ODPADKI IZ PROIZVODNIH IN STORITVENIH DEJAVNOSTI, SLOVENIJA, 2002

WASTE FROM PRODUCTION AND SERVICE ACTIVITIES, SLOVENIA, 2002

- V letu 2002 je v proizvodnih in storitvenih dejavnostih nastalo 4 055 876 ton odpadkov, od tega je bilo 63 118 ton nevarnih.
- Največji delež odpadkov je nastal v oskrbi z elektriko, plinom in vodo (44,4 %), sledijo predelovalne dejavnosti (40,9 %), gradbeništvo (7,4 %) ter rudarstvo (2,4 %) in kmetijstvo (2,1 %). Preostanek (2,8 %) odpadkov je iz trgovske, gostinske, zdravstvene, izobraževalne dejavnosti ter drugih storitvenih dejavnosti.
- Glede na skupno količino nastalih odpadkov smo v letu 2002 v Sloveniji predelali ali ponovno uporabili 60 % odpadkov, preostanek pa smo odstranili.
- In 2002, 4 055 876 tons of waste were generated in production and service activities, of which 63 118 tons of hazardous waste.
- The greatest share in the total amount of waste was generated in electricity, gas and water supply (44.4%), followed by manufacturing (40.9%), construction (7.4%), mining and quarrying (2.4%) and agriculture, forestry and fishery (2.1%). The rest of wastes were generated in wholesale, hotels and restaurants, health and social work, education, and other social and personal services (2.8%).
- Concerning the total amount of waste generated in Slovenia in 2002, 60% of wastes were recovered or reused and the rest of wastes were disposed.

METODOLOŠKA POJASNILA

Namen statističnega raziskovanja

S statističnim raziskovanjem **Letno poročilo o odpadkih iz proizvodnih in storitvenih dejavnosti (obrazec ODP)** zbiramo podatke o vrstah in količini odpadkov, nastalih med opravljanjem dejavnosti poslovnih subjektov.

S statističnim raziskovanjem **Letno poročilo o zbiranju odpadkov (obrazec ODP-Z)** zbiramo podatke o količini zbranih/prevzeti odpadkov od drugih imetnikov.

S statističnim raziskovanjem **Letno poročilo o predelavi oziroma odstranjevanju odpadkov (obrazec ODP-P)** zbiramo podatke o količini predelanih/odstranjenih odpadkov v Sloveniji.

Enote opazovanja

V raziskovanja za leto 2002 so vključeni izbrani poslovni subjekti, ki so povzročili nastanek odpadkov ali so v skladu s svojimi pristojnostmi nosilci določenih aktivnosti pri ravnjanju z odpadki (zbiralci, predelovalci ali odstranjevalci).

Zajetje

V raziskovanje o odpadkih so zajeti poslovni subjekti, ki so po standardni klasifikaciji dejavnosti razvrščeni v področja: rudarstvo, predelovalne dejavnosti, oskrbo z elektriko, plinom in vodo, gradbeništvo, trgovino, gostinstvo, promet, zdravstvo, izobraževanje ter socialno varstvo.

V raziskovanje je bilo zajetih 4025 enot, odzivnost je bila 75-odstotna.

V raziskovanje ODP-Z je bilo zajetih 165 enot, odzivnost je bila 88,5-odstotna, v raziskovanje ODP-P pa je bila zajeta 101 enota, odzivnost je bila 97-odstotna.

Definicije

Odpadek je vsaka snov ali predmet, razvrščen v eno od skupin odpadkov, po **Klasifikacijskem seznamu odpadkov**, ki ga lastnik ali imetnik ne more ali ne želi uporabiti sam, ga ne potrebuje, ga moti ali mu škodi in ga zato zavrže, namerava ali mora zavreči.

Med odpadke ne spadajo snovi, izpuščene v zrak z odpadnimi plini, in snovi, ki se odvajajo z odpadnimi vodami neposredno v vode ali kanalizacijo.

Nevarni odpadki so odpadki, ki imajo eno nevarno lastnost ali več.

Med nevarne odpadke štejemo npr.: odpadna olja, okside, soli, kisline, luge, koncentrate, odpadke organskih topil, barve, lake, smole, agrokemijske in farmacevtske preparate, specialne odpadke iz bolnišnic ter druge nevarne odpadke organskega ali anorganskega izvora.

