major legal persons with 10 or more persons in paid employment.*

*In collecting data on capital formation for 2000 and 2001 we included all reporting units that had over 10 persons in paid employment. Their response rate was 88%. For non-response we performed recalculation to the total population with the ratio estimator, using depreciation of fixed assets from final accounts or the number of persons employed in activity L Public administration.*

*Estimates of gross fixed capital formation in the household sector are based mainly on statistical surveys from the following fields: construction, agriculture, trade and transport. Household sector includes individual private entrepreneurs and other types of natural persons, which are registered with primary register institutions (medical workers, pharmacists, lawyers, free-lance cultural workers, etc.). Construction works include also own construction of dwellings.*

*Table 29.1 shows gross fixed capital formation of legal persons in social and private ownership (since 1992) and in the household sector. Gross fixed capital formation from 1993 to 2001 was calculated according to ESA 95 methodology, which does not take into account gross fixed capital formation for existing fixed assets, except imported.*

*Other tables show data on gross fixed capital formation in enterprises, companies and organisations as the result of the INV-01 survey (which covers only legal persons that were before ownership transformation in social, co-operative or mixed ownership). Data for 1997-2001 include also private enterprises.*

*Fixed assets for capital formation are valued by purchase value, which is composed of the purchase price, increased by taxes, costs of delivery and other direct costs. The purchase value of a fixed asset is thus the sum of all costs necessary to prepare the asset for its use.*

*Data from 1998 were processed so that in tables 29.3 and 29.4 only capital formation for new fixed assets is shown. Thus we are harmonised with the European standard ESA 95. In Table 29.2 we show new and existing fixed assets in order to link the data series from the previous years.*

*Data are shown according to two principles:*

- *by organisational principle: data are classified by the predominant activity of the investor, which is defined with registration into the register kept by the Statistical Office of the Republic of Slovenia, and territorially by the location of the investor and*

- po načelu čistih dejavnosti (podatki so urejeni po dejavnosti enot v sestavi v okviru organizacij, ki so jim investicije namenjene, teritorialno pa po lokaciji objekta).

Tabele 29.2 do 29.4 prikazujejo:

- izplačila za investicije v osnovna sredstva podjetij, družb in organizacij glede na vrsto glavne dejavnosti investitorja in vrsto vira financiranja (tabela 29.2);
- investicije v nova osnovna sredstva podjetij, družb in organizacij glede na vrsto glavne dejavnosti investitorja in glede na dejavnost, ki jim je investicijski proizvod (oziroma storitev) namenjen (tabela 29.3);
- investicije v nova osnovna sredstva podjetij, družb in organizacij glede na vrsto glavne dejavnosti investitorja ter glede na tehnično strukturo in namen investicij (tabela 29.4).

## Definicije in pojasnila

**Izplačila za bruto investicije** so denarna vlaganja v nova in rabljena osnovna sredstva v tekočem letu, ne glede na to, kdaj so bili objekti zgrajeni ali kdaj je bila dobavljena oprema.

**Vrednost bruto investicij** obsega:

- nakupe (fizično ustvarjenih) lastnih osnovnih sredstev (novih in rabljenih) v tekočem letu (dokončane in nedokončane gradnje, izdelava in nakup zgradb, opreme in drugega), ne glede na to, ali so bili v poročevalskem letu plačani ali ne;
- posodobitve, rekonstrukcije in renovacije na že obstoječih osnovnih sredstvih
- lastno izgradnjo in brezplačno pridobitev osnovnih sredstev;
- nabavno vrednost osnovnih sredstev v finančnem zakupu (lizing).

**Investicije v nove zmogljivosti** so vlaganja za ustanavljanje novih samostojnih podjetij, organizacij in obratov ter graditev prometnih poti, ki jih prej ni bilo ali pa so imele drugačen namen kot na novo zgrajene.

**Investicije za razširitev, rekonstrukcijo in posodobitev** so vlaganja v obstoječe zmogljivosti zaradi povečanega obsega proizvodnje ali storitev ali zaradi spremembe tehnologije in tehnike proizvodnje; zajemajo tudi preureditev že obstoječih objektov, opreme in naprav in tudi graditev ali nabavo novih osnovnih sredstev v sklopu že obstoječe organizacijsko samostojne delovne enote.

**Investicije za vzdrževanje obstoječih zmogljivosti** na enaki ravni so vlaganja zaradi zamenjave, intenzifikacije in racionalizacije proizvodnje, ne da bi širili razpoložljive zmogljivosti ali bistveno spreminjali sedanjo tehnologijo ali tehniko proizvodnje.

V skladu z ESA-95/SNA-93 in s slovenskimi računskimi standardi smo osnovna sredstva razdelili v dve veliki skupini:

- **opredmetena osnovna sredstva** (gradbena dela in izboljšava zemljišč, od leta 2000, stroji, oprema in prometna sredstva ter večletni nasadi in osnovna čreda) in
- **neopredmetena osnovna sredstva** (študije, projekti in raziskovalna dela; programska oprema; licence, patenti in blagovne znamke - do leta 1997 in izvirniki oz. originali na področju filma, glasbe ipd.).

Nakupov zemljišč ne štejemo več kot investicijo v osnovna sredstva. Upoštevamo le stroške transakcij z njimi.

V vrednosti gradbenih del upoštevamo tudi vrednost opreme, ki je vgrajena v gradbene objekte, v vrednost opreme pa so zajeti tudi stroški montaže, transporta in zavarovanja.

Opomba: Zaradi zaokroževanja na mio SIT se vsota vrednosti v vrsticah oz. stolpcih ne ujema povsem s skupno vrednostjo.

## *Definitions and explanations*

***Payment for gross capital formation** is financial investment in new or existing fixed assets in the current year, irrespective of when the buildings were constructed or when the equipment was delivered.*

***Value of gross capital formation** is:*

- *purchase of own fixed assets (new or existing) in the current year (finished and unfinished construction, construction and purchase of buildings, equipment and similar), irrespective of whether they were paid for in the reporting year or not;*
- *modernisation, reconstruction and renovation of existing assets;*
- *own formation and acquisition without compensation of fixed assets;*
- *purchase value of fixed assets in financial leasing.*

***Gross fixed capital formation in new capacities** is investment in creating new enterprises, organisations and units, construction of roads, etc., which previously did not exist or had other purpose than the newly built.*

***Gross fixed capital formation for enlargement, reconstruction and renovation** is investment in existing capacities because of increased volume of production or services, or because of the change of technology. It also covers reorganisation of existing buildings and equipment, and construction or purchase of new fixed assets in the complex of an existing organisationally independent unit.*

***Gross fixed capital formation for maintenance of existing capacities** at the same level is investment due to replacement, intensification and rationalisation of production, but without expanding the existing capacities or fundamentally changing the present technology.*

*In accordance with ESA-95/SNA-93 and Slovenian accounting standards, we divided fixed assets into two large groups:*

- ***tangible fixed assets** (construction work and land improvement since 2000, machinery, transport and other equipment, orchard development and breeding stock);*
- ***intangible fixed assets** (studies, projects and research work; software; licences, patents and trademarks - until 1997; originals in the field of literature, film, music, etc.).*

*Purchase of land is no longer part of fixed capital formation. Only transaction costs are taken into account.*

*Construction work also includes the value of equipment built in the buildings. The value of equipment includes costs of assembling, transport and insurance.*

*Note: In some tables the total in the rows and columns does not correspond to the total value due to rounding to million SIT.*

# 30. KONSOLIDIRANA BILANCA JAVNEGA FINANCIRANJA

# *CONSOLIDATED BALANCE OF PUBLIC FINANCING*

## METODOLOŠKA POJASNILA

## *METHODOLOGICAL EXPLANATIONS*

### Viri in metode zbiranja in izkazovanja podatkov

### Sources and methods of data collection and presentation

Konsolidirano bilanco javnega financiranja sestavlja Ministrstvo za finance na podlagi ekonomske klasifikacije transakcij in računovodskih pravil, skladno z metodologijo Mednarodnega denarnega sklada (MDS) ("Manual on Government Finance Statistics" - GFS, 1986).

*The consolidated balance of public financing is being compiled by the Ministry of Finance according to a new economic classification and accounting rules, which are in line with the IMF methodology (Government Finance Statistics Manual, GFS - 1986).*

**Konsolidirana bilanca javnega financiranja** Slovenije je statistični izkaz, ki nudi osnovni vpogled v tokove, v katere so vključene enote sektorja država. Konsolidirana bilanca javnega financiranja sistematično izkazuje transakcije, ki so posledica izvajanja sistema financiranja funkcij države preko proračuna Republike Slovenije, občinskih proračunov in dveh skladov obveznega socialnega zavarovanja - Zavoda za pokojninsko in invalidsko zavarovanje (ZPIZ) in Zavoda za zdravstveno zavarovanje Slovenije (ZZZS) ("redno" javno financiranje).

***The consolidated balance of public financing*** *in Slovenia is a statistical record which provides basic insight into flows between the general government sector units and other units of the economy. It systematically summarises transactions which are the result of implementing the system of financing general government functions through the central government budget, municipal budgets and the two compulsory social security funds - the Institute for Pension and Disability Insurance (IPDI) and the Health Insurance Institute of Slovenia (HIIS) ("ordinary" public financing).*

Osnovni viri podatkov za konsolidirano bilanco javnega financiranja so podatki o prihodkih državnega proračuna, ki se vplačujejo prek evidenčnih računov Agencije za plačilni promet (podatki iz evidence B-2), ter podatki iz tekoče evidence Ministrstva za finance. Ta vsebuje naslednje vrste podatkov: podatke o realizaciji tistih prihodkov državnega proračuna, ki se vplačujejo neposredno na račune proračuna, podatke o vseh odhodkih državnega proračuna ter podatke iz obveznih mesečnih poročil o javnofinančnih prihodkih in odhodkih Zavoda za pokojninsko in invalidsko zavarovanje, Zavoda za zdravstveno zavarovanje Slovenije in vseh slovenskih občin, ki imajo podlage v ustreznih odredbah o poročanju.

*The two main sources for the consolidated balance of public financing are data on state budget revenues from payments made through the record accounts of the Agency of the Republic of Slovenia for Payments and data from the current records of the Ministry of Finance. The latter includes data on state budget revenues realised through direct payments on the budget accounts, data on expenditure of the state budget and data from obligatory monthly reports on revenues and expenditure of the Institute for Pension and Disability Insurance, the Health Insurance Institute of Slovenia and of all municipalities in Slovenia that have the foundation in appropriate decrees on reporting.*

Konsolidirana bilanca se sestavlja iz bilanc, ki se sestavljajo za posamezne dele državnega sektorja, tako da je konsolidirana bilanca javnega financiranja konsolidirani zbirni račun prihodkov in odhodkov vseh štirih "blagajn" rednega javnega financiranja v Sloveniji.

*The consolidated balance of public financing is being compiled from four separate balances so that it is a consolidated collective account of revenues and expenditures of all four funds of the ordinary public financing in Slovenia.*

Konsolidacija se izdela na podlagi metodologije MDS (GFS, poglavje II. K. Konsolidacija) in pomeni izločitev iz vsote nekonsolidiranih prihodkov in odhodkov transfernih tokov med posameznimi blagajnami javnega financiranja. Transferni tokovi med posameznimi javnofinančnimi blagajnami iz konsolidirane bilance javnega financiranja zato niso razvidni.

*Consolidation is done in line with IMF methodology (GFS, chapter II. K Consolidation) and means the elimination from the non-consolidated revenues, expenditures and other transactions items of particular transfer flows between the four public financing institutions. Eliminated transfer flows are therefore not seen from the consolidated balance.*

**Struktura izkaza konsolidirane bilance javnega financiranja**. Javnofinančni tokovi se v bilancah javnega financiranja po novi ekonomski klasifikaciji (Odredba o evidentiranju in izkazovanju javnofinančnih prihodkov in drugih prejemkov ter odhodkov in drugih izdatkov, sredstev in obveznosti do virov sredstev, Ur. l. RS št. 1/99, 16/99, 48/99, 72/99, 74/99) izkazujejo v treh med seboj povezanih računih:

***The structure of the consolidated balance of public financing****. Public financing flows are in the balances of public financing according to the new economic classification (regulation on recording and presenting public financing revenues and other receipts and expenditures and other outlays, assets and liabilities, OJ RS No. 1/99, 16/99, 48/99, 72/99, 74/99) presented in three separate, but interrelated accounts:*

- bilanci prihodkov in odhodkov,
- računu finančnih terjatev in naložb in
- računu financiranja.

- *in the balance of revenues and expenditures*
- *in the lending minus repayments account and*
- *in the financing account.*

Ti računi konsolidirane bilance javnega financiranja so v Statističnem letopisu zajeti v dveh tabelah: prva, 30.1, izkazuje prihodke in odhodke ter finančne terjatve in naložbe, druga, 30.2, pa postavke računa financiranja.

*These accounts of the consolidated balance of public financing are presented in the Statistical Yearbook in two tables: in Table 30.1, which covers revenues and expenditures and lending minus repayments items, and in Table 30.2, which covers the financing account items.*

V **bilanci prihodkov in odhodkov** so evidentirane nefinančne transakcije. Bilanca prihodkov in odhodkov kaže, na kakšnih podlagah država pridobiva sredstva od enot drugih sektorjev ali iz lastnih virov, na drugi strani pa, kako država tako zbrana sredstva razporeja po različnih vrstah uporabe in uporabnikov, vključno z uporabo znotraj sektorja država.

***The balance of revenues and expenditures*** *covers non-financial transactions. The balance of revenues and expenditures shows on the one hand what are the sources of public financing revenues (revenues from other sector units or from own sources) and on the other hand how the general government units use those collected revenues for various kinds of uses and users, including uses inside the general government sector.*

Saldo bilance prihodkov in odhodkov je izkazan kot *proračunski presežek* (če celotni prihodki, realizirani v posameznem proračunskem obdobju, presegajo celotne odhodke v tem obdobju) ali kot *proračunski primanjkljaj* (če v posameznem proračunskem obdobju realizirani celotni odhodki presegajo dosežene prihodke v tem obdobju).

*The difference between consolidated revenues and expenditures is budget surplus (in the case when all revenues realised in a particular budgetary year surpass all expenditures realised in the same year) or budget deficit (in the case when all revenues realised in a particular budgetary year are lower than expenditures realised in the same year).*

**Račun finančnih terjatev in naložb** izkazuje finančne transakcije, ki vplivajo na neto spremembo finančnih sredstev državnega sektorja.

***Lending minus repayments account*** *covers financial transactions, which are part of the net change in financial assets for the government sector*

Vsota proračunskega presežka ali primanjkljaja in bilančne postavke bilance finančnih terjatev in naložb je *skupni presežek oziroma primanjkljaj.*

V **računu financiranja** so izkazani finančne transakcije, ki vplivajo na neto spremembo v finančnih obveznostih državnega sektorja, ter neto sprememba denarnih sredstev na računih, ki so namenjeni izvajanju proračuna. Račun financiranja kaže, kako se javnofinančni primanjkljaj izravna s financiranjem iz različnih virov. Trije glavni viri izravnavanja primanjkljaja tekočega javnega financiranja so: zadolževanje pri drugih sektorjih gospodarstva države ali v tujini in črpanje lastnih denarnih rezervnih sredstev (notranje zadolževanje med posameznimi blagajnami iz računa financiranja konsolidirane bilance javnega financiranja ni razvidno).

Poleg prihodkov, ki jih posamezne blagajne zberejo same, so prenosi iz ene blagajne v drugo za prejemnike prenosov (to so občine, ZPIZ in ZZZS) dodatni vir financiranja njihove javne porabe. Agregati teh transferjev iz tabele 30.1 konsolidirane bilance javnega financiranja niso razvidni. *Transferni tokovi*, ki se izločijo s postopki konsolidacije, zajemajo naslednje vrste tokov:

- prispevke delodajalcev za socialno varnost za zaposlene v državnih in občinskih organih ter za zaposlene v javnih zavodih in drugih izvajalcih javnih služb, ki se plačujejo bodisi iz državnega proračuna ali občinskih proračunov v ZPIZ in ZZZS, bodisi iz ZZZS v ZPIZ, bodisi iz ZZZS v državni proračun;
- transferje dopolnilnih sredstev iz državnega proračuna v proračune občin ter nekatere dodatne transferje, ki se v proračune občin nakazujejo posredno iz posameznih ministrstev, tako za tekoče kot za investicijske namene;
- transferne tokove med državnim proračunom in zavodom za zdravstveno zavarovanje (npr. plačila prispevkov za zdravstveno zavarovanje nekaterih kategorij prebivalstva, ki se plačujejo bodisi preko posameznih ministrstev ali preko Zavoda za zaposlovanje RS) ter nekatera transferna plačila med občinskimi proračuni in Zavodom za zdravstveno zavarovanje Slovenije;
- tokove lastnih prihodkov oziroma prihodkov od prodaje proizvodov in storitev, ki jih posamezni upravni organi zaračunavajo tudi drugim državnim organom ali drugim blagajnam javnega financiranja.

*The sum of the budget deficit or surplus and the lending minus repayments balancing item is overall surplus or deficit of the consolidated balance of public financing.*

***The financing account** records financial transactions which affect the overall net change in general government financial liabilities, and change in that part of government currency and deposits which is used for the implementation of the budget. The financing account shows how public financing deficit is covered by various sources. The three main sources of financing the current public financing deficit are: incurring financial liabilities towards other domestic sectors and towards the rest of the world and use of general government reserve assets (internal financing flows between the particular funds are not seen from the consolidated statement).*

*In addition to revenues collected by the individual funds themselves, transfers from one public financing fund to another, which appear in the process of public financing, are additional sources of revenues for the recipient institutions (these are municipalities, IPDI and HIIS). Aggregates of those transfers are not visible from Table 29.1 of the consolidated balance of public financing. Transfer flows, which are eliminated from the consolidated balance, include the following types of flows:*

- *employers' social security contributions paid for employees in central government and local government institutions and for employees in public institutions and other performers of public services, which are paid either from central and local government budgets to the Pension Fund and the Health Care Fund, or from the Health Care Fund to the Pension Fund, or from the Health Care Fund to the central government budget;*
- *transfers of additional funds from the central government budget to local government budgets, and some other transfers which are directly directed to local government budgets from particular ministries for both current consumption and investment consumption purposes;*
- *transfer flows between the central government budget and the Health Care Fund (e.g. payments of contributions for health care insurance for some categories of population, which are paid either by particular ministries or by the Employment Service of Slovenia) and some transfer payments between the local government budgets and the Health Care Fund;*
- *flows of revenues from sales of goods and services charged by one public financing institution to another.*

## Zajetje

Konsolidirana bilanca javnega financiranja ustreza delu popolnega zaporedja sektorskih računov, kot so ti definirani v Sistemu nacionalnih računov (System of National Accounts - SNA, 1993) in v Evropskem sistemu računov (European System of Accounts - ESA, 1995). V kategorijah SNA/ESA ta bilanca zajema transakcije tekočih računov in kapitalskega računa ter del sprememb v finančnih sredstvih in obveznostih državnega sektorja, ki se zajemajo v finančnem računu SNA/ESA - vzpostavljanje neto finančnih terjatev kot del državne ekonomske politike in neto zadolževanje za potrebe pokrivanja skupnega primanjkljaja.

