METODOLOŠKA POJASNILA

Namen raziskovanja

Namen kvalitativne Ankete o poslovnih tendencah v storitvenih dejavnostih (vprašalnik PA-STOR/M) je mesečno pridobivanje informacij o stanjih glavnih ekonomskega kazalnikov ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati ankete so osnova za izračun kazalnika zaupanja v storitvenih dejavnostih.

Panelno anketo o poslovnih tendencah v storitvenih dejavnostih izvajamo v Sloveniji od aprila 2002 s poenotenim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kakor jo izvajajo v državah članicah Evropske unije že več desetletij; to omogoča neposredno primerljivost podatkov.

Enote opazovanja

Opazujemo podjetja, ki so po Standardni klasifikaciji dejavnosti (SKD) razvrščena v storitveno dejavnost, in sicer:

- 55 - Gostinstvo
- 60 - Kopenski promet; cevovodni transport
- 61 - Vodni promet
- 62 - Zračni promet
- 63.3 - Dejavnost potovalnih agencij in organizatorjev potovanj; s turizmom povezane dejavnosti
- 64 - Pošta in telekomunikacije
- 65 - Finančno posredništvo, razen zavarovalništva in dejavnosti pokojninskih skladov
- 66 - Zavarovalništvo in dejavnost pokojninskih skladov, razen obveznega socialnega zavarovanja
- 67 - Pomožne dejavnosti v finančnem posredništvu
- 70 - Poslovanje z nepremičninami
- 71 - Dajanje strojev in opreme brez upravljalcev v najem; izposojanje izdelkov široke porabe
- 72 - Obdelava podatkov, podatkovne baze in s tem povezane dejavnosti
- 73 - Raziskovanje in razvoj
- 74 - Druge poslovne dejavnosti
- 90 - Dejavnosti javne higiene
- 93 - Druge storitvene dejavnosti

Vzorec podjetij je oblikovan na podlagi dveh meril:

- razvrstitev storitvenega podjetja po SKD-ju in
- velikosti storitvenega podjetja (števila zaposlenih po Zakonu o gospodarskih družbah).

Vir podatkov

Na vprašalnik PA-STOR/M odgovarjajo direktorji podjetij ali drugi vodilni delavci med 1. in 10. v mesecu.

METHODOLOGICAL EXPLANATIONS

Purpose of the survey

The purpose of the qualitative Survey on Business Tendency in Services (questionnaire PA-STOR/M) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The survey results are the basis for evaluation of the confidence indicator in services.

The Panel Survey on Business Tendency in Services is being carried out in Slovenia since April 2002 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

Observation units

We are monitoring units that are registered in services according to the Standard Classification of Activities (SKD):

- 55 - Hotels and restaurants
- 60 - Land transport; transport via pipelines
- 61 - Water transport
- 62 - Air transport
- 63.3 - Activities of travel agencies and tour operators; tourist assistance activities
- 64 - Post and telecommunications
- 65 - Financial intermediation, except insurance and pension funding
- 66 - Insurance and pension funding, except compulsory social security
- 67 - Activities auxiliary to financial intermediation
- 70 - Real estate activities
- 71 - Renting of machinery and equipment without operator and of personal and household goods
- 72 - Data processing, database activities and other computer related activities
- 73 - Research and development
- 74 - Other business activities
- 90 - Sewage and refuse disposal, sanitation and similar activities
- 93 - Other service activities

The sample of enterprises was selected by two criteria:

- classification of the enterprise according to the Standard Classification of Activities,
- size of the enterprise (the number of employees in accordance with the Companies Act).

Data source

Respondents answering the monthly PA-STOR/M questionnaire are managers of enterprises or other executives. They respond between the 1st and the 10th of the month.

Zajetje

V panelni vzorec smo zajeli vsa velika in srednje velika podjetja ter 11 % malih podjetij (ali 15 % zaposlenih v malih podjetjih), ki so razvrščena v storitveno dejavnost. Panelni vzorec pokriva 17 % podjetij vzorčnega okvira ali 69 % zaposlenih v storitvenih dejavnostih.