Nevarni odpadki so po Pravilniku o spremembah in dopolnitvah Pravilnika o ravnanju z odpadki (Ur. List RS, št. 20/01) razvrščeni v Klasifikacijski seznam odpadkov po skupinah odpadkov skupaj z drugimi odpadki in so označeni z zvezdico ob klasifikacijski številki odpadka.

Klasifikacijski seznam odpadkov je seznam odpadkov, nevarnih in nenevarnih, razvrščenih po ustreznih skupinah predvsem glede na izvor nastanka odpadka. Vsak odpadek ima poleg natančno opredeljenega imena vpisano še ustrezeno klasifikacijsko številko odpadka.

METHODOLOGICAL EXPLANATIONS

The purpose of the survey

With the statistical survey **Annual Report on Waste Generation in Production and Service Activities (form ODP)** we collect the data on types and amounts of waste generated by business subjects during their carrying-on of different operations.

With the statistical survey **Annual Report on Waste Collected from Production and Service Activities (form ODP-Z)** we collect the data on types and amounts of waste collected/received from others.

With the statistical survey **Annual Report on Waste Recovering/Disposing (form ODP-P)** we collect the data on types and amounts of waste that was recovered, reused or disposed in Slovenia.

Observation units

The surveys for 2002 covers selected business subjects that generated waste or those that in accordance with their responsibility were engaged as performers of certain activities within the chain hierarchy of individual ways of waste management operations (waste dealers, waste collectors, waste treatment businesses, waste disposal businesses, etc.)

Coverage

The Survey on Waste from Production and Services Activities includes business subjects classified according to the Standard Classification of Activities into mining and quarrying, manufacturing, electricity, gas and water supply, construction, distributive trade, hotels and restaurants, transport, health care, education and social protection.

4,025 units were covered with the survey ODP and the response rate was 75%.

165 units were covered with the survey ODP-Z and the response rate was 88.5%. 101 units were covered with the survey ODP-P and the response rate was 97%.

Definitions

Waste is any material or object from one of the groups of waste of **List of Waste**, which the owner or possessor cannot or does not want to use, does not need, is disturbing or damaging to him and he discharges it, intends or must discharge it.

Substances emitted into the air and materials discharged into the water or the sewage system are not considered to be waste.

Hazardous waste is waste which has one or more dangerous characteristics.

Waste oils, oxides, salts, acids, lye, concentrates, colors, lacquers, bitumen, agrochemical and pharmaceutical preparations, special waste from hospitals and other organic or inorganic hazardous waste are considered to be hazardous waste.

Hazardous wastes is classified by the Regulation Amending the Regulation on Waste Handling (OJ RS, No. 20/01) in the List of Waste together with other waste and has a small asterisk behind the number of waste classification.

List of Waste (LoW) covers non-hazardous and hazardous waste classified by proper group with regard to the source of waste formation. In addition to the precisely defined name, every waste has a proper classification number of waste.

Predelava odpadkov je namenjena koristni uporabi odpadkov ali njihovih sestavin in zajema predvsem:

- reciklažo odpadkov za predelavo v surovine in ponovno uporabo odpadkov,
- uporabo odpadkov kot gorivo v kurilni napravi ali industrijski peči,
- uporabo odpadkov za pridobivanje goriva.

Sežiganje komunalnih in drugih odpadkov s topotno obdelavo zaradi njihovega odstranjevanja ni predelava odpadkov.

Odstranjevanje odpadkov je namenjeno končni oskrbi odpadkov, ki jih ni mogoče predelati, in zajema predvsem različne postopke obdelave odpadkov in odlaganje odpadkov.

Definicije so povzete iz Pravilnika o ravnanju z odpadki (Ur. list RS, št. 84/98).

Objavljanje rezultatov

Letno:

- Statistične informacije
- Statistični letopis

Waste recovery is designed for beneficial use of waste or waste components, mostly comprising:

- recycling of waste into raw materials and reuse of waste,
- use of waste in fuelling devices and industrial ovens,
- use of waste for fuel generation.

Incineration of waste and other thermal procedures designed for waste disposal are not considered to be waste recovery.

Waste disposal is operation aimed at final treatment of waste that cannot be recovered, comprising mostly different waste processing procedures and waste landfilling.

The definitions are taken over from the Regulation on Waste Handling (OJ RS, No. 84/98).