*V bilanci prihodkov in odhodkov* izkazani tokovi ustrezajo postavkam virov in uporab naslednjih računov nefinančnih transakcij: proizvodnega računa, računov ustvarjanja, razdelitve in uporabe dohodka ter kapitalskega računa sektorja država. *V bilanci finančnih terjatev in naložb ter v računu financiranja* izkazani tokovi pa ustrezajo finančnim transakcijam, ki se izkazujejo v finančnem računu SNA/ESA za sektor država. Spremembe v finančnih obveznostih države iz naslova pokrivanja skupnega primanjkljaja bilanc prihodkov in odhodkov ter sprememb finančnih sredstev in naložb in financiranja odplačevanja glavnic (v računu financiranja) zajemajo prvi del zadolževanja sektorja država. Drugi del tega zadolževanja predstavlja zadolževanje Republike Slovenije kot pravne osebe, ki ima podlago v posebnih predpisih (zadolževanje za posebne namene); ta del je zajet v premoženjski bilanci Slovenije, ki jo prav tako izdeluje Ministrstvo za finance.

*Zajetje enot* v konsolidirani bilanci javnega financiranja, ki sledi pravilom sektorizacije v GFS, je precej skladno tudi s pravili sektoriza-

## Coverage

*The consolidated balance of public financing covers part of the full sequence of sector accounts as defined in the System of National Accounts (SNA, 1993) and in the European System of Accounts (ESA, 1995). In SNA/ESA categories it covers items of the current accounts and the capital account and part of the change in government sector financial assets and liabilities recorded in the SNA/ESA financial account - the change in net financial claims as part of government policy and the change in financial liabilities in the context of covering total surplus/deficit of the consolidated balance.*

*Flows covered by the balance of revenues and expenditures are equivalents of the resources and uses items of the following non-financial accounts: production account, generation, distribution and use of income account, and capital account of the general government sector. Flows covered by lending minus repayments account and financing account items are equivalents of financial transactions items, which are covered by the SNA/ESA financial account for the general government sector. Changes in the government financial liabilities which are linked to balancing the overall balance of revenues and expenditures and lending minus repayments (in the financing account) represent the first part of the general government sector borrowing. The second part of this borrowing is incurring debts of the Republic of Slovenia as a legal person for special purposes on the basis of special legislation - this is only recorded in the balance of general government assets, which is compiled by the Ministry of Finance separately.*

*Coverage of units in the consolidated balance of public financing, which follows the GFS sectorisation rules, is rather consistent with the*

cije v SNA/ESA; na podlagi teh pravil v Sloveniji razlikujemo tri podsektorje sektorja država: enote centralne ravni države, enote lokalne ravni države (občine) in sklade obveznega socialnega zavarovanja (Uredba o uvedbi in uporabi Standardne klasifikacije institucionalnih sektorjev, Ur. l. RS 56/98). V bilanci javnega financiranja je ob popolnem zajetju poslovanja Republike Slovenije kot pravne osebe preko državnega proračuna, občin preko občinskih proračunov in dveh skladov obveznega socialnega zavarovanja zajeta tudi večina drugih enot, ki se po SNA/ESA in po slovenskih predpisih razvrščajo v državni sektor, kot so zdravstvene ustanove, šole itd., in sicer na strani odhodkov z njihovo udeležbo v odhodkih štirih blagajn rednega javnega financiranja, na strani prihodkov pa s postavko "prodaja blaga in storitev". Zajeti niso drugi javnofinančni prihodki, ki jih nekatere državne ali tudi druge enote dobivajo mimo proračunov (izvenproračunski javnofinančni viri).

*Čas evidentiranja.* Načeloma so v konsolidirano bilanco javnega financiranja za posamezna leta, skladno z GFS, vključeni javnofinančni prihodki in odhodki, ki so bili v koledarskem letu realizirani (načelo zajemanja tokov plačil - "cash" načelo časa evidentiranja). V podatke za posamezno leto so poleg tega vključena tudi plačila, izvršena v januarju naslednjega leta, ki se nanašajo na poravnavo obveznosti predhodnega leta (skladno z določili Zakona o izvrševanju proračuna, Ur. l. RS, št. 5/96, 78/97, 87/97, 34/98, 91/98). Tako podatki za leto 1998 zajemajo tudi prihodke od prometnega davka, prejete do 15. januarja 1999, in plačila uporabnikom za poravnavo obveznosti, ki so nastale v letu 1998, nakazana do 20. januarja 1999. Podatki za leta 1999, 2000, 2001 in 2002 zajemajo tudi prihodke od DDV in od trošarin, prejete do 31. januarja naslednjega leta, ter plačila uporabnikom za poravnavo obveznosti, nastale v zadevnem letu, izplačana do 31. januarja naslednjega leta. Te zamike lahko interpretiramo kot odmik od "cash" načela v smeri pravila, po katerem se prihodke razporedi v obdobje, na katero se nanaša podlaga, od katere je bila obveznost plačila odmerjena, odhodke pa v obdobje, v katerem je obveznost plačila nastala oziroma v katerem velja do njene zapadlosti (posamezne izpeljave "accrual" načela časa evidentiranja, ki je načelo obračunavanja po SNA/ESA).

*SNA/ESA definitions and sectorisation rules, which are the basis for distinguishing the three subsectors of the general government sector in Slovenia (central government units, local government units and obligatory social security funds) (Regulation on the Introduction and Use of the Standard Classification of Institutional Sectors, OJ RS 56/98.) It should be noted that apart from the central government and local government budgets and the two social security funds most of other units recognised as general government institutional units, such as hospitals, schools etc., are also covered by the balance - on the expenditures side they are covered with their share in the expenditures of the four funds of the ordinary public financing and on the revenues side with the item "sales of goods and services". On the other hand, it does not cover other revenues from public financing extrabudgetary sources, received by some general government or other units.*

*Time of recording. Included in the consolidated balance for each year are - in line with GFS - in principle, revenues and expenditures that were in the accounting period actually realised (cash basis principle of the time of recording). Data for particular yearly periods additionally include payments made in January of the following year, but which refer to liabilities of the previous year, based on the provisions of the Republic of Slovenia Budget Implementation Act (OJ RS 5/96, 78/97, 87/97, 34/98, 91/98). The 1998 data thus also cover revenues from the taxes on goods and services until 15 January 1999 and payments to the users of the budget until 20 January 1999. Data for the budgetary years 1999, 2000, 2001 and 2002 cover VAT and excise revenues until 31 January of the next year and payments to the users of the budget until 31 January of the next year. These shifts could be interpreted as a deviation from the cash principle towards the rule according to which revenues from taxes on goods and services and from value added taxes are recorded for the period in which the duty to pay appeared and in which it lasts (specific implementation rule of the "accrual" principle, which is adopted in SNA/ESA).*

## Definicije in pojasnila

### Tabela 30.1: Bilanca prihodkov in odhodkov

**Prihodki** so v konsolidirani bilanci javnega financiranja v skladu z novo ekonomsko klasifikacijo prikazani v petih glavnih skupinah: davčni prihodki in nedavčni prihodki (skupaj: tekoči javnofinančni prihodki), kapitalski prihodki, prejete donacije in transferni prihodki.

**Davčni prihodki** zajemajo vse vrste obveznih, nepovratnih in nepoplačljivih dajatev, ki jih davkoplačevalci vplačujejo v dobro proračunov. Vključujejo vse vrste davkov, ki so določeni s posebnimi zakoni. Med davčne prihodke se skladno z novo ekonomsko klasifikacijo uvrščajo tudi vsi obvezni prispevki za socialno varnost, to so prispevki zaposlenih, delodajalcev in samozaposlenih, ki se vplačujejo v državni proračun in v oba sklada obveznega socialnega zavarovanja.

Davčni prihodki so izkazani v naslednjih glavnih postavkah: davki na dohodek in dobiček, prispevki za socialno varnost, davki na plačilno listo in delovno silo, davki na premoženje, domači davki na blago in storitve, davki na mednarodno trgovino in transakcije ter drugi davki.

**Davki na dohodek in dobiček** zajemajo dohodnino kot kompleksni davek na dohodke posameznikov (ki je razčlenjena na posamezne podzvrsti dohodnine) in davek od dobička pravnih oseb.

**Prispevki za socialno varnost** obsegajo obvezne prispevke za vse vrste socialnega zavarovanja, ki se nadalje razvrščajo v prispevke zaposlenih (delojemalcev) za posamezne namene socialnega zavarovanja, prispevke delodajalcev, prispevke samozaposlenih ter ostale prispevke za obvezno socialno zavarovanje. Prihodki iz naslova različnih prostovoljnih shem socialnega zavarovanja (prostovoljno zdravstveno zavarovanje), dokupi delovne dobe ipd. ne sodijo med obvezne prispevke in se po novi ekonomski klasifikaciji razvrščajo med nedavčne prihodke.

**Davki na plačilno listo in delovno silo** zajemajo davke, ki jih plačujejo delodajalci na osnovi izplačanih plač zaposlenim in so določeni bodisi v absolutnih zneskih ali na osnovi lestvice obdavčitve plačilne liste (pri nas sta to davek na izplačane plače in davek na pogodbeno delo).

## *Definitions and explanations*

### *Table 30.1: balance of revenues and expenditures*

***Revenues** are according to the new economic classification in the consolidated balance of public financing presented with the following main groups: tax revenues, non-tax (together: public financing revenues), capital revenues, grants received and transfer revenues.*

***Tax revenues** cover all kinds of one-sided obligatory payments which are paid by taxpayers into the budgets. They include all kinds of taxes, which are defined by special tax legislation. According to the new economic classification, tax revenues include obligatory social security contributions, that is contributions of employees, employers and self-employed, which are paid in the budgets and both social security funds.*

*Tax revenues are presented with the following main items: taxes on income and profit, social security contributions, taxes on payroll and workforce, taxes on property, domestic taxes on goods and services, taxes on international trade and transactions, and other taxes.*

***Taxes on income and profit** include individual tax on income and profit as a complex tax on incomes of individuals (which is disaggregated on various types of individual taxes) and profit tax payable by legal persons.*

***Social security contributions** include obligatory contributions for all kinds of social security, which are composed of employees contributions for particular social security purposes, employers contributions, self-employed contributions and other social security contributions. Revenues coming from various voluntary social security schemes (voluntary health care insurance), acquisitions of working years, etc., are not obligatory social security contributions and are according to new economic classifications classified under non-tax revenues.*

***Taxes on payroll and workforce** cover taxes paid by employers on the basis of wages paid to the employees and are determined either in absolute terms or on the basis of payroll tax scale (payroll tax and tax on work contracts).*

**Davki na premoženje** zajemajo davke na uporabo, lastništvo ali prodajo premoženja (premičnin in nepremičnin) in se zaračunavajo bodisi v določenih časovnih intervalih, v enkratnem znesku ali ob prenosu lastništva. Sem sodijo tudi davki na spremembo lastništva nad premoženjem zaradi dedovanja, daril ali drugih transakcij.

***Taxes on property*** *cover taxes on use, ownership or sale of property (movables or immovables) and are charged either in certain time intervals or as one-time charge or at the ownership transfer. They include taxes on change of property ownership caused by inheritance, gifts and other transactions.*

**Domači davki na blago in storitve** zajemajo dajatve na proizvodnjo, pridobivanje, prodajo, prenos, dajanje v najem blaga in storitev ter dajatve v zvezi z uporabo ali z izdajo dovoljenja za uporabo blaga ali izvajanjem storitev. V to skupino davkov sodijo splošni prometni davki (do sredine 1999), ki so jih nasledili davek na dodano vrednost in trošarine. V to kategorijo davčnih prihodkov sodijo tudi davki na posebne storitve (posebni prometni davki od iger na srečo in na igralne avtomate), dajatve na uporabo motornih vozil (registracijske takse) ter drugi davki na uporabo blaga in storitev in na dovoljenja za izvajanje določenih storitev (v to skupino se tako razvrščajo takse za obremenjevanje vode, komunalne, požarne, prenočitvene, krajevne takse, cestnine idr.). V to kategorijo sodijo tudi davki, ki se zaračunavajo ob uvozu na meji, in davki na pridobivanje, obdelavo ali proizvodnjo rudnin in drugih naravnih bogastev.

***Domestic taxes on goods and services*** *cover duties on production, acquisition, sale, transfer and renting of goods and services and duties related to use or issuance of the licence to use a good or produce services. They cover general sales taxes (until mid 1999), which were replaced by value added tax and excises. They also cover taxes on special services (special sales tax on gambling and tax on gambling machines), duties on use of motor vehicles (registration taxes) and other taxes on use of goods and services and on licences to perform certain services (this group covers water tax, communal tax, fire tax, tourist tax, municipal taxes, road taxes, etc.). This category also includes taxes charged on imports on the border, and taxes on acquisition or production ores or other mineral assets.*

**Davki na mednarodno trgovino in transakcije** zajemajo vse dajatve na mednarodno trgovino: carine in druge uvozne dajatve, izvozne davščine in druge vrste dajatev v mednarodnih transakcijah.

***Taxes on international trade and transactions*** *cover all duties on international trade: customs duties and other import duties, export duties and other kinds of duties on international transactions.*

**Drugi davki** zajemajo ostale vrste davčnih dajatev, ki jih ni mogoče zajeti med zgoraj navedene skupine davčnih prihodkov.

***Other taxes*** *cover other kinds of tax duties which can not be included into above items.*

**Nedavčni prihodki** so izkazani v naslednjih glavnih skupinah: udeležba pri dobičku in dohodki od premoženja, takse in pristojbine, denarne kazni, prihodki od prodaje blaga in storitev in drugi nedavčni prihodki.

***Non-tax revenues*** *are presented under the following main groups of revenues: entrepreneurial and property income, fees and charges, fines and forfeits, revenues from sales of goods and services and other non-tax revenues.*

**Prihodki iz naslova udeležbe pri dobičku in dohodki od premoženja** zajemajo udeležbo države pri dobičku podjetij, v katerih imajo upravljalske pravice. Zajemajo tudi prihodke od obresti (tako od sredstev na vpogled in vezanih tolarskih in deviznih depozitov kot tudi obresti od danih posojil) in prihodke od upravljanja z državnim (oziroma občinskim) premoženjem (prihodki od najemnin, zakupnin, licenčnin, prihodki od podeljenih koncesij).

***Entrepreneurial and property income*** *cover income derived from participation on profits of enterprises in which government has capital shares or management rights. This item also include interest revenues (both interest on at sight, short-term and long-term tolar and foreign currency deposits and interest on given loans) and revenues from managing government (state or local) property (revenues from renting and hiring, licences and concessions given).*

**Takse in pristojbine** zajemajo tiste prihodke, ki predstavljajo odškodnino oziroma delno plačilo za opravljene storitve državnih organov oziroma javne uprave. Pri taksah in pristojbinah obstaja - drugače kot pri davkih - neposredna povezava med dajatvijo in protistoritvijo državnega organa oziroma javne uprave. Takse se v nadaljnji členitvi delijo na sodne takse in upravne takse.

***Fees and charges*** *cover those revenues which refer to compensation or part payments for services rendered by government administration bodies. In the case of fees and charges there is, differently from taxes, no direct link between the amount of duty and the value of service rendered by the government body. Taxes are in further classification divided into court fees and administrative service charges.*

**Denarne kazni** zajemajo prihodke iz naslova plačil pravnih in fizičnih oseb zaradi prestopkov in prekrškov po različnih zakonih.

***Fines and forfeits*** *cover revenues from payments of legal and natural persons due to infringements and offences by various laws.*

Med tovrstne dejavnosti državnih organov sodijo: tiskanje in prodaja publikacij in tiskovin, plačila za opravljene inšpekcijske preglede, plačila stroškov sodnih postopkov, plačila za geodetske storitve, gospodarska dejavnost zaporov, neposredna plačila uporabnikov za nekatere storitve javnih služb (npr. doplačila v domovih za ostarele, vrtcih, plačila vstopnic za kulturne prireditve itd.).

***Sales of goods and services*** *cover all kinds of revenues which individual budget users and other institutions financed from the central and local government budgets acquire from their "own activities", that is by selling their goods and services to other sectors, for which it is therefore not paid from public financing sources, but by direct users of those goods and services. Such activities of the government units include: printing and sale of publications and printing material, inspection services, court procedures, geodetic services, economic activities of prisons, particular public services for which it is partly paid directly by the users (e.g. supplementary payments in homes for older people and in kindergartens, entrance tickets for culture performances offered by government institutions, etc.)*

**Drugi nedavčni prihodki** zajemajo dodatne prostovoljne prispevke za socialno varnost (dokupi pokojninske dobe idr.).

***Other non-tax revenues*** *cover additional social security contributions, acquisitions of working years, etc.*

**Kapitalski prihodki** zajemajo prihodke, ki so realizirani s prodajo realnega (fizičnega) premoženja, to je prodaje zgradb, opreme, drugih osnovnih sredstev, zemljišč, nematerialnega premoženja (patentov, licenc, blagovnih znamk), zalog in interventnih oz. blagovnih rezerv.

***Grants*** *received cover those kinds of current and capital revenues which are one-sided and voluntary remittances received either from domestic sources (from domestic legal persons: private companies, financial corporations, etc.) or from abroad (from international institutions, international non-governmental organisations, individual foreign governments and their institutions and from other legal and natural persons).*

**Transferni prihodki** zajemajo vsa sredstva, ki jih posamezna institucija javnega financiranja (posamezna blagajna javnega financiranja) prejema iz drugih javnofinančnih institucij. Izkazana so le sredstva iz

***Transferred revenues*** *cover all revenues which the four public financing institutions receive from other public financing institutions. Here only means from central government funds are shown, since*

državnih skladov, kajti transferni prihodki iz državnega proračuna, proračunov lokalnih skupnosti ali iz enega od skladov socialnega zavarovanja se v konsolidirani bilanci javnega financiranja ne izkazujejo.