Način zbiranja podatkov

Anketo izvajamo mesečno, po pošti.

Definicije in pojasnila

Ravnotežje je razlika med pozitivnimi in negativnimi odgovori, izraženimi v odstotkih. Ravnotežja prikazujejo gibanje opazovanih ekonomskih kazalnikov (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskih kazalnikov. Grafikoni prikazujejo ravnotežja po posameznih vprašanjih.

Kjer so prikazane primerjave kazalnikov s kazalniki za EU, so **vrednosti desezonirane**. To so vrednosti, pri katerih je izločen vpliv sezone, vsebujejo pa trend-cikel in naključno komponento. Podatki za EU so desezonirani z metodo DAIINTIES, za Slovenijo pa z metodo TRAMO/SEATS, ki temelji na modelih ARIMA.

Pri oblikovanju modelov je upoštevano obdobje od aprila 2002 do januarja 2006, razen pri časovni vrsti Pričakovane prodajne cene, kjer je upoštevano obdobje od januarja 2003 do januarja 2006. Pri časovni vrsti Pričakovane prodajne cene sezonska komponenta ni prisotna.

Kazalnik zaupanja v storitvenih dejavnostih je povprečje odgovorov (ravnotežij) na vprašanja o poslovнем položaju ter sedanjem in pričakovanem povpraševanju po storitvah.

Grafikoni z naslovom **Gibanje ekonomskih kazalnikov v gostinstvu in s turizmom povezanih dejavnostih** združujejo rezultate dejavnosti 55 - Gostinstvo in 63.3 - Dejavnost potovalnih agencij in organizatorjev potovanj; s turizmom povezane dejavnosti.

Coverage

The panel includes all large and medium-sized enterprises and 11% of small enterprises (or 15% employees of small enterprises), the principal activity of which is classified into services. The panel covers 17% of the enterprises of the studied population or 69% of employees in services.

Method of data collection

The survey is carried out monthly by mail.

Definitions and explanations

The balance is the difference between positive and negative answers, expressed in percent. The balance shows the movement of observed economic indicators (present situation and future expectations), and not the real size of economic indicators. The charts show the balance by individual questions.

In the charts with comparisons with EU indicators, data are **seasonally adjusted**. Values are adjusted for the seasonal component, but include the trend-cycle component and the irregular component. Data for EU are seasonally adjusted by the DAINTIES method and for Slovenia by the TRAMO/SEATS method, which is based on ARIMA models.

The designing of the models is based on the time period from April 2002 to January 2006, except for time series Selling prices expectations where the designing of the model is based on the time period from January 2003 to January 2006. In the time series Selling prices expectations the seasonal component is not present.

The confidence indicator in services is the arithmetic mean of responses (balances) to the questions on business situation, and present and expected demand.

The charts **Evolution of economic indicators in hotels and restaurants and in tourist assistance activities** show results for 55 - Hotels and restaurants and 63.3 - Activities of travel agencies and tour operators; tourist assistance activities.

The charts **Evolution of economic indicators in land, water and air transport** show results for 60 - Land transport; transport via pipelines, 61 - Water transport and 62 - Air transport.

The charts **Evolution of economic indicators in post, telecommunications and data processing** show results for 64 - Post and telecommunications and 72 - Data processing, database activities and other computer related activities.

The charts **Evolution of economic indicators in financial intermediation** show results for 65 - Financial intermediation, except insurance and pension funding, 66 - Insurance and pension funding, except compulsory social security and 67 - Activities auxiliary to financial intermediation.

The charts **Evolution of economic indicators in real estate activities, renting and business services** show results for 70 - Real estate activities, 71 - Renting of machinery and

Poslovanje z nepremičninami, 71 - Dajanje strojev in opreme brez upravljalcev v najem; izposojanje izdelkov široke porabe, 73 - Raziskovanje in razvoj in 74 - Druge poslovne dejavnosti.