*transfer revenues from the central government budget, local government budgets or from one of the social security funds are not shown in the consolidated balance of public financing.*

**Odhodki** so skladno z novo ekonomsko klasifikacijo izkazani v naslednjih glavnih skupinah: tekoči odhodki in tekoči transferji (tekoči javnofinančni odhodki) ter izdatki za nakup in gradnjo osnovnih sredstev in investicijski transferji (investicijski odhodki).

***Expenditures** are according to the new economic classification presented with the following main groups of expenditures: current expenditure, current transfers (together: current public financing expenditures), acquisition of capital assets and capital transfers (capital expenditures).*

**Tekoči odhodki** zajemajo naslednje glavne skupine nefinančnih transakcij: plače in druge izdatke zaposlenim, izdatke za blago in storitve, plačila obresti in sredstva, izločena v rezerve.

***Current expenditures** cover the following main groups of non-financial transactions: wages and other personnel expenditure, purchase of goods and services, interest payments and increase of reserves.*

**Plače in drugi izdatki zaposlenim** zajemajo vsa tekoča plačila, nastala zaradi stroškov dela (to je sredstva za plače in dodatke, povračila in nadomestila, sredstva za nadurno delo, regres za letni dopust in druge izdatke zaposlenim).

***Wages and other personnel expenditure** covers all current payments due to labour costs (that is payments for wages and additional payments, repayments and compensations, payments for over-time work, special payments for leave and other payments to employees).*

**Izdatki za blago in storitve** obsegajo vsa plačila za nabavljeni material in drugo blago ter plačila za opravljene storitve, ki jih država pridobiva na trgu. Sem sodijo vsi nakupi materiala, goriva in energije, izdatki za tekoče vzdrževanje in popravila, plačila potnih stroškov, izdatki za najemnine in zakupnine ter izdatki za vse vrste storitev, ki jih za državo opravljajo bodisi pravne ali fizične osebe (proizvodne in neproizvodne storitve, intelektualne storitve itd.). Obsegajo tudi izdatke za nakupe drobne opreme, ki je klasificirana glede na računovodska pravila med tekočimi odhodki, in sicer glede na njihovo vrednost ali življenjsko dobo (vrednost pod 500 ECU in življenjska doba krajša od enega leta). V kategorijo tekočih izdatkov za blago in storitve se skladno z novo ekonomsko klasifikacijo razvrščajo tudi odhodki investicijskega značaja, ki so namenjeni za vojaške namene in za specialno policijsko opremo.

***Purchases of goods and services** cover all payments for goods and payments for services rendered by market producers. It includes acquisitions of materials, fuel and energy, expenditures for current maintenance and repair and travel costs, expenditures for hiring and renting and expenditures for all kinds of services which are rendered to the government by legal and natural persons. They also include expenditures for acquisitions of small equipment which is in line with accounting rules classified as current expenditure, according to the value or life-time of the equipment (value under 500 Euro or life-time less than one year). Classified into current expenditures for goods and services are according to new economic classification also investment expenditures intended for military purposes and special police equipment.*

**Plačila obresti** zajemajo plačila za servisiranje domačega in tujega dolga in se na naslednjih ravneh razvrščajo na plačila obresti od najetih kreditov in na plačila obresti od izdanih vrednostnih papirjev. V podrobnejši klasifikaciji pa se nadalje razčlenjujejo po posameznih vrstah domačih oziroma tujih kreditodajalcev.

***Interest payments** include payments for servicing domestic and foreign debt and are composed of interest payments due to loans received and due to securities issued. In more detailed levels of classification they are disaggregated by types of domestic or foreign creditors.*

**Sredstva, izločena v rezerve,** obsegajo izločanja sredstev v proračunske rezerve, vključno s sredstvi tekoče proračunske rezerve za morebitne odhodke, ki niso bili predvideni v času priprave proračuna. V izvrševanju proračuna se odhodki, ki se plačajo iz sredstev rezerv, računovodsko evidentirajo v okviru ustreznega odhodkovnega konta, in ne v okviru konta rezerv.

***Reserves** cover funds which increase the budgetary reserves (they include funds for current budgetary reserve for eventual expenditures which in time of preparation the budget were not foreseen).*

**Tekoči transferji** zajemajo vsa navračljiva, nepoplačljiva plačila, za katera država (plačnik) od prejemnika sredstev ne pridobi v povračilo nikakršnega materiala ali drugega blaga oziroma prejemnik teh sredstev za plačnika (državo) ne opravi nikakršne storitve. Prejemnik mora tako dobljena sredstva uporabiti za izdatke tekoče ali splošne narave, in ne v investicijske namene. Odhodki, ki so zajeti v to skupino, so prikazani glede na vrsto prejemnika sredstev, in sicer z naslednjimi glavnimi podpostavkami: subvencije, transferji posameznikom in gospodinjstvom, tekoči transferji neprofitnim organizacijam in drugim nedržavnim ustanovam ter tekoči transferji v tujino.

***Current transfers** cover all unreturnable payments for which general government (payer) does not receive anything as a compensation from the receiver of these payments, neither in the form of material or other goods nor in the form of service implemented by the receiver. Use of these payments by the receiver should not have a nature of investment consumption. Expenditures included into current transfers are presented - according to the type of the receiver - within the following subitems: subsidies, current transfers to individuals and households, current transfers to non-profit institutions and other non-government institutions, and current transfers to the rest of the world.*

**Subvencije** obsegajo vsa nepovratna sredstva, dana javnim ali zasebnim podjetjem, finančnim institucijam (bankam, zavarovalnicam) ali zasebnim tržnim proizvajalcem (obrtnikom, kmetom in drugim proizvajalcem blaga in storitev na trgu). Prejemniki subvencij obravnavajo ta sredstva kot prihodek tekočega poslovanja. Subvencije se izkazujejo pod različnimi nazivi: regresi, kompenzacije, premije, nadomestila, povračila idr. Najpogosteje je njihov namen bodisi znižanje cen za končnega uporabnika ali pa zvišanje dohodkov proizvajalcev. Subvencije so v ekonomski klasifikaciji razčlenjene po vrstah ekonomskih subjektov, prejemnikov subvencij (subvencije javnim podjetjem, finančnim institucijam, zasebnim podjetjem in zasebnikom), v nadaljnji členitvi pa po vrstah oziroma namenu subvencije (subvencioniranje cen, subvencioniranje obresti, pokrivanje izgub, subvencioniranje proizvodnje, subvencioniranje zaposlovanja itd.).

***Subsidies** include all unrequitable funds, given to public or private enterprises, to financial institutions (banks, insurance companies) and private market producers (craftsmen, farmers and other market producers of goods and services). Receivers of subsidies treat these funds as income from current operations. Subsidies are recorded under different names: compensations, premiums, repayments etc. Their purpose is most often either decrease of prices for final consumers or increase of incomes for producers. In the economic classification subsidies are broken down by types of economic subjects that receive them (subsidies to public enterprises, financial institutions, private companies, etc.) and further broken down by types or purpose of the subsidy (subsidisation of prices or interest, covering loss, subsidisation of production or employment, etc.).*

**Transferji posameznikom in gospodinjstvom** zajemajo vsa plačila, namenjena za tekočo porabo posameznikov ali gospodinjstev, in predstavljajo splošni dodatek k družinskim dohodkom ali pa delno ali polno nadomestilo posameznikom ali gospodinjstvom za posebne vrste izdatkov (socialno zavarovanje, varstvo nezaposlenih, ostarelih in invalidov, družinski prejemki, štipendije, pokojnine, nadomestila

***Transfers to individuals and households** cover all payments intended for current use by individuals and households and function as a general adding to family income or as partial or full compensation of individuals or households for their special kinds of expenditure (social security, social care for unemployed, old and handicapped people, family allowances, scholarships, pensions, compensations of*

plač v času bolezenske odsotnosti ipd.). Tudi za tovrstne transferje je značilno, da koristniki teh sredstev plačniku (državi) ne opravijo nikakršnih storitev oziroma ne nudijo nikakršnega nadomestila. V okviru transferjev posameznikom se izkazujejo tako neposredna plačila posameznikom iz proračunov kot tudi sredstva, ki jih posamezniki sicer ne prejmejo neposredno, pač pa koristijo njihove ugodnosti (npr. pri regresiranju študentske prehrane ali regresiranju potovanj učencev in študentov, pri čemer so prejemniki sredstev podjetja, ki študentom in dijakom nudijo cenejšo prehrano oziroma cenejši prevoz). Čeprav so prejemniki teh sredstev podjetja, in ne neposredno posamezniki, se ti transferji ne izkazujejo v okviru subvencij podjetjem, pač pa med transferji posameznikom.

*wages for the time of illness etc.) It is characteristic for these transfers that the general government (payer) does not receive anything as a compensation from the receiver of these payments, neither in the form of service implemented by the receiver or as any other compensation. Recorded under transfers to individuals are both direct payments to individuals from budgets and funds which individuals do not receive directly, but make use of services financed by them (e.g. at reimbursement of student food and student travels, where receivers are companies offering pupils and students cheaper food or transportation). Even though receivers of these payments are companies and not directly individuals, these transfers are not shown within subsidies to enterprises but within transfers to individuals.*

**Transferji neprofitnim organizacijam in ustanovam** predstavljajo tretjo skupino tekočih transferjev, pri čemer se pod neprofitnimi organizacijami razumejo javne ali zasebne nevladne institucije, katerih cilj ni pridobitev dobička, ampak je namen njihovega delovanja javnokoristen, dobrodelen, kot so npr. Rdeči križ, dobrodelne organizacije, verske organizacije, društva (kulturna, športna društva, gasilska društva, strokovna društva in zveze itd.) in druge neprofitne ustanove.

***Transfers to non-profit institutions*** *represent the third group of current transfers, where non-profit institutions include public or private non-government institutions, whose motive is not profit, but they follow public good and charitable objectives, such as the Red Cross, charitable organisations, religious organisations, societies (culture, sport clubs, fire brigades, professional societies and associations, etc.) and other non-profit institutions.*

**Drugi domači tekoči transferji** zajemajo tekoče transferje v javne zavode in drugim izvajalcem javnih služb (zajemajo vse izdatke za plačila storitev javnim zavodom, javnim gospodarskim službam in drugim izvajalcem javnih služb, ki se financirajo iz proračunov) in tekoče transferje drugim ravnem države.

***Other domestic current transfers*** *include current transfers to public institutions and other implementators of public services financed from the budgets and current transfers to other levels of government.*

**Tekoči transferji v tujino** obsegajo izdatke za plačila tekočih odhodkov različnim mednarodnim institucijam (članarine, kotizacije, pristopnine ipd.) in izdatke tujim vladnim in nevladnim neprofitnim institucijam in organizacijam v tujini.

***Current transfers abroad*** *cover expenditures for payments to various international institutions (membership fees, participation fees, entrance fees, etc.) and to foreign government and non-government non-profit institutions and to organisations abroad for their current expenditures.*

**Investicijski odhodki** so izkazani z naslednjima glavnima skupinama odhodkov: odhodki za nakupe in gradnjo osnovnih sredstev ter investicijski transferji.

***Capital expenditures*** *are presented within the following main groups of expenditures: expenditures on acquisition of fixed assets and capital transfers.*

**Odhodki za nakupe in izgradnjo osnovnih sredstev** zajemajo plačila, namenjena pridobitvi ali nakupu opredmetenih in neopredmetenih osnovnih sredstev, to je zgradb in prostorov, prevoznih sredstev, opreme in napeljav ter drugih osnovnih sredstev. Zajemajo tudi izdatke za novogradnje, rekonstrukcije in adaptacije ter za investicijsko vzdrževanje in obnove osnovnih sredstev, izdatke za nakup zemljišč in naravnih bogastev ter izdatke za nakup nematerialnega premoženja, blagovnih rezerv in interventnih zalog. Zajemajo pa tudi plačila za izdelavo investicijskih načrtov, študij o izvedljivosti projektov in projektne dokumentacije. Odhodki iz tega naslova pomenijo povečevanje realnega premoženja države in povečujejo vrednost opredmetenih in neopredmetenih dolgoročnih sredstev v bilancah stanja države na centralni oziroma lokalni ravni.

***Acquisition of capital assets*** *cover payments used to acquire or buy tangible or intangible fixed assets, i.e. buildings and rooms, transport means, equipment and installations and other fixed assets. They also include expenditures for new buildings, reconstructions, adaptations and for investment maintenance and renovation of fixed assets, expenditures for acquisitions of land and natural goods and intangible assets, merchandise reserves and reserves for interventions. Included are also payments for investment plans, feasibility studies and project documentation. This kind of expenditure increases government real property and value of tangible and intangible long-term assets in the balance sheets for the government sector on its central and local levels.*

**Investicijski transferji** zajemajo izdatke države, ki so nepovratna sredstva, namenjena plačilu investicijskih odhodkov prejemnikov sredstev, to je za nakup ali gradnjo osnovnih sredstev, za nabavo opreme ali drugih opredmetenih in neopredmetenih osnovnih sredstev, za investicijsko vzdrževanje, obnove idr. Prejemniki teh sredstev so subjekti, ki nimajo statusa proračunskega uporabnika (po SNA večina teh enot ne spada v sektor država). Investicijski transferji (drugače kot investicijski odhodki) ne povečujejo realnega (fizičnega) premoženja države (ne povečujejo vrednosti opredmetenih in neopredmetenih dolgoročnih sredstev v bilancah stanja države na centralni oziroma lokalni ravni), pač pa povečujejo realno premoženje prejemnikov teh sredstev (javnih oziroma zasebnih podjetij, posameznikov, finančnih institucij, zavodov itd.). V bilancah stanja države (oziroma občine) pa se investicijski transferji izkazujejo kot finančna naložba države oz. občine v javni zavod ali javno podjetje, finančno institucijo itd.

***Capital transfers*** *cover unreturnable expenditures of the government sector, which are intended to be used to finance capital expenditures of the receivers, that is for their acquisition of fixed assets, for purchase of equipment and other tangible and intangible fixed assets, for investment maintenance and renovation, etc. Receivers of capital transfers are entities which are not direct users of the budgetary sources (most of these entities according to SNA do not belong to the government sector). Capital transfers (contrary to capital expenditures) do not increase real (physical) property of the state (they do not increase the value of tangible and intangible long-term assets in balance sheets of the government sector on its central and local levels) but increase real property of receivers of these funds (public or private enterprises, individuals, financial institutions, etc.). In balance sheets of the government (or municipality) capital transfers are shown as financial investment of the government or municipality into the public institution or enterprise, financial institution, etc.*

vrste finančnega sredstva. V okviru te skupine izdatkov se izkazujejo tudi plačila zapadlih jamstev države podjetjem ali finančnim institucijam, ki prav tako pomenijo vzpostavitev terjatev države do prejemnikov teh sredstev. Na strani izdatkov je zajet tudi del porabe sredstev kupnin iz naslova privatizacije. V okviru te skupine izdatkov se izkazujejo tudi plačila zapadlih jamstev države podjetjem ali finančnim institucijam, ki prav tako pomenijo vzpostavitev terjatev države do prejemnikov teh sredstev.

# 32. PLAČILNA BILANCA

# BALANCE OF PAYMENTS

## METODOLOŠKA POJASNILA

## METHODOLOGICAL EXPLANATIONS

### Viri in metode zbiranja podatkov

### Sources and methods of data collection

### Splošno o plačilni bilanci

Plačilno bilanco Slovenije sestavlja Banka Slovenije (BS) na podlagi metodologije Mednarodnega denarnega sklada (MDS) po Priročniku za sestavljanje plačilne bilance (Balance of Payments Manual, četrta različica tega priročnika je izšla leta 1977, peta pa leta 1993) in v okviru razpoložljivih podatkov.

Plačilna bilanca je statistični zapis, ki za določeno časovno obdobje sistematično zajema ekonomske transakcije med subjekti gospodarstva države in tujino, praviloma med rezidenti države in nerezidenti. V plačilno bilanco se zajemajo naslednje vrste transakcij: izvoz in uvoz blaga, izvoz in uvoz storitev, prejemki in izdatki iz naslova dohodkov, finančne terjatve in obveznosti do tujine ter enostranske transakcije - transferji. Te transakcije se zajemajo v dva temeljna podračuna plačilne bilance: v tekoči račun ter v kapitalski in finančni račun.

Uporaba jasnega koncepta rezidenčnosti enote omogoča ustrezno identificiranje in zajetje transakcij med rezidenti države in nerezidenti (tujino). Koncept rezidenčnosti, ki ga uporablja Priročnik za sestavljanje plačilne bilance, je enak konceptu rezidenčnosti v Sistemu nacionalnih računov (SNA, 1993). V skladu s tem konceptom je enota - transaktor - rezidenčna enota takrat, kadar ima na ekonomskem ozemlju države središče svojega ekonomskega interesa; če tega pogoja ne izpolnjuje, je nerezidenčna enota. Ekonomsko ozemlje v tej definiciji zajema geografski teritorij, ki ga upravljajo organi države, in ne sovpada povsem z ozemljem države.

Eno temeljnih načel pri sestavljanju plačilne bilance je sistem dvojnega knjigovodstva, tako da je vsaka transakcija knjižena dvakrat; vsota vseh knjiženj bi morala teoretično biti nič, v resnici pa pride do salda, ki se knjiži v postavki "neto napake in izpustitve".

Plačilna bilanca je v osnovni različici tudi delno sektorizirana (denarne oblasti, vlada, poslovne banke, drugi) in razčlenjena na podlagi razlikovanja med kratkoročnimi in dolgoročnimi terjatvami oziroma obveznostmi. Vendar skrajšani prikaz plačilne bilance Slovenije v Statističnem letopisu teh značilnosti nima.

Podatki o transakcijah so preračunani v ameriške dolarje po tečaju Banke Slovenije na dan transakcije, če je ta znan, sicer pa po povprečnem tečaju obdobja.

Negativni predznak (-) pomeni uvoz oziroma presežek uvoza nad izvozom v tekočem računu, povečanje terjatev ali zmanjšanje obveznosti v kapitalskem in finančnem računu ter povečanje mednarodnih rezerv.

### Posebnosti plačilne bilance Slovenije

Način obračuna plačilne bilance Slovenije je bil po letu 1991 nekajkrat dopolnjen - z namenom, da bi se čim bolj približali metodološkim napotkom spremenjene različice priporočil MDS. To je bilo dokaj odvisno od razpoložljivih virov podatkov, ki so bili ob denarni osamosvojitvi Slovenije oziroma po letu 1991 precej pomanjkljivi. Na novo je bilo treba organizirati zbiranje, obdelavo in objavljanje denarnih, finančnih in plačilnobilančnih podatkov. Z dopolnjevanjem virov podatkov se je postopoma izpopolnjevala tudi shema plačilne bilance.

Metodologija plačilne bilance Slovenije je bila torej večkrat spremenjena; večje spremembe so bile nazadnje vpeljane v avgustu 2000. Ob vsakokratni uvedbi večjih metodoloških sprememb v obračunsko shemo so se obstoječe serije podatkov nadomeščale z novimi serijami, medtem ko se zaradi manjših sprememb podatki za nazaj niso popravljali, kar je včasih kvarilo medletno primerljivost podatkov. Podatki so se popravljali za obdobja od vključno leta 1994 dalje. (Te spremembe so se odražale tudi v preteklih prikazih plačilne bilance Slovenije v Statističnem letopisu.) Plačilnobilančni podatki za leti 1992 in 1993 so ostali razpoložljivi le na podlagi tedaj veljavne obračunske sheme, ki je uporabljala še precej nerazvite vire podatkov in je temeljila na četrti izdaji Priročnika za sestavljanje plačilne bilance.

### General features of the balance of payments

*The balance of payments of Slovenia is compiled by the Bank of Slovenia (BS) on the basis of International Monetary Fund's recommendations (Balance of Payments Manual, the fourth and the fifth editions were issued in 1977 and in 1993 respectively) and under limitations posed by availability of data sources.*

*The balance of payments is a statistical statement that systematically summarises, for a specific time period, the economic transactions of an economy with the rest of the world. Transactions consist of those involving goods, services and income; those involving financial claims on and liabilities to the rest of the world; and those (such as gifts) classified as transfers, which involve offsetting entries to balance - in an accounting sense - one-sided transactions. These transactions are covered by two main subaccounts of the balance of payments: the current account, and the capital and financial account.*

*Use of a clear concept of residency of a unit enables appropriate identification and coverage of all transactions between residents of an economy and non-residents (rest of the world). The concept of residency used in the Balance of Payments Manual is identical to that used in the System of National Accounts (SNA, 1993). According to this concept, a unit-transactor is a resident unit when it has a centre of economic interest in the economic territory of a country. According to this definition economic territory consists of the geographic territory administered by the government and is not completely identical to the territory encircled by the country's geographical boundaries.*

*One of the basic principles in compiling the balance of payments is the system of double accounting; the sum of all entries should theoretically be zero, but practically it is a balance (positive or negative), which is then entered into the item "net errors and omissions".*

*The balance of payments in its basic variant is also partly sectored (monetary authorities, government, commercial banks, others) and structured on the basis of distinguishing between short-term and long-term claims and liabilities. However, presentation of the balance of payments of Slovenia in Statistical Yearbook is without these features.*

*Data on transactions are converted from original currencies to USD using the daily Bank of Slovenia exchange rates or average exchange rates of the period if the exact date of transaction is not known.*

*Minus sign (-) indicates imports or surplus of imports over exports in the current account, increase in assets or decrease in liabilities in the capital and financial accounts, and growth of reserve assets.*

### Some specific features of the balance of payments of Slovenia

*Methodology for the compilation of the balance of payments of Slovenia has been supplemented a few times since 1991 with the objective to come more in line with the IMF recommendations. However, those changes have to a great extent depended on the availability of data sources, which were after the attainment of monetary independence of Slovenia and after 1991 rather deficient. It was necessary to establish a new organisation of monetary, financial and balance-of-payments data collection, processing and publishing. By supplementing the data sources, gradually the scheme of the balance of payments was improved.*

*Methodology of the balance of payments of Slovenia has therefore been changed several times, with extensive methodological changes introduced into the balance of payments scheme for the last time in August 2000. Whenever important methodological changes had been introduced into the compilation scheme, data series for the period from 1994 on were replaced with new data series, while in cases of minor methodological changes data for previous years were not corrected, which sometimes deteriorated year-to-year comparability of data. All these changes have been reflected in data series published in previous issues of the Statistical Yearbook. Balance-of-payments data for 1992 and 1993 are available only on the basis of the then valid methodology, which used rather underdeveloped data sources and was based on the fourth edition of the Balance of Payments Manual.*

## Viri podatkov in metodologija plačilne bilance Slovenije za obdobje 1995-2002

Od leta 1991 dalje so se podatkovni viri postopoma izgrajevali v okviru prilagajanja metodologije sestavljanja plačilne bilance mednarodnim priporočilom. Osnovni viri podatkov za izdelavo plačilne bilance so: mesečni podatki o transakcijah (ITRS) in stanjih, carinske listine, podatki o registriranih črpanjih/odplačilih kreditov v poslovanju s tujino, računovodski podatki Banke Slovenije in bank, poročila o naložbah (SN), mesečna anketa prostocarinskih prodajaln ter ocene.

Mesečni podatki sistema poročanja o transakcijah s tujino (ITRS) zajemajo podatke o plačilih preko računov domačih bank in drugih domačih podjetij pri bankah v tujini (tudi računi centralne banke), podatke o plačilih preko računov nerezidentov pri domačih bankah, podatke o poslovanju preko drugih odprtih računov med rezidenti in nerezidenti ter podatke o plačilih med rezidenti in nerezidenti v SIT. Poročati so dolžne vse banke, ki opravljajo plačilni promet s tujino, in vsi rezidenti, ki imajo odprte račune v tujini. Poročajo o stanjih na računih in o transakcijah. Podatek o vrsti transakcije je dolžan posredovati rezident nalogodajalec/upravičenec plačila.

Uporabljeni so naslednji modeli ocenjevanja: ocena odkupov tuje gotovine in čekov od tujcev v menjalnicah (del postavke potovanja), ocena izdatkov za potovanja v tujino, vključno s čezmejnimi nakupi blaga, ocena plačil iz tujine slovenskim delavcem dnevnim migrantom, ocena italijanskih pokojnin (do konca leta 1998) in kratkoročnih komercialnih kreditov in ocena transakcij s tujo gotovino in z vlogami slovenskih gospodinjstev.

Za postavko blago so glavni vir podatkov carinske listine (Enotne carinske listine - ECL). Na podlagi teh listin pripravlja Statistični urad Republike Slovenije obračun blagovne menjave s tujino (izvoz blaga FOB in uvoz blaga CIF, vključno z oplemenitenjem po bruto načelu), Banka Slovenije pa te podatke vključuje v plačilno bilanco Slovenije. Za blago se poleg podatkov iz carinskih listin uporabljata še dva vira: sistem poročanja o transakcijah s tujino (ITRS) ter poročila prostocarinskih prodajaln in carinskih skladišč.

Za storitve, dohodke in tekoče transferje je glavni vir podatkov ITRS, drugi viri teh podatkov pa so ocene in za tekoče transferje tudi carinske listine.

Za ocenjevanje delov postavk tekočega računa plačilne bilance se uporabljajo naslednji modeli:

- prilagoditev vrednosti podatkov o izvoženem blagu in prilagoditev zaobjema podatkov o izvoženem in uvoženem blagu (postavki "prilagoditev zaobjema");
- ocena odkupov tuje gotovine in čekov od tujcev v menjalnicah (postavka "potovanja - prejemki");
- ocena izdatkov za potovanja v tujino, vključno s čezmejnimi nakupi blaga (postavka "potovanja - izdatki");
- ocena plačil iz tujine slovenskim delavcem dnevnim migrantom (postavka "dohodki - prejemki od dela");
- ocena prejemkov iz naslova italijanskih pokojnin (postavka "tekoči transferji - prejemki").

Za sestavljanje kapitalskega in finančnega računa plačilne bilance se uporabljajo naslednji viri:

- ITRS in carinske listine ter poročila o naložbah (SN) (za reinvestirane dobičke neposrednih naložb);
- podatki o črpanjih/odplačilih v okviru kreditnih poslov s tujino iz evidence o registriranih kreditih, pridobljenih v tujini oziroma danih tujini; registracija je obvezna za vse komercialne kredite z rokom plačila nad 1 leto, kadar znesek presega 1 mio SIT, oz. za vse finančne kredite, tako kratkoročne kot dolgoročne; za obdobje od 1997 naprej so iz tega vira na voljo tudi podatki o namenu neposrednih plačil tujih kreditodajalcev, s katerimi se poravnava obveznosti domačih posjilojemalcev do drugih nerezidentov;
- ocene kratkoročnih komercialnih kreditov;

## *Data sources and methodology of the balance of payments for the period 1995-2002*

*Since 1991 data sources have gradually been built up within the framework of overall adapting of the methodology of compiling the balance of payments of Slovenia to international standards. Balance of payments is compiled on the basis of monthly available data on transactions (ITRS) and stocks, customs declarations data and data from reports to the Bank of Slovenia on registered credits granted to and disbursed abroad, accounting data of the Bank of Slovenia and commercial banks, foreign investment reports (for reinvested earnings on foreign direct investment), monthly reports of duty-free shops and estimates.*

*Monthly available data on transactions (International Transactions Reporting System - ITRS) include data on transactions settled via accounts between residents and non-residents. These accounts comprise accounts of domestic banks held with correspondent banks abroad (including the central bank) as well as non-bank resident accounts abroad, non-resident accounts held with domestic banks and other accounts between residents and non-residents. ITRS data also include data on payments between residents and non-residents in Slovenian tolars. Reporting units are all banks performing transactions with the rest of the world and all residents who have open accounts abroad. They report on accounts' balance and transactions. Data on type of transaction must be supplied by the resident transactor.*

*There are several estimation models used in the balance of payments compilation: estimates of buying foreign currency and cheques from foreigners in exchange offices, travels abroad (including cross-border shopping), labour income, Italian pensions (till the end of 1998), short-term commercial credits, foreign currency and deposits of resident households.*

*Main sources of data for the goods item are customs data. Calculations of "export FOB" and "import CIF" are prepared by the Statistical Office of the Republic of Slovenia (including processing according to the gross principle), and then included into the overall balance of payments. In use for the goods item are two additional data sources: the system of reporting about international transactions of resident units (ITRS) and reports of duty-free shops and customs warehouses.*

*For services, income and current transfers the main source of data is the ITRS, another source are estimates and for current transfers also customs data.*

*The following models of estimating particular parts of items of the current account of the balance of payments are in use:*

- *adjustment of the value of the transactions included in the aggregate export of goods, FOB and adjustment of coverage of data on export and import of goods (items "coverage adjustment");*
- *estimate of part of receipts from tourism (item "travel - receipts");*
- *estimate of expenditure on travel abroad (item "travel - expenditure");*
- *estimate of payments from the rest of the world to Slovene workers - daily migrants (item "income - receipts from work");*
- *estimate of receipts from pensions paid by Italy (item "current transfers - receipts").*

*For the capital and financial account items the following data sources are used:*

- *ITRS, customs declarations and foreign investment reports*
- *reports to the Bank of Slovenia on registered credits granted to and disbursed abroad; registration is compulsory for all commercial credits to be paid in over a year when the amount is over SIT 1 million and for all financial credits both short-term and long-term; for the period after 1997 data on the purpose of direct payments of foreign creditors, with which liabilities of domestic credit takers towards other non-residents are settled, are also available from this source;*
- *estimates of short-term commercial credits;*

- ocena transakcij v zvezi s tujo gotovino in z denarnimi vlogami slovenskih gospodinjstev pri bankah v tujini;
- računovodski podatki Banke Slovenije in komercialnih bank; podatki o spremembah stanj na računih terjatev in obveznosti poslovnih bank in BS do tujine iz njihovih računovodskih izkazov.

### Zajetje in definicije

Nerezidenti so za namene sestavljanja plačilne bilance opredeljeni kot:

- fizične osebe, ki nimajo stalnega bivališča v Sloveniji, razen tistih z veljavnim delovnim dovoljenjem v Sloveniji za obdobje 6 mesecev ali več;
- fizične osebe s stalnim bivališčem v Sloveniji, ki imajo uradno dovoljenje za delo ali bivanje v tujini;
- pravne osebe s sedežem v tujini, razen diplomatsko-konzularnih in ostalih predstavnikov, ki jih financira slovenska vlada, ter slovenski državljani, zaposleni pri njih, vključno z njihovimi družinskimi člani;
- diplomatska, konzularna in druga predstavništva tujih držav ali mednarodnih organizacij v Republiki Sloveniji, ki jih financirajo ali sofinancirajo tuje vlade, in tuji državljani, zaposleni pri njih, in njihovi družinski člani;
- predstavništva in poslovne enote tujih podjetij v Sloveniji, razen za tisti del njihovih dejavnosti, ki se stalno opravlja v Sloveniji;
- predstavništva in poslovne enote slovenskih podjetij, ki opravljajo stalno dejavnost v tujini, za tisti del dejavnosti, ki se opravlja v tujini.

Vsi drugi so rezidenti Republike Slovenije.

V pojasnilih za posamezne postavke - standardne sestavine plačilne bilance Slovenije - navajamo opredelitve iz Priročnika za izdelavo plačilne bilance MDS (1993) in elemente metodologije za sestavo plačilne bilance Slovenije, ki so upoštevane v izkazu za obdobje 1995-2002.

**Tekoči račun** plačilne bilance zajema vse transakcije, ki imajo ekonomske vrednosti in so transakcije med rezidenti opazovanega gospodarstva države in nerezidenti, ne spadajo pa v kapitalski in finančni račun. Ločimo naslednje tri temeljne vrste tekočih transakcij: transakcije blaga in storitev, transakcije dohodkov in tekoče transferje.

Postavka **blago** zajema blago, blago za oplemenitenje, popravila blaga, blago, ki se dobavlja v pristanišča, in nedenarno zlato. V postavko blago se uvrščajo vse tiste transakcije z blagom, v katerih sta udeležena rezident in nerezident in pri katerih se spremeni lastništvo. Med izjeme sodijo transakcije med rezidenti in nerezidenti na osnovi oplemenitenja in finančnega zakupa, ki se uvrščajo v postavko blago, čeprav ni prišlo do spremembe lastništva predmeta, ki je sicer prečkal državno mejo.

Izvoz blaga je v plačilni bilanci izkazan kot izvoz blaga FOB (podatki iz carinskih listin), v podatke pa je vključena še t.i. “prilagoditev zaobjema”. Prilagoditev zaobjema zajema tisti izvoz blaga, za katerega se ne izdelajo carinske deklaracije, izvoz blaga iz popravila, odpise/pripise razlik v vrednosti in izvoz blaga v okviru izvajanja investicijskih del (gradbeni material).

Uvoz blaga je v plačilni bilanci izkazan kot seštevek uvoza blaga CIF (podatki iz carinskih listin), zmanjšanega za prilagoditev CIF/FOB, in "prilagoditve zaobjema".

Podatki o uvozu po vrednosti CIF so prilagojeni na vrednosti FOB s pomočjo koeficienta, ki je enak uteženemu povprečju koeficientov med CIF in FOB vrednostmi uvoza blaga (za razpoložljivi vzorec), ločenim glede na vrsto blaga, vrsto prevoznega sredstva in državo partnerja. S prilagoditvijo zaobjema so v uvozu blaga prikazani še tile podatki: o tistem uvozu blaga, za katerega se carinske listine ne izpolnjujejo, o uvozu blaga iz popravila, o odpisih/pripisih razlik v vrednosti, o prodaji tujega blaga rezidentom v prostih carinskih prodajalnah in konsignacijskih skladiščih in o uvozu blaga v okviru izvajanja investicijskih del.

- *estimate of transactions in foreign cash and deposits of resident households in the banks abroad;*
- *accounting data of the Bank of Slovenia and commercial banks; data on changes on the accounts of claims and liabilities of commercial banks and the central bank vis-a-vis the rest of the world.*

### *Coverage and definitions*

*Non-residents are for the purpose of compiling the balance of payments of Slovenia defined in the following way:*

- *natural persons without permanent residence in Slovenia, except those who have the official permit to work in Slovenia for 6 months or more;*
- *natural persons with permanent residence in Slovenia who have an official permit to work or live abroad;*
- *legal persons with registered headquarters abroad, except diplomatic, consular and other entities financed by Slovenian government and Slovenian citizens employed there together with members of their families;*
- *diplomatic, consular and other representative bodies of foreign countries or international organisations in the Republic of Slovenia which are financed or co-financed by foreign governments and foreign citizens employed in them together with their family members;*
- *representative agencies and business units of foreign enterprises in Slovenia, except for the part of their activity which is implemented on a permanent basis in Slovenia;*
- *representative agencies and business units of Slovene enterprises which implement a permanent activity abroad, only for the part which is actually implemented abroad.*

*Residents of the Republic of Slovenia are all others not listed above.*

*Particular items of the presented balance of payments are explained by the definitions from the IMF Balance of Payments Manual (1993) and elements of the methodology for the compilation of the balance of payments of Slovenia for the period 1995-2002.*

***Current account** of the balance of payments covers all transactions (other than those in financial items) that involve economic values and occur between the residents of the observed economy and non-residents. Specifically, the major classifications are goods and services, income and current transfers.*

*The item **goods** covers general merchandise, goods for processing, repairs on goods, goods procured in ports by carriers, and non-monetary gold. The item goods is a collection of all transactions in goods between residents and non-residents if changes of ownership occurred. The two exceptions are transactions on the basis of processing and financial leasing, which are included in goods although there were no changes of ownership of the goods that had passed the state border.*

*Export of goods is presented in the balance of payments as the sum of export of goods FOB (customs data) and the “coverage adjustment”. Coverage adjustment for export of goods includes the following items: value of export of goods for which customs declarations have not been made; export of goods after the repair; write-offs and adding of values and export of goods on the basis of implementing investment works (building materials).*

*Import of goods is presented in the balance of payments as the sum of import of goods CIF (customs data), decreased for adjustment CIF/FOB, and "coverage adjustment".*

*Adjustments for valuation of data on imports and coverage of data on imports and exports are made by the Bank of Slovenia. The imports data are adjusted from CIF basis to FOB basis by the coefficient which is equal to the weighted average of coefficients between the CIF and FOB values of imported goods (for the available sample), separately calculated for each type of merchandise, transport means and country of the exporter. Coverage adjustment for import of goods includes the following items: value of import of goods for which customs declarations have not been made; import of goods after the repair abroad; write-offs and adding of values; value of imported goods (not covered by customs declarations) which are sold to residents in duty-free shops and consignment warehouses; and import of goods on the basis of implementing investment works.*

**Storitve** (izvoz in uvoz storitev) so v prikazani plačilni bilanci izkazane s postavkama transport in potovanja; preostale storitvene transakcije so združene v postavko druge storitve, ki združuje komunikacijske in konstrukcijske storitve, zavarovanje, finančne storitve, računalniške in informacijske storitve, pravice in licence, preostale poslovne storitve, osebne, kulturne in rekreativne storitve ter vladne storitve.

*Data on **services** (export and import of services) are presented in the balance of payments with items transport and travel, while the rest of the service transactions are aggregated into the item other services. Other services is the aggregation of the following standard components of the balance of payments: communication services, construction, insurance, financial services, computer and information services, royalties and licence fees, other business services, personal, cultural and recreational services, and government services.*

**Dohodki** zajemajo dva tipa transakcij med rezidenti in nerezidenti: (i) prejemke za opravljeno delo, ki se plačujejo nerezidentom (npr. mejnim, sezonskim in drugim kratkoročnim delavcem, ki opravljajo delo v tujini), in ustrezne izdatke - ti so v prikazani plačilni bilanci izkazani kot "dohodki od dela" -, ter (ii) prejemke dohodkov, ki se oblikujejo na temelju finančnih terjatev do tujine, in izdatke na temelju obveznosti do tujine; ti prejemki in izdatki temeljijo na neposrednih naložbah, naložbah v vrednostne papirje (portfeljske naložbe) in na posojilih - v prikazani plačilni bilanci so izkazane kot "dohodki od finančnih sredstev".

***Income** according to IMF methodology covers two types of transactions between residents and non-residents: (i) those involving compensation of employees, which is paid to non-residents (e.g., border, seasonal, and other short-term workers) - these are presented in the balance of payments as "income from work", and (ii) those involving investment income receipts and payments on external financial assets and liabilities. Included in the letter are receipts and payments on direct investment, portfolio investment, other investment, and loans - these are presented in the balance of payments as "income from financial assets".*

**Tekoči transferji** zajemajo vse transferje med rezidenti in nerezidenti, ki niso prenosi kapitala, razen: (i) transferjev lastništva osnovnih sredstev; (ii) transferjev sredstev, ki so v zvezi (ali pogojeni) z nabavo ali s prenehanjem razpolaganja z osnovnimi sredstvi; (iii) oprostitev obveznosti do upnikov brez kakršnega koli nadomestila.

***Current transfers** consist of all transfers that are not transfers of capital except: (i) transfers of ownership of fixed assets, (ii) transfers of funds linked to, or conditioned upon, acquisition or disposal of fixed assets, (iii) exemption, without any counterparts being received in return, of liabilities by creditors.*

Tekoči transferji v nasprotju s kapitalskimi transferji neposredno vplivajo na raven razpoložljivega dohodka in na porabo blaga ali storitev, tako da zmanjšujejo dohodkovne in porabne možnosti dajalcu in jih povečujejo prejemniku transferja. Značilne vrste tekočih transferjev so: denarni prenosi za financiranje tekočih izdatkov držav, prejemnic tekočih transferjev, darila in pomoči v naravi (hrana, obleka, zdravila, vojaška oprema itd.), prispevki držav članic mednarodnim organizacijam itd.

*The distinguishing feature of current transfers against capital transfers is that current transfers directly affect the level of disposable income and should influence the consumption of goods and services, so that they would reduce the income and consumption possibilities of the donor and increase these possibilities for the recipient. Characteristic types of current transfers are: financial transfers for financing current expenditure of countries recipients of current transfers, gifts and help in kind (food, clothes, medicines, military equipment, etc.), contributions of member states to international organisations, etc.*

V plačilni bilanci Slovenije so tekoči transferji razčlenjeni na tekoče transferje uradnega sektorja (transakcije med rezidenti, ki so državne ustanove, in nerezidenti) in na tekoče transferje drugih sektorjev. Tekoči transferji uradnega sektorja zajemajo tekoče transferje, katerih plačniki so enote državnega sektorja Slovenije (tekoči transferji v tujino) oziroma drugih držav (tekoči transferji v Slovenijo). Tekoči transferji drugih sektorjev zajemajo nakazila delavcev, transferje iz zavarovanj in druge transferje. Transferji na osnovi zavarovanj so izračunani kot razlika med prejetimi zavarovalnimi premijami in plačili odškodnin, zmanjšana za delež, ki je vključen v postavko zavarovalniške storitve.

*In the balance of payments of Slovenia current transfers are broken down into the current transfers of the official sector (transactions between residents, which are governmental institutions, and non-residents) and current transfers of other sectors. Current transfers of the official sector cover current transfers paid by resident government units (current transfers abroad) and non-resident government units (current transfers to Slovenia) respectively. Other sectors' transfers include workers' remittances, insurance transfers and other transfers. The insurance item is calculated as a difference between the insurance premiums received and the claims paid on the credit side and vice versa on the debit side.*

**Kapitalski in finančni račun** plačilne bilance ima dve temeljni sestavini - kapitalski račun in finančni račun -, kar je v skladu z računi v Sistemu nacionalnih računov (1993). Stranki v transakciji s terjatvami ali obveznostmi sta navadno rezident in nerezident, v nekaterih primerih pa sta lahko obe bodisi rezidenta bodisi nerezidenta.

***The capital and financial account** has two major components - the capital account and the financial account - that are in concordance with those same accounts in the System of National Accounts (1993). The two parties to a transaction in assets or liabilities are usually a resident and a non-resident but, in some instances, both parties may be residents or non-residents.*

Poglavitne sestavine **kapitalskega računa** so kapitalski transferji in transakcije z neproizvedenimi nefinančnimi sredstvi (patenti in licence). Kapitalski transferji zajemajo odpise dolga in druge kapitalske transferje uradnega sektorja, ter transferje migrantov, druge odpise dolga in druge transferje ostalih sektorjev. Transakcije z neproizvedenimi nefinančnimi sredstvi zajemajo nakup in prodajo patentov, licenc in drugih nematerialnih imetij ter transakcije z nepremičninami med diplomatskimi predstavništvi in državo.

*The major components of the **capital account** are capital transfers and acquisition/disposal of non-produced, non-financial assets. Capital transfers cover debt write-offs and other capital transfers made by government sector units, and migrants transfers, other debt write-offs and other transfers made by other sectors. Transactions with non-produced non-financial assets cover acquisition and sale of patents, licences and other intangible property and transactions in immovables between embassies and the state.*

Glavna struktura **finančnega računa** temelji na funkcionalnem načelu, tako da je finančni račun sestavljen iz bilanc neposrednih naložb, naložb v vrednostne papirje, drugih naložb in sprememb mednarodnih rezerv.

*The main structure of the **financial account** is based on the functional criteria, so that the financial account is composed of the following subaccounts: balance of direct investment, balance of portfolio investment, balance of other investment, and change of reserve assets.*

Neposredne naložbe zajemajo vse transakcije med neposrednimi investitorji in podjetji z neposredno naložbo. Podatki v plačilni bilanci o naložbah v tujino in iz tujine v Slovenijo so razlike med povečanji in zmanjšanji takih naložb. Zajete so vse čezmejne mednarodne transakcije z lastniškim kapitalom, razen tistih, ki se razvrščajo med transakcije z lastniškimi vrednostnimi papirji, in reinvestirani zaslužki od neposrednih tujih naložb. Do leta 1997 so bili v to postavko vključeni nakupi in prodaje vseh delnic in deležev, od vključno leta 1997 pa samo nakupi tistih delnic, ki so imetniku zagotavljale večinski delež upravljalskih pravic ali kontrolni paket delnic, ostali nakupi pa so bili vključeni med naložbe v vrednostne papirje. Merila za razmejevanje

*Direct investment covers transactions between direct investors and direct investment enterprises. Both direct investment abroad and direct investment to Slovenia are expressed as differences between increases and decreases of such investments. Covered are all cross-border transactions in equity capital except those classified as equity portfolio investment, plus reinvested earnings on foreign direct investment. Until 1997 covered by this item had been international acquisitions and sales of all shares and other equity, while since 1997 only those shares have been included, which guaranteed the foreign investor a major share of management rights or a controlling share of shares, and the rest have been included into portfolio investment. Cri-*

med neposrednimi naložbami in naložbami v vrednostne papirje je dodatno opredelil novi Devizni zakon iz leta 1999.

Naložbe v vrednostne papirje v plačilni bilanci Slovenije zajemajo podatke o drugih naložbah v lastniške vrednostne papirje (od vključno leta 1997 dalje) in o naložbah v dolžniške vrednostne papirje (med njimi v instrumente denarnega trga). Podatki o spremembah finančnih sredstev in obveznosti so razlike med povečanji in zmanjšanji takih naložb.

Druge naložbe zajemajo druge vrste finančnih transakcij (razen transakcij s sredstvi mednarodnih rezerv, ki se izkazujejo posebej). Terjatve in obveznosti iz naslova drugih naložb zajemajo: kratko- in dolgoročne trgovinske kredite, posojila (skupaj s porabo kreditov MDS, posojili MDS in posojili v zvezi s finančnimi najemi), gotovino in vloge ter preostale terjatve oziroma obveznosti. Mednarodne denarne rezerve zajemajo rezerve Banke Slovenije; to so transakcije s tistimi sredstvi, ki so po mnenju denarnih oblasti vedno takoj na voljo za uskladitev plačilnobilančnih neravnovesij. Sredstva rezerv zajemajo denarno zlato, posebne pravice črpanja (SDR), sredstva rezerv v MDS in tuje valute (gotovino in vrednostne papirje).

Pozitivna ali negativna vrednost postavke **neto napake in izpustitve** je posledica uporabe različnih virov za postavke plačilne bilance, napak v poročanju in pomanjkljivosti metodologije za sestavo plačilne bilance. Ker se napake in izpustitve v plačilni bilanci navadno pobotajo, velikost statistične napake ne more biti kazalec natančnosti bilance.

*teria for distinction between foreign direct investment and portfolio investment were further developed by the 1999 Foreign Exchange Act.*

*Portfolio investment in the balance of payments of Slovenia covers other equity portfolio investment (since 1997) and debt portfolio investment (investment into monetary market instruments among them).*

*Other investment covers other financial transactions between residents and non-residents (except transactions with reserve assets). These changes in financial assets and liabilities vis-a-vis the rest of the world cover: short- and long-term trade credits, loans (including use of IMF credit, loans from the IMF, and loans associated with financial leases), currency and deposits, and other claims or liabilities. Reserve assets refer to reserves of the Bank of Slovenia and cover transactions in those assets that are considered, by the monetary authorities of an economy, to be available for use in meeting the balance of payments. The items covered are monetary gold, special drawing rights (SDRs), reserve position in the IMF and foreign exchange assets (currency and securities).*

*Positive or negative value of **net errors and omissions** is the result of the use of different sources for the components of the balance of payments, reporting mistakes and imperfection of the methodology for the compilation of the balance of payments. Since some of the errors and omissions that occur in the course of compilation usually offset one another, the size of the statistical error does not necessarily provide an indication of the overall accuracy of the statement.*

#### Viri in metode zbiranja podatkov

**Emisije žveplovega dioksida** so ocenjene na podlagi podatkov o porabi surovin in goriv po področju dejavnosti, ki jih zagotavljata Ministrstvo za okolje, prostor in energijo, Urad za energetiko in Statistični urad Republike Slovenije. Izračuni so narejeni na Ministrstvu za okolje, prostor in energijo - Agenciji RS za okolje po enotni evropski metodologiji za izdelavo emisijskih evidenc - CORINAIR.

Podatki za zadnje leto so začasni zaradi usklajevanja podatkov o porabi goriv.

Koncentracije dima in žveplovega dioksida na reprezentativnih mestih po sezonah so rezultat meritev, ki jih izvaja Ministrstvo za okolje, prostor in energijo - Agencija RS za okolje.

Podatke o uvoznih količinah snovi, ki škodljivo delujejo na ozonski plašč, nam je posredovalo Ministrstvo za okolje, prostor in energijo - Agencija RS za okolje.

#### *Sources and methods of data collection*

***Sulphur dioxide emissions*** *are estimated on the basis of data on fuel and raw material consumption by fields of activities provided by the Ministry of the Environment, Spatial Planning and Energy, Energy Office, and the Statistical Office of the Republic of Slovenia. The calculations are made at the Ministry of the Environment, Spatial Planning and Energy, Environmental Agency of the Republic of Slovenia under the Unified European Methodology for Creating Emission Records - CORINAIR.*

*The last year data are preliminary because of the coordination of data on fuel consumption.*

*Concentrations of black smoke and sulphur dioxide at the representative measuring sites by seasons are the results of the measurements made by the Ministry of the Environment, Spatial Planning and Energy, Environmental Agency of the Republic of Slovenia.*

*Ministry of the Environment, Spatial Planning and Energy, Environmental Agency of the Republic of Slovenia, has provided data on the imported quantities of ozone depleting substances.*

#### Zajetje

V prikazanih podatkih so zajeta vsa večja mesta in kraji, kjer se pojavlja onesnaženost zraka z žveplovim dioksidom in dimom.

#### *Coverage*

*Data on air pollution by sulphur dioxide and smoke cover all major towns and places where this pollution occurs due to economic activities and heating.*

#### Definicije in pojasnila

**Onesnaženost zraka.** Podatki o koncentraciji žveplovega dioksida in dima so prikazani na podlagi analiz 24-urnih vzorcev, meritve se začnejo praviloma ob 7. uri zjutraj. Koncentracija žveplovega dioksida se določa z laboratorijsko peroksidno metodo z acidimetrično detekcijo. Koncentracija dima se določa glede na potemnitev filtra po standardni reflektometrični metodi. Mejna imisijska 24-urna koncentracija žveplovega dioksida je 125 µg/m3. (Uredba o mejnih, opozorilnih in kritičnih imisijskih vrednostih snovi v zraku, Uradni list Republike Slovenije št. 73/94.)

Podatki o **ozonu škodljivih snoveh** so zbrani na podlagi določil Odredbe o ravnanju s snovmi, ki povzročajo tanjšanje ozonskega plašča (Ur. l. RS št. 80/97), in so rezultat obdelave podatkov iz odločb oz. dovoljenj ter poročil uvoznikov o uvoženih snoveh za preteklo koledarsko leto. Odredba o ravnanju s snovmi, ki povzročajo tanjšanje ozonskega plašča, med drugim določa, da uvoznik za uvoz snovi, navedenih v 2. čl. Odredbe, priloga 1, ki jih je sicer prepovedano uvažati, vloži prošnjo na Ministrstvo za okolje, prostor in energijo, le-ta pa v soglasju z Ministrstvom za zdravje lahko dovoli uvoz na podlagi 6. čl. Odredbe za znanega uporabnika, če so izpolnjena tudi določila iz 7. čl. iste Odredbe. Uvoznik mora za vsakokratni uvoz metilbromida (VI. skupina ozonu škodljivih snovi - priloga 1) ali delno halogeniranih klorofluorogljikovodikov (VIII. skupina ozonu škodljivih snovi - priloga 1) predhodno pridobiti odobritev za letno količino, ki jo je dovoljeno uvoziti, in pridobiti še dovoljenje, ki ga izda Ministrstvo za okolje, prostor in energijo - Agencija RS za okolje.

#### *Definitions and explanations*

***Air pollution.*** *Data on the concentration of sulphur dioxide and smoke are shown on the basis of analyses of 24-hour samples. As a rule, measurements begin at 7 a.m. every day. The concentration of sulphur dioxide is Internal current expenditure and External current expenditure.determined from the degree of blackness of a filter, according to the standard reflectometric method. The limit 24-hour emission concentration of sulphur dioxide is 125 µg/m3. (Regulation on Limit, Alarm, and Critical Values of Compounds in the Air, OJ RS, No. 73/94.)*

*Data on* ***ozone depleting substances*** *are collected on the basis of the Regulation on Handling Ozone Depleting Substances (OJ RS No.80/97) and are the result of processed data from decisions or permissions and reports of importers on imported substances for the previous calendar year. The Regulation on Handling Ozone Depleting Substances provides also that the importer of the substances that are interdict for the importing (Article 2 of the Regulation, Annex 1) apply to the Ministry of the Environment, Spatial Planning and Energy that can in accordance with the Ministry of Health allow to import such substances for the known user if the rules from Article 7 of the same Regulation are fulfilled. For the importing of methylbromide (VIth group of ozone depleting substances - Attachment 1) or partly halogenated chlorofluorocarbons (VIIIth group of ozone depleting substances - Attachment 1), the importer has to apply for the determination of the yearly approved quantity of ozone depleting substances for the import, which is the condition to get the permission for each importation issued by the Ministry of the Environment, Spatial Planning and Energy, Environmental Agency of the Republic of Slovenia.*

#### Viri in metode zbiranja podatkov

Podatke o vodnem gospodarstvu zbiramo z letnimi poročili, ki nam jih pošiljajo podjetja in organizacije iz predelovalnih dejavnosti, rudarstva, kmetijstva in ribištva, gozdarstva, vodnega gospodarstva, stanovanjsko-komunalne dejavnosti in krajevne skupnosti, ki upravljajo javni vodovod in javno kanalizacijo.

#### *Sources and methods of data collection*

*Data on water management are collected from the annual reports forwarded by enterprises and organisations from the fields of manufacturing, mining and electricity supply, agriculture and fishing, forestry and hunting, water management, community service activities, and from local communities which manage public waterworks and sewage.*

Osnova za vse podatke so meritve z vodomeri, ki so nameščeni na vodnih virih in proizvodnih napravah. Kjer vodomerov ni, so količine zajete vode ocenjene na podlagi normativov za določeno panogo dejavnosti, na osnovi glavnega projekta, obratovalnega časa in zmogljivosti črpalk ali na podlagi strokovne ocene.

*All data are entered on the basis of measurements made with water gauges placed in water resources and production installations. If there is no water gauge, the quantities of collected water are estimated on the basis of the norms for a given branch of activity, main project, operating times and pumping station capacity, or on the basis of an expert estimate.*

Podatke o kakovosti vode v slovenskih rekah je posredovalo Ministrstvo za okolje, prostor in energijo - Agencija Republike Slovenije za okolje.

*The Ministry of Environment, Spatial Planning and Energy - Environmental Agency of the Republic of Slovenia forwarded data on the quality of water in Slovenian rivers.*

## Zajetje

Podatke o izkoriščanju voda nam pošiljajo podjetja in druge organizacije, odgovorne za izkoriščanje, izpust in prečiščevanje vode.

Podatke o javnem vodovodu in javni kanalizaciji spremljamo po upravnih enotah ter povodjih in porečjih, podatke o količini zajete vode in odplak pa tudi po naseljih.

V podatkih o vodovodnih in kanalizacijskih sistemih niso zajeti lokalni sistemi, ki jih upravljajo vaški odbori, in ne vodovodi in kanalizacijski sistemi podjetij, ki jih uporabljajo posamezna gospodinjstva oziroma podjetja.

Seznam upravljavcev namakalnih sistemov smo leta 2003 dopolnili še s podatki Ministrstva za kmetijstvo, gozdarstvo in prehrano.

## *Coverage*

## *WASTE*

### Viri in metode zbiranja podatkov

Statistični urad RS je do leta 2001 izvajal dve raziskovanji s področja **statistike odpadkov**; obe sta se izvajali v triletni periodiki. Od leta 2001 jih izvaja **pet** na leto, in sicer v sodelovanju z Agencijo RS za okolje – tri raziskovanja na področju **industrijskih odpadkov** (ODP, ODP-Z in ODP-P), dve raziskovanji pa na področju **komunalnih odpadkov** (KO-Z in KO-U). Pri izdelavi metodologije smo upoštevali zahteve slovenske zakonodaje in zahteve nove zakonodaja Evropske unije (Waste Statistics Regulation), hkrati pa smo vključili tudi priporočila Organizacije združenih narodov s področja statistike okolja.

### *Sources and methods of data collection*

*The Statistical Office of the Republic of Slovenia (SORS) has until 2001 carried out two statistical surveys on waste. Both surveys had a periodicity of three years. Since 2001 the Statistical Office together with the Environmental Agency of the Republic of Slovenia has been carrying out annually five surveys – three for industrial waste (ODP, ODP-Z and ODP-P) and two for municipal waste (KO-Z and KO-U). In formulating the methodology we took into account the current legislation of the Republic of Slovenia for the field of waste management and the new Waste Statistics Regulation (legislation of the EU). We also incorporated methodological elements of the United Nations relating to the field of environment statistics.*

**Podatke o količinah odpadkov pripeljanih na odlagališča** smo pridobili iz poročil poslovnih subjektov, ki so upravljavci odlagališč nenevarnih odpadkov, na katera se pretežno odlagajo komunalni odpadki (komunalna odlagališča) (obrazec KO-U).

**Podatke o količini nastalih odpadkov v proizvodnih in storitvenih dejavnostih** smo pridobili iz poročil poslovnih subjektov, pri katerih odpadki nastajajo (obrazec ODP). V raziskovanje so zajeti poslovni subjekti, ki opravljajo svojo primarno dejavnost na področjih od C do O po Standardni klasifikaciji dejavnosti (SKD) in imajo več kakor 5 oziroma 10 zaposlenih.

V raziskovanje so zajeti tudi poslovni subjekti, ki lastne odpadke interno predelujejo ali odstranjujejo. Pri dejavnostih A, L in M ni zaznati pojava interne predelave odpadkov.

**Podatke o količini zbranih odpadkov iz proizvodnih in storitvenih dejavnosti** smo pridobili iz poročil poslovnih subjektov, ki so na Ministrstvu za okolje, prostor in energijo registrirani kot zbiralci industrijskih odpadkov (obrazec ODP-Z).

**Podatke o količini predelanih ali odstranjenih industrijskih odpadkov** smo pridobili iz poročil poslovnih subjektov, ki so na Ministrstvu za okolje, prostor in energijo registrirani kot predelovalci oziroma odstranjevalci odpadkov, prevzetih od drugih imetnikov odpadkov (obrazec ODP-P).

Pri razvrščanju posameznih vrst odpadkov so poročevalske enote uporabljale Klasifikacijski seznam odpadkov (Katalog odpadkov); ta je bil objavljen kot priloga k Pravilniku o ravnanju z odpadki (Ur. l. RS št. 20/01). V tem seznamu so odpadki razvrščeni v skupine predvsem glede na vir nastanka odpadkov.

Ta pravilnik ne upošteva radioaktivnih odpadkov, ker ravnanje z njimi urejajo posebni predpisi.

### *Coverage*

*Data on public waste removal were obtained from business subjects that were given the licence by the municipality to carry out the public service of collecting and removing municipal waste (form KO-Z). The survey covers only municipal waste from groups 20 (Municipal waste – household waste and similar commercial, industrial and institutional waste, including separately collected fractions) and 15 01 (packaging – including separately collected municipal packaging waste) from the List of Waste.*

*Data on landfill sites were obtained from business subjects registered as managers of landfill sites of non-hazardous waste in Slovenia at which municipal waste is mostly disposed (form KO-U).*

*Data on quantities of waste generated in production and service activities were obtained from business subjects that were the waste producers (form ODP). The survey covers business subjects from all fields of activity (C to O by the Standard Classification of Activities) which have more than 5 or 10 employees.*

*The survey covers also business subjects implementing internal waste recovering/reusing or disposing. The internal treatments were not present in the fields of activity A, L and M.*

*Data on quantities of waste collected from production and service activities were obtained from business subjects having the licence (obtained from the Ministry of the Environment, Spatial Planning and Energy) to collect industrial and hazardous waste (form ODP-Z).*

*Waste has been classified by the reporting units according to the Waste Catalogue, which is part of the Regulation on Waste Management (OJ RS No 20/01). Nomenclature of waste (Waste Catalogue) is a waste classification list, arranged by corresponding groups of waste, first of all with regard to the source of its generation.*

*Radioactive waste is not included in this list, because radioactive waste handling is settled by special regulations.*

### Definicije in pojasnila

**Odpadek** je vsaka snov ali vsak predmet, razvrščen v eno izmed skupin odpadkov, določenih v Klasifikacijskem seznamu odpadkov, ki ga imetnik ne more ali ne želi uporabiti sam ali ga ne potrebuje ali ki imetnika moti ali mu škodi in ga zato zavrže oz. namerava ali mora zavreči.

Med odpadke ne spadajo snovi, ki se izpuščajo z odpadnimi plini v zrak, in snovi, ki se odvajajo z odpadnimi vodami neposredno v vode ali v kanalizacijo.

**Nevarni odpadki** so odpadki, ki imajo eno ali več nevarnih lastnosti (od H1 do H14).

Gospodinjskim odpadkom podobni so **trdni odpadki negospodinjskega izvora**. Po sestavi so podobni gospodinjskim in ne zahtevajo posebne obdelave. Nastajajo v trgovini in drugih storitvenih in proizvodnih dejavnostih in jih skupaj z gospodinjskimi odpadki odvažajo pristojne javne službe. Odlagajo jih na javnih odlagališčih komunalnih odpadkov.

## INVESTICIJE IN TEKOČI IZDATKI ZA VARSTVO OKOLJA

### Viri in metode zbiranja podatkov

Podatki o investicijah in tekočih izdatkih za varstvo okolja za leto 2001 so rezultat poskusnega raziskovanja, ki ga je Statistični urad Republike Slovenije izvedel v letu 2002. Nov vprašalnik je usklajen z zahtevami Eurostata. V omenjenem poskusnem raziskovanju je bil poudarek na zbiranju kakovostnejših podatkov iz rudarstva, predelovalnih dejavnosti in dejavnosti oskrbe z električno energijo, plinom in vodo.

Zaradi obstoječe serije podatkov, zbranih v prejšnjih letih, smo se odločili, da jih bomo zbirali tudi iz drugih panog dejavnosti.

Podatke smo pridobili neposredno od podjetij in drugih organizacij.

## *GROSS FIXED CAPITAL FORMATION AND CURRENT EXPENDITURE FOR ENVIRONMENTAL PROTECTION*

### *Sources and methods of data collection*

*Data on gross fixed capital formation and current expenditure for environmental protection for 2001 are the result of a pilot survey that was carried out by the Statistical Office of the Republic of Slovenia in 2002. The new questionnaire is harmonized with the demands from Eurostat. Pilot survey data collection was focused mainly on better quality data from Mining and quarrying, Manufacturing and Electricity, gas and water supply.*

*Because of the existing time series we have decided to collect data also from other fields of activity.*

*Data are collected directly from enterprises and organisations.*

## Zajetje

**Pilotno raziskovanje** (OKI) smo izvajali na vzorcu. Zaradi primerjav s podatki o investicijah v osnovna sredstva smo vzorčni okvir za raziskovanje o izdatkih za varstvo okolja tvorili iz enot, ki so bile izbrane za raziskovanje o investicijah v osnovna sredstva.

Podatki so prikazani po organizacijskem načelu, to je po pretežni dejavnosti in sedežu investitorja.

Odzivnost poročevalskih enot je bila skoraj 90 odstotna, o investicijah za varstvo okolja je poročalo 15,1% enot, o tekočih izdatkih je poročalo 43,8% enot zbranih v vzorec.

Za manjkajoče odgovore smo izvedli preračun na celotno populacijo z razmernostno cenilko,; za to smo uporabili podatek o amortizaciji osnovnih sredstev iz zaključnih računov oziroma podatek o številu zaposlenih pri dejavnosti L – Javna uprava. Za uteževanje podatkov o plačilu storitev v zvezi z varstvom okolja se v vseh stolpcih te vrstice uporablja druga utež. Pri izračunu uteži smo predpostavili, da imajo omenjeni izdatek vse aktivne enote. Izračuni so bili izvedeni po istem postopku kot pri izračunu prve uteži.

## Definicije in pojasnila

Splošne definicije so navedene v poglavju o **investicijah (29. poglavje)**.

**Podatki o investicijah v varstvo okolja** se delijo na investicije za varstvo okolja na koncu proizvodnega procesa in na investicije za varstvo okolja med proizvodnim procesom.

**Investicije na koncu proizvodnega procesa** so investicije namenjene novim načinom, tehnologijam, postopkom ali opremi, za zbiranje in odstranjevanje onesnaženosti ali onesnaževal (npr. emisij v zrak, izcednih voda pri odlaganju odpadkov). Te investicije so namenjene tudi ravnanju z onesnaževali in njihovem odlaganju ter za redno opazovanje in meritve stopnje onesnaženosti (predvsem na koncu proizvodnega procesa - na iztoku ali izhodu, kot npr. emisijski filtri, naprave za čiščenje odpadnih vod, zbiranje odpadkov in ravnanje z njimi).

**Investicije med proizvodnim procesom**, so investicije namenjene novim ali izboljšavi starih tehnologij, postopkov ali opreme. S tem se preprečujejo ali zmanjšujejo količine onesnaženosti povzročene med proizvodnim procesom in z njimi povezanih izpustov onesnaževal (zmanjševanje vpliva na okolje).

Preprečevanje onesnaževanja lahko zajema različne ukrepe, npr. prilagoditev opreme ali tehnologije, izbira nove izboljšane metodologije, sprememba proizvodov, zamenjava surovin, z namenom bolj čistih proizvodov in/ali spremembe v okoljskem upravljanju.

**Tekoči izdatki za varstvo okolja** se delijo na tekoče izdatke, ki nastanejo v zvezi z varstvom okolja v poročevalski enoti in na tekoče izdatke, ki jih za varstvo okolja poročevalska enota za storitve v zvezi z varovanjem okolja plačuje drugim.

**Tekoči izdatki, ki nastanejo v poročevalski enoti** so namenjeni delovanju in vzdrževanju naprav za zmanjševanje obremenjevanja okolja, izdatkom za zaposlene, ki so udeleženi pri varstvu okolja, ter na drugim tekočim izdatkom, ki so nastali v poročevalski enoti.

**Tekoči izdatki plačani drugim** so namenjeni plačilu storitev drugim (javnemu sektorju ali specializiranim izvajalcem za storitve zbiranja odpadkov, čiščenja odpadnih voda), monitoringom in drugim tekočim izdatkom za storitve zunanjih izvajalcev.

Izdatki za **raziskave in razvoj** so lahko prikazani kot tekoči izdatki nastali v poročevalski enoti ali pa kot tekoči izdatki plačani drugim.

Podatki so bili zbrani glede na okoljski namen po Klasifikaciji aktivnosti in izdatkov za varovanje okolja, in sicer podatki o izdatkih za: varstvo zraka in klime, upravljanje odpadnih voda, ravnanje z odpadki, zaščito in izboljšavo tal, podtalnice in površinskih voda, varstvo pred hrupom in vibracijami, varstvo biološke raznovrstnosti in pokrajine in druge okoljske namene; k tem štejemo izdatke za raziskovanje in razvoj v zvezi z varstvom okolja, zmanjšanje in odstranjevanje negativnih posledic radioaktivnega sevanja, in druge okoljske namene.

## *Coverage*

*We carried out the **sample pilot survey** (OKI). Due to the comparison with data gathered with the Annual Report on Gross Fixed Capital Formation, we decided to take the sample for the pilot survey from the Annual Report on Gross Fixed Capital Formation units.*

*Data are shown according to the predominant activity and location of the investor.*

*The response rate in data collection was almost 90%, of which 15.1% of units responded about gross fixed capital formation for environmental protection and 43.8% of units about current expenditure from all units in the sample.*

*For non-response we performed recalculation to the total population with the ratio estimator, using depreciation of fixed assets from final accounts or the number of people employed in the field of activity L - Public administration. For the recalculation of the payments for the environmental protection services another weight, calculated according to the estimation that all active units have such expenses, was used. Recalculation was made under the same procedure as for the first weight.*

## *Definitions and explanations*

*General definitions are stated in the chapter **on gross fixed capital formation (gross investment) (Chapter 29)**.*

***Gross fixed capital formation in environmental protection** is divided into end-of-pipe investment and investment in integrated technologies.*

***End-of-pipe investments** are investments for the methods, practices, technologies, processes or equipment designed to collect and remove the pollution and pollutants after their creation (e.g. air emissions, leachate at waste disposal). They are intended also to treat and dispose the pollutants and to monitor and measure the level of pollution (mainly end-of-pipe methods, techniques or equipment, e.g. air emissions filters, wastewater treatment plants, waste collection and treatment activities).*

***Investments in integrated technologies** are investments for new or adaptation of existing technologies, processes or equipment designed to prevent or reduce the amount of pollution created at the source, thereby reducing the environmental impacts associated with the release of pollutants and/or polluting activities.*

*Prevention of pollution can cover various measures such as adjustment of equipment and technology, selection of a new and improved methodology, change of products, replacement of raw materials with the purpose of producing cleaner products and/or change in environmental management.*

***Current expenditure for environmental protection** is divided to Internal current expenditure and External current expenditure.*

***Internal current expenditure** is intended for the maintaining the environmental protection facilities, for personnel costs and other internal current expenditure.*

***External current expenditure** is intended for payments to the third parties (public sector or contractors specialised for collecting waste, cleaning waste water) for environmental protection services, monitorings and other current expenditure.*

*The expenditure for the **research and development** can be shown as internal current expenditure or external current expenditure.*

*Data are collected according to the environmental domain under the Classification of the Environmental Protection Activities: protection of air and climate, wastewater management, waste management, protection and remediation of earth, underground and surface waters, protection against noise and vibrations, protection of biodiversity and landscape, and other environmental domains where protection against radiation is included.*

## ELEMENTARNE NESREČE

### Viri podatkov

Podatke o ocenjeni gmotni škodi, ki so jo povzročile elementarne nesreče v preteklem letu, zbiramo vsako leto s statističnim vprašalnikom Poročilo o oceni škode, ki so jo povzročile elementarne nesreče, obrazec ELNES.

### Zajetje

V podatkih je zajeta vsa ocenjena gmotna škoda po posameznih elementarnih nesrečah, o katerih so nam poročale občine.

Občine so pri izpolnjevanju omenjenih vprašalnikov uporabljale Navodilo o enotni metodologiji za cenitev škode, ki so jo povzročile elementarne nesreče, objavljeno v Uradnem listu SFRJ št. 27/87. Pri tem velja opozoriti, da občine nimajo popolnega pregleda nad zasebnimi in drugimi sredstvi.

### Definicije in druga pojasnila

**Škoda** je izguba, ki je lahko nastala na sredstvih in drugih dobrinah zaradi elementarne nesreče ali drugega vzroka.

Vrste škode:

- neposredna (direktna) škoda na poškodovanih in uničenih sredstvih in dobrinah;
- posredna (indirektna) škoda;
- stroški, ki so nastali kot posledica neposredne škode.

**Vzroki za nastanek naravne nesreče** so lahko različne narave: poplave (zaradi preobilnega deževja ali prehitrega taljenja snega), gozdni požari, snežni plazovi, zemeljski plazovi, seizmična aktivnost, vulkanski izbruhi ali pa različni meteorološki vzroki, kot so razna neurja (nevihte, snežni meteži) ali hud mraz (pozeba, žled). Pogosto se dogaja, da izhajata dva vzroka drug iz drugega, eden je prvotni, drugi pa drugotni (npr. udarec strele povzroči gozdni požar, poplava porušitev jezu); tedaj se kot vzrok upošteva tisti, ki je povzročil škodo.

**Potres** je naravni pojav, pri katerem pride do manjšega ali večjega premikanja tal, zaradi česar se porušijo in poškodujejo objekti, naprave in druge dobrine; posledica so ranjeni in mrtvi.

**Poplava** lahko nastane zaradi delovanja zunanjih, notranjih voda ali zaradi hudournikov in planinskih voda.

**Poplava zaradi delovanja zunanjih voda** je (občasno) stihijsko poplavljanje terena (doline večjih vodnih tokov) zaradi izlivanja vode čez obrambne nasipe in jezove ali predore nasipov oziroma rušenje jezov in drugih varstvenih hidrogradbenih objektov. Pri tem so upoštevane tudi poplave, ki nastanejo zaradi ledenih ovir v vodnih tokovih.

**Poplava zaradi delovanja notranjih voda** je poplavljanje terena (nižinski predeli) z odvečnimi površinskimi vodami in visokimi talnimi vodami zaradi nenormalnega hidrološkega stanja in zaradi počasnega odvajanja teh voda (ni odvodnega omrežja ali so njegovi zmogljivosti nezadostne).

**Poplavljanje zaradi hudournikov in planinskih voda** je nepričakovano poplavljanje terena z vodno maso, ki nastane na hudourniških tokovih in pri koncentraciji planinskih voda zaradi hitrega naraščanja vode, velike količine kamnitih naplavin in mulja ter velike rušilne moči neposredno po močnih krajevnih plohah in hitrem taljenju snega.

**Suša** je daljše obdobje, v katerem ne pade dovolj padavin za normalni razvoj in dozorevanje kmetijskih rastlin, kar negativno vpliva na velikost in kakovost pridelka, zato je ta bistveno manjši od triletnega povprečja.

**Neurje** je veter s hitrostjo 17,2 m na sekundo oziroma 82 km na uro ali več, ki lomi veje in debla, valja in lomi posevke, stresa plodove s sadnega drevja in prizadene škodo dobro vzdrževanim gradbenim objektom.

## *NATURAL DISASTERS*

### *Data sources*

*We collect data on estimated damage caused by natural disasters in the previous year with the Report on Estimated Damage Caused by Natural Disasters (ELNES).*

### *Coverage*

*The data cover all estimated damage caused by individual natural disasters reported by municipalities.*

*In answering the questionnaires the municipalities used the Instructions on Unified Methodology for Estimating Damages Caused by Natural Disasters, published in the Official Gazette of SFRY, No. 27/87. It should be mentioned that the municipalities do not have the incomplete overview over the ownership of the means and goods.*

### *Definitions and other explanations*

*Damage is loss on means and goods caused by a natural disaster or by some other reason.*

*Types of damage:*

- *direct damage on damaged or ruined means and goods;*
- *indirect damage;*
- *consequential costs as the result of direct damage.*

*There are different **reasons for natural disasters**: floods (because of heavy rain or fast melting snow), forest fires, snow and land avalanches, seismic activities, volcano eruptions or various meteorological reasons such as storms (thunderstorms, blizzards) or heavy colds (frosts, freezing rain). Often there are primary and secondary reasons (e.g. a thunderbolt can be the reason for a forest fire, a flood can be the reason for destroying a dam); in such cases the reason is the one that caused the damage.*

***Earthquakes** are natural phenomena where smaller or greater movement of earth is observed, which causes collapsing or ruining of buildings, equipment, etc.; the results are injured and dead people.*

***Floods** can be caused by activity of surface and underground waters or because of steep mountain streams and rivers.*

***A flood caused by the influence of surface waters** is uncontrolled flooding of area (valleys of big watercourses) caused by overflowing the dams or by ruining the dams or other hydro protecting objects. Floods caused by the ice barriers in watercourses are also included.*

***A flood caused by the activity of underground waters** is flooding of area (lowland) by high surface waters and high underground waters caused by high hydrological state and because of slow draining of these waters (there is no drainage or drainage is of low capacity).*

***Floods caused by steep mountain streams and rivers** are cases of unexpected flooding of area as a result of a rapidly raising level of steep mountain streams and a big quantity of stone and slime alluvial material with great destructive power usually after strong showers or fast snow melting periods.*

***Droughts** are long periods without enough precipitation for normal growth and ripening of crops, which has a negative impact on its quantity and quality, i.e. the crop is considerably lower than a three-year average.*

***Thunderstorms** are strong winds blowing with a speed of 17.2 m per second or 82 km per hour or more and breaking branches and trunks, destroying the crops, shaking down the fruits and causing the damage to buildings.*

**Toča** je atmosferska padavina v trdnem stanju (led) s premerom 5 mm ali več, ki s svojim udarcem močno poškoduje ali uniči kmetijske kulture, lahko pa povzroči škodo tudi na drugih objektih (gradbenih ipd.).

***Hail** is atmospheric precipitation in solid state (ice) of 5 mm or more in diameter, which can severely damage or destroy crops or cause damage to buildings.*

**Pozeba** je nastanek ledenih kristalov, ki se pri temperaturi, nižji od 0 °C, v različnih oblikah kopičijo na vodoravnih in navpičnih površinah; imenujemo jo lahko tudi slana ali ivje. Slana in ivje lahko močno poškodujeta kmetijske kulture.

***Frost** is the appearance of frozen crystals, which are at the temperature lower than 0°C gathered on horizontal or vertical surface and can be called white frost. White frost can cause severe damage to crops.*

**Žled** je tanka ledena obloga na drevju, napeljavah ali skalovju.

***Sleet** is frozen deposit on trees, installations or rocks.*

**Drsenje tal in snega**:

***Land and snow slide:***

- drsenje tal so nenadni geološki premiki zemeljske površine na poševnih terenih z jasnimi znaki prelomov na površini tal in drsenja, ki nastajajo v kratkem času in jih spremljajo močne deformacije in široke razpoke ter povzročijo škodo na gradbenih objektih;
- *a landslide is caused by unexpected geological surface movement on the slopes with evident signs of ruptures on the surface and sliding. They are noticed in a short time, are accompanied by great deformation and wide fissures and cause great damage to the buildings;*
- sem prištevamo tudi škode, nastale zaradi snežnih in kamnitih plazov, snežnih zametov.
- *the damage caused by avalanches (snow and rocky) and snowdrifts are included.*

**Epidemija** je porast obolenj zaradi nalezljive bolezni, ki po številu primerov, času, kraju in zajetju prebivalstva ni običajen, ter nenavadno povečanje števila obolenj s komplikacijami ali smrtnim izidom. Epidemija je tudi pojav dveh ali več med seboj povezanih obolenj za nalezljivimi boleznimi, ki se niso nikoli ali se niso več let pojavila na posameznem območju, ter pojav večjega števila obolenj, katerih povzročitelj ni znan, spremlja pa jih febrilno stanje. Množični pojav teh bolezni lahko povzroči motnje v delovanju poslovnih subjektov ter znatno škodo v delovnem procesu.

***An epidemic** is the unusual growth of people falling sick (considering the cases, time and place) because of the infectious diseases. It means also many cases with the complications or even deaths. An epidemic is also the case when two or more infectious diseases, which have not been observed for a long time or never, outbreak in a combination. An epidemic is also a great number of sick people with high temperature, with the reason being unknown. A great number of such illnesses can cause some troubles in administration or considerable damage in the working process.*

**Epizootija** je nenavaden porast obolenj živali zaradi kužnih bolezni, ki lahko povzročijo veliko gospodarsko škodo. Rastlinski škodljivci in rastlinske bolezni, ki se lahko pojavijo tudi kot posledica invazije rastlinskih škodljivcev, prav tako lahko povzročijo veliko gospodarsko škodo.

***Epizootic** (epidemic animal infectious diseases) is unusual growth of animals falling sick because of the animal infectious diseases and can cause a great economic loss. Pest and other plant diseases as the result of pest invasion can also cause a great economic loss.*

**Požar** je vsak ogenj, ki je nastal zunaj kontroliranega ognjišča, ali ogenj, ki se je od tod razširil in se lahko naprej razvija z lastno močjo, pri tem pa povzroči materialno škodo.

***Fire** is any blaze that has started outside the fireplace or has escaped from it and is expanding so much that it causes great material damage.*

**Onesnaženost zemljišča** je posledica izlivanja onesnaženih in strupenih voda iz rudniških flotacij in različnih drugih proizvodnih obratov, neustrezne uporabe kemičnih sredstev v kmetijski proizvodnji in drugih vzrokov. Kadar to onesnaženje preseže meje dopustne koncentracije, povzroči veliko in tudi dolgotrajno škodo na zemljišču, flori, favni, vodi in zdravju prebivalstva.

***Land pollution** is the result of discharging polluted or poisonous water from mine flotations and other manufacturing businesses, improper use of chemical substances in agricultural production and other reasons. When pollution exceeds the maximum allowed concentration it can cause big and long lasting damage on the fields, flora and fauna, water and people's health.*

**Onesnaženost voda** (kopenskih in morja) je posledica naravnega in veliko intenzivnejšega onesnaževanja z organskimi substancami, različnimi kemijskimi spojinami, radioaktivnimi in drugimi nevarnimi snovmi (težke kovine, pesticidi, herbicidi itd.) iz industrije, kmetijstva in drugih oblik proizvodnje in storitev, iz urbanih okolij itd., ne glede na to, ali gre za namerna ali naključna onesnaženja, ki nastanejo kot stranska posledica neke okvare (akcidentne havarije). Vse to zmanjšuje uporabnost vode ne le za pitje, temveč tudi za druge namene. Nepovratno ali za daljše obdobje uničuje floro in favno v vodah in ogroža zdravje in življenje prebivalstva.

***Water pollution** (surface waters and sea) can be caused by natural reasons or by much more intense polluting with organic substances, various kinds of chemicals, radioactive and other dangerous substances (heavy metals, pesticides, herbicides, etc.) from industry, agriculture and other forms of production and services, from urban areas, etc., irrespective of whether pollution is made on purpose or accidentally or is a side effect of some damage (accidental damage). All such events diminish the use of water not only for drinking but also for other purposes. The flora and fauna can be ruined or destroyed for longer time, which means a great threat for people's health and life.*

**Onesnaženost zraka** nastane z izpuščanjem plinastih snovi in trdnih delcev iz procesa zgorevanja, industrijskih procesov in motornih vozil. Zaradi izpuščanja onesnažujočih snovi v ozračje (zrak) se pojavljata kisli dež in smog. Onesnaženi zrak povzroča škodo na objektih, površinskih in talnih vodah, gozdovih in drugi vegetaciji, vodnih rastlinah in živalih ter ogroža zdravje prebivalstva.

***Air pollution** is caused by emission of gaseous substances and solid particles from combustion processes, industrial processes and traffic. Acid rain and smog are the results of emission of polluting substances. Polluted air can cause a lot of damage on buildings, surface and underground waters, forest and other vegetation, water vegetation, animals and is also a great threat to people's health.*

**Druge nesreče** so nesreče, ki jih povzroči človek s svojo dejavnostjo in ravnanjem, oziroma ki se zgodijo, ko različni dogodki pri opravljanju določene dejavnosti ali upravljanju sredstev za delo ter ravnanju z nevarnimi snovmi, uidejo nadzoru in posledično ogrozijo življenje ali zdravje ljudi, živali, premoženje, kulturno dediščino ter okolje. Tudi take nesreče lahko povzročijo občutno škodo in tudi to je treba prav tako oceniti. Zaradi tehničnih pomanjkljivosti, zastarele tehnologije, nezadostnih varstvenih ukrepov in napačne uporabe materialov nastajajo razne oblike okvar (havarij), ki lahko povzročijo eksplozije, požare, pokanje posod in izlivanje njihove vsebine, rušenje, vse to lahko povzroči precejšnjo gmotno škodo npr. v rudnikih, v gospodarskih obratih in drugih javnih objektih. Iz navedenih vzrokov lahko pride tudi do sevanja na predmete, prebivalce, flore in favno.

***Other accidents** are accidents caused by human activities. Various accidents can happen while handling hazardous substances and the result could be threatening the life or health of people, animals, property, cultural heritage or environment. Such accidents can cause a great economic loss, which needs to be estimated. Sometimes technical deficiencies, out-of-date technology, inadequate safety precautions and wrong use of some materials cause different accidents such as explosions, fire, outpouring of substances or ruining, which can cause great material damage in mines, industrial buildings and other public facilities. Some of these reasons can also cause radiation of objects, people, flora and fauna.*

# 34. PREGLED PO STATISTIČNIH REGIJAH

# *REVIEW BY STATISTICAL REGIONS*

## METODOLOŠKA POJASNILA

### Statistične regije in členitev Slovenije na statistične regije

Pojem "statistična regija" ima v slovenski strokovni javnosti razmeroma kratko zgodovino. Uporabljati se je začel šele po letu 1995, po uvedbi reforme lokalne samouprave v Sloveniji. Tedaj so v Sloveniji prenehale obstajati dotedanje, za evropske razmere velike občine, nadomestile pa so jih v povprečju za več kot polovico manjše občine. Statistični urad RS je dotlej več desetletij objavljal statistične podatke za vrsto statističnih raziskav na ravni občin, in sicer v zbirki "Statistični podatki po občinah Republike Slovenije". Zaradi razdrobitve občin leta 1995 se je povečala potreba po objavljanju podatkov na regionalni ravni, to je na vmesni ravni med majhnimi občinami in državo. Raziskovalne ustanove, občasno pa tudi Statistični urad RS so že od sedemdesetih let prejšnjega stoletja za analitične potrebe združevali tedanje občinske podatke (62 ali 65 občin) na raven t .i. "12 funkcionalnih regij" oziroma "12 območij medobčinskega sodelovanja".

V obdobju med leti 1990 in 1995 je bilo v 12 medobčinskih skupnosti povezanih 62 tedanjih občin. Leta 1995 je bilo z reformo lokalne samouprave v Sloveniji ustanovljenih 147 občin. Tedaj na novo uvedene statistične regije so ohranile potek meja in poimenovanja omenjenih medobčinskih skupnosti – le njihova notranja členitev je bila prilagojena 147 občinam. Ob tem so se pojavila prva neujemanja mej teh dveh ravni teritorialnih enot. Ob reformiranju občin leta 1995 je namreč nekaj naselij, ki so se dotlej nahajala na meji statističnih regij, spremenilo svojo občinsko pripadnost. Posledica tega je bilo neujemanje nekaterih občinskih meja z mejami statističnih regij.

Neujemanje meja občin in statističnih regij je bilo odpravljeno šele z Uredbo o standardni klasifikaciji teritorialnih enot (SKTE), ki jo je sprejela Vlada Republike Slovenije 30. 3. 2000. Od tedaj dalje potekajo meje statističnih regij po občinskih mejah. Statistične regije so tako postale v popolnosti del hierarhične členitve ozemlja Slovenije, ki jo sestavljajo naslednje ravni: popisni (prostorski) okoliš, statistični okoliš, naselje, občina, statistična regija. S tem je bilo za statistični sistem doseženo pomembno stanje: možnost povsem zanesljivega združevanja (agregiranja) statističnih podatkov z nižjih na višje teritorialne ravni. Ob tem je treba še omeniti, da meje upravnih enot ne sovpadajo povsem z mejami statističnih regij, vendar se neujemanja postopoma zmanjšujejo.

Ob ustanovitvi dodatnih 46 občin leta 1999 je število statističnih regij ostalo nespremenjeno (12), znatno pa se je spremenil obseg dveh regij. Iz dotedanje Osrednjeslovenske statistične regije je bil izločen njen južni del (občine Ribnica, Kočevje, Kostel, Sodražica, Loški Potok in Osilnica – oziroma približno ozemlje upravnih enot Kočevje in Ribnica) ter pripojen dotedanji Dolenjski statistični regiji; ta se je zato povečala in dobila novo ime Jugovzhodna Slovenija. Zadnja sprememba v številu občin junija leta 2002 ni vplivala na obseg in število statističnih regij.

## *METHODOLOGICAL EXPLANATIONS*

### *Statistical regions and breakdown of Slovenia into statistical regions*

*The term "statistical region" has a relatively short history within the professional public in Slovenia. It was first used after the introduction of the local self-government reform in Slovenia in 1995. At that time large municipalities - compared to the situation in Europe - ceased to exist. They were replaced by municipalities that were on average smaller by over a half. For several decades the Statistical Office of the Republic of Slovenia used to publish statistical data for several statistical surveys at the level of municipalities within the series entitled "Statistical Data by Municipalities of the Republic of Slovenia". Because of the breakdown of municipalities in 1995, the Office was faced with the increased need for publishing data at regional level, i.e. at the level between the municipal and national level. Since the 1970s research institutions and occasionally also the Office have combined for analytical purposes the then municipal data (62 or 65 municipalities) to the level of "12 functional regions" or "12 regions of intermunicipal co-operation".*

*Between 1990 and 1995 there were 62 municipalities linked into 12 intermunicipal communities. In 1995, 147 municipalities were established with the local self-government reform in Slovenia. The then newly introduced statistical regions kept the boundaries and names of intermunicipal communities. Internal breakdown was adjusted to the 147 municipalities. The first discrepancy regarding the boundaries at the level of these two territorial units started to appear. At the reform of municipalities in 1995 some settlements located at the boundaries between statistical regions namely changed the municipality of appurtenance. The result was discrepancy between some municipal boundaries and regional boundaries.*

*Discrepancies between municipal and regional boundaries were abolished with the Decree on the Standard Classification of Territorial Units (SKTE) adopted by the Government of the Republic of Slovenia on 30 March 2000. Since then the boundaries of statistical regions have been based on municipal boundaries. Statistical regions thus became a part of the hierarchical breakdown of Slovene territory, which is composed on the following levels: census (spatial) district, statistical district, settlement, municipality, statistical region. In this way an important situation was achieved for the statistical system, namely the possibility of fully reliable aggregation of statistical data from lower to higher territorial levels. It has to be mentioned that boundaries of administrative units do not coincide entirely with boundaries of statistical regions, however, discrepancies are gradually decreasing.*

*At the creation of additional 46 municipalities in 1999 the number of statistical regions remained the same (12), however, the area of two regions changed considerably. From Osrednjeslovenska statistical region the southern part was eliminated (municipalities Ribnica, Kočevje, Kostel, Sodražica, Loški potok and Osilnica - i.e. about the territory of administrative units Kočevje and Ribnica) and connected to Dolenjska statistical region; which was thus enlarged and renamed Jugovzhodna Slovenija. The last change of the number of municipalities in June 2002 did not affect the number and size of statistical regions.*

1) Površine statističnih regij se spreminjajo skladno s površinami občin zaradi natančnejših meritev. Površine občin nam posreduje Geodetska uprava Republike Slovenije in so izračunane iz digitaliziranih obrisov posameznega prostorskega okoliša na kartah 1 : 5000 in 1 : 10000 in so nato seštete na podlagi pripadnosti prostorskega okoliša višji prostorski enoti. / *Areas of statistical regions change in accordance with areas of municipalities due to more detailed measurements. Areas of municipalities are sent to us by the surveyin and Mapping Authority of the Republic of Slovenia and are calculated from digitalised outlines of individual areas on maps 1:5000 and 1:10000 and then added on the basis of affiliation to the higher unit.*

1) Metodološka pojasnila glej v poglavju 1: Statistični GIS pokrovnosti tal. / *Methodological explanations are in Chapter 1 Statistical land cover GIS.*
2) Gozdnate površine zajemajo tudi površine v zaraščanju, in ne samo zaraščenih kmetijskih površin, ki niso v rabi več kot 20 let, kot določa definicija gozda v Zakonu o gozdovih (ti podatki so objavljeni v tabeli 17.2). / *Wooded areas cover areas reverting to natural vegetation and not only agricultural areas that have not been used for over 20 years, as determined by the definition of a forest according to the Forest Act (these data are published in Table 17.2).*
3) Kot pokrovnost tal so tako opredeljene z vegetacijo porasle površine, ki ne sodijo v kategorijo gozdatih površin in v evropskih razmerah obsegajo pretežno kmetijske površine (dejanske ali potencialne površine za kmetijsko rabo). / *Covered are areas overgrown with vegetation that do not belong to the category of wooded areas and in European conditions cover mostly agricultural areas (areas actually or potentially used for agriculture).*

# 35. PREGLED PO OBČINAH

# *REVIEW BY MUNICIPALITIES*

## METODOLOŠKA POJASNILA

### Občine in členitve Slovenije na občine od leta 1990 dalje

Med leti 1990 in 2000 so se v Sloveniji odvijale štiri upravno-teritorialne spremembe na ravni občin in s tem tudi spremembe v šifriranju občin. Za uporabnike, ki se morajo vsem tem spremembam prilagajati in jih upoštevati, bo zato verjetno dobrodošla preglednica "Občine in členitev Slovenije na občine od leta 1990 dalje", v kateri so spremembe opremljene z imeni in šiframi občin. Preglednica je dosegljiva na internetnem naslovu http://www.stat.si/katalogrds/krd.

Pred letom 1995 veljavne občine so z manjšimi spremembami obstajale kar tri desetletja. Izoblikovane so bile med obširno upravno reformo, ki se je začela že leta 1955, ko je bilo v Sloveniji 384 občin, in zaključila leta 1964. Namesto številnih majhnih občin so bile tedaj ustanovljene večje občine, imenovane tudi komune, ki so prevzele vrsto državnih nalog in plansko vodenje gospodarstva na svojem ozemlju. Število teh občin se je ustalilo pri 62 (krajši čas 65), veljavne pa so bile do decembra 1994. Občina je bila že tedaj samoupravna lokalna skupnost, vendar hkrati tudi del države. Njena uprava je bila del državne uprave. Območje občin je bilo takrat sestavljeno iz območij katastrskih občin, od leta 1995 pa so območja občin sestavljena iz območij celih naselij.

S 1. 1. 1995 je bila na ozemlju Republike Slovenije z zakonom izvedena reforma lokalne samouprave. Namesto razmeroma velikih občin je bilo ustanovljenih več manjših občin (147). Območja občin je določil zakon; kot temeljni teritorialni gradnik so bila uporabljena območja naselij. Občine so postale temeljne lokalne samoupravne skupnosti, ki v okviru ustave in zakonov samostojno urejajo in opravljajo zadeve lokalnega pomena in naloge iz državne pristojnosti, ki so nanje prenesene z zakonom.

Tretja večja sprememba v območjih občin se je zgodila leta 1998, ko je bilo v procesu nadaljnjega drobljenja občinske mreže ustanovljenih 46 novih občin. Zadnja sprememba se je zgodila junija 2002 z odcepitvijo novoustanovljene občine Šmartno pri Litiji od občine Litija, s katero se je število občin v Sloveniji povečalo na 193.

## *METHODOLOGICAL EXPLANATIONS*

### *Municipalities and breakdown of Slovenia into municipalities since 1990*

*Between 1990 and 2002 four major administrative territorial changes took place in Slovenia at the level of municipalities and thus also changes in coding municipalities. Users who have to adjust to all these changes and take them into account will probably benefit from the table "Municipalities and breakdown of Slovenia into municipalities since 1990", in which changes are equipped with names and codes of municipalities. The table is also available on the Internet address http://www.stat.si/katalogrds/krd.*

*With only slight changes, before 1995 the same municipalities existed for three decades. They were formed during the extensive administrative reform that started in 1955, when Slovenia had 384 municipalities, and finished in 1964. Instead of numerous small municipalities larger ones (sometimes called communes) were formed. They took over numerous state tasks and planning of economy in their territory. The number of these large municipalities stopped at 62 (for a short period there were 65 of them) and they were valid until 1994. Even then a municipality was a self-governing local community, but at the same time also part of the state. Its administration was part of the public administration. At that time the territory of a municipality was composed of areas of cadastral municipalities, while from 1995 on the territory of a municipality is composed of areas of whole settlements.*

*On 1 January 1995 a reform of local self-government was implemented in the territory of the Republic of Slovenia. Instead of relatively large municipalities several smaller ones (147) were established. The areas of municipalities were determined by law. As the main territorial basis the areas of settlements were used. Municipalities became the basic local self-governing communities that within the framework of the constitution and laws independently regulate and perform matters of local importance and tasks from the state competence transferred to them by law.*

*The third major change of territories of municipalities took place at the end of 1998 when in the process of further division of the network of municipalities 46 new ones were created. The last change of territories of municipalities took place in June 2002 with the separation of newly established municipality Šmartno pri Litiji from municipality of Litija, which increased the total number of municipalities in Slovenia to 193.*

1) Površine občin so prevzete iz Registra prostorskih enot Republike Slovenije po stanju 1. 1. 2003. Izračunane so iz digitaliziranih obrisov posameznega prostorskega okoliša na kartah v merilu 1 : 5000 in 1 : 10000 in nato seštete na podlagi pripadnosti prostorskega okoliša višji prostorski enoti. Seštevek površin občin zato ni enak seštevku površin katastrskih občin.
*The area of municipalities is taken from the Register of Spatial Units of the Republic of Slovenia, as of 1. 1. 2003. It is calculated from digitalised outlines of individual areas on maps 1 : 5000 and 1 : 10000 and then added on the basis of affiliation to the higher unit. The total area of municipalities therefore is not equal to the area of cadastral communities.*

2) Katastrske občine se lahko delijo med dve ali tri občine.
*Cadastral communities can be divided between two or three municipalities.*

3) Podatki so prevzeti iz Registra prostorskih enot po stanju 1. 1. 2003.
*Data are taken from the Register of Spatial Units, as of 1. 1. 2003.*

*Historical Review of municipalities and statistical regions is described in the Catalogue of Regional Breakdown, http://www.stat.si/krd (in Slovene only).*

# 36. PREGLED PO MESTNIH OBMOČJIH

## SPLOŠNA POJASNILA

Poglavje »Pregled po mestnih območjih« s podatki o mestnih naseljih in mestnih območjih je po nekajletnem premoru (od 1997) znova uvrščeno v Statistični letopis Republike Slovenije. S 1. 1. 2003 je namreč začela veljati na Statističnem uradu Republike Slovenije (SURS) oblikovana in sprejeta statistična opredelitev (tipologija) naselij Republike Slovenije. Ta razlikuje dva tipa naselij: mestna in nemestna. V sklopu mestnih naselij so definirana tudi **mestna območja**; ta so sestavljena iz enega ali več naselij.

Tipologija naselij se nanaša na stanje upravne teritorialne razdelitve Republike Slovenije po stanju na dan 1. 1. 2003. Tedaj je bilo v Republiki Sloveniji 5 996 naselij, porazdeljena pa so bila v 193 občin. Vsaka uporaba tipologije na kateri koli datum pred 1. 1. 2003 zahteva prilagoditev razvrstitve naselij glede na takrat veljavno upravno teritorialno razdelitev.

Ponovna opredelitev mestnih naselij je bila potrebna najmanj iz dveh razlogov. Prejšnja opredelitev mestnih naselij (iz leta 1981) je bila zastarela, naraščale pa so tudi potrebe po izkazovanju rezultatov statističnih raziskovanj tudi po tipu naselij, torej ločeno za mestna in nemestna naselja. Nenazadnje je množica statističnih podatkov iz Popisa prebivalstva, gospodinjstev in stanovanj v Republiki Sloveniji, 31. 3. 2002 (Popis 2002) vabila k prikazu in analizi pojavov in procesov v Sloveniji na podeželju in v urbanih okoljih.

Statistična tipologija naselij le-tem ne dodeljuje nikakršnega posebnega formalnega statusa, uporabna je zgolj za statistične namene. Formalni status mesta lahko pridobi neko naselje le na podlagi določil Zakona o lokalni samoupravi (Ur. l. RS št. 72/93, 57/94).

Statistični podatki o mestnih naseljih in mestnih območjih, ki so prikazani v tem poglavju, ne temeljijo na lastnih primarnih virih (urbana statistična raziskovanja), temveč so rezultati iz rednih statističnih raziskovanj za različna vsebinska področja (iz Popisa 2002 in iz registrov). Vsa metodološka in vsebinska pojasnila, definicije pojmov ipd. iz tega poglavja je zato treba poiskati v ustreznih poglavjih Letopisa.

V prvi tabeli obravnavanega poglavja so prikazana **vsa mestna naselja** in naselja v mestnih območjih (156). Razvidna je torej tudi pripadnost mestnih naselij mestnim območjem, kakor izhaja iz statistične tipologije in veljavne upravne teritorialne razdelitve Slovenije na dan 1. 1. 2003. Podatki v vseh preostalih tabelah so prikazani po **mestnih območjih** (104).

Večina tabel, ki prikazujejo podatke po mestnih območjih, se nanašajo na Popis 2002, torej na datum 31. 3. 2002. Na ta dan je bila Republika Slovenija razdeljena na 192 občin. Naselje Šmartno pri Litiji ni bilo sedež samostojne občine, temveč naselje v okviru občine Litija. Naselje Hrastje je prej pripadalo občini Šenčur, na dan 1. 1. 2003 občini Kranj, občina Šentjur je imela naziv Šentjur pri Celju - in vse to je v tabelah, ki prikazujejo rezultate Popisa 2002, tudi upoštevano.

### Merila za opredelitev mestnih naselij

**Mestna naselja** so opredeljena na podlagi štirih meril:

1. naselja s 3 000 in več prebivalci (formalno merilo);
2. naselja, ki imajo od 2 000 do 2 999 prebivalcev in več delovnih mest kot delovno aktivnega prebivalstva, stanujočega v teh naseljih (formalno, funkcijsko merilo);
3. naselja, ki so sedeži občin in imajo vsaj 1 400 prebivalcev ter presežek delovnih mest, oziroma naselja, ki so sedeži občin in imajo vsaj 2 000 prebivalcev (formalno, funkcijsko merilo);
4. obmestna naselja z manjšim številom prebivalcev, ki se z določenim mestnim naseljem, ki ima več kot 5 000 prebivalcev, s sklenjeno pozidavo zraščajo v enovito funkcionalno celoto – mestno območje; kot merilo funkcionalne povezanosti je upoštevana zaposlitvena migracija, kot izločitveno merilo pa delež kmetijskih gospodinjstev v obmestnem naselju (fiziognomsko-morfološko, funkcijsko merilo).

**Nemestna naselja** so vsa druga naselja, ki ne ustrezajo statistični opredelitvi mestnega naselja in naselja v mestnem območju.

# *REVIEW BY URBAN AREAS*

## *GENERAL EXPLANATIONS*

*After several years – since 1997 – the chapter »Review by urban areas«, which brings data on urban settlements and areas, returns to the Statistical Yearbook of the Republic of Slovenia. On 1 January 2003 a new statistical typology of settlements in the Republic of Slovenia, prepared by the Statistical Office of the Republic of Slovenia, came into force. This typology distinguishes between two types of settlements: urban and non-urban.* ***Urban areas*** *are defined within urban settlements. They are composed of one or more settlements.*

*The typology of settlements refers to the situation of the administrative territorial breakdown of the Republic of Slovenia as of 1 January 2003. At that time there were 5,996 settlements in Slovenia, which were divided among 193 municipalities. Every application of the typology to any date before 1 January 2003 requires adjustment of the division of settlements in terms of the then valid administrative territorial breakdown.*

*Redefinition of urban settlements was necessary because of two reasons. The previous breakdown of urban settlements (from 1981) was outdated and the needs for disseminating results of statistical surveys by type of settlement – i.e. by urban and non-urban settlements – were on the rise. And last but not least, the multitude of statistical data collected with the Census of Population, Households and Housing in the Republic of Slovenia, 31 March 2002 dictated the presentation and analysis of phenomena and processes in Slovenia in urban and non-urban environments.*

*The statistical typology of settlements does not assign any special formal status to settlements. It is used only for statistical purposes. The formal status of a city can be obtained by a settlement only on the basis of provisions of the Local Government Act (OJ RS, No. 72/93, 57/94).*

*Statistical data on urban settlements and areas shown in this chapter are not based on own primary sources (urban statistical surveys), but on regular statistical surveys. All methodological explanations, definitions, etc., for this chapter should be sought in other chapters of this Yearbook.*

*Table 1 shows all* ***urban settlements*** *and settlements in urban areas (156). It is evident which urban settlement belongs to which urban area as derived form the statistical typology and the valid administrative territorial breakdown of Slovenia as of 1 January 2003. Data in other tables are shown by* ***urban areas*** *(104).*

*Most tables showing data by urban areas refer to the 2002 Census, i.e. to 31 March 2002. At that time Slovenia was divided into 192 municipalities. Settlement Šmartno pri Litiji was not the seat of an independent municipality but a settlement within municipality Litija, settlement Hrastje was part of municipality Šenčur, while from 1 January 2003 on it belongs to municipality Kranj, and municipality Šentjur was named Šentjur pri Celju. All this is taken into account in tables published on the basis of 2002 Census results.*

### *Criteria for determining urban settlements*

***Urban settlements*** *are determined on the basis of four criteria:*

1. *settlements with 3,000 inhabitants or more (formal criterion);*
2. *settlements with 2,000–2,999 inhabitants and more workplaces than persons in employment living in these settlements (formal, functional criterion);*
3. *settlements that are seats of municipalities and have at least 1,400 inhabitants and a surplus of workplaces or settlements that are seats of municipalities and have at least 2,000 inhabitants (formal, functional criterion);*
4. *suburban settlements that have fewer inhabitants but are being gradually spatially and functionally integrated with an urban settlement with 5,000 inhabitants or more thus becoming urban areas; as a criterion of functional linking labour migration is used, while the share of agricultural holdings in the suburban settlement is used as a separation criterion (physiognomic-morphological, functional criterion).*

***Non-urban settlements*** *are all other settlements that do not meet the statistical definition of urban settlements and settlements within urban areas.*

# 37. MEDNARODNI PREGLED

# *INTERNATIONAL REVIEWS*

## POJASNILA

Angleška imena držav in pripadajoče kode smo povzeli po mednarodnem standardu ISO 3166, ki ga izdaja Mednarodna organizacija za standardizacijo, po stanju 28. 7. 2003[1]. Slovenska imena so povzeta po standardu ISO 3166, ki ga objavlja Urad Republike Slovenije za meroslovje pri Ministrstvu za šolstvo, znanost in šport. V seznamu so uporabljena uradna kratka imena držav. Države so prikazane po celinah ter razvrščene po abecednem redu v slovenskem jeziku. Vzporedno sta navedena tudi uradno angleško kratko ime države in pripadajoča koda. Za Jugoslavijo, ki se je v letu 2003 preimenovala v Srbijo in Črno goro (njena površina se s tem ni spremenila), uporabljamo v tem poglavju le novo ime.

V tabelarnem pregledu, ki sledi, so države navedene le v slovenščini. Glede na dostopnost podatkov in zasnovo poglavja je v posameznih tabelah izbor držav zožen. Viri, navedeni pod tabelami, ne veljajo za Slovenijo, temveč za podatke drugih držav, za Slovenijo so povzeti po Statističnem letopisu Republike Slovenije in drugih publikacijah Statističnega urada Republike Slovenije.

## *EXPLANATION*

*English country names and their codes were taken over from the international standard ISO 3166, which is published by the International Organisations for Standardisation, as of 28 July 2003[1]. Slovene country names were taken over from the ISO 3166 standard published by the Metrology Office at the Ministry of Education, Science and Sport. Official short names of countries are used. Countries are shown by continents and in alphabetical order of the Slovene alphabet. Official English short names of countries and their codes are also stated. For Yugoslavia, which in 2003 changed its name to Serbia and Montenegro (the territory remained the same), we use in this chapter only the new name.*

*In tables only Slovene country names are stated. The selection of countries in individual tables is narrowed depending on the availability of data and the chapter structure. Sources stated under tables are not sources for Slovenia but for other countries. Sources for Slovenia are the Statistical Yearbook and other publications of the Statistical Office of the Republic of Slovenia.*

1) Pričakovano trajanje izobraževanja je mera, ki daje oceno pričakovanega števila let, ki ga bo oseba, stara 5 let, preživela v izobraževanju, če se bo nadaljeval enak vzorec izobraževanja. Izračunamo ga tako, da seštejemo deleže vključenih v izobraževanje za vsako posamezno leto starosti. Primer: Pričakovana leta izobraževanja za otroke, stare 10 let, je 1 leto, če so vsi vljučeni v izobraževanje oz. 0,5 leta, če je v izobraževanje vključena le polovica prebivalstva te starosti.
*School expectancy indicates the total number of years a 5-year-old child can expect to spend in formal education over a lifetime given current enrolment rates. It is calculated by taking the sum of enrolment rates for each individual year of age. For example, school expectancy for children aged 10 is 1 year if all children are enrolled and 0.5 year if only a half of children at that age are enrolled.*

2) V Belgiji in Franciji delež šolajočih se v starostni skupini 3-4 leta presega 100 odstotkov. To je posledica dejstva, da je veliko otrok, ki so stari manj kot tri leta, vključenih v določene oblike izobraževanja.
*In Belgium and France the enrolment rates for 3-4-year-olds exceed 100 per cent. This is due to the fact that a large number of children below the age of 3 are enrolled in certain kinds of education.*

1) BDP za leto 2000 je bil popravljen in je tako za 4,6 odstotka višji od prvotno izračunanega. Ravno zaradi tega je tudi delež izdatkov za programe socialne zaščite v BDP nekoliko nižji. BDP bo popravljen tudi za nazaj (predvidoma od leta 1995 dalje).
*GDP for 2000 was corrected and is thus 4.6% higher than previously calculated. Therefore, the share of social protection in the GDP is slightly lower. GDP will be corrected for other years as well (as a note from 1995 on).*
